Subject: Patents

Why are companies like apple allowed to scam patents like a company as Virnetx has and in security year after year that Benefits their customers and not pay a cent. Apple tries to bankrupt these companies so they get there product for nothing and in so doing screw there stock holders like me who put up there money in hopes that these companies are successful. Apple has 160 billion in cash in off shore banks and screw our country not paying income tax doing this. Why do we allow this when I pay my taxes. Patents are sorely needed in this country so why is this happening.
