

C10N

INDEXING SCHEME ASSOCIATED WITH SUBCLASS [C10M](#) RELATING TO LUBRICATING COMPOSITIONS

Definition statement

This place covers:

This subclass constitutes an Indexing Scheme associated with subclass [C10M](#), relating to lubricating compositions:

- metals, as such, or in a compound (indexed according to Groups 1-8 of the Periodic Table) which are present in a lubricating composition;
- the properties of the lubricant composition or constituents thereof;
- the use or application of the lubricant composition;
- the form in which the lubricant composition is applied;
- chemical modification by after-treatment of lubricant constituents;
- special methods of preparation of lubricant compositions;
- special pretreatment of the material to be lubricated.

Relationships with other classification places

All documents indexed in this subclass must also have been classified in subclass [C10M](#).

Synonyms and Keywords

In patent documents, the following words/expressions are often used as synonyms:

- "lubricant" or "lubricating composition" includes cutting oils, hydraulic fluids, metal drawing compositions, flushing oils, or the like.
- "aliphatic" includes "cycloaliphatic".
