The PETTP gives patent examiners the opportunity to learn about advances in the state of the art, emerging trends, and recent innovations directly from guest speakers.

**Why participate in PETTP?**

Guest speakers can:

- Help improve the quality of patent examination by informing patent examiners about advances in their technology areas.
- Gain a greater understanding of the USPTO.
- Choose from among several locations: speak at USPTO headquarters in Alexandria, VA; at one of our four regional offices; or from your location via webinar.
