Special rules of classification

In this subclass, subject matter which cannot be completely classified in a single one of the main groups should be classified in each relevant main group.

The main group [A23G 3/00](#) takes precedence over [A23G 1/00](#) and [A23G 9/00](#).

Special processing steps not included in main groups [A23G 1/00](#) and [A23G 9/00](#) are classified in the appropriate subgroup of [A23G 3/00](#).

The classification symbols of groups:

[A23G 1/305](#), [A23G 1/56](#), [A23G 3/343](#), [A23G 3/346](#), [A23G 4/062](#), [A23G 9/322](#) and [A23G 9/52](#) can be used in combination with Indexing Codes [A23G](#). Only one symbol is added after the classification symbol. If necessary, the classification symbol with a different additional symbol is repeated e.g. [A23G 1/56](#), [A23G 2200/02](#)

[A23G 1/56](#), [A23G 2210/00](#)

The additional symbols give further information concerning structure, composition or form.

[A23V 2002/00](#) Indexing scheme should be used as much as possible in combination with the subgroups [A23G 1/30](#), [A23G 3/34](#), [A23G 4/06](#) and [A23G 9/32](#) and lower.
