To Whom It May Concern:

Boeing Directed Energy Systems is pleased to endorse New Mexico as the location for a United States Patent and Trademark satellite office. New Mexico has many benefits that will guarantee the success of a United States Patent and Trademark satellite office. This is the best location for this sector. New Mexico boasts the largest per capita Ph.D's in the United States. Premier National Laboratories are collocated within the state. Fortune 500 High Technology headquarters and production facilities such as Intel and Boeing are located within the state. There is an abundance of highly trained potential employees available in the state. Beautiful and abundant landscape, sunshine, and outdoor recreation opportunities are available, making relocation and retention in this state desirable. New Mexico state government offers a Pro-Business climate and a diverse and qualified workforce. Culturally unique and diverse, New Mexico is a great place to live. We encourage you to carefully consider New Mexico as the next site for a United States Patent and Trademark satellite office.
