Subject: PAIR E-Patent Reference Service

I just tried to get access to one of our applications cited references and noticed that the E-Patent service only listed the PTO-892 references and not the PTO-1449 references. Since this was just a pilot program, I was not sure if everything was put into the system yet. Please let me know if, when this program is instituted, you plan to have all the US patent references available that were cited on all PTO-892 and PTO-1449 filings. Thank you.
