Chapter 1700  Miscellaneous

1701  Office Personnel Not To Express Opinion on Validity, Patentability, Expiration Date, or Enforceability of Patent [R-10.2019]

Every patent is presumed to be valid. See 35 U.S.C. 282, first sentence. Public policy demands that every employee of the United States Patent and Trademark Office (USPTO) refuse to express to any person any opinion as to the validity or invalidity of, or the patentability or unpatentability of any claim in any U.S. patent or the expiration date of any patent, except to the extent necessary to carry out:

(A) an examination of a non-reissue patent application where determination of the expiration date of a patent is necessary to conduct examination of the non-reissue patent application,
(B) an examination of a reissue application of the patent,
(C) a supplemental examination proceeding or reexamination proceeding to reexamine the patent,
(D) an interference or derivation proceeding involving the patent,
(E) a patent term adjustment or extension under 35 U.S.C. 154 and/or 35 U.S.C. 156 where determination of the expiration date of a patent is necessary to determine the adjustment or extension,
(F) a notification that a patent has expired for failure to pay maintenance fee,
(G) a consideration of a request under the regulations (e.g., a petition) wherein determination of patent term is necessary or arises as an ancillary matter, or
(H) an inter partes or post-grant review of the patent.

The question of validity or invalidity is otherwise exclusively a matter to be determined by a court. Likewise, the question of enforceability or unenforceability is exclusively a matter to be determined by a court. Members of the patent examining corps are cautioned to be especially wary of any inquiry from any person outside the USPTO, including an employee of another U.S. government agency, the answer to which might indicate that a particular patent should not have issued. No USPTO employee may pursue a bounty offered by a private sector source for identifying prior art. The acceptance of payments from outside sources for prior art search activities may subject the employee to administrative disciplinary action.

Office employees may provide factual information regarding the calculation of patent term in general (i.e., a design patent term is 15 years-from-grant if the underlying design patent application was filed on or after May 13, 2015, and 14 years-from-grant if the design application was filed earlier). However, office employees should refuse to provide a determination or express an opinion addressing any patent owner or public inquiries as to a specific patent’s expiration date, except as provided above in items A-H. A number of factors may affect calculation of a patent term expiration date, both pre- and post-issuance, that may create difficulty in accurately calculating the term of a patent. In the event of any inquiries, the USPTO has provided a downloadable patent term calculator as a resource to help the public estimate the expiration date of a patent at https://www.uspto.gov/patent/laws-and-regulations/patent-term-calculator. See also MPEP § 2701.

When a field of search for an invention is requested, examiners should routinely inquire whether the
invention has been patented in the United States. If the invention has been patented, no field of search should be suggested.

Employees of the USPTO, particularly patent examiners who examined an application which matured into a patent or a reissued patent or who conducted a reexamination proceeding, should not discuss or answer inquiries from any person outside the USPTO as to whether or not a certain reference or other particular evidence was considered during the examination or proceeding and whether a claim would have been allowed over that reference or other evidence had it been considered during the examination or proceeding. Likewise, employees are cautioned against answering any inquiry concerning any entry in the patent or reexamination file, including the extent of the field of search and any entry relating thereto. The record of the file of a patent or reexamination proceeding must speak for itself.

Practitioners shall not make improper inquiries of members of the patent examining corps. Inquiries from members of the public relating to the matters discussed above must out of necessity be refused and such refusal should not be considered discourteous or an expression of opinion as to validity, patentability or enforceability.

The definitions set forth in \(37 \text{ CFR } 104.1\) and the exceptions in \(37 \text{ CFR } 104.21\) are applicable to this section.

### 1701.01 Office Personnel Not To Testify [R-10.2019]

It is the policy of the United States Patent and Trademark Office (USPTO) that its employees, including patent examiners, will not appear as witnesses or give testimony in legal proceedings, except under the conditions specified in \(37 \text{ CFR Part 104, Subpart C}\). The definitions set forth in \(37 \text{ CFR } 104.1\) and the exceptions in \(37 \text{ CFR } 104.21\) are applicable to this section. Any employee who testifies contrary to this policy will be dismissed or removed.

Whenever an employee of the USPTO, including a patent examiner, is asked to testify or receives a subpoena, the employee shall immediately notify the Office of the USPTO General Counsel. Inquiries requesting testimony shall be also referred immediately to the Office of the USPTO General Counsel.

Any individual desiring the testimony of an employee of the USPTO, including the testimony of a patent examiner or other quasi-judicial employee, must comply with the provisions of \(37 \text{ CFR Part 104, Subpart C}\).

A request by a third party to take deposition testimony of a patent examiner in a pending \textit{ex parte} reexamination proceeding will generally be denied in view of the \textit{ex parte} nature of the reexamination proceeding.

A request for testimony of an employee of the USPTO should be made to the Office of the USPTO General Counsel at least ten (10) working days prior to the date of the expected testimony.

Patent examiners and other USPTO employees performing or assisting in the performance of quasi-judicial functions, are forbidden to testify as experts or to express opinions as to the validity of any patent.

If an employee is authorized to testify, the employee will be limited to testifying about facts within the employee’s personal knowledge. Employees are prohibited from giving expert or opinion testimony. Likewise, employees are prohibited from answering hypothetical or speculative questions. \textit{Fischer & Porter Co. v. Corning Glass Works}, 61 F.R.D. 321, 181 USPQ 329 (E.D. Pa. 1974). See also \textit{In re Mayewsky}, 162 USPQ 86, 89 (E.D. Va. 1969) (deposition of an examiner must be restricted to relevant matters of fact and must avoid any hypothetical or speculative questions or conclusions based thereon); \textit{ShafferTool Works v. Joy Mfg. Co.}, 167 USPQ 170 (S.D. Tex. 1970) (deposition of examiner should be limited to matters of fact and must not go into hypothetical or speculative areas or the bases, reasons, mental processes, analyses, or conclusions of the examiner in acting upon a patent application). Employees will not be permitted to give testimony with respect to subject matter which 
is privileged. Several court decisions limit testimony with respect to quasi-judicial functions performed by employees. Those decisions include *United States v. Morgan*, 313 U.S. 409, 422 (1941) (improper to inquire into mental processes of quasi-judicial officer or to examine the manner and extent to which the officer considered an administrative record); *Western Electric Co. v. Piezo Technology, Inc.*, 860 F.2d 428, 8 USPQ2d 1853 (Fed. Cir. 1988) (patent examiner may not be compelled to answer questions which probe the examiner’s technical knowledge of the subject matter of a patent); *McCulloch Gas Processing Co. v. Department of Energy*, 650 F.2d 1216, 1229 (Temp. Emer. Ct. App. 1981) (discovery of degree of expertise of individuals performing governmental functions not permitted); *In re Nilssen*, 851 F.2d 1401, 7 USPQ2d 1500 (Fed. Cir. 1988) (technical or scientific qualifications of examiners-in-chief are not legally relevant in appeal under 35 U.S.C. 134 since board members need not be skilled in the art to render obviousness decision); *Lange v. Commissioner*, 352 F. Supp. 116, 176 USPQ 162 (D.D.C. 1972) (technical qualifications of examiners-in-chief not relevant in 35 U.S.C. 145 action).

In view of the discussion above, if an employee is authorized to testify in connection with the employee’s involvement or assistance in a quasi-judicial proceeding which took place before the USPTO, the employee will not be permitted to give testimony in response to questions that the Office determines are impermissible. Impermissible questions include, but are not limited to, questions directed to discovering the mental processes or expertise of a quasi-judicial official, such as:

(A) Information about that employee’s:

(1) Background;

(2) Expertise;

(3) Qualifications to examine or otherwise consider a particular patent or trademark application;

(4) Usual practice or whether the employee followed a procedure set out in any Office manual of practice (including the MPEP or TMEP) in a particular case;

(5) Consultation with another Office employee;

(6) Understanding of:

(6a) A patented invention, an invention sought to be patented, or patent application, patent, reexamination or interference file;

(6b) Prior art;

(6c) Registered subject matter, subject matter sought to be registered, or a trademark application, registration, opposition, cancellation, interference, or concurrent use file;

(6d) Any Office manual of practice;

(6e) Office regulations;

(6f) Patent, trademark, or other law; or

(6g) The responsibilities of another Office employee;

(7) Reliance on particular facts or arguments;

(B) To inquire into the manner in and extent to which the employee considered or studied material in performing a quasi-judicial function; or

(C) To inquire into the bases, reasons, mental processes, analyses, or conclusions of that Office employee in performing the quasi-judicial function.

Any request for testimony addressed or delivered to the Office of the USPTO General Counsel shall comply with 37 CFR 104.22(c). All requests must be in writing. The need for a subpoena may be obviated where the request complies with 37 CFR 104.22(c) if the party requesting the testimony further meets the following conditions:

(A) The party requesting the testimony identifies the civil action or other legal proceeding for which the testimony is being taken. The identification shall include the:

(1) Style of the case;

(2) Civil action number;

(3) District in which the civil action is pending;

(4) Judge assigned to the case; and

(5) Name, address, and telephone number of counsel for all parties in the civil action.

(B) The party agrees not to ask questions seeking information which is precluded by 37 CFR 104.23.

(C) The party shall comply with applicable provisions of the Federal Rules of Civil Procedure,
including Rule 30, and give ten (10) working days notice to the Office of the USPTO General Counsel prior to the date a deposition is desired. Fifteen (15) working days notice is required for any deposition which is desired to be taken between November 15 and January 15;

(D) The party agrees to notice the deposition at a place convenient to the USPTO. The Conference Room in the Office of the USPTO General Counsel is deemed to be a place convenient to the Office; and

(E) The party agrees to supply a copy of the transcript of the deposition to the USPTO for its records.

Absent a written agreement meeting the conditions specified in paragraphs (A) through (E), a party must comply with the precise terms of 37 CFR 104.22(c) and the USPTO will not permit a deposition without issuance of a subpoena.

1702 Restrictions on Current and Former Office Employees Regarding Patent Matters [R-10.2019]

35 U.S.C. 4 Restrictions on officers and employees as to interest in patents.

Officers and employees of the Patent and Trademark Office shall be incapable, during the period of their appointments and for one year thereafter, of applying for a patent and of acquiring, directly or indirectly, except by inheritance or bequest, any patent or any right or interest in any patent, issued or to be issued by the Office. In patents applied for thereafter they shall not be entitled to any priority date earlier than one year after the termination of their appointment.

37 CFR 11.10 Restrictions on practice in patent matters.

(a) Only practitioners who are registered under § 11.6 or individuals given limited recognition under § 11.9(a) or (b) are permitted to prosecute patent applications of others before the Office; or represent others in any proceedings before the Office.

(b) Post employment agreement of former Office employee. No individual who has served in the patent examining corps or Office; or represent others in any proceedings before the Office. No individual who has served in the patent examining corps or

(iii) In which said employee participated personally and substantially as an employee of the Office; and

(2) To not knowingly act within two years after terminating employment by the Office as agent or attorney for, or otherwise represent, or assist in any manner the representation of any other person:

(i) Before the Office,

(ii) In connection with any particular patent or patent application,

(iii) If such patent or patent application was pending under the employee’s official responsibility as an officer or employee within a period of one year prior to the termination of such responsibility.

(3) The words and phrases in paragraphs (b)(1) and (b)(2) of this section are construed as follows:

(i) Represent and representation mean acting as patent attorney or patent agent or other representative in any appearance before the Office, or communicating with an employee of the Office with intent to influence.

(ii) Assist in any manner means aid or help another person on a particular patent or patent application involving representation.

(iii) Particular patent or patent application means any patent or patent application, including, but not limited to, a provisional, substitute, international, continuation, divisional, continuation-in-part, or reissue patent application, as well as any protest, reexamination, petition, appeal, interference, or trial proceeding based on the patent or patent application.

(iv) Participate personally and substantially.

(A) Basic requirements. The restrictions of § 11.10(a)(1) apply only to those patents and patent applications in which a former Office employee had “personal and substantial participation,” exercised “through decision, approval, disapproval, recommendation, the rendering of advice, investigation or otherwise.” To participate personally means directly, and includes the participation of a subordinate when actually directed by the former Office employee in the patent or patent application. Substantially means that the employee’s involvement must be of significance to the matter, or form a basis for a reasonable appearance of such significance. It requires more than official responsibility, knowledge, perfunctory involvement, or involvement on an administrative or peripheral issue. A finding of substantiality should be based not only on the effort devoted to a patent or patent application, but also on the importance of the effort. While a series of peripheral involvements may be insubstantial, the single act of approving or participation in a critical step may be substantial. It is essential that the participation be related to a “particular patent or patent application.” (See paragraph (b)(3)(iii) of this section.)

(B) Participation on ancillary matters. An Office employee’s participation on subjects not directly involving the substantive merits of a patent or patent application may not be “substantial,” even if it is time-consuming. An employee whose official responsibility is the review of a patent or patent application solely for compliance with administrative
control or budgetary considerations and who reviews a particular patent or patent application for such a purpose should not be regarded as having participated substantially in the patent or patent application, except when such considerations also are the subject of the employee’s proposed representation.

(C) Role of official responsibility in determining substantial participation. Official responsibility is defined in paragraph (b)(3)(v) of this section. “Personal and substantial participation” is different from “official responsibility.” One’s responsibility may, however, play a role in determining the “substantiality” of an Office employee’s participation.

(v) Official responsibility means the direct administrative or operating authority, whether intermediate or final, and either exercisable alone or with others, and either personally or through subordinates, to approve, disapprove, or otherwise direct Government actions.

(A) Determining official responsibility. Ordinarily, those areas assigned by statute, regulation, Executive Order, job description, or delegation of authority determine the scope of an employee’s “official responsibility.” All particular matters under consideration in the Office are under the “official responsibility” of the Director of the Office, and each is under that of any intermediate supervisor having responsibility for an employee who actually participates in the patent or patent application within the scope of his or her duties. A patent examiner would have “official responsibility” for the patent applications assigned to him or her.

(B) Ancillary matters and official responsibility. Administrative authority as used in paragraph (v) of this section means authority for planning, organizing and controlling a patent or patent application rather than authority to review or make decisions on ancillary aspects of a patent or patent application such as the regularity of budgeting procedures, public or community relations aspects, or equal employment opportunity considerations. Responsibility for such an ancillary consideration does not constitute official responsibility for the particular patent or patent application, except when such a consideration is also the subject of the employee’s proposed representation.

(C) Duty to inquire. In order for a former employee, e.g., former patent examiner, to be barred from representing or assisting in representing another as to a particular patent or patent application, he or she need not have known, while employed by the Office, that the patent or patent application was pending under his or her official responsibility. The former employee has a reasonable duty of inquiry to learn whether the patent or patent application had been under his or her official responsibility. Ordinarily, a former employee who is asked to represent another on a patent or patent application will become aware of facts sufficient to suggest the relationship of the prior matter to his or her former office, e.g., technology center, group or art unit. If so, he or she is under a duty to make further inquiry. It would be prudent for an employee to maintain a record of only patent application numbers of the applications actually acted upon by decision or recommendation, as well as those applications under the employee’s official responsibility which he or she has not acted upon.

(D) Self-disqualification. A former employee, e.g., former patent examiner, cannot avoid the restrictions of this section through self-disqualification with respect to a patent or patent application for which he or she otherwise had official responsibility. However, an employee who through self-disqualification does not participate personally and substantially in a particular patent or patent application is not subject to the lifetime restriction of paragraph (b)(1) of this section.

(vi) Pending means that the matter was in fact referred to or under consideration by persons within the employee’s area of official responsibility.

(4) Measurement of the two-year restriction period. The two-year period under paragraph (b)(2) of this section is measured from the date when the employee’s official responsibility in a particular area ends, not from the termination of service in the Office, unless the two occur simultaneously. The prohibition applies to all particular patents or patent applications subject to such official responsibility in the one-year period before termination of such responsibility.

(c) Former employees of the Office. This section imposes restrictions generally parallel to those imposed in 18 U.S.C. 207(a) and (b)(1). This section, however, does not interpret these statutory provisions or any other post-employment restrictions that may apply to former Office employees, and such former employees should not assume that conduct not prohibited by this section is otherwise permissible. Former employees of the Office, whether or not they are practitioners, are encouraged to contact the Department of Commerce for information concerning applicable post-employment restrictions.

(d) An employee of the Office may not prosecute or aid in any manner in the prosecution of any patent application before the Office.

(e) Practice before the Office by Government employees is subject to any applicable conflict of interest laws, regulations or codes of professional responsibility. Pursuant to 35 U.S.C. 4, patent examiners, other Office employees, and Office officers may not apply for a patent or acquire any right or interest in any patent during the period of their employment with the Office and for one year thereafter. An Office employee or officer who is named as an inventor in a patent application will be presumed (1) to be legally incapable of signing the inventor’s oath or declaration pursuant to 35 U.S.C. 4, or (2) to refuse to sign the inventor’s oath or declaration based on Office employee status. For applications filed on or after September 16, 2012, a substitute statement under 37 CFR 1.64 may be filed in lieu of the oath or declaration without contacting the current employee or officer of the Office.

See also MPEP § 309.
1703 The Official Gazette [R-10.2019]

The *Official Gazette of the United States Patent and Trademark Office* (Official Gazette) is published electronically every Tuesday in two sections, the *Official Gazette — Patents* and the *Official Gazette — Trademarks*.

The *Official Gazette — Patents* reports the reexamination certificates, reissues, plant patents, utility patents, and design patents issued and statutory invention registrations (if any) published on that day. The *Electronic Official Gazette — for Patents* (eOG:P) ([www.uspto.gov/learning-and-resources/official-gazette/official-gazette-patents](http://www.uspto.gov/learning-and-resources/official-gazette/official-gazette-patents)) allows browsing through the issued patents for the week. The eOG:P can be browsed by classification or type of patent, for example, utility, design, and plant. Specific patents can be accessed by class/subclass or patentee name. Links are provided to the various pages of the eOG:P:

(A) *Browse by CPC or USPC* page to access patents by a specific classification;

(B) *Classification of Patents* page to link to patents issued within specified CPC classes, links to Utility documents and of USPC class ranges with links to Design and Plant documents, and a link to a listing of Class Designations and Descriptions;

(C) *Browse Granted Patents* page to access a patent by patent number or patents by type as well as links to certificates resulting from reexaminations, supplemental examinations and administrative trials;

(D) *Index of Patentees* page to browse by names of inventors and assignees in either a cumulative alphabetical index or individual indexes by type of patent. Each patentee listing contains a link to the patent;

(E) *Geographical Index of Inventors* to link to patents by the state or country of residence of the first listed inventor; and

(F) *Notices* page to link to the text of Patent and Trademark Office Notices for the week.

As to each patent, the following information may be given:

(A) Patent number;

(B) Title of the invention;

(C) Name of inventor(s), city, and state or country of residence;

(D) Assignee's name, city, and state or country of residence, if assigned;

(E) Applicant's name, city, and state or country of residence;

(F) Filing date and application number;

(G) For reissue patents, the original patent number and issue date, and the original application number and filing date;

(H) U.S. benefit application data, if any;

(I) PCT or international design application data, if any;

(J) Foreign priority application data, if any;

(K) Patent Application Publication Number and Publication date, if any;

(L) International classification;

(M) CPC classification;

(N) U.S. classification by class and subclass (for Design and Plant documents);

(O) Number of claims;

(P) Selected figure of the drawing, if any;

(Q) A claim or claims.

The *Official Gazette — Trademarks* is published electronically and contains an illustration of each trademark published for opposition, an alphabetical list of registered trademarks, a classified list of registered trademarks, an index of registrants, a list of canceled trademark registrations, and a list of renewed trademark registrations.

The information in the *Official Gazette* pertaining to each issued patent and each trademark registration can be obtained from the Patent Grants Database and the U.S. Trademark Electronic Search System (TESS) respectively, both also available on the USPTO website.

Regular and special notices of the United States Patent and Trademark Office are published in the *Official Gazette Notices*, both as part of the *Electronic Official Gazette — Patents* (eOG:P) and as a separate publication. The notices that are
included in this publication include notices of patent and trademark suits, disclaimers filed, Certificates of Correction issued, lists of applications and patents available for license or sale, notices of 37 CFR 1.47 applications, and general information such as orders, notices, changes in rules, changes in classification, certain adverse decisions in interferences, the condition of work in the Office, registration of attorneys and agents, reprimands, suspensions, and exclusions of registered attorneys and agents, and notices to parties not reached by mail. The Official Gazette Notices are available on the United States Patent and Trademark Office website (www.uspto.gov/learning-and-resources/official-gazette).

1704 Application Records and Reports [R-07.2015]

The PALM (Patent Application Locating and Monitoring) System is the automated data management system used by the United States Patent and Trademark Office (USPTO) for the retrieval and/or online updating of the computer record of each patent application. The PALM System also maintains examiner time, activity, and docket records, and technical support staff backlog records.

Information retrieval from PALM is by means of the PALM intranet. Transactions are entered by keyed entries or by making an appropriate choice in a drop down menu. Among other items, classification, examiner docket, attorney, inventor, status, and prosecution history data as well as the location of each paper application can be retrieved and updated online with PALM.

I. DOCKET REPORTS

The recording of changes to examiner dockets is accomplished by PALM simultaneously with the recording of incoming and outgoing communications, transfers of applications to and from dockets, and other types of updating of the application record. The status of each examiner’s docket can be determined by means of the PALM intranet and is supplemented by periodic printed or electronic reports. Docket reports that are generated by PALM include the individual examiner new and amended docket which lists applications as regular, special, or expedited applications in priority order; the individual examiner rejected application docket; the individual examiner new application profile, which lists the totals of new applications in each docket, sorted by month of filing; and various summaries of the above reports at the art unit, Technology Center (TC), and corps levels.

II. BIWEEKLY TIME AND ACTIVITY REPORTS

All reporting of examiner time and activity is on a biweekly basis. Each examiner’s examining and non-examining time, as entered in the Web Time and Attendance System is used by PALM in the computation of productivity data. The biweekly reports produced include the individual Biweekly Examiner Time and Activity Report which lists, by application number, all applications for which actions have been counted during the biweekly period. The type of action counted for each application is also indicated on the report. This report also includes examiner time data, an action summary, and cumulative summaries to date for the current quarter and fiscal year. Various summary reports at the Art Unit, TC, and Corps levels are also produced.

1705 Examiner Docket, Time, and Activity Recordation [R-10.2019]

Actions prepared by examiners are submitted electronically and sent to their respective legal instrument examiners for entry of the type of Office action into the PALM System and for mailing.

Each examiner’s action that is counted and reported to the PALM system will be listed by application number on the Biweekly Examiner Time and Activity Report. The Biweekly Examiner Time and Activity Report should be checked by the examiner to verify that all applications worked on for the biweekly report period are properly listed.

Examples of examiner’s actions that are reported to PALM by the legal instrument examiner, but are not listed on the Biweekly Examiner Time and Activity Report, include examiner’s amendments, actions in reexamination proceedings, interview summaries, transfers of applications, and supplemental Office actions and miscellaneous Office letters which do not set a period for reply.
I. COUNTING OF FIRST ACTION ON THE MERITS (FAOM)

Office actions on the merits consist of rejections (final and non-final), *Ex parte Quayle* actions, and allowances.

The first time an examiner performs one of the above merit actions, credit is received for a First Action on the Merits (FAOM) on the production reports.

A second/subsequent FAOM usually occurs when the first action is a restriction/election action and the second action is an action on the merits. The PALM system will automatically determine if it is a FAOM. If the second action is a FAOM, the action will be listed and credited on the Biweekly Examiner Time and Activity Report as a Second/Subsequent FAOM.

II. COUNTING OF DISPOSALS

An examiner receives a “disposal” credit for the following actions:

(A) Allowance;
(B) Abandonment;
(C) Requests for Continued Examination;
(D) Examiner’s Answer;
(E) International Preliminary Examination Report;
(F) Statutory Invention Registration (SIR) disposal (only after a FAOM; see MPEP § 1101);
and
(G) Institution of an interference or derivation proceeding wherein the application would be in condition for allowance but for the interference or derivation proceeding.

These same items constitute the “disposals” for performance evaluation of examining art units and TCs. However, disposals at the Office level consist only of allowances and abandonments.

For either an allowance or an abandonment after an Examiner’s Answer or decision by a court or the Patent Trial and Appeal Board, no disposal credit is received, though these actions are indicated on the Biweekly Examiner Time and Activity Report.

III. CORRECTION INFORMATION

(A) If any information is either missing from or incorrect on the Biweekly Examiner Time and Activity Report, the examiner should promptly notify their supervisory patent examiner (SPE) and either the legal instrument examiner or PALM troubleshooter by providing all the pertinent information necessary to make the changes to the PALM system (e.g., examining hours, application number, type of action, etc.).

(B) The PALM troubleshooter or legal instrument examiner will report the necessary changes and corrections directly into PALM. These changes will be listed on the next Biweekly Examiner Time and Activity Report.

(C) If any information is missing from the last Biweekly Examiner Time and Activity Report of a quarter (except at the end of a fiscal year) or is incorrect, the examiner should promptly notify the PALM troubleshooter or legal instrument examiner and his/her supervisory patent examiner (SPE). The PALM troubleshooter or legal instrument examiner will make the appropriate changes directly into the PALM system. The changes will be listed on the next Biweekly Examiner Time and Activity Report. However, these changes will not be reflected in the previous Quarter’s Report; the examiner’s SPE may manually make an adjustment to the records to show these changes.

(D) In order to ensure that all PALM reports are correct at the end of the fiscal year (rating period), a special correction cycle is provided on the PALM system. If any information is missing from or is incorrect on the last Biweekly Examiner Time and Activity Report, the examiner should immediately notify the legal instrument examiner and their SPE. These changes will be reflected in the examiner’s final biweekly report for the entire fiscal year.
I. COURT DECISIONS

The Office of the Solicitor forwards to the Office of the Commissioner for Patents copies of all recent court decisions in patent cases where a precedential opinion is issued. The Office of the Commissioner for Patents will routinely forward these opinions to TC Directors, the Office of Patent Training, and the Director of the Office of Patent Quality Assurance. TC Directors, in turn, are to make copies available to supervisors and other individuals as the TC Director determines to be appropriate. TC Directors are encouraged to discuss the contents of the opinions in their staff meetings, particularly where such meetings are being held to reinforce examination quality.

II. PATENT TRIAL AND APPEAL BOARD DECISIONS

A decision rendered by the Patent Trial and Appeal Board (Board) is returned to the examiner. The examiner takes action consistent with the decision rendered by the Board unless rehearing of the Board decision is requested (MPEP § 1214.03). The TC Director may circulate and discuss the decision among some or all of the supervisors in the TC, and the supervisors, in turn, may circulate the decision among the examiners in their art units, depending on the subject matter or issues in the decisions.

In the event the Patent Trial and Appeal Board (Board) or court decision is one that significantly adds to the body of law by, for example, addressing a new legal or procedural issue, or providing a new interpretation of a prior decision, such a decision may result in a United States Patent and Trademark Office (USPTO) memorandum pointing out the significance of the decision to the examination process. When any examiner or supervisor in the Patent Examining Corps (Corps) concludes that a recent decision of the Board or a court affects existing USPTO policy or practice, the matter should be brought to the attention of the appropriate TC Director through normal chain-of-command procedures.

When the TC Director believes that guidance to the Corps is warranted as a result of a decision, the TC Director should consult with the Deputy Commissioner for Patent Examination Policy and provide a draft of the guidance that is recommended as appropriate under the circumstances. The Deputy Commissioner for Patent Examination Policy will then consult appropriate Office officials, as necessary, to formulate a recommendation to the Commissioner for Patents on the policy implications of the decision's opinion.

It may be necessary for the Director, General Counsel, Solicitor, Chief Administrative Patent Judge, Commissioner for Patents, Deputy Commissioner for Patent Examination Policy, Deputy Commissioner for Patent Operations and TC Director making the recommendation to meet to review and discuss the policy ramifications of the decision's opinion and recommended guidance to enable the Director to determine how the USPTO will proceed.

Communication of the determination of the policy implications of the court or Board decision will normally take place by either notice in the Official Gazette and/or via memorandum to USPTO personnel. Ultimately, the policy implications of the decision will be officially incorporated into the Manual of Patent Examining Procedure and Office of Patent Training curriculum materials during the next update cycle for these reference materials.
1722-1729 [Reserved]

1730 Information Sources [R-10.2019]

I. IN GENERAL

General information about patents, trademarks, products and services offered by the United States Patent and Trademark Office (USPTO), and other related information is available by contacting the USPTO Contact Center at:

800-PTO-9199 or 571-272-1000
(TDD) 571-272-9950

An automated message system is available 7 days a week, 24 hours a day providing informational responses to frequently asked questions and the ability to order certain documents. Customer service representatives are available to answer questions, send materials or connect customers with other offices of the USPTO from 8:30 a.m. - 8:00 p.m. ET, Monday-Friday (excluding federal holidays).

For other technical patent information needs, the Inventors Assistance Center can be reached through customer service representatives at the above numbers, Monday through Friday (except federal holidays) from 8:30 a.m. to 5:00 p.m. ET.

General information can also be obtained in person from the Public Search Facilities of the USPTO. See subsection IV. below.

II. USPTO INTERNET SITE

A. General Information

The USPTO website (www.uspto.gov) provides a wealth of information to all users. The USPTO website offers links to news and notices (such as announcements, press releases, Official Gazette Notices and Federal Register Notices), USPTO contacts and addresses, activities and education related pages (such as the PTDL program and the Kids Pages), patent specific information (such as issued patents and published patent applications, general information pertaining to applying for a patent, electronic filing of patent applications, and reference materials such as the MPEP and examination guidelines), and trademark specific information (such as the Trademark Manual of Examining Procedure and the U.S. Trademark Electronic Search System (TESS)). In addition, the website allows downloading of a variety of USPTO forms (including PCT forms), ordering copies of patents and trademarks, accessing a list of all current fees, paying patent maintenance fees, replenishing deposit accounts, accessing various legal materials, linking to related websites, etc.

B. Electronic Business

The Patent Electronic Business Center (EBC) assists USPTO customers with electronic patent application submissions via the Electronic Filing System (EFS-Web) and with the review of patent applications in Public and Private PAIR. The EBC offers online electronic filing information, instructional material, PatentIn and Checker support and is available to assist users through one-on-one support during its normal business hours. The EBC also serves as a liaison in directing customers to other USPTO organizations that can address their specialized business issues and needs. The hours of operation of the EBC are Monday through Friday, 6 a.m. - midnight (ET). The EBC can be reached by telephone at 866-217-9197 (toll-free) or 571-272-4100. The EBC may be reached by email at ebc@uspto.gov and by fax at 571-273-0177.

1. USPTO Databases

(a) Issued Patents

The Patent Grants Database provides access to the full-text of all U.S. patents issued since 1976, and to the full-page images of all U.S. patents issued since 1790.

(b) Published Applications

(c) Status Information

Status information relating to patent applications is available through the Patent Application Information Retrieval (PAIR) system. There is both a public and
private side to PAIR. In public PAIR, information is available relating to issued patents, published patent applications, and applications to which a patented or published application claims domestic priority. In private PAIR, an applicant (or a registered practitioner with power of attorney) can securely track the progress of the applicant's application(s) through the USPTO. Private PAIR makes available information relating to unpublished patent applications, but the applicant must associate a Customer Number with the application to obtain access. See MPEP § 403 for Customer Number practice.

(d) Image File Wrapper (IFW)

The Image File Wrapper (IFW) system uses image technology to replace the paper processing of patent applications in the Office. Paper components of these application files (including the specification, oath or declaration, drawings, information disclosure statements, amendments, Office actions, and file jacket notations) have been scanned to create electronic image files. For patent applications in the IFW system, the IFW file is the Official file and no access is granted to the original paper document sheets used to create the IFW file. All processing and examination is conducted using the electronic images instead of the paper source documents.

If an IFW file has been created for a patented application, published application, or an application to which a patented or published application claims domestic priority, the IFW file (with the exception of non-patent literature) is accessible through public PAIR. All patent applications filed after June 30, 2003 have been scanned into the IFW system and will be available in public PAIR as soon as they have been published or patented. Pending applications filed before June 30, 2003 are scanned into IFW as incoming papers are received in the Office. Non-patent literature (NPL) may be viewed using private PAIR (if an IFW file has been created) or obtained from the USPTO Office of Public Records.

Questions about IFW images viewed in PAIR should be directed to the Patent EBC.

(e) Assignments on the Web (AOTW)

Assignment information is available for issued patents and published applications recorded since August 1980. AOTW is available at www.uspto.gov/patent/laws-and-regulations/power-attorney-and-assignment/assignments-web-aotw. Questions or concerns regarding the data displayed may be directed to the Assignment Services Division at assign@uspto.gov or 571-272-3350.

(f) Global Dossier Public Access

Global Dossier Public Access provides secure, online, one-stop access to and management of dossier information of all applications that comprise a family and that have been filed in multiple participating patent offices. This includes the IP5 Offices, international applications filed under the Patent Cooperation Treaty (PCT), as well as patent applications from World Intellectual Property Organization-Centralized Access to Search and Examination (WIPO-CASE) participating offices. Global Dossier includes a Citation List that provides a comprehensive listing of relevant citations in related applications that share a common priority claim. By using this service, examiners are able to view Office actions (along with machine translations), citations, and classification data for those applications in real time. In addition, Global Dossier provides Office action Indicators to assist examiners quickly identify applications that contain Office actions. See www.wipo.int/case/en/ for additional information regarding WIPO-CASE. For more information regarding the Global Dossier see https://www.uspto.gov/patents-getting-started/interational-protection/global-dossier-initiative.

2. Transacting Electronic Business

(a) Filing Applications and Other Documents

The Electronic Filing System-Web (EFS-Web) allows customers to electronically file patent application documents securely via the Internet. See the EFS-Web Legal Framework

for submissions via EFS-Web. See also MPEP § 502.05.

(b) Paying Fees and Replenishing Deposit Accounts

The Office of Finance Online page Fees Self-Service Portal available at https://fees.uspto.gov/ may be used to access the Patent Maintenance Fees Storefront to pay maintenance fees, the Financial Manager to maintain and replenish deposit account, or the current USPTO Fee Schedules.

(c) Ordering Copies and Publications

Copies of patent applications as filed and patent file wrappers that have been issued or published are available online from the Certified Copy Center (CCC) Storefront at the MyUSPTO log in link (https://my.uspto.gov). Presentation patents (a certified copy of the first page of an issued patent having a special ribbon and seal available for commemorative purposes) may also be ordered. Contact OPR at 1-800-972-6382 or 571-272-3150 for more information.

III. PCT

For questions and information concerning the Patent Cooperation Treaty (PCT), the PCT Help Desk is available to provide assistance and may be reached by telephone at 571-272-4300 between the hours of 8:30 a.m. and 5:00 p.m. (ET), Monday through Friday, or by facsimile at 571-273-0419, 24 hours a day. In addition, helpful information is available through the Internet at the International Patent Legal Administration page of the USPTO website at http://ptoweb.uspto.gov/patents/oipc/ipla.html and at the World Intellectual Property Office website (www.wipo.int/portal/en/index.html).

IV. USPTO SEARCH AND INFORMATION RESOURCE FACILITIES

The following USPTO search and information resource facilities are accessible to the public:

(A) Public Search Facility (Madison East, first floor, 600 Dulany St., Alexandria, VA 22314) at 571-272-3275 (Hours: Weekdays, 8:00 a.m. to 8:00 p.m., ET);

(B) Scientific and Technical Information Center

(1) Main Library (Remsen Bldg., first floor, 400 Dulany St., Alexandria, VA 22314) at 571-272-3547

(2) Biotech/Chemical Library (Remsen 1D58) at 571-272-2520 (Hours: Weekdays, 8:30 a.m. to 5:00 p.m., ET); and

(C) File Information Unit (Randolph Square, third floor, 2800 South Randolph St., Arlington, VA 22206) at 703-756-1800 (Hours: Weekdays, 7:00 a.m. to 6:00 p.m., ET).

V. REGISTERED PRACTITIONERS

The USPTO cannot recommend any particular attorney or agent, or aid in the selection of an attorney or agent. See MPEP § 401. A list of Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office is available on the USPTO website at https://oedci.uspto.gov/OEDCI/.

VI. MISCELLANEOUS

A. Recently Filed Applications

For information and questions concerning recently filed patent applications and filing receipts, contact the Application Assistance Unit at 571-272-4200 (hours: weekdays, 8:30 a.m. to 5:00 p.m., ET).

B. Pre-Grant Publication

For inquiries concerning projected pre-grant publication dates, contact the Application Assistance Unit at 571-272-4200.

C. Status Information

For information on the status of a patent application, patent applicants who have access to PAIR should check PAIR. Alternatively, applicants may contact the Application Assistance Unit at 571-272-4200.
D. Correspondence

For information pertaining to mail, facsimile, or hand-delivery of correspondence to the USPTO, see MPEP §§ 502-502.01. For information pertaining to Internet electronic mail (email) correspondence with the USPTO, see MPEP § 502.03.

E. Copies of Documents

Inquiries regarding certified or uncertified copies of documents, including patent applications-as-filed, patent related file wrappers, and patent copies, should be directed to the Office of Public Records’ (OPR) Patent and Trademark Copy Fulfillment Branch Customer Service at 571-272-3150 or 1-800-972-6382. The Certified Copy Center (CCC) Storefront allows USPTO customers to order certified copies from both published and unpublished patent applications. The CCC Storefront provides a one-stop shop solution for certified copies of documents from both published and unpublished patent applications by including a mechanism for customers to demonstrate their authority to access unpublished patent documents. Access to the CCC Storefront is located at the MyUSPTO log in link (https://my.uspto.gov). Customers will need to have a USPTO.gov account to access the CCC Storefront. To order file histories for self-service copying, contact the File Information Unit at 703-756-1800.

F. Maintenance Fees

Information regarding maintenance fees may be obtained from the Patent Application Information Retrieval (PAIR) system on the USPTO website, or by contacting the Receipts Accounting Division at 571-272-6500. See MPEP § 2570 for additional information.

G. Assignments

For questions pertaining to filing assignments or other documents affecting title, contact Assignment Recordation Branch at 571-272-3350 or email questions to EPAS@uspto.gov. Documents may be submitted to the Assignment Branch by facsimile at 571-273-0140. See MPEP § 302.09 for additional information.

H. Petitions

Petitions regarding the filing of patent applications, revival of abandoned applications, reinstatement of expired patents, withdrawal of patent applications from issue, small entity entitlement, review of previous decisions of the Technology Centers, suspension of regulations, and questions not specifically provided for by regulations are administered by the Office of Petitions. See MPEP § 1002.02(b). For matters decided by the Office of Petitions, the appropriate USPTO personnel may be reached at the Petitions Help Desk at 571-272-3282.

Resource information and reference materials regarding petitions handled by the Office of Petitions are available at www.uspto.gov/patents-application-process/petitions. The website also describes various ways available to file petitions, including EFS-Web, mail (United States Postal Service (USPS) and non-USPS), ePetition, facsimile, and hand carry. Note that a petition to withdraw an application from issue may be filed as an ePetition or sent by facsimile to 571-273-0025 (all other facsimile transmissions to the Office of Petitions should be sent to the Central FAX Number 571-273-8300). Urgent petitions to withdraw an application from issue may also be filed as an ePetition.

I. PatentIn

For help related to downloading the PatentIn software program or using PatentIn, contact the Patent Electronic Business Center at 866-217-9197 or via email at ebc@uspto.gov (see subsection II.B. above). See MPEP § 2430 for additional information.
