As a 9 year veteran of the local commercial real estate market I have seen many of businesses expand, contract, startup & fold the largest two being Micron & Hewlett Packard. These two fortune 500 companies are constantly evolving, shifting, adapting etc... which equates to (in my opinion) a highly skilled work force entering & leaving the market & or starting the next big thing. Basically what I am saying in a not so sophisticated way is I believe that the type of work force need for 2 satellite offices for the USPTO is here & ready!
