Subject: Comments on the Guidance Memorandum for Determining Subject Matter Eligibility of Claims Reciting or Involving Laws of Nature, Natural Phenomena and Natural Products

To: the USPTO:  
From: Mike Alder, Director  
Technology Transfer Office  
Brigham Young University  
Provo, Utah 84602

I wish to go on record that the attached section of a letter addressed to the USPTO directly reflects my comments on the proposed Guidance Memorandum cited above. Your decision to publish these guidelines will destroy two new findings at BYU that will

1. Diagnose Alzheimer's Disease before any dementia is showing
2. Destroy a new therapy that could protect individuals at risk from contracting Alzheimer's Disease.

The implications of such an action will be devastating to BYU and to humanity. Get your act together and use some wisdom.

Regards,

Mike
