

Compilation of Changes to the CPC Scheme Between 2019.02 and 2019.05

Presentation Details

- Entries for new symbols and headings: *Black text in italics*
- Entries for existing symbols and headings
- text insertions: *Green text in italics with yellow background*
 - text deletions: ~~Red strikethrough text with grey background~~
- Entries for deleted symbols and headings: ~~Black strikethrough text~~
- Entries arranged by project.
 - In cases when the originating project cannot be found, "N/A" is given for the Project information (e.g. the change could be due to an Editorial Correction).
 - Projects ending in "-F" indicate finalisation after reclassification was completed.

Project: MP0370 (A63B)

- M A63B 6/00** Mats or the like for absorbing shocks for jumping, gymnastics or the like ~~{{for jogging on the spot A63B 69/0035; resiliently-mounted floors E04F 15/22}}~~
- M A63B 6/02** • for landing, e.g. for pole vaulting ~~{{jumping-mattresses for rescue A62B 1/22}}~~
- M A63B 19/00** Hoop exercising apparatus ~~{{(A63B 21/0608 takes precedence; not driven by the user, e.g. motor driven, A63G 29/00, A63G 31/00)}}~~
- M A63B 19/02** • Freely-movable rolling hoops, e.g. gyrowheels {or spheres or cylinders, carrying the user inside (resisting devices overcoming gyroscopic forces of rotating bodies A63B 21/22; standing on it for equilibrium exercises A63B 26/003; ~~spherical hulls or hulls in the shape of a vertical ring for use in water B63B 1/047~~)}
- U A63B 21/00** Exercising apparatus for developing or strengthening the muscles or joints of the body by working against a counterforce, with or without measuring devices (electric or electronic controls therefor A63B 24/00)
- NOTE
- In this subclass, the following terms or expressions are used with the meaning indicated:
- "resistance" and "resistance force" are often used in the art as synonyms for "counterforce";
 - "interface with the user" covers the part of the apparatus, on which the user directly applies his force
- U A63B 21/06** • User-manipulated weights
- M A63B 21/0608** • {Eccentric weights put into orbital motion by nutating movement of the user ~~(symmetric devices, e.g. hula hoops, put into orbital motion A63B 19/00)}~~
- M A63B 27/00** Apparatus for climbing poles, trees, or the like ({ropes A63B 29/02}; ~~;) safety belts for climbers A62B 35/00; {climbing irons permanently attached to fixed structures E06C 9/04}~~)
- U A63B 29/00** Apparatus for mountaineering (helmets A42B 3/00; non-skid devices or attachments for footwear, e.g. crampons, A43C 15/00; breathing masks or helmets for use at high altitudes A62B 18/00; picks B25D 7/00)
- U A63B 29/02** • Mountain guy-ropes or accessories, e.g. avalanche ropes; Means for indicating the location of accidentally buried, e.g. snow-buried, persons
- NOTE
- Contrary to the wording of group A63B 29/02, devices for lowering persons are classified in A62B 1/06

- M A63B 29/021 • {Means for indicating the location of accidentally buried, e.g. snow-buried, persons ~~(detecting hidden masses in general G01V)~~}
- M A63B 31/00 **Swimming aids (teaching swimming [A63B 69/10](#) - [A63B 69/14](#); life-saving in water; {, e.g. life-buoys, life-belts}, -} [B63C 9/00](#))**
- M A63B 35/00 **Swimming framework; {, i.e. apparatus fixed to or held by the swimmer or diver}, } with driving mechanisms operated by the swimmer or by a motor (other vessels or like floating structures for pleasure or sport [B63B 35/71](#), [B63B 35/73](#); divers' sleds or like craft [B63C 11/46](#))**
- NOTE
References listed below indicate CPC places which could also be of interest when carrying out a search in respect of the subject matter covered by the preceding group:
- Effecting propulsion of vessels by muscle power [B63H 16/00](#)
- U A63B 39/00 **Hollow non-inflatable balls {, i.e. having no valves (rigid balls [A63B 37/00](#))}**
- U A63B 39/02 • Arrangements for maintaining the pressure
- M A63B 39/025 • {using containers with pressurising means for balls not in use ~~(packages under vacuum or pressure, or special atmospheres B65D 81/20)~~}
- U A63B 43/00 **Balls with special arrangements**
- M A63B 43/04 • with an eccentric centre of gravity; with mechanism for changing the centre of gravity (solid balls [A63B 37/10](#); ~~{motorised rolling toys A63H 33/005}~~)
- U A63B 47/00 **Devices for handling or treating balls {, e.g. for holding or carrying balls}**
- WARNING
Group [A63B 47/00](#) is impacted by reclassification into group [A63B 57/20](#). Groups [A63B 47/00](#) and [A63B 57/20](#) should be considered in order to perform a complete search.
- M A63B 47/008 • {Devices for measuring or verifying ball characteristics ~~(measuring or testing in general G01)~~}
- U A63B 55/00 **Bags for golf clubs; Stands for golf clubs for use on the course; Wheeled carriers specially adapted for golf bags**
- WARNING
Group [A63B 55/00](#) is impacted by reclassification into groups [A63B 55/30](#), [A63B 55/40](#), [A63B 60/60](#), and [A63B 60/64](#). All groups listed in this Warning should be considered in order to perform a complete search.
- M A63B 55/404 • {Covers or hoods for ~~golfbags~~ *golf bags*}
- U A63B 65/00 **Implements for throwing (throwing toys [A63H 33/18](#)); Mechanical projectors, e.g. using spring force}**
- M A63B 65/02 • Spears or the like {; {Javelins ~~(darts F42B 6/003)~~}
- M A63B 65/10 • Discus discs; Quoits ~~{(flying disc toys A63H 33/18)}~~
- U A63B 67/00 **Sporting games or accessories therefor, not provided for in groups [A63B 1/00](#) - [A63B 65/00](#)**
- M A63B 67/02 • Special golf games, e.g. miniature golf {, ~~e.g. or~~ golf putting games played on putting tracks; putting practice apparatus having an elongated platform as a putting track ~~(mats for golf practice A63B 69/3661)~~}

- M A63B 67/04 · Table games physically beneficial for the human body, modelled on outdoor sports, e.g. table tennis (~~{tables for table tennis A47B 25/003}~~; other table games [A63F](#))
- M A63B 67/10 · Games with thread-suspended or swingably-mounted bodies, e.g. balls, pointed bodies shaped as birds, animals, or the like, for aiming at and hitting targets (games using a bat with a ball tethered thereto [A63B 67/20](#), [pin games with tethered balls A63D 7/00](#) ; ~~pin games with tethered balls A63D 7/00~~); {Games using tethered bodies, e.g. balls, not otherwise provided for}
- M A63B 67/20 · Games using a bat {or racket} with a [ball {body, e.g. a or other body}](#) ball tethered thereto

Project: MP0379 (A61M)

- U A61M 5/00 **Devices for bringing media into the body in a subcutaneous, intra-vascular or intramuscular way; Accessories therefor, e.g. filling or cleaning devices, arm-rests ({vaccination appliances for veterinary use [A61D 1/025](#)} ; tube connectors, tube couplings, valves or branch units specially adapted for medical use [A61M 39/00](#); containers specially adapted for medical or pharmaceutical purposes [A61J 1/00](#); {combinations of vial and syringe for mixing or transferring their contents [A61J 1/20](#); holders for containers for collecting, storing or administering blood or medical fluids [A61J 1/16](#)})**

- U A61M 5/32 · · · Needles; Details of needles pertaining to their connection with syringe or hub (infusion needles [A61M 5/158](#)); Accessories for bringing the needle into, or holding the needle on, the body {([A61M 5/42](#), [A61M 5/46](#) take precedence; guide needles for catheters [A61M 25/065](#)); Devices for protection of needles {(apparatus specially adapted for cleaning or sterilising needles [A61M 5/001](#))}
- U A61M 5/3205 · · · {Apparatus for removing or disposing of used needles or syringes, e.g. containers; Means for protection against accidental injuries from used needles (for sharps [A61B 50/362](#); disintegrating apparatus in general [B02C](#), e.g. [B02C 19/0075](#), [B23H 9/001](#); disposal of medical waste in general [B09B 3/0075](#); receptacles for refuse disposal in general [B65F 1/00](#))}
- U A61M 5/321 · · · · {Means for protection against accidental injuries by used needles}
- U A61M 5/322 · · · · · {Retractable needles, i.e. disconnected from and withdrawn into the syringe barrel by the piston (devices for protecting guide needles in combination with catheters [A61M 25/0612](#))}
- M A61M 5/3232 · · · · · {Semi-automatic needle retraction, i.e. in which ~~the~~ triggering of the needle retraction requires a deliberate action by the user, e.g. manual release of spring-biased retraction means}
- M A61M 5/3234 · · · · · · {Fully automatic [needle retraction](#), i.e. in which [triggering of the triggering needle](#) does not require a deliberate action by the user}
- M A61M 2005/3235 · · · · · · · {triggered by radial deflection of the anchoring parts between needle mount and syringe barrel or needle housing, e.g. spreading of needle mount retaining hooks having slanted surfaces by engagement with correspondingly shaped surfaces on the piston at the end of an injection stroke}
- M A61M 2005/3236 · · · · · · · · {Trigger provided at the distal end, i.e. syringe end for mounting a needle}
- M A61M 2005/3238 · · · · · · · · {Trigger provided at the proximal end, i.e. syringe end opposite to needle mounting end}

M	A61M 2005/3239 {triggered by dislodgement of outer part anchoring the needle portion to the inside of the syringe barrel wall, e.g. a ring-shaped portion}
M	A61M 2005/3241 {Needle retraction energy is accumulated inside of a hollow plunger rod}
M	A61M 2005/3242 {Needle retraction by vacuum}
U	A61M 5/3243 {being axially-extensible, e.g. protective sleeves coaxially slidable on the syringe barrel (devices for protecting guide needles in combination with catheters A61M 25/0612)}
M	A61M 5/3257 {Semi-automatic sleeve extension, i.e. in which the triggering of the sleeve extension requires a deliberate action by the user, e.g. manual release of spring-biased extension means}
M	A61M 5/326 {Fully automatic sleeve extension , i.e. in which triggering of the triggering sleeve does not require a deliberate action by the user}
M	A61M 2005/3261 {triggered by radial deflection of the anchoring parts between sleeve and syringe barrel, e.g. spreading of sleeve retaining hooks having slanted surfaces by engagement with conically shaped collet of the piston rod during the last portion of the injection stroke of the plunger}
M	A61M 2005/3263 {Trigger provided at the distal end, i.e. syringe end for mounting a needle}
M	A61M 2005/3264 {Trigger provided at the proximal end, i.e. syringe end opposite to needle mounting end}
M	A61M 2005/3265 {Degree of extension of sleeve to its needle covering position is progressively established by the degree of piston insertion into the syringe barrel}
M	A61M 2005/3267 {Biased sleeves where the needle is uncovered by insertion of the needle into a patient's body}
M	A61M 2005/3268 {having cantilever elastically spreadable arms, e.g. to accumulate energy during needle uncovering movement for urging protection sleeve to return to needle covering position}

Project: MP0379 (C07C)

U	C07C 63/00	Compounds having carboxyl groups bound to a carbon atoms of six-membered aromatic rings
U	C07C 63/68	. containing halogen
U	C07C 63/72	. . Polycyclic acids
M	C07C 63/74	. . {having unsaturation outside the aromatic rings}

Project: MP0379 (F01D)

M	F01D	NON-POSITIVE DISPLACEMENT MACHINES OR ENGINES, e.g. STEAM TURBINES (machines or engines for liquids F03; non-positive displacement pumps F04D)
---	------	---

NOTES1. This subclass covers:

- non-positive-displacement engines for elastic fluids, e.g. steam turbines;
- non-positive-displacement engines for liquids and elastic fluids;
- non-positive-displacement machines for elastic fluids;

- non-positive-displacement machines for liquids and elastic fluids.
2. Attention is drawn to the Notes preceding class [F01](#), especially as regards the definitions of "reaction type", e.g. with airfoil-like blades, and "impulse type", e.g. bucket turbines.

WARNING

1. The following IPC groups are not in the CPC scheme. The subject matter for these IPC groups is classified in the following CPC groups:

[F01D 5/32](#) covered by [F01D 5/30](#)

2. 1. In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

| M | D21H | PULP COMPOSITIONS; PREPARATION THEREOF NOT COVERED BY SUBCLASSES D21C OR D21D; IMPREGNATING OR COATING OF PAPER; TREATMENT OF FINISHED PAPER NOT COVERED BY CLASS B31 OR SUBCLASS D21G; PAPER NOT OTHERWISE PROVIDED FOR |
|---|-------------|---|

NOTES

1. This subclass covers also pulp compositions for the preparation of fibreboard or other fibrous articles by wet processes.
2. In this subclass, the following terms are used with the meaning indicated:

- "pulp" means a dispersion, { e.g. an aqueous suspension, } comprising paper-making fibres and optional additives, which is to be processed, and covers the term "stock"; it also means dry paper-making fibres which are to be made into paper by either wet or dry processes;
- "paper" means paper, cardboard or wet-laid non-woven fabrics.

3. In groups [D21H 11/00](#) - [D21H 15/00](#), in the absence of an indication to the contrary, classification is made in the last appropriate place.

~~4. Attention is drawn to the use of Combination Sets as specified in the Notes after groups D21H 17/00, D21H 17/69, D21H 17/71, D21H 19/00, D21H 21/00, D21H 21/14, D21H 23/00, D21H 23/22, D21H 25/00 and D21H 27/00.~~

WARNINGS

1. The following IPC groups are not in the CPC scheme. The subject matter for these IPC groups is classified in the following CPC groups:

2. In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

M D21H 17/00

Non-fibrous material added to the pulp, characterised by its constitution; Paper-impregnating material characterised by its constitution

NOTE

1. In this group, in the absence of an indication to the contrary, a material is classified in the last appropriate place.

~~2. In this group, it is desirable to classify the individual constituents of fibres used in the pulp or paper using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 15/00.~~

U D21H 17/63

- Inorganic compounds

U D21H 17/67

- • Water-insoluble compounds, e.g. fillers, pigments

M D21H 17/69

- • • modified, e.g. by association with other compositions prior to incorporation in the pulp or paper

NOTE

~~In this group, it is desirable to classify the individual components of the mixtures using Combination Sets with symbols chosen from groups D21H 17/00 or D21H 21/00.~~

M D21H 17/71

- {Mixtures of material ([D21H 17/69](#) takes precedence); Pulp or paper comprising several different materials not incorporated by special processes ([D21H 23/10](#), [D21H 23/70](#), [D21H 23/76](#) take precedence)}

NOTE

~~In this group, it is desirable to classify the individual components of the mixtures using Combination Sets with symbols chosen from groups D21H 17/00 or D21H 21/00.~~

M D21H 19/00

Coated paper (coated fibreboard [D21J 1/08](#)); Coating material (recording sheets characterised by the coating used to improve ink, dye or pigment receptivity [B41M 5/50](#))

NOTE

~~In this group, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 17/00 or D21H 21/14 - D21H 21/56.~~

- M D21H 21/00** **Non-fibrous material added to the pulp, characterised by its function, form or properties; Paper-impregnating or coating material, characterised by its function, form or properties**
- NOTE**
In groups D21H 21/00 - D21H 21/12, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 17/00.
- M D21H 21/14** **characterised by function or properties in or on the paper ([D21H 19/66](#), [D21H 27/02](#) take precedence)**
- NOTE**
In groups D21H 21/14 - D21H 21/56, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 19/00.
- M D21H 23/00** **Processes or apparatus for adding material to the pulp or to the paper (applying liquids or other fluent material to surfaces, in general [B05](#); processes for making continuous lengths of paper [D21F 11/00](#))**
- NOTE**
1. In groups D21H 23/00 - D21H 23/20, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, as Combination Sets with symbols chosen from groups D21H 11/00 - D21H 17/00 or D21H 21/00.
~~2.~~ 1. Processes or apparatus used for addition to the paper during its manufacture, i.e. on-machine, are classified in groups [D21H 23/24](#) - [D21H 23/28](#) if they are specially influenced by, or specially adapted to the paper-making process.
- U D21H 23/02** **characterised by the manner in which substances are added**
- M D21H 23/22** **Addition to the formed paper**
- NOTE**
In groups D21H 23/22 - D21H 23/78, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 21/00.
- M D21H 25/00** **After-treatment of paper not provided for in groups [D21H 17/00](#) - [D21H 23/00](#)**
- NOTE**
In this group, it is desirable to classify the individual constituents of the fibres used in the pulp or the paper, the non-fibrous material added to the pulp or the impregnating or coating material, using Combination Sets with symbols chosen from groups D21H 11/00 - D21H 21/00.
- M D21H 27/00** **Special paper not otherwise provided for, e.g. made by multi-step processes**
- NOTE**
1. This group provides for the classification of paper with special properties or applications which are only partially or not at all provided for elsewhere in the

classification. Whenever possible, however, these papers are classified according to the criteria used in the other groups of this subclass.

~~2. In this group, it is desirable to classify the individual constituents using Combination Sets with symbols chosen from groups D21H 11/00 – D21H 25/00.~~

NOTES

1. In this group, the following expression is used with the meaning indicated: "involving", when used in relation to a material, includes the testing for the material as well as employing the material as a determinant or reactant in a test for a different material.
2. In groups [G01N 33/52](#) – [G01N 33/98](#), the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, classification is made in the last appropriate place.
3. Documents relating to new peptides or new DNA or its corresponding mRNA, encoding for the peptides, and their use in measuring or testing processes are classified in subclass [C07K](#) or in group [C12N 9/00](#) according to the peptides, with the appropriate indexing codes relating to their use in diagnostics. However, if the investigating or analysing aspects are of interest, the documents are classified in this group.

- NOTES**
1. This group covers:
 - 1.1 Cryptographic mechanisms including cryptographic protocols and cryptographic algorithms, whereby a cryptographic protocol is a distributed cryptographic algorithm defined by a sequence of steps precisely specifying the actions required of two or more entities to achieve specific security objectives (e.g. cryptographic protocol for key agreement), and whereby a cryptographic algorithm is specifying the steps followed by a single entity to achieve specific security objectives (e.g. cryptographic algorithm for symmetric key encryption).
 - 1.2 [H04L 9/00](#) focuses on cryptographic mechanisms such as encryption schemes, digital signatures, hash functions, random number generation, key management, said cryptographic mechanisms providing information security such as privacy or confidentiality, data integrity, message authentication, entity authentication, authorization, validation, certification, time-stamping, anonymity, revocation, non-repudiation.
 - 1.3 [H04L 9/00](#) covers also countermeasures against attacks on cryptographic mechanisms.
 2. This group does not cover:
 - 2.1 Networking architectures or network communication protocols for securing the traffic flowing through data packet networks and providing secure exchanges among applications communicating through data packet networks, which are covered by [H04L 63/00](#).  3. Attention is drawn to the Notes in class [C07](#), for example the notes following the title of subclass [C07D](#), setting forth the rules for classifying organic compounds in that class, which rules are also applicable, if not otherwise indicated, to the classification of organic compounds in group [A61K 8/00](#).
 4. Salts or complexes of organic compounds are classified according to the base compounds. If a complex is formed between two or more compounds, classification is made for each compound.
- U A61K 8/18** • characterised by the composition

- In this group, the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, classification is made in the last appropriate place.
- U A61K 8/30** • • containing organic compounds
U A61K 8/33 • • • containing oxygen
U A61K 8/36 • • • • Carboxylic acids; Salts or anhydrides thereof

- M A61K 8/368 with carboxyl groups directly bound to carbon atoms ~~or~~ aromatic rings
- U A61K 31/00 **Medicinal preparations containing organic active ingredients**

NOTES

1. When classifying in groups [A61K 31/00](#) - [A61K 41/00](#) the symbol [A61K 2300/00](#) may be added, using Combination Sets, to indicate a mixture of active ingredients.

2. In the preparation of new organic compounds and their use in medicinal preparations, classification is only made in the relevant subclasses [C07C](#) - [C07J](#) according to the type of compound. However, the inventions dealing with medicinal preparations containing at least two active organic ingredients are always classified in this group in addition to the classification for the type of compounds in [C07C](#) - [C07J](#).

3. Attention is drawn to the notes in class [C07](#), particularly to the definition of steroids given in Note (1) following the title of [C07J](#) and to the definition of carbohydrates and sugars given in the notes following the title of [C07H](#).

4. Salts and complexes of organic active compounds are always classified according to the free active compounds. If a complex is formed between two or more active compounds, then they are classified according to all compounds forming the salts or complexes followed by the symbol [A61K 2300/00](#) (i.e. as a mixture of active organic compounds). According to the last place rule, organic active compounds forming salts with heavy metals should be classified in [A61K 33/24](#) - [A61K 33/38](#) and not in subgroups [A61K 31/28](#) - [A61K 31/32](#), [A61K 31/555](#) or [A61K 31/714](#).

This does not apply to complexes, as apparent from the [A61K 31/00](#) scheme, wherein the complexes hemin and hematin are classified in [A61K 31/555](#) and cyanocobalamin in [A61K 31/714](#).

5. From January 2003 onwards, the EPO copies into CPC the IPC classification of the first document received (family representative). However, blends of active ingredients receive the additional symbol [A61K 2300/00](#) as Combination Set.

NOTES

1. This group covers control of position or course in two dimensions specially adapted for land vehicles, i.e. control systems to define a trajectory for a land vehicle, and to take suitable actions to make the vehicle follow said trajectory.

2. Relationships with other classification places.

Subclass [G01C](#) covers navigation in general, i.e. determining the position and course of land vehicles, ships, aircraft, and space vehicles.

Subclass [G01S](#) covers radio, sonar or lidar navigation systems, i.e. navigation by use of radio, acoustic or optical waves, or analogue arrangements using other electromagnetic waves.

Subclass [G08G](#) covers navigation systems for traffic control purposes, i.e. systems in which the navigation is not performed autonomously by or in the vehicle, but where the vehicles are guided by instructions transmitted to them.

Aspects of navigation systems that are important per se should also be classified in the relevant groups of [G01C](#) (see for example list under "Informative References" below).

Aspects of radio, sonar or lidar navigation systems that are important per se should also be classified in the relevant groups of [G01S](#) (see for example list under "Informative References" below).

Project: MP0431 (G01)**M G01 MEASURING ~~(counting G06M)~~; TESTING****NOTES**

1. This class covers, in addition to "true" measuring instruments, other indicating or recording devices of analogous construction, and also signalling or control devices insofar as they are concerned with measurement (as defined in Note 2 below) and are not specially adapted to the particular purpose of signalling or control.
2. In this class, the following term is used with the meaning indicated:
 - "measuring" is used to cover considerably more than its primary or basic meaning. In this primary sense, it means finding a numerical expression of the value of a variable in relation to a unit or datum or to another variable of the same nature, e.g. expressing a length in terms of another length as in measuring a length with a scale; the value may be obtained directly (as

just suggested) or by measuring some other variable of which the value can be related to the value of the required variable, as in measuring a change in temperature by measuring a resultant change in the length of a column of mercury. However, since the same device or instrument may, instead of giving an immediate indication, be used to produce a record or to initiate a signal to produce an indication or control effect, or may be used in combination with other devices or instruments to give a conjoint result from measurement of two or more variables of the same or different kinds, it is necessary to interpret "measuring" as including also any operation that would make it possible to obtain such a numerical expression by the additional use of some way of converting a value into figures. Thus the expression in figures may be actually made by a digital presentation or by reading a scale, or an indication of it may be given without the use of figures, e.g. by some perceptible feature (variable) of the entity (e.g. object, substance, beam of light) of which the variable being measured is a property or condition or by an analogue of such a feature (e.g. the corresponding position of a member without any scale, a corresponding voltage generated in some way). In many cases there is no such value indication but only an indication of difference or equality in relation to a standard or datum (of which the value may or may not be known in figures); the standard or datum may be the value of another variable of the same nature but of a different entity (e.g. a standard measure) or of the same entity at a different time.

In its simplest form, measurement may give merely an indication of presence or absence of a certain condition or quality, e.g. movement (in any direction or in a particular direction), or whether a variable exceeds a predetermined value.

3. Attention is drawn to the Notes following the title of Section [G](#), especially as regards the definition of the term "variable".

4. In many measuring arrangements, a first variable to be measured is transformed into a second, or further, variables. The second, or further, variables may be (a) a condition related to the first variable and produced in a member, or (b) a displacement of a member. Further transformation may be needed.

When classifying such an arrangement, (i) the transformation step, or each transformation step, that is of interest is classified, or (ii) if interest lies only in the system as a whole, the first variable is classified in the appropriate place.

This is particularly important where two or more conversions take place, for instance where a first variable, for example pressure, is transformed into a second variable, for example an optical property of a sensing body, and that second variable is expressed by means of a third variable, for example an electric effect. In such a case, the following classification places should be considered: the place for the transformation of the first variable, that for sensing the condition caused by that variable, subclass [G01D](#) for expression of the measurement, and finally the place for the overall system, if any

5. The measurement of change in the value of a physical property is classified in the same subclass as measurement of that physical property, e.g. measurement of expansion of length is classified in [G01B](#).

NOTE

1. This class does not cover reproduction of pictures or patterns by scanning and converting into electrical signals, which is covered by subclass H04N.
2. In this class, the following terms are used with the meaning indicated:
 - "records" means photographs or any other kind of latent, directly-visible or permanent storage of pictorial information, which consist of an imagewise distribution of a quantity, e.g. an electric charge pattern, recorded on a carrier member;
 - "optical" applies not only to visible light but also to ultra-violet or infra-red radiations.

CONTROLLING; REGULATING (~~specially adapted to a particular field of use, see the relevant place for that field, e.g. A62C 37/00, B03B 13/00, B23Q~~)

NOTES

1. This class covers methods, systems, and apparatus for controlling, in general.
2. In this class, the following terms or expressions are used with the meanings indicated:
 - "controlling" means influencing a variable in any way, e.g. changing its direction or its value (including changing it to or from zero), maintaining it constant, limiting its range of variation;
 - "regulation" means maintaining a variable automatically at a desired value or within a desired range of values. The desired value or range may be fixed, or manually varied, or may vary with time according to a predetermined "programme" or according to variation of another variable. Regulation is a form of control;
 - "automatic control" is often used in the art as a synonym for "regulation".
3. Attention is drawn to the Notes following the title of section G, especially as regards the definition of the term "variable".

COMPUTING; CALCULATING; COUNTING (~~score computers for games A63B 71/06, A63D 15/20, A63F 1/18; combinations of writing implements with computing devices B43K 29/08~~)

NOTES

1. This class covers:

- simulators which are concerned with the mathematics of computing the existing or anticipated conditions within the real device or system;
 - simulators which demonstrate, by means involving computing, the function of apparatus or of a system, if no provision exists elsewhere;
 - image data processing or generation.
2. This class does not cover:
- combinations of writing implements with computing devices, which are covered by group [B43K 29/08](#);
 - control functions derived from simulators, in general, which are covered by class [G05](#), although such functions may be covered by the subclass of this class for the device controlled;
 - measurement or analysis of an individual variable to serve as an input to a simulator, which is covered by class [G01](#);
 - simulators regarded as teaching or training devices which is the case if they give perceptible sensations having a likeness to the sensations a student would experience in reality in response to actions taken by him. Such simulators are covered by class [G09](#);
 - components of simulators, if identical with real devices or machines, which are covered by the relevant subclass for these devices or machines and not by class [G09](#).
3. In this class, the following terms or expressions are used with the meanings indicated:
- "data" is used as the synonym of "information". Therefore, the term "information" is not used in subclasses [G06C](#), [G06F](#) or [G06Q](#);
 - "calculating or computing" includes, *inter alia*, operations on numerical values and on data expressed in numerical form. Of these terms "computing" is used throughout the class;
 - "computation" is derived from this interpretation of "computing". In the French language the term "calcul" will serve for either term;
 - "simulator" is a device which may use the same time scale as the real device or operate on an expanded or compressed time scale. In interpreting this term models of real devices to reduced or expanded scales are not regarded as simulators;
 - "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relative to the recorded information.
4. Attention is drawn to the Notes following the title of section [G](#), especially as regards the definition of the term "variable".

~~(punching, perforating, making articles by processing sheet metal, tubes,

 making chains B21L; grinding B24)~~

NOTES**1. This class covers:**

- working of metallic materials;
- working of non-metallic materials, provided that the methods applied are similar to those used in metal-working and not provided for elsewhere;
- features, specific to machine tools, which relate to a requirement or problem of a nature which is not peculiar to a particular kind of machine tool, e.g. feeding work, which are covered by subclass [B23Q](#), although the realisation of these features may differ according to the kind of machine tool concerned. The said subclass covers such features, in general, even if the feature or a specific function, in any particular case, is to some extent peculiar to, or is claimed only for, machine tools designed for one particular operation; only in exceptional cases are such features classified in the subclass for the machine tool concerned. Certain features of this general nature are, however, referred to subclasses relating to particular metal-working operations, especially [B23B](#), in which case the subclasses in question are not restricted, in respect of those features, to the kind of machine tool with which they are primarily concerned.

2. In this class, the following terms or expressions are used with the meanings indicated:

- "kind of operations" and similar expressions relate to such metal-working operations as boring, drilling, milling and grinding;
- "kind of machine" means a machine designed for a particular kind of metal-working operation (e.g. a lathe);
- "form of machine" means a machine of a particular kind adapted or arranged for a particular way of working or for particular work, e.g. face-plate lathe, tailstock lathe, turret lathe;
- "different machines" covers different forms of machines for performing the same type of metal-working operation, e.g. vertical and horizontal boring machines.

3. If details, components, or accessories have no essential feature specific to machine tools, the more general class, e.g. [F16](#), takes precedence.

NOTES

1. This class does not cover the working of plastics sheet material in a manner analogous to the working of paper, which is covered by class [B31](#).
2. In this class, the following term is used with the meaning indicated:
 - "plastics" means macromolecular compounds or compositions based on such compounds.
3. In this class, the following rules apply:
 - a. The working of plastics is, as far as possible, classified primarily according to the particular shaping technique used, e.g. in subclass [B29C](#).
 - b. Classification according to production of particular articles in subclass [B29D](#) is restricted to:
 - i. aspects which are characteristic for the production of a particular article, and not classifiable in subclass [B29B](#) or [B29C](#);
 - ii. combined operations for making the particular article which are not fully classifiable in subclass [B29C](#).
 - c. Products per se are not classified in this class. However, if a product is characterised by the way it is produced and not by its structure or composition, the production method should be classified in this class.

It includes the arrangement of electrical heating elements in or on furnaces, but not the elements themselves. It is not concerned with the processes carried on within the furnaces.

NOTES

1. In this class, in the absence of an indication to the contrary, a compound is classified in the last appropriate place; { except compounds of group [C01B 6/00](#) which takes precedence over the other groups of class [C01](#) }.
2. The name of compounds is to be taken in a strictly limitative sense. With the exception of hydrogen and oxygen, in order to include water of hydration and acid salts, compounds may not contain other parts than its name suggests. In some cases however subgroups are provided for compounds containing more parts than their name suggests, e.g. group [C01F 7/76](#), providing for alum, is a subgroup of group [C01F 7/74](#) covering aluminium sulfates. In such a case, this note is applicable to the particular subgroup

1. An ingredient in a mixture of fertilisers, or a single fertiliser which contains more than one of the chemical elements on which the subdivision into subclasses is based, is classified only in the first of the appropriate subclasses. Thus, a nitrophosphate or an ammoniated superphosphate is classified in [C05B](#) but not in [C05C](#), magnesium phosphate is classified in [C05B](#) but not in [C05D](#), and calcium cyanamide in [C05C](#) but not in [C05D](#).

2.

In this class, mixtures of fertilizers are classified in the first appropriate place. After the notation of the appropriate classification symbol and separated therefrom by a + sign, notations concerning the ingredients of the mixture, not covered by the chosen classification symbol, may be added. These notations are selected from class [C05](#) and are presented in the following way, e.g. [C05B 1/02](#) + [C05D 1/02](#) + [C05D 9/02](#)

1. In this class, the following term is used with the meaning indicated:

- "preparation" covers purification, separation, stabilisation or use of additives, unless a separate place is provided therefor.

2. Biocidal, pest repellent, pest attractant or plant growth regulatory activity of compounds or preparations is further classified within IPC. {This IPC Note does not apply in CPC}

3. In subclasses [C07C-C07K](#), the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, and with the exception referred to below, a compound is classified in the last appropriate place. For example, 2-butyl- pyridine, which contains an acyclic chain and a heterocyclic ring, is classified only as a heterocyclic compound, in subclass [C07D](#). In general, and in the absence of an indication to the contrary, such as mentioned in groups [C07C 59/58](#), [C07C 59/70](#), the terms "acyclic" and "aliphatic" are used to describe compounds in which there is no ring; and, if a ring were present, the compound would be taken by the "last place" rule to a

later group for cycloaliphatic or aromatic compounds, if such a group exists. Where a compound or an entire group of compounds exists in tautomeric forms, it is classified as though existing in the form which is classified last in the system, unless the other form is specifically mentioned earlier in the system.

4. Chemical compounds and their preparation are classified in the groups for the type of compound prepared. The processes of preparation are also classified in places for the types of reaction employed, if of interest. Examples of such places outside this class are:

[C12P](#) Fermentation or enzyme-using processes to synthesise a desired chemical compound or composition or to separate optical isomers from a racemic mixture

[C25B 3/00](#) Electrolytic production of organic compounds

[C25B 7/00](#) Electrophoretic production of compounds

5. General processes for the preparation of a class of compounds falling into more than one main group are classified in the groups for the processes employed, when such groups exist. The compounds prepared are also classified in the groups for the types of compound prepared, if of interest.

6. In this class, in the absence of an indication to the contrary, the compounds containing carboxyl or thiocarboxyl groups are classified as the relevant carboxylic or thiocarboxylic acids, unless the "last place rule" (see Note (3), above) dictates otherwise; a carboxyl group being a carbon atom having three bonds, and no more than three, to hetero atoms, other than nitrogen atoms of nitro or nitroso groups, with at least one multiple bond to the same hetero atom and a thiocarboxyl group being a carboxyl group having at least one bond to a sulfur atom, e.g. amides or nitriles of carboxylic acids, are classified with the corresponding acids.

7. Salts of a compound, unless specifically provided for, are classified as that compound, e.g. aniline hydrochloride is classified as containing carbon, hydrogen and nitrogen only in group [C07C 211/46](#), sodium malonate is classified as malonic acid in [C07C 55/08](#), and a mercaptide is classified as the mercaptan. Metal chelates are dealt with in the same way. Similarly, metal alcoholates and metal phenates are classified in subclass [C07C](#) and not in subclass [C07F](#), the alcoholates for instance in groups [C07C 31/28-C07C 31/32](#) and the phenates in group [C07C 39/235](#) or [C07C 39/44](#). Salts, adducts or complexes formed between two or more organic compounds are classified according to all compounds forming the salts, adducts or complexes.

INFORMATION STORAGE BASED ON RELATIVE MOVEMENT BETWEEN RECORD CARRIER AND TRANSDUCER ({producing carriers of sound records for needle playback [B29C 39/00](#)}; recording measured values in a way that does not require playback through a transducer [G01D](#); photosensitive materials or processes for photographic purposes [G03C](#); electrography, electrophotography, magnetography [G03G](#); recording or playback apparatus using mechanically marked tape, e.g. punched paper tape, or using unit records, e.g. punched or magnetically marked cards, [G06K](#); transferring data from one type of record carrier to another [G06K 1/18](#); printing of data from record carriers [G06K 3/00](#); arrangements for producing a permanent visual presentation of the output data [G06K 15/00](#); arrangements or circuits for control of indicating devices using static means to present variable information [G09G](#); coding, decoding or code conversion, in general [H03M](#); circuits for coupling output of reproducer to radio receiver [H04B 1/20](#); circuits {or arrangements} specially adapted for {pictorial or} television signal recording {[H04N 1/21](#)}, [H04N 5/76](#), [H04N 9/79](#); loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers or circuits therefor [H04R](#))

NOTES

1. This subclass covers :

- recording or playback of information by relative movement between a record track and a transducer, the transducer directly producing, or being directly actuated by, modulation in the track being recorded or played-back, and the extent of modulation corresponding to the signal being recorded or played-back;
- apparatus and machines for recording or playback, and parts thereof such as heads;
- record carriers for use with such apparatus and machines;
- associated working of other apparatus with such apparatus and machines;
- {relative positioning or movement of transducers and record carriers before, during or after transducing operation, e.g. for accessing record carriers or parts thereof, or for track change, selection or acquisition or for track following or for accessing parts of tracks;}
- {driving or moving of heads or record carriers or both heads and record carriers for increasing, maintaining or decreasing the relative speed before, during or after transducing operation}

2. In this subclass, the following terms or expressions are used with the meanings indicated :

- "head" includes any means for converting sinusoidal or non-sinusoidal electric wave-forms into variations of the physical condition of at least the adjacent surface of the record carrier, or *vice versa*;
- "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relatively to the record carrier.

3. Documents concerning relative positioning or movement of transducers and record carriers are classified in groups [G11B 3/00](#) - [G11B 7/00](#) and [G11B 21/00](#) when only the transducer is controlled and in groups [G11B 15/00](#), [G11B 17/00](#)

and [G11B 19/00](#) when only the record carrier is controlled. When both record carrier and head are controlled, the documents are classified in [G11B 15/1808](#), [G11B 15/1816](#), [G11B 19/00](#) and [G11B 27/002](#).

When a plurality of record carriers are controlled, the documents are classified in [G11B 15/68](#), [G11B 17/08](#), [G11B 17/22](#) and [G11B 27/002](#).

4. By "access" is meant an operation including a relative movement for positioning between record carrier and head before, during or after transducing; this operation including "seek", "select", "change", "acquire" and "follow" functions for at least a part of a track on at least one record carrier. By "programmed access" is meant a sequence of access operations the result of the sequence being to acquire a wanted sequence of parts of tracks or a wanted sequence of tracks. Relative movement between head and record carrier also covers the movement of a coupling beam such as a light beam between the head and a stationary record carrier.

5. "Movement of the head" also covers any virtual movement or any physical movement such as obtained by switching between successive transducing parts of the head or by moving the transducing zone of the head, i.e. by "scanning". If different transducing parts of the head are switchable, the number of transducing parts should be much smaller than the number of individual storage areas of the record carrier.

6. Attention is drawn to the notes of subclass [G11C](#).

U H03M 3/436

- • • {characterised by the order of the loop filter, e.g. error feedback type}

NOTE

In this group branch the order of the loop filters is considered to be the number of integrators for a baseband modulator and the number of resonators for a bandpass modulator respectively

- U H03M 3/438 . . . {the modulator having a higher order loop filter in the feedforward path}
- M H03M 3/44 {with provisions for rendering the modulator inherently stable}

NOTE

In this subgroup, classification is made both here and in H03M 3/478 if both subgroups are relevant

- U H03M 3/458 . {Analogue/digital converters using delta-sigma modulation as an intermediate step}
- M H03M 3/478 . . {Means for controlling the correspondence between the range of the input signal and the range of signals the converter can handle; Means for out-of-range indication}

NOTE

In this ~~group-branch~~ **subgroup**, classification is made both ~~in-group~~ **here and branch in H03M 3/44 and in-group-branch H03M 3/448** if ~~both~~ **both of these sets of groups** **subgroups** are relevant

NOTES

1. In this subclass, the following terms or expressions are used with the meanings indicated:

- "positive ignition" means ignition by a source external to the working fluid, e.g. by spark or incandescent source;
- "charging" means forcing air or fuel-air mixture into engine cylinders and thus embraces super-charging;
- "scavenging" means forcing the combustion residues from the cylinders other than by movement of the working pistons and thus embraces tuned exhaust systems.

2. Attention is drawn to the Notes preceding class [F01](#), specially as regards Note (1).

3. Engines with specified cycles or number of cylinders are classified in group [F02B 75/02](#) or [F02B 75/16](#), unless other classifying features predominate.

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.
