

Chapter 100 Secrecy and Access

- 101 General
- 102 Information as to Status of an Application
- 103 Right of Public to Inspect Patent Files and some Application Files
- 104 Power to Inspect Application
- 105 Disbarred Attorney Cannot Inspect
- 106 Control of Inspection by Assignee
- 106.01 Rights of Assignee of Part Interest
Special Security Cases
- 107 "Secrecy Order" Cases
- 107.01 "Review" of application for Secrecy Order
- 107.02 Prosecution of "Secrecy Order" Cases
- 108 Applications relating to Atomic Energy
- 109 Security Markings

101 General

Extract from Rule 14. Applications preserved in secrecy. (a) Pending applications are preserved in secrecy. No information will be given by the Office respecting the filing by any particular person of an application for a patent, the pendency of any particular case before it, or the subject matter of any particular application, nor will access be given to or copies furnished of any pending application or papers relating thereto, without written authority of the applicant, or his assignee or attorney or agent, unless it shall be necessary to the proper conduct of business before the Office or as provided by these rules.

Examiners, while holding interviews with attorneys and applicants, should be careful to prevent exposures of files and drawings of other applicants. (Basis: Notice of June 12, 1918.)

Extreme care should be taken to prevent inadvertent disclosure of the filing date or serial number of any application filed by another party. This applies not only to Office actions but also to notes (usually in pencil) in the file wrapper.

102 Information as to Status of an Application

The Office will give information to any member of the public as to the present status of an application in the matter of its being patented or abandoned where that application is:

(A) a prior application of which a patented application was a continuation or division,

relying on the filing date of said prior application. (B) an application referred to in a U.S. patent. Such information can be had on written request to the Commissioner of Patents.

103 Right of Public to Inspect Patent Files and Some Application Files

Rule 11. Patent files open to the public. After a patent has been issued, the specification, drawings, and all papers relating to the case in the file of the patent are open to inspection by the general public, and copies may be furnished upon paying the fee therefor. The file of any terminated interference involving a patent, or an application on which a patent has subsequently issued, is similarly open to public inspection and procurement of copies.

Whenever a patent relies upon the filing date of an earlier application (See 35 U.S.C. 120), the public is entitled to see the portion of the earlier application that relates to the common subject matter, and also what prosecution, if any, was had in the earlier application of subject matter claimed in the patent. The interested party may file a petition to the Commissioner for access.

Inasmuch as the Post Office address is necessary for the complete identification of the petitioner, it should always be included.

The petition may be filed either with proof of service of a copy upon the attorney of record, if known, in the application to which access is sought, or may be filed in duplicate, in which case the duplicate copy is sent by the Law Examiner to the attorney or owner of the application, who is given a limited period, as a week or ten days, within which to state any objection he may have to the granting of the petition. If no objection is raised, the petition is approved by the Law Examiner; otherwise a decision is rendered by the Commissioner. If there is no objection the petitioner is permitted to see the entire parent application. Otherwise, the petitioner is allowed to order a copy of only that portion of the parent application that relates to the common subject matter. A separate petition should be filed for each application to which access is desired, or sufficient extra copies provided so there may be one for placement in each application file, if the petition be granted, and one for service

upon each attorney of record, if, as sometimes happens, the same applicant has different attorneys in different of his applications. Each petition should show not only why access is desired, but also why petitioner believes he is entitled to access.

The entire application, an abstract or an abridgement of which has been published, is available to the public for inspection and obtaining copies. See 711.06.

Extract from Rule 14. (b) Abandoned applications are likewise not open to public inspection, except that if an application referred to in a United States patent is abandoned and is available, it may be inspected or copies obtained by any person on written request, without notice to the applicant. Abandoned applications may be destroyed after twenty years from their filing date, except those to which particular attention has been called and which have been marked for preservation. Abandoned applications will not be returned.

Rule 14(d) authorizes publication of decisions of the Board of Appeals or of the Commissioner, in abandoned applications, under certain conditions.

104 Power to Inspect Application

No person except the applicant, the assignee whose assignment is of record, or the attorney of record will be permitted to have access to the file of any application, except as provided for under the interference rules, unless written authority from the applicant, assignee, or attorney, identifying the application to be inspected, is filed in the case to become a part of the record thereof, or upon the written order of the Commissioner, which will also become a part of the record of the case. (Basis: Order No. 1271.)

Every power to inspect must be approved in writing and dated by the Examiner in charge of the Group to which the application is assigned before permission to inspect is granted. Permission to inspect may also be granted by the Patent Reference Branch, the Document Services Branch, the Service Section of the Board of Appeals, the Docket Branch and the Issue and Gazette Branch.

Either of joint applicants can grant a power to inspect to a third party. (Basis: Commissioner's Administrative Order No. 10, August 28, 1952.)

A "power to inspect" is, in effect, the same as a "power to inspect and make copies."

The authority of the Examiner to approve powers to inspect extends to the period between allowance and issue.

Where an applicant relied upon his application as a means to interfere with a competitor's business or customers, permission to inspect

the application may be given the competitor by the Commissioner. (Ex Parte Bonnie-B Co. Inc., 1923 C.D. 42; 313 O.G. 453.)

An unrestricted power to inspect given by an applicant is, under existing practice, recognized as good until and unless rescinded. The same is true in the case of one given by the attorney or assignee so long as such attorney or assignee retains his connection with the application.

Permission to inspect given by the Commissioner, however, is not of a continuing nature, since the conditions that justified the permit to inspect when given may not obtain at a later date.

105 Disbarred Attorney Cannot Inspect

Patent Office employees are forbidden to hold either oral or written communication with an attorney who has been suspended or excluded from practice regarding an application unless it be one in which said attorney is the applicant. Power to inspect given to such an attorney will not be accepted.

106 Control of Inspection by Assignee

The assignee of the entire interest in an application may intervene in the prosecution of the case, appointing an attorney of his own choice. (See Rule 32.) Such intervention, however, does not exclude the inventor from access to the application to see that it is being prosecuted properly, unless the assignee makes specific request to that effect. Even when such request is made, the applicant may be permitted to inspect the case on sufficient showing why such inspection is necessary to conserve his rights.

106.01 Rights of Assignee of Part Interest

While it is only the assignee of the entire interest who can intervene in the prosecution of an application or interference to the exclusion of the applicant, an assignee of a part interest or a licensee of exclusive right is entitled to inspect the application.

107 "Secrecy Order" Cases

Title 35, United States Code, section 181 provides, in part, that any invention in which the Government does not have a property interest, and whose publication or disclosure by the granting of a patent might, in the opinion of the Commissioner, be detrimental to the national security, shall be made available to the

defense agencies. Upon notification by the defense agencies, the Commissioner is directed to order that such inventions be kept secret and to withhold the grant of a patent for such period as the national interest requires. Where the Government has a property interest, the interested Government agency determines whether to notify the Commissioner to keep the invention secret.

35 U.S.C. 184, *Filing of application in foreign country*. Except when authorized by a license obtained from the Commissioner a person shall not file or cause or authorize to be filed in any foreign country prior to six months after filing in the United States an application for patent or for the registration of a utility model, industrial design, or model in respect of an invention made in this country. A license shall not be granted with respect to an invention subject to an order issued by the Commissioner pursuant to section 181 of this title without the concurrence of the head of the departments and the chief officers of the agencies who caused the order to be issued. The license may be granted retroactively where an application has been inadvertently filed abroad and the application does not disclose an invention within the scope of section 181 of this title.

The term "application" when used in this chapter includes applications and any modifications, amendments, or supplements thereto, or divisions thereof.

107.01 "Review" of Applications for Secrecy Order

Under 35 U.S.C. 181 the obligation is directly on the Patent Office to appreciate the possible interest of the defense agencies in pending applications and to take steps to make them available to such agencies.

IN ORDER FOR DESIRED CONTROLS TO BE EFFECTIVE AGAINST FOREIGN FILING, THESE STEPS MUST BE TAKEN AT THE TIME THE APPLICATION IS RECEIVED IN THE EXAMINING DIVISION AS A NEW APPLICATION. See Executive Examiner's Notice of Feb. 5, 1952.

It is the responsibility of the Primary Examiner to see that all applications are screened for this purpose and that the applications selected for "review" are promptly forwarded to Group 220, Licensing and Review. It is helpful if a check mark is made in the margin opposite to the part of the specification which is significant in suggesting security review.

The defense agencies also make known to the Patent Office specified technical fields or categories in which they have a particular interest. These are transmitted by Group 220 to the divisions directly concerned. The Pri-

mary Examiners are responsible for submitting all applications within these fields or categories to Group 220 for review. When an application has been so "reviewed" the Primary Examiner is relieved of responsibility in the event any protest based on security breach follows from the issuance of a patent.

Applications in which the Government has an interest need not be reviewed under 35 U.S.C. 181 in the Patent Office. Unusual situations should be brought to the attention of Group 220. (For treatment of security markings see 109.)

Applications in the process of being reviewed by Group 220 may be borrowed by the examiner when reached for action. If applications are submitted for review as soon after filing as possible, they will ordinarily be returned in time for examination purposes. If an application is returned having a label affixed to the file wrapper marked "Submit to Group 220" (formerly the Patent Security Division) the application cannot be sent to issue by Examining Groups until it has been submitted to Group 220 for consideration of processing under Section 152 of the Atomic Energy Act (42 U.S.C. 2182) and/or Section 305c of the Space Act (42 U.S.C. 2547). When an Examiner finds an application in condition for allowance labeled as indicated above he should promptly make a complete interference search in the manner indicated in section 1302.08, prepare and mail a status letter to applicant and forward the application with Form PO-488 to Group 220. Where an application holding the division date, in which review is necessary or has not been completed, is found to be allowable, the situation should be called to the attention of Group 220. When the security status of the application cannot be promptly decided, Group 220 will report the progress that has been made to the Group Supervisory Examiner. Any action to be taken in the case, for the purpose of advancing said division date, must be arranged through the Group Supervisory Examiner.

107.02 Prosecution of "Secrecy Order" Cases

"Secrecy Order" Cases are examined as in other cases, but may not be passed for issue; nor does an interference involving one or more secret cases proceed beyond the approval of the preliminary statements.

In case of a final rejection, while such action must be properly responded to within the six months' period, and an appeal, if filed, must be completed by the applicant, such appeal will not be set for hearing by the Board of

Appeals until the secrecy order is removed, unless specifically ordered by the Commissioner.

In the case of an Interference involving a "Secrecy Order" Case, see 1111.04.

When a "Secrecy Order" Case is in condition for allowance a notice of allowability [Form D-10] is issued, thus closing the prosecution. Any amendments received thereafter are not entered or responded to until such time as the secrecy order is rescinded. At such time amendments which are free from objection will be entered; otherwise they are denied entry.

108 Applications Relating to Atomic Energy

Rule 14(c) reads as follows:

"Applications for patents which disclose or which appear to disclose, or which purport to disclose, inventions or discoveries relating to atomic energy are reported to the Atomic Energy Commission and the Commission will be given access to such applications, but such reporting does not constitute a determination that the subject matter of each application so reported is in fact useful or an invention or discovery or that such application in fact discloses subject matter in categories specified by secs. 151(c) and 151(d) of the Atomic Energy Act of 1954, 68 Stat. 919; 42 U.S.C. 2181."

The Atomic Energy Act of 1954 requires that the Commissioner of Patents shall notify the Atomic Energy Commission of all applications for patent which, in his opinion, disclose inventions or discoveries required to be reported under subsection 151c which reads as follows:

"Any invention or discovery useful (1) in the production or utilization of special nuclear material or atomic energy. . . ."

The term "atomic energy" is defined as all forms of energy released in the course of nuclear fission or nuclear transformation.

It is helpful if a check mark is made in the margin opposite to the part of the specification which is significant in suggesting that the application be reported.

To carry out the responsibilities of the Commissioner under the Act, applications must be inspected promptly when received and those which appear to relate to Atomic Energy **MUST BE PROMPTLY** submitted to Group 220 even though the applications are owned or prosecuted by the United States or, indeed, the Atomic Energy Commission. In considering applications under the terms of Rule 14(c), the relation of the subject matter to national security under Sec. 107.01 is not a significant factor. **EVEN** applications using a well-known radioactive source for any purpose or which disclose inventions having special relation to atomic energy **MUST BE SUBMITTED TO** Group 220. See 706.03(b). (Basis: Notice of April 25, 1956.)

109 Security Markings

Under Executive Order 10,501, 18 Federal Register Number 220, page 7049, standards are prescribed for the marketing, handling, and care of official information which requires safeguarding in the interest of security.

Papers marked as prescribed in the Executive order, and showing that such marking is applied by, or at the direction of, a Government Agency, are accepted in patent applications. All applications or papers in the Patent Office bearing words such as "Secret," or "Confidential," must be promptly referred to Group 220 for clarification or security treatment. Under no circumstances can any such application, drawing, exhibit, or other paper be placed in public records, such as the Patented Files, until all security markings have been considered and declassified or otherwise explained.
