

A61H

PHYSICAL THERAPY APPARATUS, e.g. DEVICES FOR LOCATING OR STIMULATING REFLEX POINTS IN THE BODY; ARTIFICIAL RESPIRATION; MASSAGE; BATHING DEVICES FOR SPECIAL THERAPEUTIC OR HYGIENIC PURPOSES OR SPECIFIC PARTS OF THE BODY (electrotherapy, magnetotherapy, radiation therapy, ultrasound therapy [A61N](#))

Definition statement

This place covers:

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy transmitted by direct physical contact with the external surface of the thorax portion of human bodies to induce or supplement normal breathing (e.g. iron lungs).

Apparatus or processes, which are not used for surgical purposes that are specially adapted to improve or promote the optical functioning of individuals (e.g. rectify defective vision, improve the natural operation of their eyes) by:

- contacting eyes or their muscles directly to move the eyes,
- subjecting the eyes of individuals to controlled muscle strain,
- utilizing stimulators, such as flash illumination, to cause movement of eyes of individuals in a controlled manner, or
- facilitating or training individuals through practice to move their own eyes in a beneficial manner.

Apparatus or devices that are explicitly designed for use by a single patient or disabled person for the purpose of helping them overcome a physical condition that impairs their ability to walk unassisted across the ground or similar support surface (e.g. crutches).

Apparatus or processes utilizing mechanical energy directly applied upon human bodies for therapy (e.g. massage). These therapy apparatus and processes are intended to facilitate the healing of diseases, promote or assist normal operation of a malfunctioning body part, reduce the impact of injuries, or beneficially influence the condition of disabled body parts either by the physical movement of body parts (e.g. devices for exercising a passive body member) or other types of physical stimulation (e.g. touching) transmitted through contact with:

- external body surfaces, or
- surfaces of naturally occurring body cavities.

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy directly applied to human bodies by physical contact therewith (e.g. chiropractic) to treat, alleviate the effects of, or prevent disease or bodily malfunctions (e.g. misalignments of bone, aberrant joint) solely by manipulation, adjustment, or realignment of at least a portion of the skeletal system of the body (e.g. bone joints, tendons, spinal columns) by either:

- impacting external surfaces of bodies to manipulate or adjust portions of their skeletons containing unbroken bones, or
- pulling or pushing on the external surfaces of bodies to extend or compress portions of their skeletons containing unbroken bones.

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy directly applied upon human bodies by physical contact (e.g. massage) to rub, stroke, knead, tap, vibrate, or otherwise move a portion of the external surface of human bodies, or the surfaces of their naturally occurring body cavities, to either:

- physically relax individuals,
- physically arouse or stimulate individuals, or
- counteract or relieve bodily pains.

Apparatus or processes which are not used for surgical purposes (e.g. baths) that are specially adapted for covering, soaking, or immersing human bodies, or portions of bodies, within fluids (e.g. steam, water) or fluent materials (e.g. sand, mud) in a manner that is distinct from the common bathing process for cleaning human bodies and is intended to:

- counteract or relieve bodily pains,
- physically relax individuals,
- promote or assist healing of injured bodies or their parts, or
- restore to health, or alleviate the effects of sicknesses or other types of abnormal conditions on, bodies or their parts.

Apparatus or processes (e.g. breast baths) specially adapted for covering, soaking, or immersing only one particular part of the human body within fluids (e.g. steam, water) or fluent materials (e.g. sand, seaweed).

Articles of clothing (e.g. sweating suits for therapy) that at least partially enclose human bodies for the primary purpose of increasing the local temperature (e.g. insulated, include heating elements) or humidity (e.g. constructed of partially air tight material) of the portion of the human bodies covered to a point where the localized temperature or humidity is beyond the range that human beings normally consider physically comfortable (i.e. creates localized sauna-like environment) for therapy.

Specially adapted components for the above types of apparatus.

Auxiliary appliances or accessories specially adapted for use with any of the above types of apparatus or process (e.g. reflex point locators).

Other types of apparatus or processes which are not used for surgical (e.g. acupuncture devices) purposes that utilize mechanical energy directly applied to human bodies by physical contact for improving their functioning that are not specifically provided for elsewhere in another subclass.

Relationships with other classification places

When used with animals:

If an apparatus or process is usable for both humans and animals for the same purpose and in the same manner, and it is otherwise proper for this subclass, classification is made only in subclass [A61H](#). Similar devices or processes to those covered by subclass [A61H](#) that are usable exclusively for animals, or are used in animals in a different manner or for different purposes than for humans, are classified in subclass [A61D](#).

When used for physical relaxation:

Subclass [A61H](#) covers apparatus or processes that are specially adapted to physically relax or stimulate individuals due either to:

- mechanical energy being directly applied upon human body parts to cause their physical movement, or stimulation, by direct physical contact with external surfaces of the body or surfaces of naturally occurring cavities in the body (i.e. massage), or
- the calming or invigorating effects of bathing.

Subclass [A61M](#) covers devices or processes which are specially adapted to cause or precipitate a change in the state of consciousness of humans (e.g. induce sleep, awaken), or to increase or decrease the mental activity of humans while awake, which may also involve relaxing or stimulating individuals.

Medical Treatment:

Several subclasses provide for apparatus or processes that are used for treating humans for medical conditions. The relationship between these subclasses is as follows:

- Subclass [A61B](#) provides for surgical apparatus or processes in general. Subclass [A61B](#) also provides for surgical apparatus or processes when combined with means used for other types of

Relationships with other classification places

treatment (e.g. therapy, massage) for medical conditions, or when the apparatus can be used both for surgery and for other types of treatment for medical conditions.

- Subclass [A61H](#) provides for massage, chiropractic, or physical therapy apparatus or processes used for the treatment of disease, injuries or disability (i.e. an abnormal condition of the body) by utilization of direct mechanical energy.
- Subclass [A61N](#) provides for apparatus or processes used for the treatment of disease, injuries or disability by utilization of forms of energy other than direct mechanical energy.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

therapy	any medical treatment of an abnormal condition of a human or animal body (e.g. disease, impaired organ, injured limb) by means, instruments, devices, or methods that utilize forms of energy (e.g. mechanical energy) and which is not used for surgical purposes. In general, the treatment time for therapy is long-term relative to that for surgery which usually has a much more immediate effect on the body.
disabled person	a human being that is unable to do a basic physical task (e.g. walking) without assistance due to a physical or mental impairment/condition.
patient	a human being awaiting or undergoing any form of (a) medical care (e.g. testing) or treatment by medical staff (e.g. doctors, dentists, midwives, chiropractors) or (b) physical tending (e.g. feeding) by care providers (e.g. hospice or nursing home staff) due to impairment.

BODY PLANES

The figure above illustrates the following body planes:

1. Sagittal plane

2. Coronal plane

3. Transverse plane

The body-symmetrical plane is also called the midsagittal plane or median plane.

A61H 1/00

Apparatus for passive exercising ([A61H 5/00](#) takes precedence); Vibrating apparatus; Chiropractic devices, e.g. body impacting devices, external devices for briefly extending or aligning unbroken bones

Definition statement

This place covers:

Apparatus and processes intended to facilitate the healing of diseases, promote or assist normal operation of a malfunctioning body part, reduce the impact of injuries, or beneficially influence the condition of disabled body parts either by the physical movement of body parts, e.g. devices for exercising a passive body member, or other types of physical stimulation, e.g. pressure or blows on a part of the skeletal structure or vibration on the body.

Vibrating apparatus for passive exercising of major parts of the body.

Relationships with other classification places

This group covers vibrating apparatuses for major parts of the body. Punctual or localized massage is classified in [A61H 23/00](#).

This group covers passive exercise. Active exercise must be classified in [A63B 21/00](#) - [A63B 24/00](#).

Orthopaedic methods or devices for long-term immobilisation or treatment of broken or deformed bones are classified in [A61F 5/00](#).

--	------------------------------

Special rules of classification

Exoskeletons specifically made for aiding disabled persons to walk about are classified here in [A61H 3/00](#). If the exoskeleton is bending a joint (i.e. not only for supporting the weight), the joint which is moved has to be classified in [A61H 1/0237](#). The exoskeletons are normally portable ([A61H 2201/0157](#)) and wearable ([A61H 2201/165](#)).

Use breakdown codes for additional information ([A61H 2003/001](#) - [A61H 2003/007](#)).

For further additional information the orthogonal classification ([A61H 2201/00](#) - [A61H 2230/00](#)) is used..

Interchangeable	A61H 2201/1685
-----------------	--------------------------------

A61H 19/50

{Devices for use during sexual intercourse}

Definition statement

This place covers:

Massage devices used between more persons during sexual intercourse

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Seating furniture for sexual intercourse	A47C 15/008
--	-----------------------------

A61H 21/00

Massage devices for cavities of the body {, e.g. nose, ears and anus (for the genitals [A61H 19/00](#)); Vibration or percussion related aspects [A61H 23/00](#)}

Definition statement

This place covers:

Massage devices for nose, ears and anus

References

Limiting references

This place does not cover:

Massage of the genitals	A61H 19/00
-------------------------	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Vibration means	A61H 23/00
-----------------	----------------------------

Special rules of classification

For additional information the orthogonal classification ([A61H 2201/00](#), [A61H 2230/85](#)) is used.

A61H 23/00

Percussion or vibration massage, e.g. using supersonic vibration; Suction-vibration massage; Massage with moving diaphragms {(apparatus for passive exercising [A61H 1/00](#); generating or transmitting mechanical vibrations in general [B06B](#))}

Definition statement

This place covers:

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy directly applied upon human bodies by physical contact (e.g. massage) to tap or vibrate the external surface of human bodies, or the surfaces of their naturally occurring body cavities

References

Limiting references

This place does not cover:

Ultrasound therapy	A61N 7/00
--------------------	---------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Apparatus for passive exercising	A61H 1/00
Generating of transmitting mechanical vibrations in general	B06B

Special rules of classification

For additional information the orthogonal classification ([A61H 2201/00](#), [A61H 2230/85](#)) is used.

A61H 2023/002

{having a percussion element combined with a passive spacer element for bearing against the skin}

Definition statement

This place covers:

EP2095843

A61H 23/004

{With mechanical drive, e.g. spring mechanism or vibrating unit being hit for starting vibration and then applied to the body of a patient}

Definition statement

This place covers:

A61H 23/006**{Percussion or tapping massage (hand percussion [A61H 23/06](#))}****Definition statement***This place covers:*

Alternated pressure on the skin, characterised by higher amplitude, higher force applied and lower frequency respect to a vibration massage. Normally it implies an intermittent contact between the skin and the massaging unit.

A61H 23/008**{using shock waves}****References****Limiting references***This place does not cover:*

Inhalators	A61M 15/009

A61H 36/00

Sweating suits

Definition statement

This place covers:

Articles of clothing that at least partially enclose human bodies for the primary purpose of increasing the local temperature (e.g. insulated, include heating elements) or humidity (e.g. constructed of partially air tight material) of the portion of the human bodies covered to a point where the localized temperature or humidity is beyond the range that human beings normally consider physically comfortable (i.e. creates localized sauna-like environment)

Special rules of classification

For additional information the orthogonal classification ([A61H 2201/00](#), [A61H 2230/85](#)) is used.

A61H 37/00

Accessories for massage

Definition statement

This place covers:

Specially adapted components for the above types of apparatus (e.g. body floating supports for relaxation in water).

Special rules of classification

For additional information the orthogonal classification ([A61H 2201/00](#), [A61H 2230/85](#)) is used.
