

Dear Karin,

The electronic OG enhancement sounds like a very useful idea. Hopefully, both the OG - Patents PDF and the OG Patents VOG would be implemented, but if only one was to be implemented, I believe the VOG would be more useful.

I have two suggestions: (1) the database should be searchable in some practical manner by the OG citation (e.g. 1235 OG 67); and (2) keyword search results of OG notices should result in a list of hits with titles more useful than those currently provided. For example, the hits could be indicated by the titles of the OG notices. This would allow the user to choose the best of the hits without having to click on each one.

Good luck with this project.
