Subject: Bilski v. Kappos, the United States Patent and Trademark Office (USPTO)

Don't worry no one expects you to do the right thing. We **expect you to cripple innovation and creativity in the US!** Making the US a second-rate country is what we have come to expect.

You **SHOULDN'T** include a strong stand against software patents....but I am sure you will bend over and take one from big business.

Thanks for nothing as usual!

with low (no) expectations,
