Subject: Kansas City, Missouri as Future Location For USPTO Satellite Office

To Whom it May Concern:

The City of Kansas City, Missouri, would like explore being considered for the referenced matter. We are centrally located in the US, have affordable costs of living, a large workforce that could serve as patent examiners, and a growing technology sector, not only in the animal biosciences corridor, but with Google, Inc. and their new fiber optic commitment to Kansas City which will increase internet speed 100x's existing speeds.

Thanks in advance for letting me know what steps are necessary for consideration.

Please reply or call with questions or comments.

Thanks.
