XML Elements	Description
<case-file-event-statements>	The <case-file-event-statements> element is optional and occurs zero or one times between the <case-file-event-statements> start and </case-file-event-statements> end tags, which contains the equivalent of a TWTF/EVNT record. Each case file event statements element will contain the optional case-file-event statement element.
<case-file-event-statement>	The <case-file-event-statement> element is optional and occurs one or more times between the <case-file-event-statement> start and </case-file-event-statement> end tags. When present, each case file event statement element will contain the following optional elements.
<code>	The <code> element is optional and will occur zero or one times between the <code> start and </code> end tags containing the EVENT CODE, a four-position alphanumeric field that represents an event in the prosecution of a case (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 5 – Prosecution History Event Code List.
</code>	
<type>	The <type> element is optional and will occur zero or one times between the <type> start and </type> end tags containing the EVENT TYPE, a one-position alphanumeric field that represents the detail information or entry code references. The entry type codes are as follows. Entry Type Description A Allowance for Publication D Assigned to Examiner F First Action I Incoming Correspondence O Outgoing Correspondence R Renewal T TTAB Proceeding X Correction Z Deletion
</type>	
<description-text>	The <description-text> element is optional and will occur zero or one times between the <description-text> start and </description-text> end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark.
</description-text>	
<date>	The <date> element is optional and will occur zero or one times between the <date> start and </date> end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective.
</date>	
<number>	The <number> element is optional and will occur zero or one times between the <number> start and </number> end tags containing the EVENT SEQUENCE NUMBER, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when filed in a data set.
</number>	
</case-file-event-statement>	

CASE FILE EVENT STATEMENTS SECTION	
XML Elements	Description
</case-file-event-statements>	

PRIOR REGISTRATION APPLICATIONS SECTION

XML Elements	Description
<prior-registration-applications>	The <prior-registration-applications> element is optional and occurs zero or one times between the <prior-registration-applications> start and </prior-registration-applications> end tags, which contains the equivalent of all TWTF/PRUS records. Each prior registration applications element will contain the optional other related in and prior registration application elements.
<other-related-in>	The <other-related-indicator> element is optional and occurs zero or more times between the <other-related-in> start and </other-related-in> end tags containing the AND OTHERS, a one-position alphabetic field. A “T” in this field would indicate that the words “and others” appears in conjunction with a list of prior registrations that are claimed as being related to this mark. An “F” would indicate that the statement is not present.
</other-related-in>	
<prior-registration-application>	The <prior-registration-application> element is optional and occurs zero or more times between the <prior-registration-application> start and </prior-registration-application> end tags, which contains the equivalent of a TWTF/PRUS record instance. Each prior registration application element will contain the optional relationship type and number elements.
<relationship-type>	The <relationship-type> element is optional and occurs zero or one times between the <relationship-type> start and </relationship-type> end tags containing the RECORD TYPE, a one-position alphabetic field that defines which of 4 types of record are being stored in the Prior Registration data set. 0 = Prior Registration 1 = Continuity Parent 2 = Continuity Child 3 = NonRegistration Document Control Number
</relationship-type>	
<number>	The <number> element is optional and occurs zero or one times between the <number> start and </number> end tags containing the REEL NUMBER, an eight-position alphanumeric field. This field contains a unique number identifying the applications or registrations to which the application or registration is related as a “child” or “parent” because the original application was divided during examination into two or more applications. Seven digits and a blank are used to enter a registration number. Eight digits are used to enter a serial number. When the record type contains a value of 1 or 2, this field will contain a serial number. An entry with a record type of 0 will contain a registration number. An entry with a record type of 3 will contain a unique control number assigned to the physical document which contains the non registration information.
</number>	
</prior-registration-application>	

PRIOR REGISTRATION APPLICATIONS SECTION

XML Elements	Description
</prior registrations-applications>	

FOREIGN APPLICATIONS SECTION	
XML Elements	Description
<foreign-applications>	The <foreign-applications> element is optional and occurs zero or one times between the <foreign-applications> start and </foreign-applications> end tags containing the equivalent of all TWTF/FRGN records. Each foreign applications element will contain the optional foreign application elements.
<foreign-application>	The <foreign-application> element is optional and occurs zero or more times between the <foreign-application> start and </foreign-application> end tags containing the equivalent of a TWTF/FRGN record instance. Each foreign application element will contain the following optional elements.
<filing-date>	The <filing-date> element is optional and occurs zero or one times between the <filing-date> start and </filing-date> end tags containing the FOREIGN FILING DATE, an eight-position numeric in the format YYYYMMDD.
</filing-date>	
<registration-date>	The <registration-date> element is optional and occurs zero or one times between the <registration-date> start and </registration-date> end tags containing the FOREIGN REGISTRATION DATE, an eight-position numeric in the format YYYYMMDD.
</registration-date>	
<registration-expiration-date>	The <registration-expiration-date> element is optional and occurs zero or one times between the <registration-expiration-date> start and </registration-expiration-date> end tags containing the FOREIGN REGISTRATION EXPIRATION DATE, an eight-position numeric in the format YYYYMMDD.
</registration-expiration-date>	
<registration-renewal-date>	The <registration-renewal-date> element is optional and occurs zero or one times between the <registration-renewal-date> start and </registration-renewal-date> end tags containing the FOREIGN REGISTRATION RENEWAL DATE, an eight-position numeric in the format YYYYMMDD.
</registration-renewal-date>	
<registration-renewal-expiration-date>	The <registration-renewal-expiration-date> element is optional and occurs zero or one times between the <registration-renewal-expiration-date> start and </registration-renewal-expiration-date> end tags containing the FOREIGN RENEWAL REGISTRATION EXPIRATION DATE, an eight-position numeric expiration date for a foreign registration which has been renewed, in the format YYYYMMDD.
</registration-renewal-expiration-date>	
<entry-number>	The <entry-number> element is optional and occurs zero or one times between the <entry-number> start and </entry-number> end tags containing the ENTRY NUMBER, a three-position numeric entry number that will identify the sequence of each entry. FRGN records will be in descending sequence by entry number.
</entry-number>	
<application-number>	The <application-number> element is optional and occurs zero or one times between the <application-number> start and </application-number> end tags containing the FOREIGN APPLICATION NUMBER, a twelve-position alphanumeric, which pertains to Section 44(d).

FOREIGN APPLICATIONS SECTION	
XML Elements	Description
</application-number>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags containing the FOREIGN COUNTRY CODE, a two or three-position alphanumeric, which identifies the country of origin. Refer to Table 2B Country Code List.
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List .
</other>	
<registration-number>	The <registration-number> element is optional and occurs zero or one times between the <registration-number> start and </registration-number> end tags containing the FOREIGN REGISTRATION NUMBER, a twelve-position alphanumeric.
</registration-number>	
<renewal-number>	The <renewal-number> element is optional and occurs zero or one times between the <renewal-number> start and </renewal-number> end tags containing the FOREIGN RENEWAL REGISTRATION NUMBER, a twelve-position alphanumeric.
</renewal-number>	
<foreign-priority-claim-in>	The <foreign-priority-indicator> element is optional and occurs zero or one times between the <foreign-priority-in> start and </foreign-priority-in> end tags containing the FLAG FOREIGN PRIORITY CLAIMED, a one position alphabetic field. This field will contain "T" if foreign priority has been claimed. Otherwise, this field will contain an "F"
</foreign-priority-claim-in>	
</foreign-application>	
</foreign-applications>	

CLASSIFICATIONS SECTION	
XML Elements	Description
<classifications>	The <classifications> element is optional and occurs zero or one times between the <classifications> start and </classifications> end tags containing the equivalent of all TWTF/CLAS records. Each classifications element will contain the classification element.
<classification>	The <classification> element is optional and occurs zero or more times between the <classification> start and </classification> end tags containing the equivalent of a TWTF/CLAS record instance. Each classification element will contain the following optional elements.
<international-code-total-no>	The <international-code-total-no> element is optional and occurs zero or one times between the start <international-code-total-no> and </international-code-total-no> end tags containing NUMBER OF INTERNATIONAL CLASS, a two-position numeric field. The contents of this field will indicate the number of International Codes that appear in the CLS-INTL (CI).
</international-code-total-no>	
<us-code-total-no>	The <us-code-total-no> element is optional and occurs zero or one times between the start <us-code-total-no> and </us-code-total-no> end tags containing NUMBER OF US CLASS, a two-position numeric field. The contents of this field will indicate the number of U.S. Classes that appear in the CLS-US (CUS).
</us-code-total-no>	
<international-code>	<p>The <international-code> element is optional and occurs zero or more times between the start <international-code> and </international-code> end tags containing INTERNATIONAL CLASS CODE, a three-position alphanumeric field. The number of international codes will equal the content of the international-code-total-no element. Each occurrence of this field will be as follows:</p> <p>Trademarks and Service Marks – A three-position numeric field with leading zeros. (Possible values are 001 through 0034 for Goods and 035 through 042 for Services).</p> <p>Certification Marks – A three-position alphabetic field. (Possible values are “A” and “B”).</p> <p>Collective Membership Marks – A three-position numeric field. (Possible value = 200).</p>
</international-code>	
<us-code>	<p>The <us-code> element is optional and occurs zero or more times between the start <us-code> and </us-code> end tags containing US CLASS CODE, a three-position alphanumeric field. The number of US codes will equal the content of the us-code-total-no element. Each occurrence of this field would be as follows:</p> <p>Trademarks and Service Marks – A three-position numeric field (Possible value are 001 through 052 for Goods and 100 through 107 for Services).</p> <p>Certification Marks – A three-position alphabetic field (Possible values are “A” and “B”).</p> <p>Collective Membership Marks – A three-position numeric field. (Possible value = 200).</p>
</us-code>	

CLASSIFICATIONS SECTION																															
XML Elements	Description																														
<code><status-code></code>	<p>The <code><status-code></code> element is optional and occurs zero or one times between the start <code><status-code></code> and <code></status-code></code> end tags containing CLASS STATUS CODE, a one-position alphanumeric, as defined below. <code><status-date></code>	The <code><status-date></code> element is optional and occurs zero or one times between the start <code><status-date></code> and <code></status-date></code> end tags containing STATUS DATE, an eight-position date in the format YYYYMMDD. This date is the date on which current class status was reported.																														
<code></status-date></code>																															
<code><first-use-anywhere-date></code>	The <code><first-use-anywhere-date></code> element is optional and occurs zero or one times between the start <code><first-use-anywhere-date></code> and <code></first-use-anywhere-date></code> end tags containing DATE MARK FIRST USED ANYWHERE, an eight-position date in the format YYYYMMDD. If the month and/or day do not appear in the source document, zeros will appear in that portion of this field.																														
<code></first-use-anywhere-date></code>																															
<code><first-use-in-commerce-date></code>	The <code><first-use-in-commerce-date></code> element is optional and occurs zero or one times between the start <code><first-use-in-commerce-date></code> and <code></first-use-in-commerce-date></code> end tags containing DATE MARK FIRST USED IN COMMERCE, an eight-position date in the format YYYYMMDD, which is regulated by Congress. NOTE: If the month and/or day do not appear in the source document, zeros will appear in that portion of this field.																														
<code></first-use-in-commerce-date></code>																															

CLASSIFICATIONS SECTION	
XML Elements	Description
<code><primary-code></code>	The <code><primary-code></code> element is optional and occurs zero or one times between the start <code><primary-code></code> and <code></primary-code></code> end tags containing PRIMARY CLASS CODE, a three-position alphanumeric field. NOTE: If the filing date of the application is on or after September 1, 1973 (Series Code 73), this field will contain an International Class (CLS-INTL). If the filing date is prior to September 1, 1973 this field will contain a U.S. Class (CLS-US).
<code></primary-code></code>	
<code></classifications></code>	

CORRESPONDENT SECTION	
XML Elements	Description
<correspondent>	The <correspondent> element is optional and occurs zero or one times between the < correspondent > start and </ correspondent > end tags, which contains the address information for the correspondent of record.
<address-1>	The <address-1> element is optional and occurs zero or one times between the <address-1> start and </address-1> end tags and contains the first line of Address Information.
</address-1>	
<address-2>	The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the second line of Address Information.
</address-2>	
<address-3>	The <address-3> element is optional and occurs zero or one times between the <address-3> start and </address-3> end tags and contains the third line of Address Information.
</address-3>	
<address-4>	The <address-4> element is optional and occurs zero or one times between the <address-4> start and </address-4> end tags and contains the fourth line of Address Information.
</address-4>	
<address-5>	The <address-5> element is optional and occurs zero or one times between the <address-5> start and </address-5> end tags and contains the fifth line of Address Information.
</address-5>	
</correspondent>	

CASE FILE OWNERS SECTION	
XML Elements	Description
<case-file-owners>	The <case-file-owners> element is optional and occurs zero or one times between the <case-file-owners> start and </case-file-owners> end tags, which contains the equivalent of all TWTF/OWNER-OWNX records. Each case file owners element will contain the optional case file owner element.
<case-file-owner>	The <case-file-owner> element is optional and occurs zero or one times between the <case-file-owner> start and </case-file-owner> end tags, which contains the equivalent of a TWTF/OWNER-OWNX record instance. Each case file owner element will contain the following optional elements.
<entry-number>	The <entry-number> element is optional and occurs zero or one times between the <entry-number> start and </entry-number> end tags, which contains the ENTRY NUMBER, a two-position entry number, that will identify the sequence of Case File Owner record(s) within the same Party-Type.
</entry-number>	

CASE FILE OWNERS SECTION

CASE FILE OWNERS SECTION	
XML Elements	Description
<nationality>	The <nationality> element is optional and is comprised of either the State or Country element identifying the Place of Origin. Occurs zero or one times between the <nationality> start and </nationality> end tags and contains the CITIZENSHIP value, a two or three-position alphanumeric field. The content of this field will be the State/Country/Other code of the applicant/assignee/registrant citizenship. The state, territories and military states will appear as a two-position alphanumeric code. (Refer to Table 2A State Code List.) The country will appear as a two position alphanumeric code representing the place of origin. (Refer to Table 2B Country Code List). When the data is represented by a three position alphanumeric code, it either represents a geographic region or Government Agency. (Refer to Table 2C Other Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are listed in Table 2C Other Code List.)
<state>	The <state> element is optional and occurs zero or one times between the <state> start and </state> end tags containing the STATE NAME, a two-position alphanumeric, which identifies the place of origin. Refer to Table 2A State Code List.
</state>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags containing the FOREIGN COUNTRY CODE, a two or three-position alphanumeric, which identifies the place of origin. Refer to Tables 2B Country Code List and 2C Other Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are listed in Table 2C Other Code List.)
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region or government agency which represents the owner's place of origin. Refer to Tables 2C Other Code List . (Note: Government agencies/Military States are found in table 2A State Code List, this list also contains Government agencies/Military States that are also represented by a 2 position code.)
</other>	
</nationality>

<code><entity-statement></code>	The <code><entity-statement></code> element is optional and occurs zero or one times between the <code><entity-statement></code> start and <code></entity-statement></code> end tags and contains an Entity Statement for an owner.																																												
<code></entity-statement></code>																																													
<code><party-name></code>	The <code><party-name></code> element is optional and occurs zero or one times between the <code><party-name></code> start and <code></party-name></code> end tags, which contains the complete party name within the Owner Information for the party type identified.																																												
<code></party-name></code>																																													
<code><address-1></code>	The <code><address-1></code> element is optional and occurs zero or one times between the <code><address-1></code> start and <code></address-1></code> end tags and contains ADDRESS1, the first 40 characters of the internal address within the Address Information.																																												
<code></address-1></code>																																													

CASE FILE OWNERS SECTION	
XML Elements	Description
<address-2>	The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the ADDRESS2, the first 40 characters of the street address within the Address Information.
</address-2>	
<city>	The <city> element is optional and occurs zero or one times between the <city> start and </city> end tags and contains the CITY/OTHER FOREIGN DESIGNATION, a 40-position alphanumeric field containing the city or foreign designation of an address.
</city>	
<state>	The <state> element is optional and occurs zero or one times between the <state> start and </state> end tags, and contains the STATE CODE, a two-position alphabetic field containing the State code within the Address Information. . For two-position codes, see Table 2B Country Code List and for three-position codes see Table 2B State Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are also listed in Table 2A State Code List.)
</state>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags and contains the COUNTRY CODE, a two position alphabetic field containing the Country code within the Address Information.
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List .
</other>	
<postcode>	The <postcode> element is optional and occurs zero or one times between the <postcode> start and </postcode> end tags, and contains the U.S. Postal ZIP CODE or a foreign country's postal identification, A one to fifteen-position alphanumeric field
</postcode>	
<dba-aka-text>	The <dba-aka-text> element is optional and occurs zero or one times between the <dba-aka-text> start and </dba-aka-text> end tags and contains the Doing Business As (DBA), Also Known As (AKA) or Trading As (TA) Statement for an owner. When present an owner may have one or more of the 3 types of statements.
</dba-aka-text>	
<composed-of-statement>	The <composed-of-statement> element is optional and occurs zero or one times between the <composed-of-statement> start and </composed-of-statement> end tags, which contains the COMPOSED OF STATEMENT for an owner..
</composed-of-statement>	
<name-change-explanation>	The <name-change-explanation> element is optional and occurs zero or more times between the <name-change-explanation> start and </name-change-explanation> end tags and contains the ASSIGNMENT/NAME CHANGE Text record for this mark. Positions 1-2 will contain NC for Name Change. Positions 3-4 = PARTY-TYPE or 99. If positions 3-4 contain 99 then 5-6 will also contain 99, otherwise positions 5-6 will contain zeros. When positions 3-6 contain 9999, the statement refers to an assignment/name change description that may transcend party types. This special entry is only created for the purpose of constructing the Official Gazette.
</name-change-explanation>

DESIGN SEARCHES SECTION

XML Elements	Description
<design-searches>	The <design-searches> element is optional and occurs zero or one times between the <design-searches> start and </design-searches> end tags, which contains the equivalent of all TWTF/DSGN records. Each design searches element will contain the optional design search element.
<design-search>	The <design-search> element is optional and occurs zero or more times between the <design-search> start and </design-search> end tags, which contains the equivalent of a TWTF/DSGN record instance. Each design search element will contain the optional code element
<code>	<p>The <code> element is optional and occurs zero or one times between the <code> start and </code> end tags and contains the DESIGN SEARCH CODE, a six-position numeric field describing Design Search Code Classifications. These codes are applicable to marks containing all illustration drawing or design (mark Drawing Code 2) or an illustration drawing or design which also includes word(s)/letter(s)/numbers(s) (Mark Drawing Code 3). The 1st two positions contain the category. The 3rd and 4th positions contain the division. The 5th and 6th positions contain the section. This field must appear at lease one time for each DSGN record, and may appear up to 48 times per record.</p> <p>The PTO Design Search Code Manual describes the design search codes.</p>
</code.	
</design-search>	
</design-searches>	

INTERNATIONAL REGISTRATION SECTION	
XML Elements	Description
<international-registration>	The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. NOTE: Any of the following elements that do not have the required date will contain zeros.
<international-registration-number>	The <international-registration-number> element is mandatory and occurs one time between the start tag <international-registration-number> and end tag </international-registration-number> containing the INTERNATIONAL REGISTRATION NUMBER, a maximum ten-position alphanumeric field. This number is assigned by the International Bureau.
</international-registration-number>	
<international-registration-date>	The <international-registration-date> element is mandatory and will occur one time between the start tag <international-registration-date> and end tag </international-registration-date> containing the DATE the INTERNATIONAL REGISTRATION was registered by the International Bureau. This is an 8-position numeric date in the format YYYYMMDD.
</international-registration-date>	
<international-publication-date>	The <international-publication-date> element is mandatory and will occur one time between the start tag <international-publication-date> and end tag </international-publication-date> containing the INTERNATIONAL BUREAU PUBLICATION DATE. This is the date the International Bureau published the international registration, an 8-position numeric date in the format YYYYMMDD.
</international-publication-date>	
<international-renewal-date>	The <international-renewal-date> element is mandatory and will occur one time between the start tag <international-renewal-date> and end tag </international-renewal-date> containing the INTERNATIONAL BUREAU REGISTRATION RENEWAL DATE. This is the date by which the International Registration must be renewed, an 8-position numeric date in the format YYYYMMDD.
</international-renewal-date>	
<auto-protection-date>	The <auto-protection-date> element is mandatory and will occur one time between the start tag <auto-protection-date> and end tag </auto-protection-date> containing the AUTO PROTECTION DATE. This is the date the US application will automatically be assigned a US registration number unless the US has issued a First Refusal Notification to the International Bureau – see first-refusal-in), an 8-position numeric date in the format YYYYMMDD.
</auto-protection-date>	

INTERNATIONAL REGISTRATION SECTION

XML Elements	Description															
<international-death-date>	The <international-death-date> element is optional and occurs zero or one times between the start tag <international-death-date> and end tag </international-death-date> containing the INTERNATIONAL DEATH DATE. This is the date on which the International Registration expired, an 8-position numeric date in the format YYYYMMDD.															
</international-death-date>																
<international-status-code>	<p>The <international-status-code> element is mandatory and will occur one time between the start tag <international-status-code> and end tag </international-status-code> containing the INTERNATIONAL REGISTRATION STATUS CODE. The international status code identifies the status reported by the International Bureau and is a three-position numeric field.</p> <table border="1" data-bbox="304 540 1631 852"> <thead> <tr> <th data-bbox="304 540 472 578">RI Status</th> <th data-bbox="472 540 1024 578">Literal</th> <th data-bbox="1024 540 1631 578">Situation</th> </tr> </thead> <tbody> <tr> <td data-bbox="304 578 472 647">100</td> <td data-bbox="472 578 1024 647">IR cancelled as result of change in IR number</td> <td data-bbox="1024 578 1631 647">Dead as a Result of Change in IR number caused by Death/Birth</td> </tr> <tr> <td data-bbox="304 647 472 685">101</td> <td data-bbox="472 647 1024 685">IR cancelled</td> <td data-bbox="1024 647 1631 685">Dead as a result of Total Cancellation</td> </tr> <tr> <td data-bbox="304 685 472 781">102</td> <td data-bbox="472 685 1024 781">Death of IR</td> <td data-bbox="1024 685 1631 781">Dead as a Result of Non-Renewal, Renunciation or Cancellation by Holder of International Registration</td> </tr> <tr> <td data-bbox="304 781 472 852">001</td> <td data-bbox="472 781 1024 852">Request for extension of protection established</td> <td data-bbox="1024 781 1631 852"></td> </tr> </tbody> </table>	RI Status	Literal	Situation	100	IR cancelled as result of change in IR number	Dead as a Result of Change in IR number caused by Death/Birth	101	IR cancelled	Dead as a result of Total Cancellation	102	Death of IR	Dead as a Result of Non-Renewal, Renunciation or Cancellation by Holder of International Registration	001	Request for extension of protection established	
RI Status	Literal	Situation														
100	IR cancelled as result of change in IR number	Dead as a Result of Change in IR number caused by Death/Birth														
101	IR cancelled	Dead as a result of Total Cancellation														
102	Death of IR	Dead as a Result of Non-Renewal, Renunciation or Cancellation by Holder of International Registration														
001	Request for extension of protection established															
</international-status-code>																
<international-status-date>	The <international-status-date> element is mandatory and will occur one time between the start tag <international-status-date> and end tag </international-status-date> containing the INTERNATIONAL REGISTRATION STATUS DATE. This is the effective date of the International Registration status code, an 8-position numeric date in the format YYYYMMDD.															
</international-status-date>																
<priority-claimed-in>	The <priority-claimed-in> element is mandatory and will occur one time between the start tag <priority-claimed-in> and end tag </priority-claimed-in> containing the INTERNATIONAL REGISTRATION FLAG PRIORITY CLAIMED. A one-position alphabetic field containing a “T” or “F” value. A “T” indicates the International Registration has claimed priority; a “F” indicates the International Registration has not claimed priority.															
</priority-claimed-in>																
<priority-claimed-date>	The <priority-claimed-date> element is optional and occurs zero or one times between the start tag <priority-claimed-date> and end tag </priority-claimed-date> containing the INTERNATIONAL REGISTRATION PRIORITY CLAIMED DATE. This is the date the International Registration claimed Priority, an 8-position numeric date in the format YYYYMMDD.															
</priority-claimed-date>																

INTERNATIONAL REGISTRATION SECTION	
XML Elements	Description
<first-refusal-in>	The <first-refusal-in> element is mandatory and will occur one time between the start tag <first-refusal-in> and end tag </first-refusal-in> containing the FIRST FLAG REFUSAL status. A one-position alphabetic field a “T” or “F” value. A “T” indicates the US has issued a Notice of First Refusal to the International Bureau; a “F” indicates the US has not issued a Notice of First Refusal to the International Bureau.
</first-refusal-in>	
</international-registration>	
<notification-date>	The <notification-date> element is optional and occurs zero or one times between the start tag <notification-date-uspto> and end tag </notification-date> and contains an 8-position numeric date in the format YYYYMMDD. This is the date on which the filing was received in the United States Patent and Trademark Office from the International Bureau.

MADRID INTERNATIONAL FILING REQUESTS	
XML Elements	Description
<madrid-international-filing-record>	The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. NOTE: Any of the following elements that do not have the required date will contain zeros.
<madrid-international-filing-record>	
<reference-number>	The <reference-number> element is optional and occurs zero or one times between the start tag <reference-date> and end tag </reference-date> containing a unique numeric number assigned by the USPTO to the international filing request. Used for tracking purposes.
</reference-number>	
<original-filing-date-uspto>	The <original-filing-date-uspto> element is optional and occurs zero or one times between the start tag <original-filing-date-uspto > and end tag </original-filing-date-uspto > containing the DATE ON WHICH THE INTERNATIONAL FILING REQUEST WAS RECEIVED BY THE USPTO. An 8-position numeric date in the format YYYYMMDD.
</original-filing-date-uspto>

MADRID INTERNATIONAL FILING REQUESTS

XML Elements	Description
<international-renewal-date>	The <international-renewal-date> element is optional and will occur zero or one time between the start tag <international-renewal-date> and end tag </international-renewal-date> containing the INTERNATIONAL REGISTRATION RENEWAL DATE. This is the date by which the International Registration must be renewed, an 8-position numeric date in the format YYYYMMDD.
</international-renewal-date>	
<madrid-history-events>	The <madrid-history-events > element is optional and occurs zero or one times between the <madrid-history-events> start and </ madrid-history-event-s > end tags, which contains a history of all events (submitted to the USPTO) applied against the international filing. Contains the <madrid-history-event> element.
<madrid-history-event>	The <madrid-history-event-statements > element is occurs one or more times between the <madrid-history-event> start and </ madrid-history-event > end tags, which contain a specific description for a single transaction applied against the international filing. This element is comprised of the code, description-text, date and number elements. Events will be listed in ascending date order and assigned a sequential number during extraction process.
<code>	The <code> element is optional and will occur zero or one times between the <code> start and </code> end tags containing the EVENT CODE, an alphanumeric field that represents an event in the prosecution of the Madrid international filing request (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 6 – Madrid Processing History Event Code List
</code>	
<description-text>	The <description-text> element is optional and will occur zero or one times between the <description-text> start and </description-text> end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark
</description-text>	
<date>	The <date> element is optional and will occur zero or one times between the <date> start and </date> end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective.
</date>	
<entry-number>	The <entry-number> element is optional and will occur zero or one times between the <entry-number> start and </entry-number> end tags containing the a sequential number, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when event extracted from table

Table 2C Other Code List (3 digit code)

If the third character is a "C", the code is a geographic region of Canada. (e.g., ABC, PQC).

If the third character is a number, the code is a geographic region of the code that is in the first two positions (e.g., GB1, GB2, CN1, OM1).

If the third character is anything other than a "C" or a number it is used to represent a Government Agency.

9.AF	I	REGISTERED - SEC. 9 FILED/CHECK RECORD FOR SEC. 8
9G8P	O	REGISTERED - SEC. 9 GRANTED/CHECK RECORD FOR SEC. 8

07/11/2005 – Table updates in **bold****Table 6 Madrid International Processing History Event Code List**

CODE	DESCRIPTION
ACERT	AUTOMATICALLY CERTIFIED
ADDCH	CHANGE OF ADDRESS RECEIVED FROM IB
AICXM	AMENDED IMAGE CREATED FOR IB
AMDDR	AMENDED IMAGE HAS BEEN CREATED
APPST	IR CERTIFIED AND SENT TO IB
BRTCP	CHANGE IN OWNERSHIP NOTIFICATION RECEIVED FROM IB
BTHCP	PARTIAL CHANGE OF OWNER RECEIVED FROM IB
CB1CP	START OF JUDICIAL PROCEEDING NOTICE CREATED, TO BE SENT TO IB
CB1SP	START OF JUDICIAL PROCEEDING NOTICE SENT TO IB
CB2CP	END OF JUDICIAL PROCEEDING NOTICE CREATED, TO BE SENT TO IB
CB2SP	END OF JUDICIAL PROCEEDING NOTICE SENT TO IB
CBPCP	PARTIAL CEASING OF EFFECT NOTICE CREATED, TO BE SENT TO IB
CBPSP	PARTIAL CEASING OF EFFECT NOTICE SENT TO IB
CBTCP	TOTAL CEASING OF EFFECT NOTICE CREATED, TO BE SENT TO IB
CBTSP	TOTAL CEASING OF EFFECT NOTICE SENT TO IB
CHGOW	CHANGE OF OWNER RECEIVED FROM IB
CRCRM	CORRECTION CREATED FOR IB
CRCVM	CORRECTION TRANSACTION RECEIVED FROM IB
CREAT	APPLICATION FOR IR REGISTERED BY IB
CRRCV	CORRECTION TRANSACTION RECEIVED FROM IB
CRREF	CORRECTION REFUSAL HAS BEEN CREATED
CRRRP	CORRECTION REFUSAL CREATED
CRRSP	CORRECTION SENT TO IB
DBCRP	DIVISIONAL OF BASE APP NOTICE CREATED, TO BE SENT TO IB
DBCSP	DIVISIONAL OF BASE APP NOTICE SENT TO IB
DTHCP	PARTIAL CHANGE OF OWNER RECEIVED FROM IB
EMPET	PETITION EMAIL RECEIVED
EMRCV	EMAIL RECEIVED
FBARP	REPLACEMENT OF NATIONAL REGISTRATION CREATED, SENT TO IB
FBASP	REPLACEMENT OF NATIONAL REGISTRATION SENT TO IB
FUARP	MERGER OF INTERNATIONAL REGISTRATIONS CREATED, SENT TO IB
FUASP	MERGER OF INTERNATIONAL REG. SENT TO IB
IRABN	ABANDONED - NO POSSIBLE RESPONSE TO AN IRREGULARITY
IRCBP	IRREGULARITY ON CEASING OF EFFECT RECEIVED FROM IB
IRRAC	RESPONSE TO IRREGULARITY REVIEWED AND ACCEPTED
IRRCV	IRREGULARITY RESPONSE RECEIVED FROM APPLICANT
IRREG	IRREGULARITY RECEIVED FROM IB
IRREP	NEW IB REPRESENTATIVE RECEIVED
IRREQ	IRREGULARITY RECEIVED FROM IB (RESPONSE REQUIRED)
IRRET	IRREGULARITY RESPONSE DENIED CERTIFICATION
IRRRJ	RESPONSE TO IRREGULARITY REVIEWED AND REJECTED

CODE	DESCRIPTION
IRSNT	IRREGULARITY RESPONSE SENT TO IB
LIARP	LIMITATION OF I. R. CREATED, TO BE SENT TO IB
LIASP	LIMITATION OF INTERNATIONAL REGISTRATIONS SENT TO IB
LIMLP	LIMITATION OF GOODS RECEIVED FROM IB
LNARP	DECLARED THAT A LIMITATION HAS NO EFFECT CREATED, GOING TO IB
LNASP	DECLARATION THAT A LIMITATION HAS NO EFFECT SENT TO IB
MAARP	CHANGE IN IB REPRESENTATIVE CREATED TO BE SENT TO IB
MAASP	CHANGE IN IB REPRESENTATIVE SENT TO IB
MASGN	APPLICATION FOR IR MISASSIGNED
MCERT	MANUALLY CERTIFIED
MISCL	COMMUNICATION RECEIVED FROM IB
MTRNX	CHANGE IN OWNERSHIP PROCESSED BY IB
NCERT	APPLICATION FOR IR REJECTED BY MPU
NEWAP	NEW APPLICATION FOR IR RECEIVED
PCARP	PARTIAL CANCELLATION OF I. G. CREATED, TO BE SENT TO IB
PCASP	PARTIAL CANCELLATION OF I. R. SENT TO IB
PCBN1	NOTICE OF JUDICIAL ACTIONS ON BASE APPLICATION PROCESSED (CBN1)
PCBN2	NOTICE OF JUDICIAL PROCEEDING DENIED - PROCESSED BY IB
PCBNP	PARTIAL CEASING OF EFFECT PROCESSED BY IB
PCBNT	TOTAL CEASING OF EFFECT PROCESSED BY IB
PCORR	USPTO CORRECTION PROCESSED BY IB
PCPNX	PARTIAL CHANGE IN OWNERSHIP PROCESSED BY IB
PDBNX	DIVISION OF BASE APPLICATION PROCESSED BY IB
