Subject: E PATENT REFERENCE FEATURE SOLICITED COMMENT

Here is a problem for some users.

Java™ products are required to use the PAIR E-Patent Reference service, but are not currently installed on your computer. Follow these instructions to install the latest versions of Java™ 2 Runtime Environment (JRE) and Java Web Start (JWS) on your computer. You must have local administration rights for your computer.

"Aside from big law firms, not all practitioners: 1. Are on PAIR and 2. May have 'older' computers not equipped for Java™ or the latest versions of Adobe reader (pdf) and 3. Many users may not have the capability or resources to upgrade a computer or have the computer knowledge for manipulating files to install and run Java and other necessary upgrades. The potential future mandatory requirement of the E Patent Reference Feature will, therefore cause a hardship for many practitioners. In such cases, the USPTO should optionally provide 'hard copies' of cited patent references and publications upon request."

Best Wishes,
