Subject: A lone citizen's feedback on on the patent guidance

Hi,

I urge the USPTO to shape the post-Bilski guidelines to serve the interests of all American stakeholders, and thus reduce the conflicts of interest that currently make some aspects of the US patent process a liability to business.

The UPSTO has a moral obligation to serve all US citizens.

I am a proud American citizen and small business owner. I am fully aware of how dependent I am on the many functions of government to be able to carry out my daily activities freed from the corruption that much of the world suffers under.

Thank you for seeking feedback and for reading.

M. Chira
