Trademarks Application Daily XML V2.0 Documentation

<trademark-applications-daily>: The <trademark-applications-daily> element is mandatory and will occur one time identifying the beginning of a daily application process. The trademark applications daily element will contain one occurrence of the version and data processed indicator elements, and zero or more occurrences of the file segments element between the <trademark-applications-daily> start and </trademark-applications-daily> end tags. <version>: The <version> element is mandatory and will occur one time between the <version> start and </version> end tags identifying the version number and version date of the Trademark Applications DTD. The version element will contain one occurrence of the version number and version date elements. <version-no>: The <version-no> element is mandatory and will occur one time between the <version-no> start and </version-no> end tags containing the version number of the Trademark Applications DTD. Example: the first production version will be 1.0. </version-no> <version-date>: The <version-date> element is mandatory and will occur one time between the <version-date> start and </version-date> end tags containing the date of the Trademark Applications DTD, an 8-position numeric in the format YYYYMMDD. </version-date> </version>. APPLICATION INFORMATION SECTION: <application-information>: The <application-information> element is optional and will occur zero or one times between the <application-information> start and </application-information> end tags containing the daily trademark applications data. <data-available-code>: The <data-available-code> element is optional and will occur zero or one times when trademark data is NOT present. The <data-available-code> start tag and the </data-available-code> end tag will be present and contain a one-position "N" indicating that trademark data is Not present. This element will not be present when data is available. </data-available-code> <file-segments>: The <file-segments> element is optional and will occur zero or more times between the <file-segments> start and </file-segments> end tags identifying the beginning of the Trademark Applications file. The <file-segments> element will contain zero or more occurrences of the file segment and action keys elements. <file-segment>: The <file-segment> element is optional and will occur zero or more times between the <file-segment> start and </file-segment> end tags containing the File Segment text data, a four-position alphabetic field identifying the type of data in the Trademark Daily XML Process. The Trademark Applications <file-segment> will always have a constant of "TRMK". The "TRMK" file segment contains new trademark data and modifications made to existing Trademark data. <action-key>: The <action-key> element is optional and will occur zero or more times between the <action-keys> start and </action-keys> end tags. The action keys element will contain zero or more occurrences of the action key and case file elements. <action-key>: The <action-key> element is optional and will occur zero or more times between the <action-key> start and </action-key> end tags containing the KEY ACTION, a two-position alphanumeric field. The contents of the action key will be one of the following values for marks appearing in the Trademark *Official Gazette* (OG). 1st Position: 0, 2nd Position: 0, Category: Published for Opposition. 1st Position: 1, 2nd Position: 0, Category: Principal Register. 1st Position: 1, 2nd Position: 5, Category: Principal Register – Published Intent to Use. 1st Position: 2, 2nd Position: 0, Category: Supplemental Register. 1st Position: 3, 2nd Position: 0, Category: Section 12(c). 1st Position: 4, 2nd Position: 1, Category: 1st Renewal. 1st Position: 4, 2nd Position: 2, Category: 2nd Renewal. 1st Position: 4, 2nd Position: 3, Category: 3rd Renewal. 1st Position: 4, 2nd Position: 4, Category: 4th Renewal. 1st Position: 4, 2nd Position: 5, Category: 5th Renewal. 1st Position: 4, 2nd Position: 6, Category: 6th Renewal. 1st Position: 5, 2nd Position: 1, Category: Cancelled Sec. 7(d) – Entire Registration. 1st Position: 5, 2nd Position: 2, Category: Cancelled Sec. 7(d) – Less than Total Classes. 1st Position: 5, 2nd Position: 3, Category: Cancelled Sec. 8 – Entire Registration. 1st Position: 5, 2nd Position: 4, Category: Cancelled Sec. 8 – Less than Total Classes. 1st Position: 5, Second Position: 5, Category - Cancelled Sec. 71 - Entire Registration. 1st Position: 5, Second Position: 6, Category - Cancelled Sec. 71 - Less than Total Classes. 1st Position: 6, 2nd Position: 1, Category: Cancelled Sec. 37 – Entire Registration. 1st Position: 6, 2nd Position: 2, Category: Cancelled Sec. 37 – Less than Total Classes. 1st Position: 6, 2nd Position: 3, Category: Cancelled Sec. 18 – Entire Registration. 1st Position: 6, 2nd

Electronic Information Products Division
Trademarks Application Daily XML V2.0 Documentation

Position: 4, Category: Cancelled Sec. 18 – Less than Total Classes. 1st Position: 6, 2nd Position: 5, Category: Cancelled Sec. 24 – Entire Registration. 1st Position: 6, 2nd Position: 6, Category: Cancelled Sec. 24 – Less than Total Classes. 1st Position: 6, 2nd Position: 7, Category: Inadvertently Issued Registration Number. 1st Position: 7, 2nd Position: 0, Category: Amended. 1st Position: 7, 2nd Position: 1, Category: Restricted. 1st Position: 8, 2nd Position: 0, Category: Corrected. 1st Position: 9, 2nd Position: 0, Category: New Certificate. 1st Position: I, 2nd Position: B, Category: “IB” for Marks that are used as a basis for filing a Madrid International Report. 1st Position: N, 2nd Position: A, Category: “NA” for New Applications filed (an “NA” Action Key will not appear in the OG). 1st Position: T, 2nd Position: X, Category: “TX” for Marks that have been modified (a “TX” Action Key will not appear in the OG). The value of the <action-key> field and the serial number for “00, “IB” “NA” and “TX” key actions (or registration number for all other keyactions) will determine the sequence of the file based on the following order of precedence: 1st– Marks appearing in the OG, 2nd– Marks requesting International Registration in a country other than the USA, 2nd– New applications filed, 3rd– Marks that have been modified. CASE FILE SECTION: Empty Element Information: NOTE- Elements throughout the Trademark Applications DTD that have no data content will contain an empty element tag. For example: <foreign-applications/>.<case-file>: The <case-file> element is optional and will occur zero or more times between the <case-file> start and </case-file> end tags containing the following elements in the sequence as follows: <serial-number>: The <serial-number> element is mandatory and will occur one time between the <serial-number> start and </serial-number> end tags containing the SERIAL NUMBER, an eight-position numeric field consisting of the following: <Serial number>: Position 1-2 will contain a series code. Series Code: 70, Filing Date: 1881-03/31/05; Series Code: 71, Filing Date: 04/01/05-12/31/55; Series Code: 72, Filing Date: 01/01/56-08/31/73; Series Code: 73, Filing Date: 09/01/73-11/15/89; Series Code: 74, Filing Date: 11/16/89-09/30/95; Series Code: 75, Filing Date: 10/01/95-03/19/2000; Series Code: 76, Filing Date: 03/20/2000-Present (76 - Will be used for all paper filed applications.) Series Code: 78, Filing Date: 03/20/2000-Present (78 - Will be used for electronically filed (e-TEAS) applications.) Position 3-8 will be a six-position serial number right justified with leading zeros. NOTE: When the <serial-number> begins with 80, 81 or 82, the actual serial number is unknown and the serial number is created by placing an “8” before the seven-digit registration number. If the registration number is less than seven digits in length, it is preceded by zeros. When the <serial-number> begins with 89, non-registration data consists of information entered in the data base because of treaty obligations, U.S. Statutes, or other requirements. </serial-number> <registration-number>: The <registration-number> element is optional and will occur zero or one times between the <registration-number> start and </registration-number>end tags containing the REGISTRATION NUMBER, a seven-position numeric field right justified with leading zeros. NOTE: If a mark does not contain a registration number, the <registration number> element will contain zeros. </registration-number><transaction-date>: The <transaction-date> element is optional and will occur zero or one times between the <transaction-date> start and </transaction-date> end tags containing the TRANSACTION DATE, an eight position date in the format YYYYMMDD. The transaction date is the date of the Trademark Daily XML Process for Action Key entries. </transaction-date>.<case-file-header>: The <case-file-header> element is optional and occurs zero or one times between the <case-file-header> start and </case-file-header> end tags identifying the first record sequence of a trademark application document, which contains the equivalent of a TWTF/GENX record. Each case file header element will contain the following optional elements. NOTE: Any of the following elements that do not have the required date will contain zeros. <filing-date>: The <filing-date> element is optional and occurs zero or one times between the <filing-date> start and </filing-date> end tags containing the FILING DATE, an eight position date in the format YYYYMMDD, which is the date on which a statutorily complete trademark application is filed at

the USPTO `</filing-date>` `<registration-date>`: The `<registration-date>` element is optional and occurs zero or one times between the `<registration-date>` start and `</registration-date>` end tags containing the REGISTRATION DATE, an eight-position date in the format YYYYMMDD that identifies the date the mark was registered. `</registration-date>``<status-code>`: The `<status-code>` element is optional and occurs zero or one times between the `<status-code>` start and `</status-code>` end tags containing the STATUS CODE, a three position numeric field which identifies the status of the mark. Reference Table 1- Trademark Status Codes for the list of status codes. `</status-code>``<status-date>`: The `<status-date>` element is optional and occurs zero or one times between the `<status-date>` start and `</status-date>` end tags containing the STATUS DATE, an eight-position date in the format YYYYMMDD, which is the date on which the current status was reported to the system. `</status-date>``<mark-identification>`: The `<mark-identification>` element is optional and occurs zero or one times between the `<mark-identification>` start and `</mark-identification>` end tags containing the MARK-1-LIN, a variable length alphanumeric field containing the characters of the actual mark. `</mark-identification>``<mark-drawing-code>`: The `<mark-drawing-code>` element is optional and occurs zero or one times between the `<mark-drawing-code>` start and `</mark-drawing-code>` end tags containing the MARK DRAWING CODE, a four-position alphanumeric field. The first position identifies the physical characteristics of the mark. For applications prior to November 2, 2003: Position 1: 1, Physical Appearance: Typeset: Word(s)/letter(s)/number(s); Position 1: 2, Physical Appearance: Illustration: Drawing or design without any word(s), letter(s)/number(s); Position 1: 3, Physical Appearance: Illustration: Drawing or design which also includes word(s), letter(s)/number(s); Position 1: 4, Physical Appearance: Illustration: Drawing with word(s), letter(s)/number(s) in Block form; Position 1: 5, Physical Appearance: Illustration: Drawing with word(s), letter(s)/number(s) in Stylized form; Position 1: 6, Physical Appearance: Where no drawing is possible, such as for sound. For applications filed on or after 11/2/2003: Position 1: 1, Physical Appearance: No longer used; Position 1: 2, Physical Appearance: Illustration: Drawing or design without any word(s), letter(s)/number(s); Position 1: 3, Physical Appearance: Illustration: Drawing or design which also includes word(s), letter(s)/number(s); Position 1: 4, Physical Appearance: Standard character mark; Position 1: 5, Physical Appearance: Illustration: Drawing with word(s), letter(s)/number(s) in Stylized form; Position 1: 6, Physical Appearance: Where no drawing is possible, such as for sound. Positions 2-4 identify the Sizing Code for illustration drawings. The first position of the Sizing Code (position 2) consists of one alpha character (percent enlargement/percent reduction of O.G. registration) and two numerics (no. of 9 point lines needed for illustration space in the Official Gazette). Sizing Code 000 is used for typeset. Position 2: R, Sizing Code (Percent Enlargement/Reduction): 150% Enlargement; Position 2: S, Sizing Code (Percent Enlargement/Reduction): 75% Reduction; Position 2: T, Sizing Code (Percent Enlargement/Reduction): 50% Reduction; Position 2: U, Sizing Code (Percent Enlargement/Reduction): 37.5% Reduction; Position 2: V, Sizing Code (Percent Enlargement/Reduction): 30% Reduction; Position 2: W, Sizing Code (Percent Enlargement/Reduction): 25% Reduction; Position 2: X, Sizing Code (Percent Enlargement/Reduction): 22% Reduction. `</mark-drawing-code>` `<published-for-opposition-date>`: The `<published-for-opposition-date>` element is optional and occurs zero or one times between the `<published-for-opposition-date>` start and `</published-for-opposition-date>` end tags containing the DATE PUBLISHED FOR OPPOSITION, an eight-position date in the format YYYYMMDD, which is the date that the mark published for opposition in the Official Gazette. `</published-for-opposition-date>` `<amend-to-register-date>`: The `<amend-to-register-date>` element is optional and occurs zero or one times between the `<amend-to-register-date>` start and `</amend-to-register-date>` end tags containing the AMENDED TO REGISTER DATE, an eight-position date in the format of YYYYMMDD. This element contains the date on which a case is entered as an amendment to a register. `</amend-to-register-date>` `<abandonment-date>`: The

<abandonment-date> element is optional and occurs zero or one times between the <abandonment-date> start and </abandonment-date> end tags containing the DATE ABANDONED, an eight-position date in the format YYYYMMDD, which is the date that the mark is abandoned. </abandonment-date> <cancellation-code>: The <cancellation-code> element is optional and occurs zero or one times between the <cancellation-code> start and </cancellation-code> end tags containing the CANCELLATION CODE, a one-position alphanumeric which identifies the section of the statute under which an entire registration is being cancelled or under which some classes in a multiple class registration are being cancelled. CC: Space or 0, Definition: No entry; CC: 1, Definition: Section 7(d) Entire Registration; CC: 2, Definition: Section 8 Entire Registration; CC: 3, Definition: Section 18 Entire Registration; CC: 4, Definition: Section 24 Entire Registration; CC: 5, Definition: Section 37 Entire Registration; CC: 6, Definition: Entire Registration inadvertently Issued; CC: 7, Definition: Inadvertently issued-entire Registration restored to pendency; CC: A, Section 7(d)-Class(es) in multiple class Registration; CC: B, Section 8 – Class(es) in multiple class Registration; CC: C, Definition: Section 18-Class(es) in multiple class Registration; CC: D, Definition: Section 24 – Class(es) in multiple class Registration; CC: E, Definition: Section 37 – Class(es) in multiple class Registration. </cancellation-code><cancellation-date>: The <cancellation-date> element is optional and occurs zero or one times between the <cancellation-date> start and </cancellation-date> end tags containing the CANCELLATION DATE, an eight-position date in the format YYYYMMDD, which is the date that the cancellation of the entire registration was recorded. </cancellation-date> <republished-12c-date>: The <republished-12c-date> element is optional and occurs zero or one times between the <republished-12c-date> start and </republished-12c-date> end tags containing the DATE PUBLISHED UNDER SECTION 12(C), an eight-position date in the format YYYYMMDD, which is the date of publication under Section 12(c). </republished-12c-date> <domestic-representative-name>: The <domestic-representative-name> element is optional and occurs zero or one times between the <domestic-representative-name> start and </domestic-representative-name> end tags and contains the DOMESTIC REPRESENTATIVE information for the application. </domestic-representative-name> <attorney-docket-number>: The <attorney-docket-number> element is optional and occurs zero or one times between the <attorney-docket-number> start and </attorney-docket-number> end tags containing the ATTORNEY DOCKET NUMBER, a twelve-position number containing the reference or identification number of a case as assigned and used in the office of the attorney filing the application. </attorney-docket-number> <attorney-name>: The <attorney-name> element is optional and occurs zero or one times between the <attorney-name> start and </attorney-name> end tags and contains the ATTORNEY information from the OWNX record. </attorney-name> <principal-register-amended-indicator>: The <principal-register-amended-indicator> element is optional and occurs zero or one times between the <principal-register-amended-in> start and </principal-register-amended-in> end tags containing the FLAG AMENDED TO THE PRINCIPAL REGISTER, a one-position alphabetic indicating the register has been amended for an application on the Supplemental Register. A “T” in this field indicates an amendment to the Principal Register. An “F” in this field indicates no amendment to the Principal Register. </principal-register-amended-indicator> <supplemental-register-amended-in>: The <supplemental-register-amended-indicator> element is optional and occurs zero or one times between the <supplemental-register-amended-in> start and </supplemental-register-amended-in> end tags containing the FLAG AMENDED TO THE SUPPLEMENTAL REGISTER, a one-position field indicating the register has been amended for an application on the Principal Register. A “T” in this field indicates an amendment to the Supplemental Register. An “F” in this field indicates no amendment to the supplemental Register. </supplemental-register-amended-in>. The following six (6) MARK TYPE indicator elements contain a one-position field indicating the type of mark. The <certification-mark-indicator> is the only mark type that must appear

alone. One or more of the other five (5) MARK TYPES may be applied to the same mark. If a MARK TYPE is not entered for a mark, the field will contain a "F". <trademark-in>: 1) The <trademark-indicator> element is optional and occurs zero or one times between the <trademark-in> start and </trademark-in> end tags containing FLAG TRADEMARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Trademark. </trademark-in> <collective-trademark-in>: 2) The <collective-trademark-indicator> element is optional and occurs zero or one times between the <collective-trademark-in> start and </collective-trademark-in> end tags containing FLAG COLLECTIVE TRADEMARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Trademark. </collective-trademark-in> <service-mark-in>: 3) The <service-mark-indicator> element is optional and occurs zero or one times between the <service-mark-in> start and </service-mark-in> end tags containing FLAG SERVICE MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Service Mark. </service-mark-in> <collective-service-mark-in>: 4) The <collective-service-mark-indicator> element is optional and occurs zero or one times between the <collective-service-mark-in> start and </collective-service-mark-in> end tags containing FLAG COLLECTIVE SERVICE MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Service Mark. </collective-service-mark-in> <collective-membership-mark-in>: 5) The <collective-membership-mark-indicator> element is optional and occurs zero or one times between the <collective-membership-mark-in> start and </collective-membership-mark-in> end tags containing FLAG COLLECTIVE MEMBERSHIP MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Membership Mark. </collective-membership-mark-in> <certification-mark-in>: 6) The <certification-mark-indicator> element is optional and occurs zero or one times between the <certification-mark-in> start and </certification-mark-in> end tags containing FLAG CERTIFICATION-MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Certification Mark. </certification-mark-in> <cancellation-pending-in>: The <cancellation-pending-indicator> element is optional and occurs zero or one times between the <cancellation-pending-in> start and </cancellation-pending-in> end tags containing FLAG CANCEL PENDING, a one-position alphabetic field. A "T" indicates that a cancellation proceeding is pending for this registration. Otherwise, this field will contain an "F". </cancellation-pending-in> <published-concurrent-in>: The <published-concurrent-indicator> element is optional and occurs zero or one times between the <published-concurrent-in> start and </published-concurrent-in> end tags containing FLAG PUBLISHED CONCURRENT, a one-position alphabetic field. A "T" in this field identifies that the mark published subject to concurrent use. Otherwise, this field will contain an "F". </published-concurrent-in> <concurrent-use-in>: The <concurrent-use-indicator> element is optional and occurs zero or one times between the <concurrent-use-in> start and </concurrent-use-in> end tags containing FLAG CONCURRENT USE, a one-position alphabetic field. A "T" in this field identifies the mark is subject to Concurrent Use. An "F" indicates no concurrent use. If present, the concurrent use statement should appear in the <case-file-statement> element. </concurrent-use-in> <concurrent-use-proceeding-in>: The <concurrent-use-proceeding-indicator> element is optional and occurs zero or one times between the <concurrent-use-proceeding-in> start and </concurrent-use-proceeding-in> end tags containing the FLAG CONCURRENT USE PROCEEDING, a one-position alphabetic. A "T" in this field indicates that a concurrent use proceeding is pending before the Trademark Trial and Appeal Board (TTAB). An "F" indicates that no concurrent use proceeding is pending. </concurrent-use-proceeding-in> <interference-pending-in>: The <interference-pending-indicator> element is optional and occurs zero or one times between the <interference-pending-in> start and </interference-pending-in> end tags containing the FLAG INTERFERENCE PENDING, a one-position alphabetic. A "T" in this field indicates that the application is involved in an interference proceeding pending before the

Trademark Trial and Appeal Board. Otherwise, this field will contain an "F". </interference-pending-in> <opposition-pending-in>: The <opposition-pending-indicator> element is optional and occurs zero or one times between the <opposition-pending-in> start and </opposition-pending-in> end tags containing the FLAG OPPOSITION PENDING, a one-position alphabetic. A "T" in this field indicates that an opposition proceeding is pending on this application. Otherwise, this field will contain an "F". </opposition-pending-in><section-12c-in>: The <section-12c-indicator> element is optional and occurs zero or one times between the <section-12c-in> start and </section-12c-in> end tags containing the FLAG REPUBLISH SECTION 12C, a one-position alphabetic field. A "T" in this field indicates that the mark is to be republished under section 12(C). Otherwise, this field will contain an "F". </section-12c-in><section-2f-in>: The <section-2f-indicator> element is optional and occurs zero or one times between the <section-2f-in> start and </section-2f-in> end tags containing the FLAG SECTION 2(F), a one-position alphabetic Special Entry Code. A "T" indicates a special entry for Section 2(f). Otherwise, this field will contain an "F". </section-2f-in><section-2f-inpart-in>: The <section-2f-in-part-indicator> element is optional and occurs zero or one times between the <section-2f-in-part-in> start and </section-2f-in-part-in> end tags containing FLAG SECTION 2(F) IN PART, a one-position alphabetic field. A "T" indicates a special entry for Section 2(f) as to part of the mark. Otherwise, this field will contain an "F". </section-2f-inpart-in><renewal-filed-in>: The <renewal-filed-indicator> element is optional and occurs zero or one times between the <renewal-filed-in> start and </renewal-filed-in> end tags containing the FLAG RENEWAL FILED, a one-position alphabetic field. A "T" indicates that a renewal application has been filed for this registration. Otherwise, this field will contain an "F". </renewal-filed-in><section-8-filed-in>: The <section-8-filed-indicator> element is optional and occurs zero or one times between the <section-8-filed-in> start and </section-8-filed-in> end tags containing the FLAG SECTION 8 FILED, a one-position alphabetic field. A "T" indicates that a Section 8 affidavit was filed for this registration. Otherwise, this field will contain an "F". </section-8-filed-in><section-8-partial-accept-in>: The <section-8-partial-accept-indicator> element is optional and occurs zero or one times between the <section-8-partial-accept-in> start and </section-8-partial-accept-in> end tags containing the FLAG SECTION 8 PARTIAL ACCEPT, a one position alphabetic field. A "T" indicates that a Section 8 affidavit has been filed and was partially accepted. Otherwise, this field will contain an "F". </section-8-partial-accept-in><section-8-accepted-in>: The <section-8-accepted-indicator> element is optional and occurs zero or one times between the <section-8-accepted-in> start and </section-8-accepted-in> end tags containing FLAG SECTION 8 ACCEPTED, a one-position alphabetic field. A "T" indicates that a Section 8 affidavit has been filed and acknowledged for this registration. Otherwise, this field will contain an "F". </section-8-accepted-in><section-15-acknowledged-in>: The <section-15-acknowledged-indicator> element is optional and occurs zero or one times between the <section-15-acknowledged-in> start and </section-15-acknowledged-in> end tags containing FLAG SECTION 15 ACKNOWLEDGED, a one-position alphabetic field. A "T" indicates that a Section 15 affidavit has been filed and acknowledged for this registration. Otherwise, this field will contain an "F". </section-15-acknowledged-in><section-15-filed-in>: The <section-15-filed-indicator> element is optional and occurs zero or one times between the <section-15-filed-in> start and </section-15-filed-in> end tags containing the FLAG SECTION 15 FILED, a one position alphabetic field. A "T" indicates that a Section 15 affidavit has been filed for this registration. Otherwise, this field will contain an "F". </section-15-filed-in><supplemental-register-in>: The <supplemental-register-indicator> element is optional and occurs zero or one times between the <supplemental-register-in> start and </supplemental-register-in> end tags containing the FLAG SUPPLEMENTAL REGISTER, a one-position alphabetic field. A "T" indicates that the mark is, or will be, registered on the Supplemental Register. Otherwise, this field will contain an "F". </supplemental-register-in><foreign-priority-in>: The <foreign-priority-indicator> element is optional and occurs zero or one times between

the <foreign-priority-in> start and </foreign-priority-in> end tags containing the FLAG FOREIGN PRIORITY CLAIMED, a one-position alphabetic field. This field will contain a "T" if the application/registration contains foreign application information and a right of priority has been claimed under section 44(d). Otherwise this field will contain an "F". </foreign-priority-in><change-registration-in>: The <change-registration-indicator> element is optional and occurs zero or one times between the <change-registration-in> start and </change-registration-in> end tags containing the FLAG CHANGE REGISTRATION, a one-position alphabetic field. This field will contain a "T" if any of the following has occurred to the registration: an amendment, a certificate of correction, less goods, less classes. If none of the actions listed above has occurred for a registration, this field will contain an "F". </change-registration-in><intent-to-use-in>: The <intent-to-use-indicator> element is optional and occurs zero or one times between the <intent-to-use-in> start and </intent-to-use-in> end tags containing the FLAG INTENT USE FILE, a one position alphabetic field. A "T" in this field indicates that the case was originally filed as an Intent to Use application. Otherwise, this field will contain an "F". </intent-to-use-in><intent-to-use-current-in>: The <intent-to-use-current-indicator> element is optional and occurs zero or one times between the <intent-to-use-current-in> start and </intent-to-use-current-in> end tags containing the FLAG INTENT USE CURRENT, a one position alphabetic field. A "T" in this field indicates that this application still is an Intent to Use case for which a use amendment or statement has not yet been accepted. Otherwise, this field will contain an "F". </intent-to-use-current-in><filed-as-use-application-in>: The <filed-as-use-application-indicator> element is optional and occurs zero or one times between the <filed-as-use-application-in> start and </filed-as-use-application-in> end tags containing the FLAG FILED AS USE APPLICATION, a one position alphabetic field. A "T" indicates, at the time of initial filing, this application contained a claim based on use under Sec. 1(a). </filed-as-use-application-in><amended-to-use-application-in>: The <amended-to-use-application-indicator> element is optional and occurs zero or one times between the <amended-to-use-application-in> start and </amended-to-use-application-in> end tags containing the FLAG AMENDED TO USE APPLICATION a one position alphabetic field. A "T" indicates this application was amended to add a claim based on use under Sec. 1(a).</amended-to-use-application-in><use-application-currently-in>: The <use-application-currently-indicator> element is optional and occurs zero or one times between the <use-application-currently-in> start and </use-application-currently-in> end tags containing the FLAG USE APPLICATION CURRENTLY, a one position alphabetic field. A "T" indicates, at the present time, this application contains a claim based on use under Sec. 1(a) and/or that a Sec. 1(b) intent to use claim was perfected to claim use. </use-application-currently-in><amended-to-itu-application-in>: The <amended-to-itu-application-indicator> element is optional and occurs zero or one times between the <amended-to-itu-application-in> start and </amended-to-itu-application-in> end tags containing the FLAG AMENDED TO ITU APPLICATION, a one position alphabetic field. A "T" indicates, at the present time, this application contains a Request for Extension in the US under Sec. 66(a). </filing-basis-current-66a-in><renewal-date>: The <renewal-date> element is optional and occurs zero or one times between the <renewal-date> start and </renewal-date> end tags containing the RENEWAL DATE, an eight position date in the format YYYYMMDD. This field Contains the date the mark was renewed. If the date is before November 16, 1989, the renewal is for 20 years; if the date is after November 15, 1989, the renewal is for 10 years. </renewal-date><law-office-assigned-location-code->: The <law-office-assigned-location code> element is optional and occurs zero or one times between the <law-office-assigned-location-code> start and </law-office-assigned-location-code> end tags containing the LAW OFFICE, a three-position alphanumeric field identifying the Trademark Examining Operation Law Office responsible for examination of the application prior to registration or abandonment of the mark. Following is a list of the law office assigned codes and law offices. Law Office Code is 510, Law Office is LAW OFFICE 1; Law Office Code is 520, Law Office is LAW OFFICE 2; Law Office Code is 530, Law Office is LAW OFFICE 3; Law Office Code is 540, Law Office is LAW OFFICE 4; Law Office Code is 550, Law Office is LAW OFFICE 5; Law Office Code is 560, Law Office is LAW OFFICE 6; Law Office Code is 570, Law Office is LAW OFFICE 7; Law Office Code is 580, Law Office is LAW OFFICE 8; Law Office Code is 590, Law Office is LAW OFFICE 9; Law Office Code is 970, Law Office is ADP TEST GROUP B; Law Office Code is 980, Law Office is ATM DIRECTOR'S STAFF; Law Office Code is G00, Law Office is GROUP B DIRECTOR; Law Office Code is G10, Law Office is LAW OFFICE 9; Law Office Code is G20, Law Office is LAW OFFICE 10; Law Office Code is G30, Law Office is LAW OFFICE 11; Law Office Code is G40, Law Office is LAW OFFICE 12; Law Office Code is G50, Law Office is LAW OFFICE 13; Law Office Code is G60, Law Office is LAW OFFICE 14; Law Office Code is G70, Law Office is LAW OFFICE 15; Law Office Code is G80, Law Office is LAW OFFICE 16; Law Office Code is J00, Law Office is GROUP A DIRECTOR; Law Office Code is J10, Law Office is LAW OFFICE 1; Law Office Code is J20, Law Office is LAW OFFICE 2; Law Office Code is J30, Law Office is LAW OFFICE 3; Law Office Code is J40, Law Office is LAW OFFICE 4; Law Office Code is J50, Law Office is LAW OFFICE 5; Law Office Code is J60, Law Office is LAW OFFICE 6; Law Office Code is J70, Law Office is LAW OFFICE 7; Law Office Code is J80, Law Office is LAW OFFICE 8; Law Office Code is L00, Law Office is GROUP A DIRECTOR; Law Office Code is L10, Law Office is LAW OFFICE 101; Law Office Code is L20, Law Office is LAW OFFICE 102; Law Office Code is L30, Law Office is LAW OFFICE 103; Law Office Code is L40, Law Office is LAW OFFICE 104; Law Office Code is L50, Law Office is LAW OFFICE 105; Law Office Code is L60, Law Office is LAW OFFICE 106; Law Office Code is L70, Law Office is LAW OFFICE 107; Law Office Code is L80, Law Office is LAW OFFICE 108; Law Office Code is L90, Law Office is LAW OFFICE 109; Law Office Code is M10, Law Office is LAW OFFICE 110; Law Office Code is M20, Law Office is LAW OFFICE 111; Law Office Code is M30, Law Office is LAW OFFICE 112; Law Office Code is M40, Law Office is LAW OFFICE 113; Law Office Code is M50, Law Office is LAW OFFICE 114; Law Office Code is M60, Law Office is LAW OFFICE 115; Law Office Code is M70, Law Office is LAW OFFICE 116; </law-office-assigned-location-code><current-location>: The <current-location> element is optional and occurs zero or one times between the <current-location> start and </current-location> end tags containing the CURRENT LOCATION the TM

application is located. </current-location><location-date>: The <location-date> element is optional and occurs zero or one times between the <location-date> start and </location-date> end tags containing the DATE IN LOCATION, an eight-position date in the format YYYYMMDD, which is the date that the application reaches an assigned location.</location-date><employee-name>: The <employee-name> element is optional and occurs zero or one times between the <employee-name> start and </employee-name> end tags containing the EMPLOYEE NAME, a alphanumeric field. Employee name identifies employee assigned to the USPTO. </employee-name> </case-file-header> <case-file-statements>: The <case-file-statements> element is optional and occurs zero or one times between the <case-file-statements> start and </case-file-statements> end tags, which contains the equivalent of a TWTF/GENV record. Each case file statements element will contain the optional case-file-statement element. <case-file-statement>: The <case-file-statement> element is optional and occurs one or more times between the <case-file-statement> start and </case-file-statement> end tags. When present, each case file statement element will contain the optional type code and text elements. <type-code>: The <type-code> element is optional and occurs zero or one times between the <type-code> start and </type-code> end tags containing the TEXT TYPE, a six position alphanumeric field identifying the type of Case File Statement element – TWTF/GENV record. Positions 1-2: AF – In Another Form Statement, Positions 3-6: See Note 2. Positions 1-2: A0 – Amendment to a Registration/Renewal Certificate, Positions 3-6: See Note 3, 6. Positions 1-2: B0 – Certificate of Correction for Registration, Positions 3-6: See Note 3, 6. Positions 1-2: CC - Indication of Colors claimed, Positions 3-6: See Note 1. Positions 1-2: CD – Description of the Colors Claimed, Positions 3-6: See Note 1. Positions 1-2: CS – Certification Mark Statement, Positions 3-6: See Note 1. Positions 1-2: CU – Concurrent Use Statement (The Concurrent Use Statement, if present, will be the most recent.), Positions 3-6: See Note 3. Positions 1-2: DM - Description of Mark (Text will describe characteristics of the mark.), Positions 3-6: See Note 1. Positions 1-2: D0 - Disclaimer (Test submitted by the applicant/registrant disclaiming an unregistrable component of a mark otherwise registrable.), Positions 3-6: See Note 1, 6. Positions 1-2: D1 - Disclaimer with Predetermined Text (The following Text will appear as part of the disclaimer, “No claim is made to the exclusive right to use...., apart from the mark as shown.”), Positions 3-6: See Note 1. Positions 1-2: FN – Foreign Registration Data (Keyed as free form text.), Positions 3-6: See Note 1. Positions 1-2: GS - Goods and Services (The following symbols indicate that the goods or services have been amended after registration of the mark: Double parenthesis ((..)) identify any “less goods”; Single asterisks *.* identify additional (new) wording in the goods; Single brackets [..] indicate deleted goods.), Positions 3-6: See Note 5. Positions 1-2: IN – Interference Statement, Positions 3-6: See Note 1. Positions 1-2: LS – Lining/Stippling Statement, Positions 3-6: See Note 1. Positions 1-2: MD – Undefined Application/Registration, Positions 3-6: See Note 3. Positions 1-2: MK – Mark Overflow, Positions 3-6: See Note 1. Positions 1-2: NR – Non Registration Information, Positions 3-6: See Note 1. Positions 1-2: N0 – Name/Portrait Description and/or Consent Statement, Positions 3-6: See Note 1, 6. Positions 1-2: OR – Order restricting Scope or Claim or Registration, Positions 3-6: See Note 3. Positions 1-2: PM – Pseudo Mark, Positions 3-6: See Note 7. Positions 1-2: TF – Section 2(f) Limitation Statement, Positions 3-6: See Note 1. Positions 1-2: TR – Translation of Words in Mark, Positions 3-6: See Note 4. Positions 1-4: TLIT – Transliteration Statement, Positions 5-6: See Note 8. Positions 1-4: TNSF – Transformation Information, Positions 5-6: See Note 8. Positions 1-6: LINKBR – Linkage Information. Note 1: Positions 3-6 = 0’s. Note 2: Positions 3-5 = Prime Class, Position 6 = 0 (Statement applies to both first use dates.) Position 6 = 1 (Statement applies to first use date only.) Position 6 = 2 (Statement applies to first use in Commerce only.) Note 3: Positions 3 – 4 = Last two digits of Year of Entry, Positions 5 – 6 = Month of Entry. Note 4: Positions 3 – 5 = Sequential Entry Number or 0’s, Position 6 = 0 (Translation submitted by applicant.) Note 5: Positions 3 – 5 = Prime Class, Position 6 = 1 (Text is goods and services

statement with no “less goods” text.), Position 6 = 2 (Statement only consists of “less goods” text), Position 6 = 3 (Statement has embedded “less goods” text (separated by double parenthesis) within the goods and services text). Note 6: Position 2 = Zero. Note 7: Positions 3 – 6 are a sequential entry number, although some records have zeros in positions 3 – 6. Note 8: Positions 5 – 6 = 0’s. </type-code> <text>: The <text> element is optional and occurs zero or more times between the <text> start and <text> end tags containing the TEXT, a 40-position alphanumeric field, which is the overflow of a TWTX/GENX record or other text information pertaining to the mark.</text></case-file-statement></case-file-statements><case-file-event-statements>: The <case-file-event-statements> element is optional and occurs zero or one times between the <case-file-event-statements> start and </case-file-event-statements> end tags, which contains the equivalent of a TWTF/EVNT record. Each case file event statements element will contain the optional case-file-event statement element. <case-file-event-statement>: The <case-file-event-statement> element is optional and occurs one or more times between the <case-file-event-statement> start and </case-file-event-statement> end tags. When present, each case file event statement element will contain the following optional elements. <code>: The <code> element is optional and will occur zero or one times between the <code> start and </code> end tags containing the EVENT CODE, a four-position alphanumeric field that represents an event in the prosecution of a case (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 5 – Prosecution History Event Code List. </code> <type>: The <type> element is optional and will occur zero or one times between the <type> start and </type> end tags containing the EVENT TYPE, a one-position alphanumeric field that represents the detail information or entry code references. The entry type codes are as follows. Entry Type: A, Description: Allowance for Publication. Entry Type: D, Description: Assigned to Examiner. Entry Type: F, Description: First Action. Entry Type: I, Description: Incoming Correspondence. Entry Type: O, Description: Outgoing Correspondence. Entry Type: R, Description: Renewal. Entry Type: T, Description: TTAB Proceeding. Entry Type: X, Description: Correction. Entry Type: Z, Description: Deletion. </type> <description-text>: The <description-text> element is optional and will occur zero or one times between the <description-text> start and </description-text> end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark.</description-text> <date>: The <date> element is optional and will occur zero or one times between the <date> start and </date> end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective. </date><number>: The <number> element is optional and will occur zero or one times between the <number> start and </number> end tags containing the EVENT SEQUENCE NUMBER, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when filed in a data set. </number></case-file-event-statement></case-file-event-statements><prior-registration-applications>: The <prior-registration-applications> element is optional and occurs zero or one times between the <prior-registration-applications> start and </prior-registration-applications> end tags, which contains the equivalent of all TWTF/PRUS records. Each prior registration applications element will contain the optional other related in and prior registration application elements. <other-related-in>: The <other-related-indicator> element is optional and occurs zero or more times between the <other-related-in> start and </other-related-in> end tags containing the AND OTHERS, a one-position alphabetic field. A “T” in this field would indicate that the words “and others” appears in conjunction with a list of prior registrations that are claimed as being related to this mark. An “F” would indicate that the statement is not present. </other-related-in><prior-registration-application>: The <prior-registration-application> element is optional and occurs zero or more times between the <prior-registration-application> start and </prior-registration-application> end tags, which contains the equivalent of a TWTF/PRUS

record instance. Each prior registration application element will contain the optional relationship type and number elements. <relationship-type>: The <relationship-type> element is optional and occurs zero or one times between the <relationship-type> start and </relationship-type> end tags containing the RECORD TYPE, a one-position alphabetic field that defines which of 4 types of record are being stored in the Prior Registration data set. 0 = Prior Registration; 1 = Continuity Parent; 2 = Continuity Child; 3 = NonRegistration Document Control Number. </relationship-type> <number>: The <number> element is optional and occurs zero or one times between the <number> start and </number> end tags containing the REEL NUMBER, an eight-position alphanumeric field. This field contains a unique number identifying the applications or registrations to which the application or registration is related as a “child” or “parent” because the original application was divided during examination into two or more applications. Seven digits and a blank are used to enter a registration number. Eight digits are used to enter a serial number. When the record type contains a value of 1 or 2, this field will contain a serial number. An entry with a record type of 0 will contain a registration number. An entry with a record type of 3 will contain a unique control number assigned to the physical document which contains the non-registration information. </number></prior-registration-application></prior-registrations-applications><foreign-applications>: The <foreign-applications> element is optional and occurs zero or one times between the <foreign-applications> start and </foreign-applications> end tags containing the equivalent of all TWTF/FRGN records. Each foreign applications element will contain the optional foreign application elements. <foreign-application>: The <foreign-application> element is optional and occurs zero or more times between the <foreign-application> start and </foreign-application> end tags containing the equivalent of a TWTF/FRGN record instance. Each foreign application element will contain the following optional elements. <filing-date>: The <filing-date> element is optional and occurs zero or one times between the <filing-date> start and </filing-date> end tags containing the FOREIGN FILING DATE, an eight-position numeric in the format YYYYMMDD. </filing-date> <registration-date>: The <registration-date> element is optional and occurs zero or one times between the <registration-date> start and </registration-date> end tags containing the FOREIGN REGISTRATION DATE, an eight-position numeric in the format YYYYMMDD.</registration-date><registration-expiration-date>: The <registration-expiration-date> element is optional and occurs zero or one times between the <registration-expiration-date> start and </registration-expiration-date> end tags containing the FOREIGN REGISTRATION EXPIRATION DATE, an eight-position numeric in the format YYYYMMDD. </registration-expiration-date><registration-renewal-date>: The <registration-renewal-date> element is optional and occurs zero or one times between the <registration-renewal-date> start and </registration-renewal-date> end tags containing the FOREIGN REGISTRATION RENEWAL DATE, an eight-position numeric in the format YYYYMMDD. </registration-renewal-date><registration-renewal-expiration-date>: The <registration-renewal-expiration-date> element is optional and occurs zero or one times between the <registration-renewal-expiration-date> start and </registration-renewal-expiration-date> end tags containing the FOREIGN RENEWAL REGISTRATION EXPIRATION DATE, an eight-position numeric expiration date for a foreign registration which has been renewed, in the format YYYYMMDD. </registration-renewal-expiration-date> <entry-number>: The <entry-number> element is optional and occurs zero or one times between the <entry-number> start and </entry-number> end tags containing the ENTRY NUMBER, a three-position numeric entry number that will identify the sequence of each entry. FRGN records will be in descending sequence by entry number. </entry-number><application-number>: The <application-number> element is optional and occurs zero or one times between the <application-number> start and </application-number> end tags containing the FOREIGN APPLICATION NUMBER, a twelve-position alphanumeric, which pertains to Section 44(d). </application-number><country>: The <country> element is optional and occurs zero or one times between the <country> start and

</country> end tags containing the FOREIGN COUNTRY CODE, a two or three-position alphanumeric, which identifies the country of origin. Refer to Table 2B Country Code List.

</country><other>: The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List.

</other><registration-number>: The <registration-number> element is optional and occurs zero or one times between the <registration-number> start and </registration-number> end tags containing the FOREIGN REGISTRATION NUMBER, a twelve-position alphanumeric.

</registration-number><renewal-number>: The <renewal-number> element is optional and occurs zero or one times between the <renewal-number> start and </renewal-number> end tags containing the FOREIGN RENEWAL REGISTRATION NUMBER, a twelve-position alphanumeric.

</renewal-number><foreign-priority-claim-in>: The <foreign-priority-claim-in> element is optional and occurs zero or one times between the <foreign-priority-claim-in> start and </foreign-priority-claim-in> end tags containing the FLAG FOREIGN PRIORITY CLAIMED, a one position alphabetic field. This field will contain "T" if foreign priority has been claimed. Otherwise, this field will contain an "F" </foreign-priority-claim-in></foreign-application></foreign-applications><classifications>: The <classifications> element is optional and occurs zero or one times between the <classifications> start and </classifications> end tags containing the equivalent of all TWTF/CLAS records. Each classifications element will contain the classification element.

<classification>: The <classification> element is optional and occurs zero or more times between the <classification> start and </classification> end tags containing the equivalent of a TWTF/CLAS record instance. Each classification element will contain the following optional elements.

<international-code-total-no>: The <international-code-total-no> element is optional and occurs zero or one times between the start <international-code-total-no> and </international-code-total-no> end tags containing NUMBER OF INTERNATIONAL CLASS, a two-position numeric field. The contents of this field will indicate the number of International Codes that appear in the CLS-INTL (CI).

</international-code-total-no><us-code-total-no>: The <us-code-total-no> element is optional and occurs zero or one times between the start <us-code-total-no> and </us-code-total-no> end tags containing NUMBER OF US CLASS, a two-position numeric field. The contents of this field will indicate the number of U.S. Classes that appear in the CLS-US (CUS).

</us-code-total-no><international-code>: The <international-code> element is optional and occurs zero or more times between the start <international-code> and </international-code> end tags containing INTERNATIONAL CLASS CODE, a three-position alphanumeric field. The number of international codes will equal the content of the international-code-total-no element. Each occurrence of this field will be as follows: Trademarks and Service Marks – A three-position numeric field with leading zeros. (Possible values are 001 through 0034 for Goods and 035 through 042 for Services). Certification Marks – A three-position alphabetic field. (Possible values are "A" and "B"). Collective Membership Marks – A three-position numeric field. (Possible value = 200).

</international-code><us-code>: The <us-code> element is optional and occurs zero or more times between the start <us-code> and </us-code> end tags containing US CLASS CODE, a three-position alphanumeric field. The number of US codes will equal the content of the us-code-total-no element. Each occurrence of this field would be as follows: Trademarks and Service Marks – A three-position numeric field (Possible value are 001 through 052 for Goods and 100 through 107 for Services). Certification Marks – A three-position alphabetic field (Possible values are "A" and "B"). Collective Membership Marks – A three-position numeric field. (Possible value = 200).

</us-code><status-code>: The <status-code> element is optional and occurs zero or one times between the start <status-code> and </status-code> end tags containing CLASS STATUS CODE, a one-position alphanumeric, as defined below. Categories 5 and 6 will contain a status as determined by the cancellation. All other categories will contain a status of 6. Status: 1, Registration/Class(es):

Sec. 7(d) – Entire Registration. Status: A, Registration/Class(es): Sec. 7(d) – Class(es) in a Multiple Class Registration. Status: 2, Registration/Class(es): Sec. 8 – Entire Registration. Status: B, Registration/Class(es): Sec. 8 – Class(es) in a Multiple Class Registration. Status: 3, Registration/Class(es): Sec. 18 – Entire Registration. Status: C, Registration/Class(es): Sec. 18 – Class(es) in a Multiple Class Registration. Status: 4, Registration/Class(es): Sec. 24 – Entire Registration. Status: D, Registration/Class(es): Sec. 24 – Class(es) in a Multiple Class Registration. Status: 5, Registration/Class(es): Sec. 37 – Entire Registration. Status: E, Registration/Class(es): Sec. 37 – Class(es) in a Multiple Class Registration. Status: 6, Registration/Class(es): Active. Status: 7, Registration/Class(es): Inactive – Insufficient fee received. Status: 8, Registration/Class(es): Abandoned. Status: 9, Registration/Class(es): Expired. </status-code><status-date>: The <status-date> element is optional and occurs zero or one times between the start <status-date> and </status-date> end tags containing STATUS DATE, an eight-position date in the format YYYYMMDD. This date is the date on which current class status was reported.</status-date><first-use-anywhere-date>: The <first-use-anywhere-date> element is optional and occurs zero or one times between the start <first-use-anywhere-date> and </first-use-anywhere-date> end tags containing DATE MARK FIRST USED ANYWHERE, an eight-position date in the format YYYYMMDD. If the month and/or day do not appear in the source document, zeros will appear in that portion of this field.</first-use-anywhere-date><first-use-in-commerce-date>: The <first-use-in-commerce-date> element is optional and occurs zero or one times between the start <first-use-in-commerce-date> and </first-use-in-commerce-date> end tags containing DATE MARK FIRST USED IN COMMERCE, an eight-position date in the format YYYYMMDD, which is regulated by Congress. NOTE: If the month and/or day do not appear in the source document, zeros will appear in that portion of this field. </first-use-in-commerce-date><primary-code>: The <primary-code> element is optional and occurs zero or one times between the start <primary-code> and </primary-code> end tags containing PRIMARY CLASS CODE, a three-position alphanumeric field. **NOTE:** If the filing date of the application is on or after September 1, 1973 (Series Code 73), this field will contain an International Class (CLS-INTL). If the filing date is prior to September 1, 1973 this field will contain a U.S. Class (CLS-US). </primary-code></classifications><correspondent>: The <correspondent> element is optional and occurs zero or one times between the <correspondent> start and </correspondent> end tags, which contains the address information for the correspondent of record.<address-1>: The <address-1> element is optional and occurs zero or one times between the <address-1> start and </address-1> end tags and contains the first line of Address Information.</address-1><address-2>: The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the second line of Address Information.</address-2><address-3>: The <address-3> element is optional and occurs zero or one times between the <address-3> start and </address-3> end tags and contains the third line of Address Information.</address-3><address-4>: The <address-4> element is optional and occurs zero or one times between the <address-4> start and </address-4> end tags and contains the fourth line of Address Information.</address-4><address-5>: The <address-5> element is optional and occurs zero or one times between the <address-5> start and </address-5> end tags and contains the fifth line of Address Information.</address-5> </correspondent> CASE FILE OWNERS SECTION: <case-file-owners>: The <case-file-owners> element is optional and occurs zero or one times between the <case-file-owners> start and </case-file-owners> end tags, which contains the equivalent of all TWTF/OWNER-OWNX records. Each case file owners element will contain the optional case file owner element.<case-file-owner>: The <case-file-owner> element is optional and occurs zero or one times between the <case-file-owner> start and </case-file-owner> end tags, which contains the equivalent of a TWTF/OWNER-OWNX record instance. Each case file owner element will contain the following optional elements. <entry-number>: The <entry-number> element is

Electronic Information Products Division

Code: 12, Description: Foundation. Code: 13, Description: Limited Partnership. Code: 14, Description: State Agency. Code: 15, Description: Federal Agency. Code: 16, Description: Limited Liability Company. Code: 17, Description: Trust. Code: 18, Description: Estate. Code: 19, Description: Sole Proprietorship. Code: 98, Description: Unknown. Code: 99, Description: Other (Indicates Entity-Statement should appear).</legal-entity-type-code><entity-statement>: The <entity-statement> element is optional and occurs zero or one times between the <entity-statement> start and </entity-statement> end tags and contains an Entity Statement for an owner.</entity-statement>.<party-name>: The <party-name> element is optional and occurs zero or one times between the <party-name> start and </party-name> end tags, which contains the complete party name within the Owner Information for the party type identified.</party-name><address-1>: The <address-1> element is optional and occurs zero or one times between the <address-1> start and </address-1> end tags and contains ADDRESS1, the first 40 characters of the internal address within the Address Information.</address-1><address-2>: The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the ADDRESS2, the first 40 characters of the street address within the Address Information.</address-2><city>: The <city> element is optional and occurs zero or one times between the <city> start and </city> end tags and contains the CITY/OTHER FOREIGN DESIGNATION, a 40-position alphanumeric field containing the city or foreign designation of an address.</city><state>: The <state> element is optional and occurs zero or one times between the <state> start and </state> end tags, and contains the STATE CODE, a two-position alphabetic field containing the State code within the Address Information. For two-position codes, see Table 2B Country Code List and for three-position codes see Table 2B State Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are also listed in Table 2A State Code List.)</state> <country>: The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags and contains the COUNTRY CODE, a two position alphabetic field containing the Country code within the Address Information.</country><other>: The <other> element is optional and occurs

zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List. </other><postcode>: The <postcode> element is optional and occurs zero or one times between the <postcode> start and </postcode> end tags, and contains the U.S. Postal ZIP CODE or a foreign country's postal identification, A one to fifteen-position alphanumeric field </postcode> <dba-aka-text>: The <dba-aka-text> element is optional and occurs zero or one times between the <dba-aka-text> start and </dba-aka-text> end tags and contains the Doing Business As (DBA), Also Known As (AKA) or Trading As (TA) Statement for an owner. When present an owner may have one or more of the 3 types of statements. </dba-aka-text><composed-of-statement>: The <composed-of-statement> element is optional and occurs zero or one times between the <composed-of-statement> start and </composed-of-statement> end tags, which contains the COMPOSED OF STATEMENT for an owner. </composed-of-statement><name-change-explanation>: The <name-change-explanation> element is optional and occurs zero or more times between the <name-change-explanation> start and </name-change-explanation> end tags and contains the ASSIGNMENT/NAME CHANGE Text record for this mark. Positions 1-2 will contain NC for Name Change. Positions 3-4 = PARTY-TYPE or 99. If positions 3-4 contain 99 then 5-6 will also contain 99, otherwise positions 5-6 will contain zeros. When positions 3-6 contain 9999, the statement refers to an assignment/name change description that may transcend party types. This special entry is only created for the purpose of constructing the Official Gazette. </name-change-explanation></case-file-owner></case-file-owners>DESIGN SEARCHES SECTION. <design-searches>: The <design-searches> element is optional and occurs zero or one times between the <design-searches> start and </design-searches> end tags, which contains the equivalent of all TWTF/DSGN records. Each design searches element will contain the optional design search element. <design-search>: The <design-search> element is optional and occurs zero or more times between the <design-search> start and </design-search> end tags, which contains the equivalent of a TWTF/DSGN record instance. Each design search element will contain the optional code element. <code>: The <code> element is optional and occurs zero or one times between the <code> start and </code> end tags and contains the DESIGN SEARCH CODE, a six-position numeric field describing Design Search Code Classifications. These codes are applicable to marks containing all illustration drawing or design (mark Drawing Code 2) or an illustration drawing or design which also includes word(s)/letter(s)/numbers(s) (Mark Drawing Code 3). The 1st two positions contain the category. The 3rd and 4th positions contain the division. The 5th and 6th positions contain the section. This field must appear at least one time for each DSGN record, and may appear up to 48 times per record. The PTO Design Search Code Manual describes the design search codes. </code></design-search></design-searches> INTERNATIONAL REGISTRATION SECTION. <international-registration>: The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. NOTE: Any of the following elements that do not have the required date will contain zeros. <international-registration-number>: The <international-registration-number> element is mandatory and occurs one time between the start tag <international-registration-number> and end tag </international-registration-number> containing the INTERNATIONAL REGISTRATION NUMBER, a maximum ten-position alphanumeric field. This number is assigned by the International Bureau. </international-registration-number><international-registration-date>: The <international-registration-date> element is mandatory and will occur one time between the start tag <international-registration-date> and end tag </international-registration-date> containing the DATE the INTERNATIONAL REGISTRATION was registered by the International Bureau. This is an 8-position numeric date

in the format YYYYMMDD. </international-registration-date><international-publication-date>:
The <international-publication-date> element is mandatory and will occur one time between the
start tag <international-publication-date> and end tag </international-publication-date>
containing the INTERNATIONAL BUREAU PUBLICATION DATE. This is the date the
International Bureau published the international registration, an 8-position numeric date in the
format YYYYMMDD.</international-publication-date><international-renewal-date>: The
<international-renewal-date> element is mandatory and will occur one time between the start
tag <international-renewal-date> and end tag </international-renewal-date> containing the
INTERNATIONAL BUREAU REGISTRATION RENEWAL DATE. This is the date by which the
International Registration must be renewed, an 8-position numeric date in the format
YYYYMMDD. </international-renewal-date><auto-protection-date>: The <auto-protection-date>
element is mandatory and will occur one time between the start tag <auto-protection-date> and
end tag </auto-protection-date> containing the AUTO PROTECTION DATE. This is the date the
US application will automatically be assigned a US registration number unless the US has
issued a First Refusal Notification to the International Bureau – see first-refusal-in), an 8-
position numeric date in the format YYYYMMDD.</auto-protection-date><international-death-
date>: The <international-death-date> element is optional and occurs zero or one times
between the start tag <international-death-date> and end tag </international-death-date>
containing the INTERNATIONAL DEATH DATE. This is the date on which the International
Registration expired, an 8-position numeric date in the format YYYYMMDD.</international-
death-date><international-status-code>: The <international-status-code> element is mandatory
and will occur one time between the start tag <international-status-code> and end tag
</international-status-code> containing the INTERNATIONAL REGISTRATION STATUS
CODE. The international status code identifies the status reported by the International Bureau
and is a three-position numeric field. RI Status: 100, Literal: IR cancelled as result of change in
IR number, Situation: Dead as a Result of Change in IR number caused by Death/Birth. RI
Status: 101, Literal: IR cancelled, Situation: Dead as a result of Total Cancellation. RI Status:
102, Literal: Death of IR, Situation: Dead as a Result of Non-Renewal, Renunciation or
Cancellation by Holder of International Registration. RI Status: 001, Literal: Request for
extension of protection established, Situation: n/a. </international-status-code>
<international-status-date>: The <international-status-date> element is mandatory and will occur
one time between the start tag <international-status-date> and end tag </international-status-
date> containing the INTERNATIONAL REGISTRATION STATUS DATE. This is the effective
date of the International Registration status code, an 8-position numeric date in the format
YYYYMMDD.</international-status-date><priority-claimed-in>: The <priority-claimed-in>
element is mandatory and will occur one time between the start tag <priority-claimed-in> and
end tag </priority-claimed-in> containing the INTERNATIONAL REGISTRATION FLAG
PRIORITY CLAIMED. A one-position alphabetic field containing a “T” or “F” value. A “T”
indicates the International Registration has claimed priority; a “F” indicates the International
Registration has not claimed priority.</priority-claimed-in><priority-claimed-date>: The <priority-
claimed-date> element is optional and occurs zero or one times between the start tag <priority-
claimed-date> and end tag </priority-claimed-date> containing the INTERNATIONAL
REGISTRATION PRIORITY CLAIMED DATE. This is the date the International Registration
claimed Priority, an 8-position numeric date in the format YYYYMMDD.</priority-claimed-date>
<first-refusal-in>: The <first-refusal-in> element is mandatory and will occur one time between
the start tag <first-refusal-in> and end tag </first-refusal-in> containing the FIRST FLAG
REFUSAL status. A one-position alphabetic field a “T” or “F” value. A “T” indicates the US has
issued a Notice of First Refusal to the International Bureau; a “F” indicates the US has not
issued a Notice of First Refusal to the International Bureau.</first-refusal-in></international-
registration>. The following data in quotations was last updated 6/24/05. “<notification-date>:

The <notification-date> element is optional and occurs zero or one times between the start tag <notification-date-uspto> and end tag </notification-date> and contains an 8-position numeric date in the format YYYYMMDD. This is the date on which the filing was received in the United States Patent and Trademark Office from the International Bureau. MADRID INTERNATIONAL FILING REQUESTS. <Madrid-international-filing-record>: The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. NOTE: Any of the following elements that do not have the required date will contain zeros.<Madrid-international-filing-record><reference-number>: The <reference-number> element is optional and occurs zero or one times between the start tag <reference-date> and end tag </reference-date> containing a unique numeric number assigned by the USPTO to the international filing request. Used for tracking purposes.</reference-number><original-filing-date-uspto>: The <original-filing-date-uspto> element is optional and occurs zero or one times between the start tag <original-filing-date-uspto> and end tag </original-filing-date-uspto > containing the DATE ON WHICH THE INTERNATIONAL FILING REQUEST WAS RECEIVED BY THE USPTO. An 8-position numeric date in the format YYYYMMDD.</original-filing-date-uspto><international-status-code>: The <international-status-code> element is optional and will occur zero or one time between the start tag <international-status-code> and end tag </international-status-code> containing the INTERNATIONAL REGISTRATION STATUS CODE. The international status code identifies the status reported by the International Bureau and is a three-position numeric field. Status: 400, Description: Application for Intl Registration Automatically Certified. Status: 401, Description: Manual Certification Required by MPU. Status: 402, Description: Application for International Registration Not Paid. Status: 403, Description: Application for International Registration Manually Certified. Status: 404, Description: Certification Rejected by MPU. Status: 405, Description: Application for International Registration Sent to IB. Status: 406, Description: Irregularity Received from IB (Response Not Required). Status: 407, Description: Response to Irregularity Received from Applicant. Status: 408, Description: Irregularity Received from IB (Response Required). Status: 480, Description: Application for IR Registered by IB. Status: 498, Description: Abandoned – No Response to Irregularity. Status: 499, Description: Death of International Registration. </international-status-code>: <international-status-date>: The <international-status-date> element is optional and will occur zero or one time between the start tag <international-status-date> and end tag </international-status-date> containing the INTERNATIONAL REGISTRATION STATUS DATE. This is the effective date of the International Registration status code, an 8-position numeric date in the format YYYYMMDD.</international-status-date><irregularity-reply-by-date>: The <irregularity-reply-by-date> element is mandatory and will occur one time between the start tag <irregularity-reply-by-date> > and end tag </irregularity-reply-by-date> containing the DATE SET BY THE INTERNATIONAL BUREAU FOR RESPONSE TO NOTICE OF IRREGULARITY. This is the date the International Bureau has determined a response is due, an 8-position numeric date in the format YYYYMMDD. </irregularity-reply-by-date> <international-renewal-date>: The <international-renewal-date> element is optional and will occur zero or one time between the start tag <international-renewal-date> and end tag </international-renewal-date> containing the INTERNATIONAL REGISTRATION RENEWAL DATE. This is the date by which the International Registration must be renewed, an 8-position numeric date in the format YYYYMMDD. </international-renewal-date><madrid-history-events>: The <madrid-history-events > element is optional and occurs zero or one times between the <madrid-history-events> start and </ madrid-history-events > end tags, which contains a history of all events (submitted to the USPTO) applied against the international filing. Contains the <madrid-history-event>

element. `<madrid-history-event>`: The `<madrid-history-event-statements >` element is occurs one or more times between the `<madrid-history-event>` start and `</ madrid-history-event>` end tags, which contain a specific description for a single transaction applied against the international filing. This element is comprised of the code, description-text, date and number elements. Events will be listed in ascending date order and assigned a sequential number during extraction process. `<code>`: The `<code>` element is optional and will occur zero or one times between the `<code>` start and `</code>` end tags containing the EVENT CODE, an alphanumeric field that represents an event in the prosecution of the Madrid international filing request (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 6 – Madrid Processing History Event Code List `</code>``<description-text>`: The `<description-text>` element is optional and will occur zero or one times between the `<description-text>` start and `</description-text>` end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark `</description-text>``<date>`: The `<date>` element is optional and will occur zero or one times between the `<date>` start and `</date>` end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective. `</date>``<entry-number>`: The `<entry-number>` element is optional and will occur zero or one times between the `<entry-number>` start and `</entry-number>` end tags containing the a sequential number, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when event extracted from table. `</madrid-history-event>``</madrid-history-events>``</case-file>` CASE FILE SECTION `</action-key>``</action-keys>``</file-segment>``</file-segments>` APPLICATION INFORMATION SECTION `</application-information>`.
