As a Librarian/Media Technologist working in a secondary school, I wish to voice my support for the adoption of the Fair use Guidelines. They have already been invaluable to me in my school situation and in my District where Multi media programs are being produced under a Federal Grant. Knowing what can be and can't be used under all circumstances of those productions and how and when to gain permissions has been of great benefit to our projects. This document has brought copyright to the forefront and has made individuals and school districts aware of the importance of abiding by it. Please adopt the Fair Use Guidelines
