**Subject:** USPTO 'new rules' comment

Whats up w/infected files alerts when I started looking at Lehey Legislation?

And by the way, Patent situation IS 'Grave' for inventor like me.

Daunting and 'Patently' Scandalous--in my opinion.

Is that "First person to Copy and Steal" protection--Legislation?

Is there so much convoluted 'legalistic' mumbo-jumbo already in place, to even call USPTO and International Patent situation even amendable for 'improvement'?

We need to 'Start from Scratch'.

Forgive me, but there are some 'serious' and 'insurmountable--w/present state of affairs' w/entire 'Patent Protection' Process. Both US and Int.

I'll NOT File Didley Squat on 100 'Patentable' issues ranging from Energy to Bio--

Which could be of substantial benefit to US, and Individuals WW--Due to a 'LOAD' of 'Issues' w/entire Status Quo inherent in current system.

Goliath has overwhelming advantage. Add to that, Infringe-ers (especially Communist China, and 'former'? Commie East Block of USSR) We are encouraged to believe that any costly Litigation in 'Their Fraud Courts' would be 'Fair and Square'? Without the USPTO/State Department 'insisting: Not 'ONE MORE NICKLE's Worth of Trade WILL be Conducted Between OUR Countries'. Period.

Hey, and howabout my multiBillion Dollar competitor having recourses to 'File Around' and 'Utilize' Originating Concepts; with Impunity.

Lets MEET and Discuss this Mess we've worked Ourselves into.

& Leave the (where-ever the 'Money's comming from:) Scandalous or Minimally Effective Lawyers

behind. Fair and Square is Fair and Square. Right is Right, and Wrong is Wrong!

Convoluted and fundamentally 'Twisted' in the 'Greediest and Dishonest' Direction:

Is Patently Unfair.
