Subject: USPTO satellite office in Boise

To whom it may concern:

It has come to my attention that Boise, ID is being considered for two satellite USPTO offices. I am in full support of this possibility and am excited that the USPTO is considering Boise, ID for this opportunity. Several reasons I support this decision are below.

1. The quality of life in Boise, ID is unmatched. I have had the opportunity to live in nearly all regions of the country and have not found any other location that is able to offer the high quality of life that exists in Boise. Boise offers access to world class recreation (including golf, skiing, fishing, boating, white water rafting, and many more), retail, dining, and entertainment. Further, all these activities are less than a two hour drive from Boise!
2. Boise is a magnet for professionals. Small companies to large companies, technology driven and service driven, Boise is able to attract and retain high level professionals. Boise is a breeding ground for innovation.
3. No other city matches Boise's centralized location for the Northwest United States. Boise is centrally located between other cities of high innovation activity, including San Francisco, San Jose, Portland, Seattle, Denver, Boulder, and Salt Lake City. Boise has the potential to act as a HUB for all these locations.

I am hopeful the USPTO selects Boise as a location for its new satellite offices. Please feel free to contact me should you require any additional reasons!

Thank you!
