**A01K**

**ANIMAL HUSBANDRY; CARE OF BIRDS, FISHES, INSECTS; FISHING; REARING OR BREEDING ANIMALS, NOT OTHERWISE PROVIDED FOR; NEW BREEDS OF ANIMALS**

**Definition statement**

This place covers:

- Equipment and methods for the care, culture or rearing of all animals or for obtaining their products, not otherwise provided for
- Equipment and methods for fishing
- Equipment for angling
- Methods of breeding animals, not otherwise provided for
- New breeds of animals

**Relationships with other classification places**

Whilst **A01K** provides for equipment and methods associated with the care, nurturing, handling and rearing of all animals, and the harvesting of their products, devices and accessories for milking are classified in **A01J**. Furthermore, shoes for animals (e.g. horses, oxen and other solipeds) and associated accessories are classified in **A01L**. Devices for maintaining the appearance and welfare of animals (e.g. washing and grooming devices, shearing equipment, dehorners, horn trainers) are classified here, whilst veterinary equipment and methods for the medical treatment of animals are classified in **A61D**. **A01K** provides for fastening and tethering/restraining equipment for animals (e.g. halters, neck-bars, leads, collars), yet equine or similar harnesses and devices used in connection therewith are classified in **B68B**. **A01K** provides for new breeds of animals, irrespective of the manner of their production, including new breeds of multicellular animals, e.g. transgenic animals. It also provides for processes of obtaining such new animals. Processes and methods for genetic engineering and mutation per se are classified in **C12N**. Where genetic engineering or mutation techniques are used to produce new breeds of animals, classification should be made in both **A01K 67/00** and **C12N 15/00**. Breeding of animals not otherwise provided for is covered by **A01K 67/00**, whilst instruments or methods for reproduction or fertilisation (e.g. artificial insemination) is classified in **A61D 19/00**.

A01K 1/00

Housing animals; Equipment therefor

Definition statement

This place covers:

Stable buildings and structural details therefore.

Shelters for animal other than pets.

Shelter and stables, may be transportable.

Partition walls and -grids may be incorporated.

Stables and shelters may comprise various installations, e.g. feeders, computer/registration-systems, ventilation systems etc.

Movable animal enclosure, may be part of stable.

Wildlife homes, self-sustaining wildlife habitat sanctuary.

A01K 1/0005

{Stable partitions (devices for fastening animals A01K 1/06; pasturing enclosures A01K 3/00)}

Definition statement

This place covers:

Means for dividing stable room and/or limiting animal space.

Partitions; grids; box dividers; barriers.

Partitions etc. may be movable, existing of different materials and/or electrified.

Different ways of fastening partitions, e.g. yokes.

Doors (on or in stables); their actuation.

Doors, partitions etc. may serve for guiding or driving e.g. crowd gates, or for starting rodeos.

(Prefabricated) boxes which can serve as independent quarters, within stables.

Partitions may include ground-borne barriers such as thresholds.

Barriers controlling access to feeders
Separation possibilities between liquid/solid manure.

References

Limiting references

This place does not cover:

### A01K 1/0011

#### {Cubicle partitions}

**Definition statement**

*This place covers:*

- A fence for laterally partitioning, forming cubicle partitions in a stable.
- Divider may consist of single bent tube or more partitions. (mushroom-shape)
- A cubicle partition may comprise at least one standing pipe, or a footles cubicle partition.
- Partitions may be movable e.g. by rails.
- Gate assembly for an animal enclosure such as milking parlour.
- Box installations which are adjustable between an operative and an inoperative position in or to a stable.
- Different ways for coupling the fence.

![Diagram of cubicle partitions](image)
**A01K 1/0017**

**{Gates, doors}**

**Definition statement**

*This place covers:*

Gates, may be used as a fence and/or have a bumper system.

Gates may be extendible, e.g. have an adjustable frame.

Non-return gates, e.g. guillotine gate, tailgate.

Sheep control means, may comprise a workstation and/or a race and/or a drafting gate.

Doors may be automatically closing swing doors etc.

Device for prevent livestock passing through an open gate. (e.g. battery operated).

Hinge lock for animal gates, may have a releasable hinge mechanism.

Gate assembly for milking parlour, may be automatic. (e.g. trough rotating turnstile)
**Definition statement**

This place covers:

- Sorting gates:
  - may include an alley comprising an entrance, a main exit and a sorting exit.
  - may be adjustable.
  - may enable sorting according to weight, size, etc.
  - may contain a selective electronic confinement system, infra-red detector etc.

- e.g. turnstile-type gate, swing-gate.

- Livestock trap and sorter.

- Gates may be adjustable, may include an opening e.g. for pedestrians.

- Separating lactating animals in automatic milking installations by means of identification gates, switchable gates, enticement etc.
Feeding device for selective feeding cattle.

A01K 1/0029

{Crowding gates or barriers}

Definition statement

This place covers:
Crowding gates or barriers:
• may be foldable
• may be attachable to wall/ fence, etc.
• may be moved along a rails/ endless chain, etc.
• may be electrified.

Assemblies for driving cattle along a route:
• by means of a tailgate, mover member etc.
• Animal catching and carrying devices.
• For feeding control systems e.g. an electrified barrier.
• Barrier for preventing passage of livestock.
• Poultry agitators.
• Drones or helicopters influencing the motion of the herd.
**A01K 1/0035**

{Transportable or mobile animal shelters}

**Definition statement**

This place covers:

Shelters specially adapted for being transported and placed where needed. These shelters can be portable, collapsible, and modular, can include feeding, watering and an outdoor space and can be moved by the provision of wheels, towing hooks and the like.

These shelters are intended to be built or installed in situ for animals on the way and/or to be transported and installed in the place where needed to give shelter to animals.
Relationships with other classification places

This group does not cover the transport (e.g. carrying) of small-size animals (e.g. pets), which is covered by group A01K 1/0236.

This group does not cover vehicles or trailers for the transport of big-sized animals which is covered by group B60P 3/04.

A01K 1/0041

{Rotary, round or circular animal barns}

Definition statement

This place covers:

Buildings for housing animals comprising a mainly circular or round shape or rotating, e.g. circular plan view or round walls. These buildings can be rotary, can comprise flat walls forming a kind of circumference, e.g. hexagonal, octagonal, and decagonal, can be oval, can be connected to other structures and can be for individual or multiple animals.

**A01K 1/0047**

{Air-conditioning, e.g. ventilation, of animal housings}

**Definition statement**

*This place covers:*

Means for heating, cooling, ventilating, drying or humidifying stable rooms in general.

Method and system for disbursing ozone into a stable room e.g. deduction in flies, odour, dust etc.
Climate and ventilation control means, e.g. alarm system, responsive timer, etc.

Means of cleaning waste air:
• may use filtering devices, remove dust, odours, ammonia etc.
• may add pre-coated material, e.g. coke dust, lime dust.
• may add disinfectants.

Methods for influencing and determining the airflow, e.g. metal panels.

Specially adapted details, e.g. roof lids, etc.

A01K 1/0052

{Arrangement of fans or blowers}

Definition statement

This place covers:
Fans or blowers, for use in stable rooms in general.
• may be movable.
• may be placed in rows or back to back etc.
• may have variable speed control.
• may have cooling system, mist generator etc. included.
Wind diverters for fans and blowers.

A01K 1/0058
{Construction of air inlets or outlets in roofs}

Definition statement

This place covers:

Construction of air inlets or outlets in roofs, e.g. fans and ducts etc.
- may include evaporative coolers, ionizing apparatus, heat exchanging system, etc.

Methods of controlling ventilation in roofs.

Ventilation ceiling and panels therefor.
A01K 1/0064

{Construction of air inlets or outlets in walls}

Definition statement

This place covers:

Construction of air inlets or outlets in walls.

- by means of sheet metal panels with vents, ventilators, valves etc.

Ventilating system may be responsive to temperature, may be able to control humidity and movement of forced air etc.

A01K 1/007

{Arrangement of curtain systems}

Definition statement

This place covers:

Arrangement of curtain systems.

- may include selvedge reinforcement.
- may include curtain control system.

Automatic curtain systems with ventilation monitoring, control, alarm and auto-release systems.

Blinds.

{Arrangement of heaters or heat exchangers}

Definition statement

This place covers:

Heating devices for a stall and method for operating the same. May include:

• control device
• one or more radiating elements
• energy exchange unit
• air control flow
• air cleaning systems etc.
• Heating devices may be energy saving
• Ventilation heat recovery systems
• Climate control systems
**Definition statement**

This place covers:

Cooling station for animals, may be automatic. By means of liquid and air flow.

Evaporative cooling system e.g. fan guard mounted mister.

Cleaning waste air, e.g. by means of adding pre-coated material or water spray.

{Animal shelters or barns especially adapted for keeping horses}

**Definition statement**

*This place covers:*

Enclosures directed for raising horses. These enclosures can include cooling or warming, feeding and/or watering and can be individual or multiple horses.

Structures to be installed in stalls for horses, e.g. to prevent crib biting.

Gates especially designed for horse stalls.

Horse protectors and safety kerbing in doors, walls or buildings, e.g. skirting or stable bank.

A01K 1/01

Removal of dung or urine, {e.g. from stables} (A01K 1/015 takes precedence; {from poultry houses A01K 31/04})

Definition statement

This place covers:

Collecting solid or liquid manure in stables, by any means, e.g. waste treatment bags, composting box, (liquid) manure tank etc.

Device for removing manure from animal stalls, e.g. bedding fork, scraper.

Device may be automatic, e.g. vehicle.

Device for transporting manure.

Bedding removal and refilling system for animal cages.

Treatment of manure, drying, heating, cooling, deodorizing.

Details of channels or (slatted) floors.

{of liquid manure (treating manure A01C 3/00; treatment of water, waste water, sewage or sludge C02F)}

Definition statement

This place covers:
Stables and apparatus for collecting liquid animal manure, e.g. collection pit, tank etc.
• may have arrangements for reducing ammonia emission.
• may be transportable.
• may include hydro flushing installations.
Details like dung channel, inlet valve etc.
Treatment of liquid manure, e.g. heating, cooling, deodorization, etc.
Different ways of converting liquid animal waste.
Devices and methods for cleaning stable floor.
• may be automatic.
Apparatus for disposal or cleaning of waste-water.

{Cat trays; Dog urinals; Toilets for pets}

Definition statement

This place covers:
Indoors or outdoors toilets for pets.
Cat litter box, may be portable, disposable.
• may include ventilation, filter system etc.
• may include magnetic pet litter system.

Ready-made fillings for such toilets, may be for independent use.

Toilets may have flushing means, adaptations for human toilets, disinfection means, etc.

Paw-cleaning litter mat.

Pet-sheet, may be absorbing, impregnated with perfume, deodorant, disinfectant, pesticide etc.

Device for training animals to use toilets.

Paw-cleaning litter mat, e.g. magnetic pet litter system.

**A01K 1/011**

{with means for removing excrement (**A01K 1/0114** and **A01K 1/0117** take precedence)}

**Definition statement**

*This place covers:*

In and outdoor toilets for pets, with automatic waste removement, by means of flushing, raking, etc.

may be connected to water supply, electric supply and to drains, e.g. household drains.

• may be litter-free, or using water soluble litter etc.
• may be movable.
• may have appliances for washing the pet.
• may include lavatory facility for toilet training.
Sanitizing apparatus for pet litter box, may have controllable temperature.

Sewerage device intended for domestic animals, cleaning device therefore.

References

{Litter boxes with screens for separating excrement from litter}

Definition statement

This place covers:

Litter box may be portable.

Litter box may be disposable and may have litter included.

A litter box may contain a litter tray apparatus that collects particles of litter scattered from the paws.

The excrement may be separated by sifting, by means of:

- rotating the Litter box.
- a removable screen in corner of box.
- lifting a reticulated structure from under the litter.
- multiple layers of screens, etc.

Automated self-cleaning litter box:

- by means of rake, comb, scoop, rotating auger etc.
- may be direct responsive to the exit of a cat.
- may include a rotatable enclosure.

Animal waste dispose apparatus by means of sifting.
Scoop for pet litter.

**A01K 1/0117**

{with conveying belts for removing excrement}

**Definition statement**

*This place covers:*

Pet toilets or cages with waste disposal system, by means of endless belts, a hopper, etc.

May include a washing device, or adjustable litter supply.
May be portable.

**A01K 1/0121**

{adapted to fit on conventional toilets}

**Definition statement**

*This place covers:*

Animal toilet adapted to fit on conventional toilets.

By means of adjustable toilet seat e.g. shelf segments, etc.

Litter box max be mountable on toilet.

- may use flushable litter;
- may include apparatus for training pets to use human toilet.

**A01K 1/0125**

{Foldable or collapsible litter boxes}

**Definition statement**

*This place covers:*

Foldable or collapsible litter boxes:

- may be (partly) disposable or made out of one piece.
- may be pre-filled with litter.
• may be lightweight, biodegradable etc.
• may contain deodorization, flea repellent material etc.

A01K 1/0128

(by means of scrapers or the like moving continuously)

Definition statement

This place covers:
Barn and pit floor scrapers and details therefore, e.g. coupling etc.
• may be attachable to a conventional vehicle, e.g. tractor etc.
• may be autonomous

Component structures, e.g. scraper blades or similar.

Floor coverings, e.g. bedding-down sheets {; Stable floors}

Definition statement

This place covers:

Floors for stables or shelters, or their element.

Mats, beddings and other coverings for floors.
  • may include a heating device, e.g. heating pads for small animals, etc.
  • may include a drainage device.
  • may contain zeolites.

Spreading devices for animal bedding material.
  • may be automatic.

Mechanical manipulation of bedding material, e.g. spreading, cleaning, filtering, conditioning, turning, mixing, collecting etc.
  • may be manual, automatic, autonomous.
  • may be for livestock stalls and/or chicken runs.
Stable floor cleaning.

{Grids; Gratings; Slatted floors}

Definition statement

This place covers:

Floors for stables and shelters, like grids, gratings and slatted floors.

may comprise heating device.

Details therefor, e.g. attached rubber tiles, ribbed floor, anti-slip, etc.
Attachment means for floors, e.g. locking and fastening elements, etc.

A01K 1/0152

{Litter}

Definition statement

This place covers:

Litter or sheets for use in animal stables, cages, etc.

- may be absorbent, deodorizing, dominating smells, insect repelling, biodegradable, dustless, coated, etc.
- may contain zeolites, sawdust, disinfecting substances, etc.
- may contain material for detecting infections.

Means and apparatus for making litter.

A01K 1/0154

{comprising inorganic material}

Definition statement

This place covers:

Litter comprising inorganic material, e.g. deodorants, insect repelling material, dyed, ph-indicating material, etc.

Litter may be absorbent, dust reducing, odour-inhibiting, etc.

Litter may comprise clay, gypsum, aluminium sulfate, material for detecting infections, etc.
Different means of processing litter.

**A01K 1/0155**

*comprising organic material*

**Definition statement**

This place covers:

Litter comprising organic material, e.g. (recycled) paper, wood, straw, etc.

Litter may be absorbing, clump able, dust reducing, etc.

Methods for producing litter.

**A01K 1/0157**

*Mats; Sheets*

**Definition statement**

This place covers:

Mats and sheets for use in animal stables or cages.

- may be absorbing liquid, odour adsorbing, e.g. liquid permeable top sheet, etc.
- may be moisture proof, washable, etc.
- may contain disinfectant etc.

Floor covering for animal stables, may be suitable for covering floor/walls, e.g. animal matrass.
For stables, connectable or individual sleeping mats.

Relationships with other classification places

This group covers mats used mainly for stalls, like cubicles, mostly intended to improve comfort when lying, e.g. matrass.

This group does not cover sheets to be used as toilets for pets which belong to A01K 1/0107.

This group does not cover sleeping matrass for pets, e.g. dogs, which belong to A01K 1/0353.

A01K 1/02

Pigsties; Dog-kennels; Rabbit-hutches or the like

Definition statement

This place covers:

Farrowing pens and attachments.

Hog- or sheep shelters and -shades.

Calf boxes.

(Battery-) cages for piglets.

Pen buildings for hogs or sheep, if specially adapted therefor.

(Transport-) crates for pigs.

Details therefore, e.g. heating, ventilation, feeding system, etc.
Buildings may be movable, pre-fabricated, etc.

*{Feeding pens for pigs or cattle}*  

**Definition statement**  

*This place covers:*  

Box-like confinements (normally for 1 animal) for ensuring mostly undisturbed feeding or drinking of an animal.  

may include an identifying system, a balance, etc.  

Closure/ opening of the box may be automatic.  

Boxes may be transportable.

{Transport boxes, bags, cages, baskets, harnesses for animals; Fittings therefor (for poultry A01K 31/002; for pigeons A01K 31/07)}

Definition statement

This place covers:

Devices for transporting animals from one place to another by hand or inside a transport e.g. in automobile or trailer, by plane, by train, etc.

Transportation boxes for pets which can be collapsible, demountable, can have fastening means for mounting on the seat of an automobile and/or can be worn by the user.

Harness/Restraining system for animals which can be connected to the safety belt system.

Containing devices which can be suitable for transportation; shipping, by air, truck etc., and/or can include an animal tying device.

A01K 1/0272

{Boxes, bags, cages, baskets, harnesses especially adapted for transport in or on automobiles}

Definition statement

This place covers:

Restraining means adapted to carry animals in or on automobiles, which can be interacting with the safety belt, passenger seat, trunk or luggage compartment, trailer or the like.

The restraining means can be a box, a bag, a cage, a basket, a harness or the like which can be either connected to the safety belt or built together with it, can be adapted for transport in the trunk of an automobile and/or can be intended to be transported in or on a car, bus, (fork-) truck, tractor, etc.
This group only covers (road) transport in wheeled motor vehicles.
Relationships with other classification places

This group does not include transport in airplanes, ships, trains, motorbikes, bicycles, etc.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Halter: an arrangement of straps fixed around an animal's head and used to lead or tie-up livestock.

Neck-bar: a mechanical device for restraining animals (e.g. cows) by clamping their necks in a releasable frame or cage.

**A01K 1/0606**

{by means of grids with or without movable locking bars (A01K 1/08 takes precedence)}

Definition statement

*This place covers:*

Grids for fastening animals between grids.
may have no, some or only movable bars. Bars may be movable in any plane or way.

Details therefor, e.g. locking systems, feeding rack beam, anti-hanging system, etc.

{Devices for immobilisation or restraint of animals, e.g. chutes (pens for animals while being shod A01L 13/00; appliances for supporting or fettering animals for operative purposes A61D 3/00)}

Definition statement

This place covers:

Devices, in particular pens or boxes, for immobilising animals, e.g. animal chute, squeeze, crusher, etc.

may include animal head restrainer, weighing appliances, etc.

Devices may be mountable on a vehicle, portable, adjustable in size, etc.
The immobilisation is confining or cramping rather than fettering, lifting and/or overturning may be additional.

Details for these devices, e.g. doors, tail gates, etc.

Starting boxes for rodeos, pig holders, sheep cradles, drafting gates, etc.

Loading ramps for animals.

Neck-bars { e.g. neck collars}

Definition statement

This place covers:
Devices for tying up an animal; stanchions suspended from a structural part above, forming a movable collar-like frame.

may be automatic; self-locking.

Details therefor, e.g. alignment device, triggering mechanism, etc.

Stanchions do not form part of, nor cooperate with, a grid. They are independent of grids.

Chain fastenings

Definition statement

This place covers:
Devices for fastening chains, or similar elements around animals' necks, to the stable structure.

may be fastened around the necks or bellies of the animals.
Fastening point(s) to stable may be movable.

Fastening element is carried by animal, independent of the stable structure.

Details therefore, e.g. hooks, halter fittings, etc.

A01K 1/08

Arrangements for simultaneously releasing several animals

Definition statement

This place covers:

Devices for simultaneously releasing several fastening animals.

may be released by e.g. chain mechanism, etc. (Less important)

Fastening means may be of any possible kind.

Release means may be automatic, by hand, etc. (e.g. connected with door controls, or frightening means).
Parts of stable may be movable.

Feed racks

Definition statement

This place covers:

Barriers for feeding roughage, indoors, or outdoors (except for poultry or small animals).

may be movable (by animal or motor), portable, collapsible, transportable.

Devices may contain a trough, incorporated in e.g. a hay rack.

Barriers may be electrified and may consist of e.g. a feeding rack, etc.
Details therefor, e.g. fastening grids, etc.

{Movable feed barriers, slides or fences}

Definition statement

*This place covers:*

Movable feed barriers, slides or fences for use in or outside the stable. Mainly for cattle.

by means of moving fodder to the barriers or moving the barriers to the fodder.

Barriers are moveable by means of wheels, rails, guiding cables, etc.

may include a motor.
(Autonomous) trolley pushing feed back to fence.

**Milking stations**

**Definition statement**

This place covers:

Milking parlours or stables.

may be movable or transportable, e.g. outdoors.

Equipment therefor, except milking systems, e.g. feeding devices, udder massage and cleaning devices, identification methods, etc.

Fastening devices specially adapted to milking stations.

Cow positioning methods and apparatus, e.g. including crowd gate.
Door controls for milking-parlours, if part of a whole structure.

Pasturing equipment, e.g. tethering devices; {Guiding corridors; Corrals, e.g. portable, collapsible;} Grids for preventing cattle from straying; Electrified wire fencing (electric circuits or apparatus for supplying electric wire fencing H05C)

Definition statement
This place covers:
Fences and corrals for outdoor use, may be portable, collapsible, transportable or fixed.
may be electrified or may include chemicals.
Corrals may be combined with shelters, etc.
Fences may serve as windbreak.
Tools for installing or dismantling fences.
Details therefor, e.g. fastening devices, wire tightening equipment, posts, etc.

References

Feeding devices for stock or game (A01K 1/10 takes precedence; feeding devices for poultry or other birds A01K 39/00 ){; Feeding wagons; Feeding stacks}

Definition statement
This place covers:
Feeders for roughage or general feed dispensing, may be transportable.
Tractor borne feeders, mainly for outdoor use.
Grating or roughage feeding corrals or barriers, transportable for outdoor use.
Mobile feeding stations, may include shelters.
bale distributors or -shredders for (outdoor) feeding.
Feeders may contain mixers. (e.g. mixing, mincing, weighing devices etc.)
Feeders for poultry or other birds
Feeders for roughage or general feed dispensing
Tractor borne feeders
Grating or roughage feeding corrals or barriers
Mobile feeding stations
bale distributors or -shredders
Feeders may contain mixers

{where fodder, e.g. bales, is conveyed by conveyor or slide to mixing or shredding elements on transversal and horizontal axes}

Definition statement

This place covers:

Devices including a conveyor or slide to mixing or shredding elements, including transversal and horizontal axes.

• may be mountable or attachable to vehicle, e.g. tractor.
• may include bale un-roller, bale loosening system, (un)loader, etc.

Details therefor, e.g. ejector, mixer, cutter, etc.
**A01K 5/007**
{with mixing or shredding area contained inside an endless chain or belt conveyor}

**Definition statement**

*This place covers:*

Devices with mixing or shredding area contained inside an endless chain or belt conveyor.
- may be attachable to vehicle.
- mixing element may be movable.

Details therefor, e.g. measuring equipment, cutting member, etc.

![Diagram](image)

**A01K 5/008**
{Feed bags}

**Definition statement**

*This place covers:*

Feed bags or nets, mostly for horses.

Details therefor, e.g. attachments for feed bags, etc.

Bucket holders, e.g. for rearing calves, etc.

Feeding containers for animals, pig troughs, bracket for animal feeders, etc.
Devices may be portable, collapsible, etc.

{with conveyor belts or the like}

Definition statement

This place covers:
Automatic feeding devices with conveyor belts or the like.

Weighing or dosing means may be incorporated.
Devices may include apparatus for tensioning a belt, belt retainer, stop device, etc.

Devices may be adjustable.

Cleaner apparatus for feeding devices with conveyor belt.

**A01K 5/0216**

{for the distribution of liquid fodder (A01K 9/00 takes precedence)}

**Definition statement**

*This place covers:*

Devices for (automatically) distributing fluid fodder, e.g. milk, slurry or paste, or other fluids, e.g. medication.

Devices may include, pumps, valves, pipes, dosage systems, containers, heaters, dispensing means (incidentally teats), etc.

Mixing devices to prepare the fodder.

Cleaning devices therefor.

Devices may be mountable on vehicles, e.g. trolleys.

Dispensing means may include licking wheels or -balls.

Supply of liquid and solid mixture of animal feedstuffs, e.g. water pipe for pig's fodder.

{dispensing by dosing means actively operated by the animal}

**Definition statement**

*This place covers:*
Feeding devices dispensing by dosing means, actively operated by the animal.

Dosing devices may operate by means of e.g. a counter weight, remote control, valves, ball check, nipple feeder, etc.

may be in combination with a trough unit, feed transport device, drinking device, etc.

Devices may dispense solid or liquid food.

**A01K 5/0241**

{dispensing by means of stirring mechanisms or agitators operated by the animal}

**Definition statement**

*This place covers:*
Feeding devices dispensing by means of stirring mechanisms or agitators operated by the animal.

By means of a (rotating) wheel, rotor blades, ball check, a rod, deflector, etc.

Feeding devices may include water system.
Devices may dispense solid or liquid food.

**A01K 5/025**

{with doors or lids activated by the animals to access feeding place or trough}

**Definition statement**

*This place covers:*

Feeding devices with access to feeding place or trough only possible through access doors or lids to be opened by the animal.

By means of a (reciprocable) closure unit, open and closed by activation unit.
- may be activated by weight of animal, registration system (sensor), timer, etc.

Feeding devices may include controllable gates

Details therefor, e.g. hinge mechanism, etc.
A01K 5/0258
{with endless screws}

Definition statement

This place covers:

Automatic feeding devices with endless screw.
• may include a hopper, adjustable (un-) loader, feed lever sensor, feed intake cup apparatus, etc.
• may be computer controlled.
• may be movable, attachable to wall, etc.

A01K 5/0266
{with stable trolleys, e.g. suspended}

Definition statement

This place covers:

Automatic feeding devices by means of trolleys for animals in stables (including poultry).
• may include a reserve (e.g. one or more hoppers), mixing device, timing device or dosing device, identification device, etc.

Trolleys may be movable by rails, tracks, attachable to vehicle (e.g. tractor), etc.

Movements may be reciprocating, e.g. along an circular path.

A01K 5/0275

{with mechanisms for delivery of measured doses (A01K 5/0233 takes precedence)}

Definition statement

This place covers:

Feeding devices by means of mechanisms for delivery of measured doses.

- may transport solid and/or liquid food. Water devices may be included.

Devices may include means of weighing, timing mechanisms, metering unit(s), hopper(s), conveyors, mixing devices, etc.

Details therefor, e.g. pipes, valves, etc.

References

Limiting references

This place does not cover:

A01K 5/0283

{by weight}

Definition statement

This place covers:

Automatic feeding devices with mechanics for delivery of measured doses by means of weighing.

Weighing may occur at any point of the system. (starting e.g. at the silo).

Weighing of (refused) feed or animals (any kind) may be included.

Devices may include a timing device, registration device, etc.

Included are weighing means for controlling the duration of distribution to stations where no weighing occurs.

A01K 5/0291

(with timing mechanisms, e.g. pet feeders)

Definition statement

This place covers:

Automatic feeding devices with timing mechanisms. For all kinds of animals.

Timing mechanisms must be of some specific importance.

Devices may include dosing means, weighing apparatus, etc.

Access can be given by opening lids, dispensing food, discovering bowls, switching off electric barriers, etc.

Watering equipment for stock or game

Definition statement
This place covers:
Watering equipment for animals, e.g. troughs, buckets, bowls, etc, which can be portable, foldable, elevated, collapsible, etc.
The watering devices can include fastening means, temperature controlling systems, anti-freeze, etc.
Details therefor, e.g. drinking fountains, vessels, teats, etc.
Devices may be combined with feeders.
Troughs may have water in- and outlets.

A01K 7/005

{Drinking bowls with anti-splash or anti-spilling features}

Definition statement

This place covers:

Drinking bowls for animals having features preventing egress of liquid, usually for when the animal is drinking from the bowl.

A01K 7/02

Automatic devices {; Medication dispensers}

Definition statement

This place covers:

Automatic watering devices, disclosing several of the features of groups A01K 7/02 - A01K 7/06.

Devices may deliver medicine, disinfectants, e.g. vaccination delivery system.

Devices may comprise feeding system.
Devices may be controlled by weight or level of water, e.g. water-level regulator, etc.

Feed-moisturizing devices, without feeder characteristics.

Devices may include dosing system, filling system, identification system, time-controlling system, anti-freeze devices, etc.

A01K 7/022

{Pumps actuated by the drinking animal}

Definition statement

This place covers:

Watering devices including pumps actuated by the drinking animal, e.g. piston pumps, vane pumps, etc.

by means of a pedal, movement detector, etc.
Devices may include liquid containing food.

A01K 7/025

{Water tanks}

Definition statement

This place covers:

Watering devices where a tank aspect is included.

Details or systems for tanks or containers, e.g. connections therefor, etc.
Devices may include filters, troughs or valves, etc.

A01K 7/04

actuated by float

Definition statement

This place covers:
Automatic drinking devices actuated by floats.
Details therefor, e.g. float valve mechanism, valves, etc.
Water control valve may be adjustable.
Devices may include feeding system.

A01K 7/06
actuated by the animal {(for poultry A01K 39/0213)}

Definition statement

This place covers:
Automatic drinking devices actuated by the animal, by means of valves.

Devices may include bowl, troughs, cups, etc.
Actuation may be indirect, e.g. step-board switch.
Auxiliary features therefor, e.g. heating, fastening, etc.
Devices may be frost-proof.
Valves for liquids actuated by adult animals.
No pump present, only a valve to open the flow.

Sucking apparatus for young stock {}; Devices for mixing solid food with liquids

Definition statement

This place covers:

Devices for mixing or delivering liquid feed, e.g. milk substitute, to teats for young animals.

Details therefor, e.g. teats, guiding means (e.g. moving grids), weighing means, mixing devices, etc.

Devices may be movable, e.g. on stable rails.

Devices may include registration system, dry feeding system, etc.

An additional ingredient may be added by mixing, e.g. medicine.

Buckets with suction nipples for calves.

Marking of animals (marking poultry or other birds A01K 35/00)

**Definition statement**

*This place covers:*

Identification marks, e.g. tags, buttons, rings, collars, for animals other than birds or fish.

- may be attachable to neck, tail, leg, etc. of the animal, or sticking labels.
- may contain pesticides, ID-transmitters, electronic memory element etc.

Tools for applying marks, dyeing devices for marking animals.
ID-codes suitable for marks.

Biologically marking methods and apparatus, e.g. applying antigen.

{Ear-tags}

Definition statement

This place covers:

Ear-tags for marking animals, mostly cattle.

Details therefor, e.g. locking system, security features, etc.
Ear-tags may include transponder housing, insecticide dispenser, identification system, etc.

Devices for applying ear-tags.

\[\text{A01K 11/002}\]

\{Pliers specially adapted for fixing ear-tags to ears\}

**Definition statement**

*This place covers:*

Ear-tag applicators, mostly for cattle.
- may include movable applicator member.
- may be power driven.

Tag punch system for punching symbols into tags.

Details therefor, e.g. security features, locking members, etc.

{Automatic identification systems for animals, e.g. electronic devices, transponders for animals (identification systems for access to feeding pens A01K 1/0209; ear tags with electronic identification means A01K 11/004)}

Definition statement
This place covers:
Devices for electronic livestock data collection, e.g. transponder systems.
Automatic coding and/or decoding of identity information, also registration of additional information, e.g. on milk yield, weight, etc.
Transmission of such information, e.g. by microwaves, radio frequency, etc.
Processing of such information, e.g. the display.
System may include automatic feeding.
Manual intervention may be involved, e.g. for actuating checking device.
Methods for locating animals.

{incorporating GPS}

Definition statement

This place covers:

Methods for locating animals with GPS, usually by incorporating GPS technology within animal transponders, unique identifiers, etc.
Position detectors that acquire positional information using a global navigation satellite system (GNSS) on the domestic animals.

**Relationships with other classification places**

Collars or similar articles with GPS for locating animals, e.g. locating pets outside specific areas, are covered by group A01K 11/008.

Collars or similar articles for anti-evasion purpose, normally associated to one or more areas and adapted for pets, are covered by group A01K 15/023.

Collars or similar articles with anti-barking devices are covered by group A01K 15/022.

Devices for grooming or caring of animals, e.g. curry-combs; Fetlock rings; Tail-holders (as part of the harness B68B 5/04); Devices for preventing crib-biting; Washing devices; Protection against weather conditions or insects

Definition statement

This place covers:

Applying substances onto and/or into animal's bodies, not covered by other groups, nor restricted to veterinary art.

Improving the comfort of an animal, by means of cooling, heating, watering devices, blowing air, etc.

Grooming stands.

Devices for preventing unhealthy behaviour of animals, e.g. anti-crib-biting devices.

Improving atmosphere by, e.g. electrical field.

Cutting claws.

Wellness treatments e.g. sauna, IR treatment.

**Glossary of terms**

In this place, the following terms or expressions are used with the meaning indicated:

Fetlock ring: a ring (typically rubber) placed around the fetlock joint to prevent a horse kicking its own feet when walking, and to encourage a wider gait. Often used for horses with close hind feet.
A01K 13/001

{Washing, cleaning, or drying devices (for veterinary purposes A61D 7/00, A61D 11/00)}

Definition statement

This place covers:

Devices for cleaning, washing and/or drying animals.

may be automatic.

may be stationary, transportable or portable.

may include brushes.

The cleaning may include disinfecting, deparasitation.

Bathing devices for animals other than birds.

(Sheep-) dipping devices.

Sand-bathing devices, e.g. for chinchillas

{Devices for applying insecticides or medication (A01K 27/007 takes precedence; for veterinary purposes A61D 7/00)}

Definition statement

This place covers:

Devices for applying insecticides, disinfectant or medication to animal skin. (outside or in chambers)

- mostly by means of spraying, but also dipping or brushing.
- may be combined with feeding device.

Dispensing material may be powder or fluid.

Dust bags, e.g. for dogs.

Animal oilers without scratching action.
Fly traps.

{Rubbing-posts}

Definition statement

This place covers:
Devices enabling animals to rub and scratch themselves.
May be automatic (motor action), computer regulated.
may be actuated by animal.
Dispensers for fluid or powder may be incorporated, but scratching is essential.
Doors with brushes incorporated, e.g. for cats.
Rubbing-posts with fluid dispenser (oiler).

**{Tail-holders}**

**Definition statement**

*This place covers:*

Tail holders, mostly for cows or horses.
- may be attachable to animal or wall of stable.
- may be disposable.

Tail lengthener for horses.

Anti-kick apparatus for cows.

Horse tail braid or similar.

**{Protective coverings (Elastic soles or covers for hoofs **A01L 5/00, A01L 7/02**; for veterinary purposes **A61D**)}**

**Definition statement**

*This place covers:*

Protective garment or blankets for animals, e.g. support garment.
- may be heat retaining, heat-reflecting, bullet-proof, etc.
• may leave parts of the body open for treatment.
• may be sprayed-on films, e.g. naked sheep.

Devices for movement restriction.
Protective footwear and leg protectors for animals.
Udder and teat protectors.
Animal tail control/protection devices.
Protective devices for scaring insects, e.g. fringes, face mask, etc.
Collars for preventing animals from licking/biting e.g. their wounds.
Devices for protecting limbs or other parts from knocking against each other.
Artificial horns, horn protectors.

{Leg, hoof or foot protectors}

**Definition statement**

*This place covers:*

Foot protection systems for animals.

Hoof shoe, may be permanently or temporarily attachable.
  • may be elevated, elastic, etc.

Knee protection systems, e.g. knee caps.

Ankle protection systems.

Claw protection cover for cats.

Devices may include protection against insects.

Sheets for cooling the legs.

Boots for dogs and cats.

{Horse blankets}

Definition statement

This place covers:

Blankets, mostly for horses.

• may be heat-reflective, waterproof, breathable, heat retaining, windproof, etc.

Details therefor, e.g. fastening means, etc.

Therapeutic blankets, e.g. magnetic blanket.

Blankets may contain an anti-rubbing devices.

Blankets may have anti-insect cover.

A01K 14/00

Removing the fleece from live sheep or similar animals (hand-held clippers or shavers with a plurality of cutting edges, specially adapted for shearing animals, e.g. sheep, B26B 19/24)

Definition statement

This place covers:

Removing the fleece from live sheep or similar animals, by means of a net, e.g. a fleece retention coat.

Chemical sheep shearing, e.g. by applying coatings.

Wool harvesting systems.
Systems for processing waste products of wool harvesting.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Hobble: A device restricting an animal's leg movement to impede its ability to stray or run.

A01K 15/003

{Nose-rings; Fastening tools therefor; Catching or driving equipment}

Definition statement

This place covers:

Nose-rings, which can include e.g. anti-bite devices, fastenings, etc.

Devices for applying a nose-ring.

Devices for catching or holding any animals, which can be hand-held.

Devices for controlling animals by mainly squeezing a part of the body, mainly the nose, e.g. animal twitch.

(Cattle) pods, non-electrical.

Lassos. Holders and containers therefor, etc.

Bull halters.

Devices can be vehicle-mounted, or combined with trolleys.

NB. Not included are: (movable) confinement devices

### A01K 15/021

**{Electronic training devices specially adapted for dogs or cats}**

#### Definition statement

This place covers:

Training apparatus, by means of electronic devices specially adapted for dogs or cats, e.g. a collar.

- may operate by means of electric shocks, vibrations, sound, etc.
- may include pet identification system, e.g. Global Positioning System.

Details therefor, e.g. remote control, etc.
Devices for controlling animal behaviour.

References

Informative references

</tbody>
</table>

Special rules of classification

Collars or similar with GPS for locating animals, including pets outside specific areas are covered in A01K 11/008.

Collars or similar for anti-evasion purpose, associated normally to one or more areas and adapted for pets are covered in A01K 15/023.

Collars or similar with anti-barking device are covered in A01K 15/022.

Collars or similar with electric-shock or other correction means, not related to areas or barking, are covered in A01K 27/009.

**A01K 15/022**

{Anti-barking devices}

Definition statement

This place covers:

Anti-bark devices.

By means of collars including shock, cold fluid, high frequency devices, etc.
Details therefor, e.g. vibration sensor, etc.

A01K 15/023

{Anti-evasion devices}

Definition statement

This place covers:
Satellite animal confinement systems, e.g. global positioning. Electronic animal confinement systems, ultrasonic animal deterrent system, echo-ranging electronic boundary system, etc.

Animal repelling devices.

Devices may include bark-inhibitor.

Details therefor, collars in combination with an anti-evasion device.

A01K 15/024

{Scratching devices, e.g. for cats}

Definition statement

This place covers:
Scratching devices, e.g. for cats.
• may be attachable to wall, door, furniture, etc.
• may include cat housing, feeding device, toys, perch, etc.

Climbing posts including scratching devices.

Litter boxes with abrasive surface.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

<table>
<thead>
<tr>
<th>Curry-combs; Brushes</th>
<th>A01K 13/002</th>
</tr>
</thead>

<td>A01K 13/004</td>
</tr>
<tr>
<td>Absorbent pads characterised by the use for animals</td>
<td>A61F 2013/15186</td>
</tr>
</tbody>
</table>

Special rules of classification

When the scratching action is meant for the body of the animal that rubs itself, then it is considered a rubbing post and is covered by A01K 13/004.

If the scraping action is done to the animal, not by the animal itself, then it is considered like a comb and is covered by A01K 13/002.

When the scratching post is interpreted as used for the filing of claws, not for scratching the body, it is covered by A01K 15/024.
**A01K 15/025**

*Toys specially adapted for animals*

**Definition statement**

*This place covers:*

Toys for pets, may be edible.

Toys may be attachable to wall.

Toys may be scented, spinning, reelable, etc.

Toys may include food dispensing system, sound device, (moving) light beam, etc.

Crawling tube for small pets.

Toys may include exercise device.

{Exercising equipment, e.g. tread mills, carousels (equipment for racing or riding sports events A63K)}

**Definition statement**

*This place covers:*

Animal training devices (mostly for horses), by means of endless belts, treadmills, etc.

- may include monitoring systems.
- may include tracking, e.g. GPS.

Systems for improving the performance of horses during races and/or providing feedback during training such as gait characteristics, fatigue, lameness, heart rate, breathing, etc.

Details therefor, e.g. detachable harness assembly, etc.

Running wheel for small animals.

Devices may be attachable to vehicle, transportable, etc.

Dog jumping devices.

Swimming pools for training animals.

A01K 17/00

Dehorners; Horn trainers

Definition statement

This place covers:

Dehorning or preventing horns from growing. Treatment may be chemical or thermal.
- by means of electric dehorning.
- by means of a heating device, e.g. gas-fired heating device.
- by means of freeze-branding.
- by means of cutting, e.g. for slaughtered animals.

Changing shape of horns, e.g. by weights.
Details therefor, e.g. stencils or holders.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Horn trainer: a device fitted to an animal's horns to influence how they grow.

A01K 19/00

Weaning apparatus

Definition statement

This place covers:

Anti-sucking devices for cattle, may be attached to mother animal or her young, e.g. muzzles, halters, etc.
may operate by means of electric chocks or contains sharp elements.

**A01K 21/00**

**Devices for assisting or preventing mating**

**Definition statement**

This place covers:

Devices for preventing mating, e.g. harness for dogs, bulls, rabbits, etc.

Diapers for female dogs.

Stimulation of ovulation methods and devices.

Means for guiding a boar past sows, e.g. boar cart.

A01K 23/00

Manure or urine pouches

Definition statement

This place covers:

Devices for receiving excrements from animals, either fastened on the animal, or situated immediately close to it.

Harnesses for attaching waste collecting containers, bags, sacks, etc. to animal.

Anti-splash shields for dogs.

Details therefor, e.g. bags, sacks, holders, etc.

Harness may also serve for protection against mating, etc.

Devices for taking samples of excrements of animals.

Diapers for animals.

**A01K 23/005**

{Manure or urine collecting devices used independently from the animal, i.e. not worn by the animal but operated by a person}

**Definition statement**

_This place covers:_

Manure collecting devices used independently from the animal, e.g. waste scooper devices (not to scoop the ground).

Pet excrement scoop, may be in combination with a (plastic) bag.
- may comprise an elongated handle.
- pick-up waste bag, used without any tools.

**Relationships with other classification places**

When the waste is picked from the ground it belongs in E01H 1/1206.

When the waste is picked before falling on the ground it belongs in A01K 23/005.

When only a flexible bag is used to remove excrement it belongs to B65F 1/0006.

A01K 25/00

Muzzles

Definition statement

This place covers:

Devices for encapsulating an animals head, mostly for dogs.

• may include a control and leash combination for e.g. training, guiding, restraining a dog.
• may be remotely releasable.

Grazing regulators for cows.

Prevention of bite function must be present.

Leads or collars, e.g. for dogs

Definition statement
This place covers:
Collars mostly for dogs, or for similar animals.
• may contain anti-parasite material.
• may be in combination with leads or harnesses

Multiple animal leashes.
Details therefor, e.g. closure members, dampers, safety connections, etc.
Lead-storing or -dispensing means, e.g. adjustable length leash.
Devices may be attachable to vehicles, walls, etc.
Material for leash, harness or collar.

### A01K 27/001

#### {Collars}

**Definition statement**

*This place covers:*

Collars for dogs or the like which can be extendable, choking, etc. These collars can be attachable to leashes and/or harnesses, can have multiple or sliding attachment points and can be adapted to different sizes.

Double collars.

Collars extended into leashes e.g. for better control by pulling neck.

![Diagram of collar and leash](image-url)

| Head harness | A01K 27/002 |

**A01K 27/002**

{Harnesses}

**Definition statement**

_This place covers:_

Harnesses intended for guiding or controlling the animal, e.g. while walking.

Head harnesses, e.g. muzzle-like that do not interfere with an animal opening its mouth, intended for guiding and/or controlling the animal.

A01K 27/003

{Leads, leashes}

Definition statement

This place covers:

Devices for retractable leashes.

• may include waste disposal bag dispenser.

Details therefor, e.g. locking/brake mechanism, retractor, etc.
Compact dog leash, may be attached to collar of dog or concealed in hollow walking stick.

**A01K 27/005**

*Quick-couplings, safety-couplings or shock-absorbing devices between leash and collar*

**Definition statement**

_This place covers:_

Shock absorbing devices, by means of e.g. stretching leash, extensible mechanism, elastic section, etc.

Break away assembly.

Quick release leash, one hand operated dog leash.

- locking systems.
Shock absorbing lead grip.

A01K 27/006

{with light-emitting or ornamental devices}

Definition statement

This place covers:

Dog leashes or collars with light-emitting, or other ornamental devices.
• may include e.g. a container, identification device, bag dispenser mechanism, decorations, flashlight, etc.

Leash and collar may be illuminating, water-resistant, etc.

Collar may contain flea-repelling material or insecticide, etc.
**A01K 27/007**

{with insecticide-dispensing means}

**Definition statement**

*This place covers:*

Collars (or ear-tags) which protect against fleas, ticks, lice and other insects/parasites.
- may be naturally (herbs), chemically or by entrapment.

Flea-repelling pet accessory, e.g. a pet toy.

(Disposable) pendants, may be deodorizing, insect-repelling, etc.

Drug or insect-repelling dispensing devices, may be attachable to collar.

Collar may contain flea-repelling material or insecticide, etc.

**A01K 27/009**

{with electric-shock, sound, magnetic- or radio-waves emitting devices}

**Definition statement**

*This place covers:*

Devices for controlling animal behaviour with electric-shock collars.

Collars may include therapeutic devices, by means of magnets.

Devices may work with remote control.
Collars may include identification device, pet locator, etc.

**Relationships with other classification places**

Collars in combination with anti-barking [A01K 15/022]

Anti-evasion devices [A01K 15/023]

**References**

**Informative references**

Attention is drawn to the following places, which may be of interest for search:

| Electronic training and confining equipment | [A01K 15/021] |

**Special rules of classification**

Collars or similar with GPS for locating animals, including pets outside specific areas are covered in [A01K 11/008].

Collars or similar for anti-evasion purpose, associated normally to one or more areas and adapted for pets are covered in [A01K 15/023].

Collars or similar with anti-barking device are covered in [A01K 15/022].

Collars or similar with electric-shock or other correction means, not related to areas or barking, are covered in [A01K 27/009].

**A01K 29/00**

**Other apparatus for animal husbandry**

**Definition statement**

This place covers:

- Monitoring of farm animals.
- Administration or planning, for breeding activities.
- Physical preparation for breeding, e.g. irradiation of sperm or eggs.
- Transporting or loading animals, e.g. a ramp, other than for birds and fish and not covered elsewhere.
- Administration or management of herds in general.
- Measuring physical properties of animals, e.g. performance testing.
Snake venom milking.

Sorting of animals, e.g. by size, weight (not covered elsewhere).

Influencing biological activity, (not covered elsewhere).

Monitoring or measuring activity of animals. (including fish)

Procedures or recipes for feeding animals, e.g. for rapid growth.

Weighing animals.

Detecting mating by marking devices actuated by animals.

Anti-theft devices.

Animal-rescue devices for swimming pools.

A01K 29/005

{Monitoring or measuring activity, e.g. detecting heat or mating}

Definition statement

This place covers:

Livestock data collection/receiving systems.
Devices for monitoring behaviour of animals.
Devices for monitoring feeding behaviour of animals.
Devices for monitoring movement/activity of animals.
Devices for monitoring animal health, e.g. temperature, location, etc.
Bio-sensors.
Identification method and apparatus.

A01K 31/00

Housing birds

Definition statement
This place covers:
Installations or devices for housing birds, not covered elsewhere, or not specified.
Poultry houses for battery or free-floor rearing, not specified.
Bird-washing (disinfecting) devices.
General aspect of mass-rearing of poultry. (housing aspect)
Poultry house ventilation
  - Buildings may include heating, cooling and ventilating means.
A01K 31/00 (continued)
Definition statement

Curtain control devices for poultry houses.

{Poultry cages, e.g. transport boxes (Harvesting or transport of poultry A01K 45/005)}

Definition statement
This place covers:
Cages or boxes for transporting birds or other small animals.
may be collapsible, foldable, portable, mountable on vehicle, etc.
may include feeding and/or drinking devices.
may be adapted for shipping, shipping containers.
Cages may be arranged in stacks or rigs (shelf like containers).
Other poultry cages, not included for battery utilisation.

A01K 31/005

{Battery breeding cages, with or without auxiliary features, e.g. feeding, watering, demanuring, heating, ventilation}

Definition statement

This place covers:

Battery cage systems for breeding poultry, e.g. broilers.

- may be transportable, e.g. to slaughterhouse.

Details of such system, e.g. feeding/drinking devices, ventilation, egg collecting means, etc.

Battery cages may be suitable for breeding, rearing and fattening, e.g. growing aspect.
Building structure may be included.

{Floors (for stables A01K 1/015)}

Definition statement

This place covers:

Flooring systems for use in raising poultry, e.g. battery cages, transport cages, etc.
- may include methods for processing manure.

Poultry nests may be included.

Systems for preventing breast blisters, swollen hocks, etc.
Floors specially adapted for egg laying poultry.

A01K 31/04
Dropping-boards; Devices for removing excrement

Definition statement
This place covers:
Devices for removing excrements from poultry housings, (e.g. batteries, single cages).
• may be collecting, drying, or otherwise treating excrements from cage or poultry house.
• may include conveyor belts, scrapers, blowers for drying air, water flushers, heating means, liquid sprayers, etc.
Drying blowers may be in combination with ventilation means or heating.
Vehicles for manure treatment, cleaning apparatus.

Cages {}, e.g. for singing birds (for poultry A01K 31/002)

Definition statement
This place covers:
Cages for domestic birds, indoor or outdoor, e.g. volières, etc.
• may be transportable, foldable, etc.
• may include bird baths, feeders, waste trays, etc.

Cages may be suitable for assembling into batteries.

Heaters for cages.

Covers and supporting means therefor.

Accessories for cages, e.g. toys, nest holders, vermin traps, etc.

Hangers or stands for cages.

Transportable cages (A01K 31/08 takes precedence); Travelling cages for pigeons; Opening or closing of cages

Definition statement

This place covers:

Transportable cages, may be single cages, containers, crates, etc.
- may be portable, disposable, etc.
- may be mountable on vehicle, e.g. car, ship, etc.
- may include drinking/feeding devices.

Containers may be subdivided in compartments.

Details therefor, e.g. doors, locks, wheels, etc.

A01K 31/08

Collapsible cages

Definition statement

This place covers:

(Bird-) cages in which the collapsible aspect is dominating or characteristic.

- may be used for pet birds, transporting pigeons, exhibiting birds, breeding, etc.

Cages may be prefabricated, disposable, connectable to each other, etc.

- features may enable them to be shipped, or stored under restricted space conditions (even only once, before assembly).

Perches {for poultry or birds, e.g. roosts}

**Definition statement**

This place covers:

Perches or roosts (perch arrays) for poultry or other birds.

- may be movable, foldable, heated, lighted, etc.
- may enable trimming a birds nails.

Fastening means for perches to cage, feeding device, etc. (e.g. clamping mechanism).

Disinfecting perch constructions.

Cleaners for perches.

Ant-vermin perches.
Shoulder-mountable perches.

A01K 31/14

Nest-boxes {, e.g. for singing birds or the like}

Definition statement

This place covers:

Nest-boxes, nesting structures for different kind of birds, e.g. earth burrowing birds.
- may include feeding- and drinking devices.
- may include viewing possibilities, e.g. viewing window.

Size of the nests may be adaptable. Nests may be collapsible.

Bird nest protection systems.

Birdhouse kit construction.
Multiple nesting structures, e.g. for cliff swallows.

**A01K 31/16**

Laying nests for poultry; Egg collecting

**Definition statement**

*This place covers:*

Laying nests, single or in batteries, for hen houses or cages.

Egg-collecting and -counting means connected therewith.

Nest bowls for poultry.

Details therefor, e.g. trapdoors, if integral part of specific structure.

Nests may be intended for other birds than poultry.

Nests may have manual or mechanical egg-collecting features, e.g. conveyors.

Cleaning devices for e.g. nest pad, etc.
Registration devices, e.g. registering the number of eggs laid by a hen.

A01K 31/165

{Egg collecting or counting}

Definition statement
This place covers:
Devices for collecting eggs, in particular from battery nests or cages.
Devices for counting eggs.
Devices for transporting eggs, e.g. escalators, etc.
above devices may be cooperating.
Details therefor, e.g. conveyor belts, guiding devices, if connected with nest or cage.
Devices may include weighing apparatus, cleaning apparatus, marking device, etc.

Laying batteries {including auxiliary features, e.g. feeding, watering, demanuring, heating, ventilation}

**Definition statement**

*This place covers:*

Battery structures for housing poultry.
- may include movable cages, easy mountable, dismountable, etc.
- may include ventilating, heating, demanuring means, etc.

Support for cages.
Feeding and drinking devices, egg-receiving devices, may be part of a battery.

**A01K 31/18**

**Chicken coops or houses {for baby chicks}; Brooders {including auxiliary features, e.g. feeding, watering, demanuring, heating, ventilation (battery breeding cages A01K 31/005)}**

**Definition statement**

*This place covers:*

Structures for housing chicks (or other young animals).

Characteristic must be the growing of the chicks, e.g. adjustment of structure to growth.

- may include brooder incubators, (NB: for young chicks) but not as the main future.

Poultry rearing device, other than brooders, e.g. mere shelters.

Heating, ventilation and drinking/feeding-device, may be part of whole structure.

**Brooders {; Foster-mothers; Hovers}**

**Definition statement**

*This place covers:*

Brooders for raising poultry.

- may be portable.

Heating devices as part of a brooder, e.g. electric heaters, infra-red gas heaters, etc.

Heat lamps, dampers, in combination with brooders.

**A01K 31/20**

**Heating arrangements {; Ventilation}**

**Definition statement**

*This place covers:*

Climate control features applicable to brooder houses or brooders, e.g. heaters, (coolers), ventilation system.

The heating or ventilating aspect must be a characteristic.

Devices may also be meant for conventional battery cages.
Heating may be electric, infra-red gas heater, etc. (e.g. floor-heating).

Poultry runs {}; Poultry houses, including auxiliary features, e.g. feeding, watering, demanuring (air-conditioning of poultry runs or houses A01K 1/0047)

Definition statement

This place covers:

Means for raising poultry free, e.g. without cages inside houses.
- may include methods for controlling environmental condition e.g. ventilation and heating devices.
- may include methods of processing poultry manure.

Free floor raising aspect must be present.

Poultry houses may consist of free areas (runs).
Details therefor, e.g. chicken fences.

Poultry houses may be movable, e.g. wheeled.

A01K 31/24

Dovecots; Pigeon lofts

Definition statement

This place covers:

Dovecots, pigeon lofts and trap assemblies for pigeons, e.g. battery pigeon loft, etc.

- may include a waste disposal system, ventilating system, etc.
- may be movable and size/height may be adjustable.
Details therefor, entrance, cleaning systems, etc.

A01K 33/00

Nest-eggs

Definition statement

*This place covers:

Nest eggs or hatching simulation device.

- may be vermin-destroying.
A01K 35/00
Marking poultry or other birds {marking meat A22C 17/10}

Definition statement
This place covers:
Marking poultry by means of rings, tags, wing bands, clips, etc.
Transponder may be included.
Detection devices therefor.
Devices for placing or removing rings.
Devices may include anti-parasite material.
Storage device for tagging rings.
Branding devices for poultry.

Constraining birds, e.g. wing clamps

**Definition statement**

_This place covers:_

Devices for preventing birds from flying, escaping, sitting down, picking or dropping excrements.
- by means of clamps, locking system (beak), harness, boots, etc.

Attachments rings for birds feet.

Anti-picking devices, e.g. blinders, lenses or goggles.

Constraining birds for artificial insemination.

**A01K 39/00**

Feeding or drinking appliances for poultry or other birds {(_A01K 31/005, A01K 31/06, A01K 31/17 take precedence_)}

**Definition statement**

_This place covers:_

Feeding/drinking devices for poultry, may be automatic. (e.g. battery feeding system)
Window mountable bird feeders.

Bird feeding supports.

Feeding devices for wild animals, e.g. hummingbird feeders.

Bird feeder may be disposable.

Bird feeder may recycle bird food.

A01K 39/01

Feeding devices, {e.g. chainfeeders} (A01K 39/04 takes precedence; \{panfeeding systems, feeding pans A01K 39/0125\})

Definition statement

This place covers:

Poultry feeders comprising mechanical distributing means from a storage to one or more feeding stations, e.g. a long trough.

Conveying chains/belts therefor, conveying cables.

Hoppers therefor, including vibrators or controls.

Conveyor/trough combinations therefor, e.g. conveyor in trough wall.

Battery feeding systems, without other important battery features.

Devices may include level detectors.
Trough-type feeders with connection means for distributing systems.
Feed-flow regulating means.
Bird-feeding devices for outside, may be insect-proof.
Nectar feeder access devices.

**A01K 39/0106**

{for solid feed, e.g. grit-cake holders (licking-stone holders for stock or game **A01K 5/015**)}

Definition statement

This place covers:

Bird food holders, mostly for feeding birds outside, e.g. wire mesh tubular feeder.
  - may be attachable to wall, tree, etc.

Devices may also be used for feeding other animals, e.g. squirrels.

Bird feeders may be disposable.

Feed blocks.
Hand-held bird feeders.

References

Limiting references

This place does not cover:

Licking-stone holders for stock or game

A01K 39/0113

(with means to prevent other animals or insects, e.g. squirrels or ants, from eating also)

Definition statement

This place covers:

Squirrel proof bird feeding device, by means of e.g. a spinning mechanism triggered by weight, electric shock device, slippery side panels, etc.

Baffles for preventing animals from climbing up a birdhouse.
Rodent repelling by means of e.g. several water filled moats, protective pet dish, etc.

A01K 39/012

filling automatically {, e.g. by gravity from a reserve}

Definition statement

This place covers:

Bird or poultry feeding devices with automatic filling of a feed compartment, e.g. gravity.
  • may be actuated by the animal.

Devices include a storage, e.g. incorporated hopper.

Excluded are the possible conveying means from a storage to the feeder(s): See A01K 39/01.

Means for controlling the feeding device, e.g. animal actuated.

Feeders with multiple levels.

Devices may be combined with shelters.
Devices may include time-control means.

A01K 39/0125

{Panfeeding systems; Feeding pans therefor}

Definition statement

This place covers:

Pan feeding systems for poultry.

Device may include an adjustable feed level control.

Means of controlling supply of feed to the trough.
Feeding device may include time controlling means.
Details therefor, e.g. feed drop tube, etc.
Feeding pans, feed box, etc.

**A01K 39/014**

**Feed troughs; Feed throwers**

**Definition statement**

*This place covers:*

Bird troughs, e.g. with bird-actuated covers.

Bird throwers, i.e. throwing-out feed, by means of e.g. propelling, centrifugal.

Troughs for batteries.

Grids for troughs, anti-roost devices for troughs.

Trough aspect is prevailed, feeder may include a hopper or other delivery means, e.g. a foraminous hopper for direct access.

Devices may include a shelter.

Heating or lighting means may be incorporated.

Drinking appliances (A01K 39/04 takes precedence)

Definition statement

This place covers:

Poultry watering systems involving features of more than one subgroup of A01K 39/02.

Devices may be bird-actuated, other than nipples.

Drinking system may be remote controlled.

Flush apparatus for watering system.

Drinking troughs; their accessories, e.g. covers.

Details of general importance, e.g. anti-freeze devices, heating devices, over flow plug, etc.

Battery drinking systems.

Cleaning apparatus for watering devices.

Structures for supporting water systems, e.g. a hanger.

A01K 39/0213

{Nipple drinkers}

Definition statement

This place covers:

Water or liquid food dispensing by means of nipple drinkers/drinking valves.

• may include medicine dispensing means.
• may include cleaning system.
• may be animal-operated.

Details therefor, e.g. pipes, valves, etc.
Pressure regulators.

with weight-controlled supply

Definition statement

This place covers:

Poultry watering systems, with weight-controlled supply, e.g. suspension-type drinking system.

- by means of e.g. a valve for regulating amount of water, closure mechanism, etc.
Cleaning devices therefor, may be self cleaning.

A01K 39/024

with float-controlled supply

Definition statement

This place covers:

Poultry watering systems, with float-controlled supply.

Float controlled valve mechanisms.

Details therefor, e.g. valves, float box, etc.
**A01K 39/026**

kept filled to constant level from incorporated storage

**Definition statement**

This place covers:

Drinking devices kept filled to constant level from incorporated storage, e.g. water supply container.

- may include heating devices, anti-roost device, etc.

Devices may be in combination with a feeding device.

**A01K 39/04**

Combined feeding and drinking appliances {, e.g. also for batteries}

**Definition statement**

This place covers:

Combined feeding and drinking appliances for birds/ poultry.

- may include anti-freeze devices, time-control devices, etc.
Device may be in combination with shelter.

**A01K 39/06**

*Cramming appliances {, e.g. helical force-feeders}*

**Definition statement**

*This place covers:*

- Cramming appliances.
- Special cages with constraining means for cramming animals.
- Force-feeders.
- Devices may include a weight/quantity controller, pump, etc
- Trolleys for moving along (an operator) in front of cages.
- Metering feed-pistols, etc.
Animals may be other than birds, e.g. laboratory animals.

A01K 41/00

Incubators for poultry

Definition statement

This place covers:

Devices for incubating eggs and hatching devices.
  - may include ventilating devices, lightning, climate control, temperature control device, etc.

Devices for turning eggs.
Devices may be transportable.

**A01K 41/02**

**Heating arrangements**

**Definition statement**

*This place covers:*

Heating arrangements for incubators for poultry.

- by means of electric heating, heat exchange fluid, warm air flow, etc.

Devices may be in combination with ventilation means, humidity control, etc.
A01K 41/023
{Devices for regulating temperature}

Definition statement

This place covers:
Devices for regulating temperature in incubators for poultry.
Devices may be in combination with ventilating means, etc.

A01K 41/026
{Heating with water}

Definition statement

This place covers:
Incubators for poultry, heated with water.
Details therefor, e.g. heat regulating means, heat exchange liquid, thermostatic control device, etc.
A01K 41/04
Controlling humidity in incubators

Definition statement

This place covers:
Devices for controlling humidity in incubators.
  • by means of e.g. weighing device.

Devices may be in combination with ventilation and temperature control device, e.g. air-control unit.

A01K 41/06
Egg-turning appliances for incubators

Definition statement

This place covers:
Egg-turning devices for incubators.
Devices for rolling eggs.
Transfer devices for eggs, e.g. rotator assembly.
Control devices, e.g. turning control signal.
A01K 41/065

{Egg drawers}

**Definition statement**

_This place covers:_

Egg drawers, e.g. for incubators for poultry.

Drawers may include egg-turning device.

Drawers may be divided in different compartments, cells, etc.

---

A01K 43/00

Testing, sorting or cleaning eggs (investigating or analysing eggs, e.g. by candling G01N 33/08); {Conveying devices (for batteries A01K 31/165); Pick-up devices}

**Definition statement**

_This place covers:_

Devices for performing different kind of treatment steps with eggs, e.g. transporting, conveying, picking up, putting down, ordering, aligning, emptying, irradiating etc, impregnating, crack-checking, cracking (e.g. for embryo extraction), sorting, measuring/weighing, etc.
Devices for packaging and storing eggs.

This place covers:
Devices for grading and stamping of eggs.
Devices for printing on eggs, e.g. inkjet printer.
Egg dyeing devices, laser devices, etc.

A01K 45/00
Other aviculture appliances, e.g. devices for determining whether a bird is about to lay

Definition statement
This place covers:
Transporting or conveying birds (in particular poultry in quantities).
Devices for sex determination of poultry.
Sorting, weighing and/or counting birds.
Bird baths and showers, may be combined with watering.
Influencing or measuring biological activity, e.g. by electrical field, blue light.
Irradiation to increase egg/meat production.
Assisting birth, e.g. shell-openers.
Anti-vermin devices.
Shackling (living) birds.
Devices for assisting (artificial) insemination.
Conditioning fighting cocks, e.g. by artificial spurs.
Protective gear for birds, e.g. saddles.
Devices for control of static neutralisation.

{Bird baths or showers}

**Definition statement**

*This place covers:*

Bird baths or showers.
- may include feeding system.
- may be self cleaning, self-filling.
- may include anti-freeze facilities e.g. a heater.

Devices for attaching birdbaths to e.g. walls, trees, cage, etc.

Details therefor e.g. filling and flushing valve, etc.

**A01K 45/005**

{Harvesting or transport of poultry}

**Definition statement**

*This place covers:*

Loading and unloading devices for poultry, or crates.

Devices for distributing poultry to receiving bins, (multi-layer) containers, etc.

Devices for gripping the feet of poultry and suspending poultry from its legs.

Poultry collecting devices, by means of e.g. picking up, etc.
Definition statement

Devices for transporting poultry, e.g. containers.

A01K 45/007

{Injecting or otherwise treating hatching eggs}

Definition statement

This place covers:

Devices for injecting eggs, may be automatic.

Introducing material into eggs, e.g. feeding a subject prior to hatch, fertilizing eggs.

Pre-hatch sex determination.

Method for localizing allantoic fluid.

Means of non-invasive forced oxygen enrichment.

A01K 47/00

Beehives

Definition statement

This place covers:

Beehives, nesting boxes, e.g. Kenya hives.
- may enable housing of multiple colonies.
- may include ventilation.

Beehives may be portable, disposable, biodegradable, etc.

Covers for beehives.

Bee observation devices.
A01K 47/02

Construction or arrangement of frames for honeycombs

Definition statement

This place covers:

Frames for, or including, honeycombs.

Methods and devices for producing or assembling the frames.

Frames may be foldable.

Reinforcing elements for honeycombs.

Means for holding honeycombs or frames in the beehive.

Means for keeping distance between frames or honeycombs.

Honeycombs may be complete (ready to breed), or to be completed by bees.

Combination of frames with honeycombs, the frames having particular importance.

Mounting honeycombs into frames, e.g. by heating wires.

Appliances for providing, preventing or catching swarms; Drone-catching devices

Definition statement

This place covers:

Devices for detecting bee-swarms.

Devices for catching/trapping bee swarms.

Devices for controlling swarming of bees, e.g. by means of pheromones.

Appliances for re-queening a hive.
Devices for breeding bee colonies.

A01K 59/00
Honey collection

Definition statement
This place covers:
Collection frames for honey.
Devices for removing honey frames, e.g. de-boxing device.
Devices for separating honey from honeycombs.
Devices for cutting and wrapping honey.
Devices for liquefying honey.

A01K 59/02
Devices for uncapping honeycombs

Definition statement
This place covers:
Honeycomb uncapping device, e.g. fail-type.
Devices for moving lids from honeycombs.
Cutting knife, may be electrically heated.

Devices may include honey extracting device.

**A01K 59/04**

Honey strainers {; Strainers with centrifuges or presses}

**Definition statement**

This place covers:

Centrifugal honey extraction device.

Honey presses.

Devices for extracting honey by means of blowing air into cells of the honeycomb.
Devices for separating bees wax and honey or removing moisture from honey.

**A01K 59/06**

Devices for extracting wax

**Definition statement**

*This place covers:*

Devices for extracting bees wax, e.g. by means of rotation, etc.

Devices for melting wax from honey combs, e.g. by means of microwaves, hot water, etc.

Bee hive press.

Devices for treating wax, purifying wax.
**A01K 61/00**

Culture of aquatic animals (receptacles for live fish, e.g. aquaria, **A01K 63/00**)

**Definition statement**

*This place covers:*

Culture of fish or other water-animals (including aquatic insects), in ponds, containers, streams, or open sea.

Feeding schedules therefor.

Containers for aquatic animals culture.

Tools for aquatic animals culture, e.g. servicing machines for basins.

Artificial reefs; Artificial seaweed.

Fish brooders.

Accessories, e.g. floats, combined feeding and aerating means.

Treating aquatic animals, e.g. by soaking in medical solution.

Methods of producing pearls.

Devices for removing parasites from fish.

---

Hatching, e.g. incubators

**Definition statement**

This place covers:

- Devices for larvae breeding.
- Devices for incubating eggs and larvae and transportation means therefor.
- Devices for planting eggs.
- Breeding devices for live-bearing-fish.
- Hatcheries, may be part of fish farm.
- Collector tanks for eggs.
- Rearing procedures.

A01K 61/59

of crustaceans, e.g. lobsters or shrimps

Definition statement

This place covers:

• Aquaculture farming systems for shrimps, crayfish or lobsters.
• Habitats therefor, e.g. (mating) tanks, containers, aquaria, for raising crustaceans in different stages of development.
• Devices for handling eggs and larvae of crustaceans, e.g. vacuum devices or devices for incubation.
• Methods for increasing the production of larvae.
• Harvesting devices for shrimps.

A01K 61/60

Floating cultivation devices, e.g. rafts or floating fish-farms

Definition statement

This place covers:

• Floating fish-farming systems.
• Water circulating devices or pollution control systems.
• Devices for raising and lowering fish cages.
• Devices for anchoring floating fish cages, e.g. floating rings.
• Submersible cages, rearing pens or fish traps.

A01K 61/70
Artificial fishing banks or reefs

Definition statement
This place covers:
• Artificial reefs or parts for artificial fishing banks, e.g. tyres, concrete or synthetic aquatic structures, for use in aquaria, tanks or the open sea.
• Artificial seaweed, e.g. seaweed bed, or rocks.
• Fish habitat structures, including traps.
• Devices providing food, shelter or reproductive support.

for use with aquaria

Definition statement

This place covers:

- Fish-feeding devices specially adapted to aquaria and normally not applicable to open pond pisciculture.
- The feeder may consist of foodstuff in a special form, e.g. applicable to an aquarium wall, e.g. wax-based fish food.
- Feeders containing living matter, e.g. algae.
- Devices may include timing, lighting, filter or heating devices. However, of relevance is time-control only.
- Fish-operated or automatic feeding devices.

Receptacles for live fish, e.g. aquaria (keepnets or other containers for keeping captured fish A01K 97/20); Terraria

Definition statement

This place covers:
Containers for fish or other water-organisms, or their eggs to be kept alive. (Also tanks, aquaria, ponds, basins, etc.)

Devices for transporting water-organisms, e.g. containers, tanks, aquaria, etc.

Catching or feeding means may be incorporated, but no rearing aspect present.

Containers may serve for use under or out of the water.

Organisms may be bait animals, e.g. small fish.

Containers may incorporate ancillary systems, e.g. for aerating, anti-frees, bird deterring device, etc.
Containers may comprise netted portions.

{Accessories for aquaria or terraria}

Definition statement

This place covers:

Ornaments for aquaria and terraria, e.g. (synthetic) plants, rocks, etc.

Water flow control devices e.g. a wave-making device.

Fountains.
Cleaning and filtration systems.
Supporting structures for aquaria and terraria.
Dividers for in aquaria en terraria.

**A01K 63/02**

Receptacles specially adapted for transporting live fish

**Definition statement**

*This place covers:*
Containers for transporting fish, shellfish or crustaceans.
Devices for displacement of live fish.
Transport devices for live baits, may include artificial muddy sand.
Packaging for oysters.
Means of suppressing motion functions in fish, e.g. anaesthetization.
Transport devices may include cooling system.
Animals may be separated or transported in groups.

A01K 63/04

Arrangements for treating water specially adapted to receptacles for live fish

**Definition statement**

This place covers:

- Water treatment devices specially adapted to aquaculture. Mostly for aquarium/terrarium use, but also for other receptacles for aquaculture, e.g. holders for molluscs, or even ponds etc.
- Aquarium filters, may be in combination with pumps.
- Electr(olyt)ic water treatment.
- Water treatment with (e.g. UV-) rays radiation.
- Cleaning water or sand in aquaria.
- (Aquarium) water outlets or inlets, e.g. siphons.
- Pesticide dispensers for aquaria.
- Devices for transferring water between different zones of e.g. ponds.
- Artificial (see) water solutions.
- Devices for removing pollution of aqueous bodies.
- Devices for testing toxicity of water.
Means for acclimatising salt-water fish to brackish or fresh water.

{Introducing gases into the water, e.g. aerators, air pumps}

Definition statement

This place covers:

Devices for introducing gasses into bodies of water, e.g. pumps, ducts, nozzles, etc. may include filter device.

Aeration must not merely serve for water treatment in a filter vessel outside the rearing or storing water.

Aerators may be in combination with lights or ornaments.

Gases may be generated by transformation, e.g. from tablet.

Gas introduction may involve water movement, cooling or heating.

Air filters.
Aeration of transport vessels if the vessels are not the main characteristic.

Protein skimmers, even if combined with conventional filters.

Devices for controlling the oxygen level in water.

Special rules of classification

Documents relating to new peptides or new DNA or its corresponding mRNA encoding for peptides, and their use for the obtention of transgenic animals, are classified in subclass C07K or in group C12N 9/00 according to the peptides, with the appropriate Indexing Codes.

A01K 67/027

New breeds of vertebrates

Definition statement

This place covers:
The germline of animals can be altered by introduction and/or deletion of genetic material. Such genetically modified animals can be used e.g. for the production of heterologous proteins or as models for disease. This subgroup covers transgenic vertebrates (A01K 67/0275-A01K 67/0278) and invertebrates (A01K 67/033+).

In addition, the following animals which do not necessarily comprise a modified germline are classified here: chimeric animals comprising somatic cells from another individual or species (A01K 67/0271), and cloned animals (A01K 67/0273).

Relationships with other classification places

Symbols in the A01K 67/027-A01K 67/033 range are used in combination with C12N 15/8509 and subgroups if a meaningful disclosure of the vector (system) for transgenesis is given. Processes of producing embryos, including cloning of animals, are additionally indicated by C12N 15/873-C12N 15/877 symbols.

Specific enzymes used for transgenesis | C12N 9/00
Further aspects of vectors | C12N 2800/00-C12N 2840/00
Testing involving animals | G01N 33/5082

Special rules of classification

Modified animals are classified in A01K 67/027-A01K 67/033 (animals), C12N 15/8509, C12N 15/873, C12N 15/877 (relating to vectors and methods for producing such animals) and the following ranges of symbols must be given (i.e. compulsory) to indicate further aspects thereof.

A01K 2207/00 relates to modifications that do not affect the germline.
A01K 2217/00 indicates various technical aspects of genetic modification.
A01K 2227/00 defines the species of the (genetically modified) animal.
A01K 2267/00 indicates the purpose of the (genetically modified) animal.

Whereas symbols in the A01K 2217/00 range are restricted to genetically modified animals, the symbols in the A01K 2207/00, A01K 2227/00 and A01K 2267/00 ranges are used for all modified animals covered by A01K 67/027-A01K 67/033, C12N 15/8509, C12N 15/73 and C12N 15/877.

Please note that multiple symbols from each category may be required to cover all disclosed aspects.

Genetically modified animals

When a genetically modified animal is actually made, A01K 67/0275-A01K 67/0278, A01K 67/033 or a subgroup thereof needs to be given, whereby the last place rule applies. If a vector for transgenesis is disclosed, additionally the C12N 15/8509 symbol needs to be given. The specific aspects of the animal are to be indicated with symbols in the A01K 2217/00, A01K 2227/00 and A01K 2267/00 ranges, which must always be given. When a human transgene is introduced, A01K 2207/15 is to be added.

Special elements of the vectors are indicated using symbols in the C12N 2800/00-C12N 2840/00 ranges, whereby A01K 2217/203 takes precedence over C12N 2830/001-C12N 2830/006, and A01K 2217/206 takes precedence over C12N 2830/008. The C12N 2830/001 - C12N 2830/008 symbols are only to be given if the invention actually resides in these elements.

If the transgene can be meaningfully indicated, C07K 14/00 and/or C12N 9/00 symbols are to be given. If a viral vector is used for transgenesis, the relevant symbol from the C12N 2710/00-C12N 2795/00 range combining the taxonomy of the virus with the ending 43 (for use as a genetic vector), must be given.

Chimeric animals

Chimeric animals (A01K 67/0271) may result from combining cells at the embryonic stage (e.g. the sheep-goat chimera 'geep'), or from exogenously added cells later in development, for instance transfer of functional immune system cells to immuno-compromised mice, or transplantation of tumor cells to form a tumor model.

The specific species (from the A01K 2227/00 series) and purpose (from the A01K 2267/00 series) of the chimeric animal must be indicated. When human cells are introduced, A01K 2207/15 is to be added.

When a chimeric animal is disclosed, which does not relate to the core of the invention, A01K 2207/12 is to be given.

Cloned animals
Documents relating to methods of producing cloned mammals (C12N 15/877 and subgroups) should also be classified in A01K 67/027 if cloned animals have actually been obtained. In addition, the appropriate A01K 2227/00 symbol should be given to indicate the species, and where relevant, the purpose (A01K 2267/00). When manipulation of (germ) cells is involved, C12N 5/00 symbols should also be considered, following the classification rules of said field.

**A01K 67/033**

**Rearing or breeding invertebrates; New breeds of invertebrates**

**Definition statement**

*This place covers:*

Devices, systems or methods for breeding invertebrates e.g. insects. Therefore it also covers the rearing or breeding of so-called "predatory insects".

Insect farms.

**FIG. 3**

**FIG. 4**

**Relationships with other classification places**

This group covers the rearing or breeding of invertebrates, e.g. of insects. Therefore it also covers the rearing or breeding of so-called "predatory insects", which are used against pest crops and animal parasites. The usage of insects for biocides or pest repellants is classified in group A01N 63/14.

A01K 69/00

Stationary catching devices

Definition statement

This place covers:

Fish and/or crab traps, e.g. nets, crabbing bait holders.
Reaction grill nets.
Fish attracting means.
Devices for unconfined fish farming.

A01K 69/00 (continued)

A01K 69/04

Fixed nets with traps

Definition statement

This place covers:
Fishing devices by means of fixed nets with traps.
Crab traps including nets.
A01K 69/06

Traps

Definition statement

This place covers:

Traps for fishes, crabs and other marine animals. e.g. shelter trap, etc.

Entrance gates to traps.

Devices for attracting animals into a cage, e.g. bait bag, etc.

Devices for releasing bait in combination with a trap.

Traps may include signalling device.

Trap cleaning devices.

A01K 69/08

Rigid traps, e.g. lobster pots

Definition statement

This place covers:

Rigid traps for catching, e.g. lobsters, crabs, fish, etc.

• may include escape gaps for undersized animals.

Entrance gates for these traps.

Means for marking the cages.
Devices for releasing baiting combination with these traps.

**A01K 69/10**

**Collapsible traps**

**Definition statement**

*This place covers:*

Collapsible traps for catching e.g. lobsters, crabs, fish, etc.

Collapsible bait traps.

Traps may be movable.

**A01K 71/00**

**Floating nets {if drawn A01K 73/00}**

**Definition statement**

*This place covers:*

Fishing by means of floating nets.

The net may be connected to inflatable floating assemblies, floating material, etc.
Floating fish baskets.

Trawling nets

Definition statement

This place covers:

- Trawling nets for catching fish and other marine animals.
- Devices for ensuring a proper opening of fishing nets.
- Devices for towing nets, healing gear, etc.
- Trawls may be electrified.
- Sweep lines for a bottom trawl.
- Devices for steering trawling nets.

A01K 73/025

{Regulation of net depth}

Definition statement

This place covers:

- Devices for regulating the depth of fishing nets, e.g. with adjustable angle of elevation.
- Depth controlling devices.
Devices for keeping nets closer to the seabed, e.g. ground rope, etc.

A01K 73/04
Devices for spreading or positioning, e.g. control thereof

Definition statement
This place covers:
Devices for spreading and/or positioning fishing nets, e.g. float boards, special net fabric, etc.
Opening devices for nets e.g. collapse-mechanism, etc.
Steering devices for nets.
Devices for monitoring the angle settings of wires.

A01K 73/045
for lateral sheering, e.g. trawl boards

Definition statement
This place covers:
Devices for lateral sheering of fishing nets.
Details therefor, e.g. trawl boards, otter boards, etc.
Towing devices, lifting devices, etc.

**A01K 73/05**

for vertical sheering

**Definition statement**

This place covers:

Devices for vertical sheering of fishing nets.

Details therefor, e.g. trawling gear, vertical suspensions, otter boards, etc.

Towing devices for nets.

**A01K 73/053**

Ground-line rollers

**Definition statement**

This place covers:

Rollers, wheels or balls intended to roll over the ground substantially in trawl direction.

Ground-line rollers for fishing nets, e.g. footrope construction, etc.

Trailing devices, lead lines for fish nets, guide wheels, ground rope, tail planes, etc.
They may be attached to other parts of nets or lines than ground lines.

A01K 73/06

Hauling devices for the headlines {, also for nets; Winches (A01K 73/12 takes precedence)}

Definition statement

This place covers:

- Devices or details involved in towing or hauling trawler headlines.
- Devices for handling the whole net, e.g. discharging its contents.
- Devices for controlling line traction or length or speed.
- Winches or their control may be included, also engine control.
- Details or headlines, e.g. special links, or load gauges.
- Position control of net may also be involved.
- Lines to be hauled may serve for other objects, e.g. lobster pots.
Discharging fish from net into boat, e.g. seine-net.

Devices may include devices for oiling/lubrication of cables.

A01K 73/10

Determining the quantity of the catch, e.g. by the pull or drag on the lines

Definition statement

This place covers:

Devices for determining the quantity of the catch.
Devices for monitoring the forces in the cable.
Trawl cable vibration meter.

**A01K 73/10 (continued)**

**A01K 73/12**

**Nets held vertically in the water, e.g. seines**

**Definition statement**

*This place covers:*
Seines, e.g. course-meshed seines, etc.
Cast nets, commercial fishing nets, etc.
Devices for preventing entrapment of see mammals.
Purse-ring stripper devices.
Devices for rearing shrimp, using nets held vertically in water.
Spar buoy pen systems.
Net joining structures.
Netting may be coloured.
Nets may include fish traps.

**A01K 74/00**

Other catching nets or the like

**Definition statement**

*This place covers:*

Other catching nets or the like, not provided for in other groups.

Devices for transporting and/or collecting fish.

Fish catching devices.

Fish lasso’s.

Details for nets, e.g. brails, etc.
Fishing methods.

A01K 75/00

Accessories for nets; Details of nets, e.g. structure

**Definition statement**

*This place covers:*

- Structure or manufacture of nets (even if limited to particular kinds of nets) or their cables or wires.
- Details of nets, e.g. connectors.
- Auxiliary features, e.g. electronic accessories, other than mere illumination.
- Measuring devices for or on nets, e.g. for controlling their length.
- Protective devices on nets, e.g. armour plates.
- Devices embracing floats and/or sinkers, e.g. their embedding in a special cable.
- Handling nets (mostly ashore or on board), e.g. holding, shaking.
- Devices for protecting animals, e.g. whale release device, etc.
Cleaning devices for e.g. nets.

A01K 75/02

Illuminating devices for nets

Definition statement

This place covers:

Illumines devices for nets and other devices for catching fish, may be chemo-light, etc.

Floating fishing lights.

Luminous fishing lure tackles.

Luminous bait.
Reflective fishing nets.

**A01K 75/04**

**Floats**

**Definition statement**

*This place covers:*

Floats, e.g. a buoyancy float, pneumatic float, etc.

- May consist of cork, foam rubber, etc.
- May be illuminated.

Devices for attaching ropes/nets to floats, e.g. clamps.

A01K 77/00
Landing-nets; Landing-spoons

Definition statement
This place covers:
Landing-nets, kesher, may be lightweight, collapsible, etc.
Handles for fishing-nets, may be extensible, collapsible, etc.
Devices may be useful for other purposes, e.g. egg retriever, swimming pool skinner, etc.
Details therefor, e.g. locking mechanisms, etc.

A01K 79/00
Methods or means of catching fish in bulk not provided for in groups A01K 69/00 - A01K 77/00, {e.g. fish pumps; Detection of fish; Whale fishery}

Definition statement
This place covers:
Devices for separating target and non-target species harvested from water bodies.
Devices for harvesting marine animals, e.g. brine shrimp harvester.
Devices for displacement of live fish.
Devices for determining the quantity of plankton. Devices for handling whales (carcasses).
A01K 79/00 (continued)

Definition statement

Observation systems, ultrasonic submarine sounding equipment, etc.

A01K 79/02

by electrocution {; Attracting or stunning fish; Scaring sharks}

Definition statement

This place covers:
Inducing movement into fish, shrimp, shellfish, etc, by electricity.
Inducing electrotaxy (directed swimming).
Stunning of fish and whales, by electricity.
Killing fish, before and after catching them, by means of electricity.
Special forms of appearance of electric current used, e.g. pulses.
Retrieving fish etc., by electrically induced movement.
Electric hooks for angling (stunning or killing biting fish).
Using water as conductor, for operating, e.g. echo-sounding.
A luring light may be involved or used alone in catching fish.
Attracting or scaring fish etc., by means other than electricity, e.g. by bait-spreading, air bubbles, shock waves, sound, etc.
Attracting or stunning fish
Scaring sharks

Reels

Definition statement
This place covers:
Subject matter comprising a portable reel (i.e., fishing reel) intended for taking up and paying out line to which tackle is attached while fishing. The reel includes a frame and a spool on which fishing line is to be wound. The reel includes a drive device for causing line to be wound or unwound from the spool or is constructed to allow hand wrapping/unwrapping of the line. The spool can have any form that
allows it to store/hold line and that allows the line to be wound onto and unwound from it. The reel may be constructed to be used without a fishing pole.

A01K 89/01

with pick-up, i.e. with the guiding member rotating and the spool not rotating during normal retrieval of the line (A01K 89/027 takes precedence)

Definition statement

This place covers:

Subject matter wherein the reel includes a guiding member mounted on a rotatably driven rotor and a drive device (e.g., hand crank or motor) for rotating the rotor and guiding member, the fishing line engaging the guiding member and the guiding member rotating around the spool so as to wrap the line on spool while the spool is held against rotation relative to the frame of the reel. The spool may move in other ways, e.g., it may reciprocate along an axis of rotation of the guiding member to distribute the fishing line along the spool.

Illustrative example of subject matter classified in this group.

Brake devices for closed face reels

A01K 89/01025

{with line snubber shifted by a remote actuator}

Definition statement

This place covers:

Subject matter including a manual actuator spaced from and operating a line engaging brake (i.e., snubber) to force the line toward a component of the frame to control unwinding of the line. The component of the frame may be the cover.

A01K 89/01026

{with rotor and snubber shiftable axially}

Definition statement

This place covers:

Subject matter wherein the snubber is fixed to the guiding member and the manual actuator shifts both the rotor and snubber axially along the axis of winding.

A01K 89/01029

{with guiding members shifted radially}

Definition statement

This place covers:

Subject matter wherein the manual actuator also moves the guiding member radially inward to an unwinding position substantially simultaneously with the axial movement of the guiding member and brake.

A01K 89/01081

{Guiding members on rotor axially rearward of spool}

Definition statement

This place covers:

Subject matter wherein the rotor is mounted for rotation at a rear end of the spool (i.e., the end of the spool opposite an end of the spool over which the fishing line passes during winding). Portions of the rotor may extend beyond the rear end (e.g., toward the forward end) of the spool.
**A01K 89/01082**

**{Guiding members shiftable on rotor}**

**Definition statement**

*This place covers:*

Subject matter wherein the guiding member is mounted on the rotor for movement relative to the rotor between a winding position in engagement with the line for wrapping it onto the spool and an unwinding position free of the line to permit the line to spin over one of the ends of the spool.

{Frame disassembly features}

Definition statement

This place covers:
Subject matter wherein the frame is provided with at least one of: (a) quick release fastening means, (b) special disassembly access to parts, and (c) special support of parts during disassembly that facilitates reassembly.

A frame connected by a series of usual threaded fasteners is not sufficient to warrant classification in this subgroup. However, more than two frame components retained by a single threaded end cap, e.g., would be considered quick release fastening means and would be sufficient.

A01K 89/015

with {a} rotary drum {, i.e. with a rotating spool} (A01K 89/033 takes precedence)

Definition statement

This place covers:
Subject matter wherein the drive device rotates the spool to wind the fishing line thereon.

A01K 89/0155

Antibacklash devices

Definition statement

This place covers:
Subject matter wherein the reel includes a brake that acts to variably regulate unwinding of the line in response to conditions in the line or reel during the casting of a weighted line.

Due to factors such as spool inertia, an unwinding spool may accelerate too rapidly or continue to rotate in the unwinding direction after the line ceases to be pulled from the spool resulting in loosened turns of line or "backlash". The brake coordinates spool rotation with the acceleration, deceleration, and termination phases of line demand during casting without requiring concurrent user adjustment.

A01K 89/01555

{using magnets}

Definition statement

This place covers:
Subject matter wherein the brake includes (a) a device for producing lines of magnetic flux, and (b) an electrically conductive device disposed to cut the flux lines, one of the devices being stationary and the other rotatable with the spool to establish a braking force opposing rotation of the spool in the unwinding direction.

{with disengageable positive drive components, e.g. a clutch}

Definition statement

This place covers:

Subject matter wherein the drive mechanism includes a drive element shiftable from a first position for positively (i.e., without slip) transferring torque between the drive device and the spool to a second position completely interrupting the positive torque transfer.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Shiftable clutch and operator in diverse technologies

F16D 11/14

A01K 89/0187

{having alternative yieldable mechanism}

Definition statement

This place covers:

Subject matter wherein the reel includes a friction device (e.g., coupling or brake) and wherein a power transmitting connection between the spool and the friction device is made and the drive element shifts to the second position (in which torque cannot be transmitted) in response to a change of the reel to a first operating state and wherein the power transmitting connection between the spool and the friction device is broken and the drive element shifts to the first position (in which torque can be transmitted) in response to a change of the reel to a second operating state.

The change in the connection between the friction device and the spool and the change in the connection between the drive device and the spool need not occur simultaneously (e.g., see U.S. Pat. No. 4,482,106; they are in response to the same condition, i.e., unwinding of the line). The operating state of the reel may be affected by conditions that are not controlled by the user (e.g., pull on the line; U.S. Pat. No. 4,482,106) or may be under the control of the user (e.g., position of a control lever; U.S. Pat. No. 4,640,471).

Clutch and brake combination in various devices

F16D 11/14
A01K 89/0188
{Axially engaged}

Definition statement
This place covers:
Subject matter wherein the shiftable drive element rotates about an axis and moves in a direction along or parallel to the axis between the first and second positions.

A01K 89/0189
{Coaxial of spool}

Definition statement
This place covers:
Subject matter wherein the axis about which the shiftable drive element rotates is the same as an axis about which the spool rotates to wind the fishing line.

A01K 89/01901
{Reengageable responsive to drive rotation}

Definition statement
This place covers:
Subject matter wherein the drive element is shifted from the second (torque interrupting) position to the first (positive torque transferring) position in response to movement of the drive device.

A01K 89/01902
{Gear pair}

Definition statement
This place covers:
Subject matter wherein the drive element is a first gear and the drive mechanism includes a second gear that is meshed with the drive element when the drive element is in the first position and is out of engagement with the drive element in the second position.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

| Haulage reel having gears shiftable into and out of intermeshing engagement | B66D 1/14 |
A01K 89/01903
{with yieldable drive coupling, e.g. friction or fluid clutch}

Definition statement
This place covers:
Subject matter wherein the drive mechanism includes a drive element adjustable to provide slippage for limiting the torque which can be transmitted between the drive device and spool.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

<table>

A01K 89/01904
{adjustable by crank manipulation}

Definition statement
This place covers:
Subject matter wherein the reel includes a selectively shiftable crank for performing the adjustment of the drive element to vary the torque limit at which slippage occurs. E.g., shifting the crank in opposite directions may alternately increase or decrease the torque limit. "Crank" includes a manually rotated device such as a thumbwheel.

A01K 89/01905
{adjustable within distinct ranges}

Definition statement
This place covers:
Subject matter wherein the reel includes means to limit the adjustment of the torque limit to one or more ranges having predetermined minimum and maximum values.

A01K 89/01906
{between drive shaft and crank}

Definition statement
This place covers:
Subject matter wherein the drive device is a manually operated crank and the adjustable drive element of the drive mechanism acts directly between the crank and a drive spindle that supports the crank and transmits power from the crank to the spool such that slippage and relative movement may occur between the crank and the drive spindle.
**A01K 89/01907**

{between drive shaft and gear}

**Definition statement**

*This place covers:*

Subject matter wherein the adjustable drive element of the drive mechanism acts directly between a shaft of the drive mechanism and a gear on the shaft at a point spaced from the spool.

**A01K 89/01908**

{Coaxial with spool}

**Definition statement**

*This place covers:*

Subject matter wherein the adjustable drive element rotates coaxially with the spool.

**A01K 89/01909**

{Axially applied}

**Definition statement**

*This place covers:*

Subject matter having an actuator for shifting the adjustable drive element axially along the axis of rotation of the spool.

**A01K 89/0191**

{by centre pin}

**Definition statement**

*This place covers:*

Subject matter wherein the actuator includes a shaft or pin-like element coaxial with the spool that operates to draw the spool toward the drive device to increase the torque transmittable between the drive device and spool.

**A01K 89/01911**

{with feed roller}

**Definition statement**

*This place covers:*

Subject matter wherein the drive mechanism includes at least one roller driven by the drive device and engaging the fishing line to feed the line to the spool.

**References**

**Informative references**

Attention is drawn to the following places, which may be of interest for search:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
A01K 89/01912
{with level winding}

Definition statement

This place covers:
Subject matter wherein the drive mechanism includes a distributing mechanism for systematically
distributing the fishing line along the length of the spool.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| Fishing reel with pick-up having a level winding mechanism | A01K 89/0114 |
| Device for distributing elongated material on a spool or core | B65H 54/02 |

A01K 89/019125
{Line shifts along a rotatable cam bar}

Definition statement

This place covers:
Subject matter wherein the distributing mechanism includes a rotatable bar substantially parallel to the
axis of the spool and wherein the bar has an undulatory, generally spiral surface that engages the line
being wound to distribute the line evenly onto the spool.

A01K 89/01913
{Line traction guide wheels}

Definition statement

This place covers:
Subject matter wherein the distributing mechanism includes a wheel mounted on a shaft, engaged by
the line being wound, and limiting lateral motion of the line relative to the wheel to guide the line, the
wheel being driven by contact with the line, the wheel and shaft including structure to convert rotation
of the wheel to a back and forth movement of the wheel substantially parallel to the spool.

A01K 89/01914
{Manually shifted guides}

Definition statement

This place covers:
Subject matter wherein the distributing mechanism includes a portion specifically contoured for direct
engagement by the user for shifting a line guide along the length of the spool to evenly distribute the
line.
A01K 89/01915
{the drive mechanism oscillating the guide}

Definition statement
This place covers:
Subject matter wherein the distributing mechanism includes a pivotally mounted line guide and a
linkage connected to the drive mechanism to shift the guide in opposite directions along a curved path.

A01K 89/01916
{the drive mechanism reciprocating the guide}

Definition statement
This place covers:
Subject matter wherein the distributing mechanism includes a line guide and a linkage connected to
the drive mechanism to shift the guide in opposite directions along a substantially linear path parallel
to the spool.

The linear path may include proportionately small curves, e.g., the path may be an elliptical path with
an extremely long major axis and a short minor axis or it may be the path of a point traveling with an
elongated chain trained over a pair of small sprockets.

A01K 89/01917
{Reversely threaded screw}

Definition statement
This place covers:
Subject matter wherein the drive mechanism linkage includes at least one shaft and right and left
hand helical grooves merged together at each end to receive a follower connected to the guide so that
rotation of the shaft by the drive mechanism imparts reciprocating motion to the guide.

A01K 89/01918
{Guide shiftable between wind and unwind positions}

Definition statement
This place covers:
Subject matter wherein the line guide is shiftable with respect to the linear path of reciprocation, to
reduce or eliminate contact between the guide and line during unwinding.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

| Fishing reels having guiding members shiftable between winding and unwind positions | A01K 89/01029, A01K 89/01082, A01K 89/01086, A01K 89/01087, A01K 89/0176, A01K 89/01918 |
A01K 89/01919
{Guide having line removal opening}

Definition statement
This place covers:
Subject matter wherein the reciprocated line guide has a passage through which the line is laterally removable.

A01K 89/0192
{Frame details}

Definition statement
This place covers:
Subject matter including details of the frame of the reel.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

<table>
<thead>
<tr>
<th>Details of the frame of a fishing reel with pick-up</th>
<th>A01K 89/01121</th>
</tr>
</thead>
</table>

A01K 89/01921
{Frame disassembly features}

Definition statement
This place covers:
Subject matter wherein the frame is provided with at least one of: (a) quick release fastening means, (b) special disassembly access to parts, and (c) special support of parts during disassembly that facilitate reassembly.

A frame connected by a series of usual threaded fasteners is not sufficient to warrant classification in this subgroup. However, more than two frame components retained by a single threaded end cap, e.g., would be considered quick release fastening means and would be sufficient.

</table>
A01K 89/01922
{Hinged frame sections}

Definition statement
This place covers:
Subject matter wherein the reel frame includes major frame components connected together by a pivotal connection.

A01K 89/01923
{Rotated joints}

Definition statement
This place covers:
Subject matter wherein the reel frame supports a spool between a pair of end plates, at least one of which is connected to the frame by a joint (e.g. bayonet or keyhole) that is releasable upon rotation of the end plate about its axis.

A01K 89/01924
{Threaded}

Definition statement
This place covers:
Subject matter wherein the joint includes a spiral thread-like coupling.

A01K 89/01925
{Reel supports, e.g. reel feet}

Definition statement
This place covers:
Subject matter wherein the frame includes a bracket for mounting the reel on a fishing rod.

A01K 89/01928
{with line or water shields}

Definition statement
This place covers:
Subject matter wherein the frame includes a gasket-like obstruction, seal, or structure providing a tortuous course to block the intrusion of foreign matter (e.g., water, dirt, or grit) into the interior of the reel.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

| Line or water shield in a fishing reel with pick-up | A01K 89/011221 |
A01K 89/01929
{with lubrication features}

Definition statement
This place covers:
Subject matter wherein the frame includes a device for facilitating the application of lubricant to a movable part of the reel.

References
Informative references
Attention is drawn to the following places, which may be of interest for search:

| Lubrication feature of a fishing reel with pick-up | A01K 89/011222 |

A01K 89/0193
{with bearing features}

Definition statement
This place covers:
Subject matter wherein including details of a bearing between the frame and a movable element of the reel.

A01K 89/01931
{Spool or spool shaft details (spool details in reel with pick-up A01K 89/0111)}

Definition statement
This place covers:
Subject matter including details of the spool.

A01K 89/027

with pick-up {, i.e. for reels with the guiding member rotating and the spool not rotating during normal retrieval of the line}

**Definition statement**

This place covers:

Subject matter wherein the reel includes a rotatably driven guiding member and a drive device (e.g., hand crank or motor) for rotating the guiding member, the fishing line engaging the guiding member and the guiding member rotating around the spool so as to wrap the line on spool while the spool is held against rotation relative to the frame of the reel. The spool may move in other ways, e.g., it reciprocates along an axis of rotation of the guiding member to distribute the fishing line along the spool. The reel part whose rotation is retarded or prevented by the device for retarding may be the guiding member or drive device.
**A01K 89/0275**

{with closed face}

**Definition statement**

*This place covers:*

Subject matter wherein the frame of the reel includes a cover substantially enclosing the spool.

Illustrative example of subject matter classified in this group.

**A01K 89/028**

{Continuously applied (for closed face reels A01K 89/0275)}

**Definition statement**

*This place covers:*

Subject matter wherein the brake is continuously applied to prevent rotation of the reel part below a predetermined torque.

**References**

*Limiting references*

*This place does not cover:*

<table>
<thead>
<tr>
<th>For closed face reels</th>

{between spool shaft and frame}

**Definition statement**

*This place covers:*

Subject matter wherein the brake is continuously applied between a rotatable spindle supporting the spool and the frame.
A01K 89/03
{between spool and spool shaft}

Definition statement

This place covers:
Subject matter wherein the brake is applied between the spool and a nonrotatable spindle on which the spool is carried.

A01K 89/033

with {a} rotary drum {i.e. for reels with a rotating spool (antibacklash devices A01K 89/0155)}

Definition statement

This place covers:
Subject matter wherein the drive device rotates the spool to wind the fishing line thereon.

Illustrative example of subject matter classified in this group.

References

Limiting references

This place does not cover:

| Antibacklash devices | A01K 89/0155 |

A01K 89/045

{Spool bearing brake}

Definition statement

This place covers:
Subject matter wherein the brake applies a relatively light retarding force to a bearing that supports the spool or to the end of a spool shaft to dampen rotation of the spool. The inherent retarding effect of a typical thrust bearing is disregarded.
References

Informative references

Attention is drawn to the following places, which may be of interest for search:

**A01K 89/046**

{Manual pressure control}

**Definition statement**

This place covers:

Subject matter wherein either (a) the brake includes a manually engageable actuator to selectively apply a retarding force to the spool that is in proportion to the manual force applied to the actuator, or (b) special access is provided for the user's thumb or finger to directly apply a retarding force to the spool.

**A01K 89/047**

{Radially applied}

**Definition statement**

This place covers:

Subject matter wherein the brake is pressed against a rotatable element of the reel to apply a force thereto in a direction substantially perpendicular to the axis of rotation of the rotatable element in order to generate the retarding force. The rotatable element may be the spool.

**A01K 89/048**

{Rolling contact}

**Definition statement**

This place covers:

Subject matter wherein the brake has a rotatable shoe engageable with the rotatable element to apply the retarding force thereto. The rotatable element is the spool or an element rotatable with the spool.

**A01K 89/049**

{Separable attachments}

**Definition statement**

This place covers:

Subject matter wherein the brake is readily attachable to and removable from the reel without substantial structural modification of the reel.
A01K 89/05
{Brakes connected to the spool by one-way clutch}

Definition statement

This place covers:
Subject matter wherein the brake is connected to the spool through an overrunning clutch that acts to drivingly connect the spool to the brake only in the unwinding direction of the spool.

A01K 89/051

{Adjustable pressure pawls, e.g. braking clickers}

Definition statement

This place covers:
Subject matter wherein the brake is an elongated, pawl-like member, commonly called a clicker, and the reel part that is retarded or prevented from rotating thereby is a toothed sprocket or gear and wherein the reel includes a device to adjust the pressure with which the pawl-like member bears against the toothed sprocket or gear.

Definition statement

This place covers:
Subject matter including an actuator to shift the brake to a non-operating position.

A01K 89/055
{Rotation responsive}

Definition statement

This place covers:
Subject matter wherein the actuator shifts the brake to the non-operating position in response to rotation of the drive device.

A01K 89/056
{Radially engaged}

Definition statement

This place covers:
Subject matter wherein the brake applies a force in a direction perpendicular to the axis of rotation of the spool in order to retard or prevent rotation of the reel part.

A01K 89/057
{Axially engaged}

Definition statement

This place covers:
Subject matter wherein the brake applies a force in a direction parallel to the axis of the spool in order to retard or prevent rotation of the reel part.

A01K 89/058
{Coaxial with spool}

Definition statement

This place covers:
Subject matter wherein the brake is applied along an axis of application which is also the axis of rotation of the spool.
A01K 89/059
{on adjustable lever}

Definition statement
This place covers:
Subject matter wherein the brake is mounted on a pivotally mounted lever.

A01K 89/06
Reversible reels {i.e. with spool axis shiftable between winding and unwinding positions}

Definition statement
This place covers:
Subject matter wherein the spool is movable relative to the frame between a casting (unwinding) position and a fishing position. The spool is in the fishing position during winding of the fishing line thereon.

A01K 89/08
Pole-less fishing apparatus, i.e. hand-held reels

Definition statement
This place covers:
Subject matter wherein the reel is configured to be used for fishing without being mounted on a fishing pole.

Illustrative example of subject matter classified in this group.
A01K 89/081
{Axial unwinding}

**Definition statement**

*This place covers:*

Subject matter wherein the line unwinds by spinning over a discharge end of the spool.
