Subject: Locations of USPTA

To: United State Patent and Trade Mark Office.
Ref: Locations of future satellite offices.

It would seem that bringing the USPTO the innovator would be the next best thing to do. Aside from the obvious, Silicon Valley, New York and Boston, you should take a look at Atlanta.

Yes, I am biased as I operate a startup in Atlanta and have a provisional patent for our process.

Why Atlanta?

Atlanta is the center of supply chain management, thanks to UPS and a multitude of companies specialized in the field.

Atlanta is also known for FinTech, financial technology, an area where innovations will become more and more important as businesses of all sizes have to adapt to the new reality of corporate financing. We are here because of the above mentioned area of strength. Additionally, internet security, multimedia and the presence of great schools make Atlanta a center of innovation.

I would urge you to consider Atlanta for one of your satellite offices.

If you would need additional information, I would recommend a conversation with Mr. Tino Mantella, the president of TAG, Technology Association of Georgia. Mr. Mantella can give you much more information on the community of innovators in Georgia. He can be reached at [e-mail address redacted] or at [phone redacted].

I also remain at your service should you have any additional questions.

Best regards

Michel Fontaine
