Subject: to round table

I would like to talk in behalf of independent self represent inventor ISRI. We (ISRI) are most vulnerable, defenseless, unprotected folks against USPTO requirement, regulation, provisions, norm, statutory ratio etc. Why?

- We are good engineers with ideas but bad record clerks
- Some of us have computer, typing, law language, budgetary, time and other dozen limitations necessitate to file a complete invention paperwork prose for examiner and examination
- We propose to split examination proses on two round, phase
- 1. Give ISRI chance to talk(by fee) with USPTO official examiner about our idea etc.
- 2. And use USPTO database of honest an certified company or lawyers who can bake his dough idea to further (degustation) second stage examining
- There is more advantage of my this idea but my time an knowledge of language is limited to bring to you attention and consideration
- I can send you full version of my suggestion on Russian or in Arminian but I thing it shouldn't work. Beter my limited 8 year spoken English practice in Wal Mart then perfect Armenian or Russian paperwork? Have a nice round table
