

REMARKS

Careful consideration has been given to the Official Action of April 19, 2005 and it is respectfully submitted that the amendatory action which has been taken places the application into condition for allowance.

Abstract

The Examiner has raised objection to the Abstract of the disclosure because of spacing (typographical) errors and because it is in claim format. The Abstract has been rewritten and overcomes the objections raised by the Examiner.

Specification

The Examiner has raised objection to the Specification because of spacing (typographical) errors therein. In order to overcome this formal objection the specification has been amended to correct the improper spacings. It is respectfully submitted that the Specification is now free from objection. The Specification has also been amended to cancel reference to the claims in favor of the actual claim language.

Claim Objections

The Examiner has objected to the informalities concerning the spacing 'typographical' errors occurring in the claims. The claims have been amended to eliminate these typographical errors.
