

## E02D

**FOUNDATIONS; EXCAVATIONS; EMBANKMENTS (specially adapted for hydraulic engineering [E02B](#)); UNDERGROUND OR UNDERWATER STRUCTURES {(tunnels, tunnelling, mining [E21](#))}**

### Definition statement

*This place covers:*

Methods, devices and machinery for making foundations;

Engineering with the ends of making foundations or underground structures involving the disturbance of the ground surface.

Investigation of foundation soil in situ;

Improving soil or rock;

Structural elements adapted to foundation engineering and equipment and methods of placing or removing them;

Preventing excavation walls or embankments from collapsing;

Keeping dry of foundation sites in the ground;

Caissons and the joining of caissons;

Testing, repairing, straightening, lowering or lifting foundation structures.

### Relationships with other classification places

[E02F](#) covers soil-shifting and dredging independent from the purpose of foundations;

[E21B](#) covers drilling of earth or rock in general and without the intent of making foundations;

[G01N](#) covers investigating or analysing materials by determining their chemical or physical properties;

[G01V](#) covers geophysics in general and prospecting;

[E02B](#) covers hydraulic engineering.

### References

#### *Application-oriented references*

*Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:*

Foundation means specially adapted for overhead structures, e.g. gantries	<a href="#">E01F 9/696</a>
---	----------------------------

## E02D 1/00

**Investigation of foundation soil in situ (investigation involving boring or specially adapted to earth drilling [E21B 25/00](#), [E21B 49/00](#); investigating or analysing materials by determining their chemical or physical properties, in general [G01N](#), e.g. sampling [G01N 1/00](#))**

### Definition statement

*This place covers:*

Any investigation of a soil with respect to envisaged activities of building foundations on surface of that soil or partially or completely embedded in that soil covered by the investigation.

The investigations may be carried out before or after work for making the foundation is being done.

Investigations may also be done while the foundation work is in progress.

The investigations may comprise evaluation of physical properties, e.g. Young's modulus, compressibility, density, water saturation, weight, bearing capacity, pore-water pressure, permeability etc.

The investigation may comprise evaluation of chemical properties e.g. ph value.

The investigation distinguishes between soil itself and the fluids circulating in it.

The investigation in situ.

Sampling of probes like soil or water for off-site investigation.

The group covers the devices for exerting the investigation work as well as the method.

### Relationships with other classification places

[E21B](#) covers drilling of earth or rock in general;

[G01N](#) covers investigating or analysing materials by determining their chemical or physical properties.

[G01V](#) covers geophysics in general and prospecting.

### References

#### Limiting references

*This place does not cover:*

Apparatus for obtaining or removing undisturbed cores, e.g. core barrels, core extractors	<a href="#">E21B 25/00</a>
Containers for collecting substances in boreholes or wells	<a href="#">E21B 27/00</a>
Testing the nature of borehole walls; sampling of soil or fluids	<a href="#">E21B 49/00</a>
Devices for testing in situ the hardness or other properties of minerals	<a href="#">E21C 39/00</a>
Sampling involving an extraction tool, e.g. core bit	<a href="#">G01N 1/08</a>
Suction devices for sampling of fluids, e.g. pumps	<a href="#">G01N 1/14</a>
Investigating characteristics of particles or permeability, pore volume etc.	<a href="#">G01N 15/00</a>
Investigating or analyzing materials by use of ultrasonic, sonic or infrasonic waves	<a href="#">G01N 29/00</a>

Prospecting using seismology	<a href="#">G01V 1/00</a>
Prospecting using optical means	<a href="#">G01V 8/00</a>

## Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Foundation soil	Soil wherein or whereon a foundation for e.g. a building will be erected on
In situ	At the place and in the state of the occurrence of the soil

## E02D 3/00

Improving or preserving soil or rock, e.g. preserving permafrost soil (securing of slopes or inclines [E02D 17/20](#); damming or interrupting passage of underground water [E02D 19/12](#); improving soil for agricultural purposes [A01](#); soil stabilisation for road building or like purposes [E01C 21/00](#), [E01C 23/10](#); setting rock anchoring bolts [E21D](#))

### Definition statement

*This place covers:*

Improving of soil by adding or mixing with materials such as fibres, filaments, open mesh, stones, lost bodies, water, sand, gravel, chemical agents like grout or cement.

Improving of soil by compacting using mechanical, thermal, electrical or electro-chemical means.

Mechanical means include rolling, tamping, vibrating etc. of the soil on its surface or by penetrating the soil.

### Relationships with other classification places

[A01](#) covers soil working in agriculture or forestry;

[E01C](#) covers paving of roadway surface;

[E21D](#) covers rock anchoring in tunnels or mining pits.

### References

#### Limiting references

*This place does not cover:*

Securing of slopes or inclines	<a href="#">E02D 17/20</a>
Placing or applying sealing substances	<a href="#">E02D 19/16</a>
Wheels or wheel attachments designed for increasing traction	<a href="#">B60B 15/00</a>
Machines, tools or auxiliary devices for preparing or distributing paving materials, for working the placed materials, or for forming, consolidating, or finishing the paving	<a href="#">E01C 19/00</a>
Apparatus or processes for surface or soil stabilisation for road building or like purposes, e.g. mixing local aggregate with binder	<a href="#">E01C 21/00</a>
Auxiliary devices or arrangements for constructing, repairing, reconditioning, or taking-up road or like surfaces	<a href="#">E01C 23/00</a>

## Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Improving or preserving	Improving a foundation soil shall in this context be understood as increasing its load bearing capacity by excluding disadvantages such as high content of water or lack of compaction.
Trench roller	Compaction roller designed to be operated on the bottom of a trench
Slope roller	Compaction roller designed to be operated on a slope or on a largely non-limited area
To vibrate	To move or cause to move forth and back rapidly
To tamp	To force or pack down firmly by repeated blows

## E02D 5/00

### Bulkheads, piles, or other structural elements specially adapted to foundation engineering (engineering elements in general [F16](#))

#### Definition statement

*This place covers:*

Sheet piles made of steel and their locking forms;

Sheet piles of concrete and their locking forms;

Bulkheads made of concrete in situ, of prefabricated parts and concrete in situ;

Piles made of timber, steel or concrete;

Prefabricated piles or piles cast in position, e.g. concrete piles;

Concrete piles cast in position with or without the use of mould-pipes or moulds;

Mould-pipes or moulds for making piles or bulkheads;

Pile shoes;

Means for anchoring piles or bulkheads.

#### References

##### Limiting references

*This place does not cover:*

Foundation slots (made of concrete)	<a href="#">E02D 17/13</a>
Structural elongated elements designed for load-supporting	<a href="#">E04C 3/00</a>
Pegs, stakes or the like	<a href="#">E04H 15/62</a>
Drilling rods or pipes	<a href="#">E21B 17/00</a>
Anchoring-bolts for roof, floor	<a href="#">E21D 21/00</a>

## Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Bulkhead	A Wall or partition built to hold back earth or water
In situ	Fabricated at the place of the intended use
Mould-pipe	A Pipe used as the mould for the pile, normally a concrete pile cast in situ

## E02D 7/00

Methods or apparatus for placing sheet pile bulkheads, piles, mouldpipes, or other moulds (for both placing and removing [E02D 11/00](#); {accessories for coupling driver to piles or the like [E02D 13/10](#); for trees or other plants [A01G 17/16](#); placing posts [E04H 17/26](#)})

### Definition statement

*This place covers:*

Inserting sheet piles, piles or mould-pipes for purpose of foundation into a soil.

Specifying the process of placing the above elements which may be done by driving, by vibrating, by pressure or pulling power, by screwing down, by using fluid jets, by using several means simultaneously, by means arranged inside a hollow pipe or mould pipe.

Machines and equipment for exerting these operations.

### Relationships with other classification places

[E21B](#) covers earth drilling, e.g. deep drilling per se. In contrast, this class is aiming to insert a foundation element such as a pile or to inject e.g. grout in a soil to form a foundation element like a pile.

[E04H](#) covers sockets for posts and how to insert them in a ground.

## References

### Limiting references

*This place does not cover:*

For both placing and removing	<a href="#">E02D 11/00</a>
Sockets or holders for posts driven into the ground	<a href="#">E04H 12/2215</a>
Sockets or holders for posts driven into the ground by screwing	<a href="#">E04H 12/2223</a>
Devices for erecting or removing fences	<a href="#">E04H 17/26</a>
Earth drilling, e.g. deep drilling	<a href="#">E21B</a>

## Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

To drive	To force or bring down a foundation element by means other than by vibrating, by pressure or pulling power, by screwing down, by fluid jets, or by means arranged inside the pile.
To vibrate	To move or cause to move forth and back rapidly

## E02D 9/00

Removing sheet piles bulkheads, piles, mould-pipes or other moulds {or parts thereof} (for both placing and removing [E02D 11/00](#))

### Definition statement

*This place covers:*

Removing the top section of piles,

Removing by withdrawing,

Removing by cutting-off an element under water

### Relationships with other classification places

[E02D 7/00](#) covers the placing of sheet piles, piles, mould-pipes or other moulds;

[E21B](#) is about earth drilling including the withdrawal of the equipment.

### References

#### Limiting references

*This place does not cover:*

Methods or apparatus for both placing and removing sheet pile bulkheads, piles, or other mould-pipes	<a href="#">E02D 9/00</a>
Devices for erecting or removing fences	<a href="#">E04H 17/26</a>
Derricks or masts for drilling machines	<a href="#">E21B 15/00</a>

## E02D 11/00

Methods or apparatus {specially adapted} for both placing and removing sheet pile bulkheads, piles, or mould-pipes (features relating to placing only [E02D 7/00](#), to removing only [E02D 9/00](#) {; placing apparatus which without special provisions, can be operated to remove, e.g. vibrating drivers [E02D 7/00](#)})

### Definition statement

*This place covers:*

Methods or apparatus equally suitable for placing and removing foundation elements such as sheet piles, piles or mould-pipes. In contrast, [E02D 7/00](#) only covers the placing of foundation elements, [E02D 9/00](#) only covers the removing of such elements.

### Relationships with other classification places

see [E02D 7/00](#)

### References

#### Limiting references

Scaffolds (as components for drivers)	<a href="#">E02D 7/16</a>

## E02D 15/00

### Handling building or like materials for hydraulic engineering or foundations ({soil-shifting [E02F](#);} conveying or working-up concrete or similar masses in general [E04G 21/02](#))

#### Definition statement

*This place covers:*

Handling materials when used for hydraulic engineering or for foundations;

Handling of bulk concrete including filling into shuttering, mould-pipes, pile tubes, bore-holes or narrow shafts and under water;

Sinking workpieces into water;

Placing gravel or light material under water.

### Relationships with other classification places

[E02F 1/00](#) covers general working methods with dredgers or soil-shifting machines;

[E04G 21/00](#) covers preparing, conveying, or working-up building materials or building elements in situ;

[E02B](#) covers hydraulic engineering.

### References

#### Limiting references

## E02D 17/00

### Excavations; Bordering of excavations; Making embankments (soil-shifting apparatus [E02F](#); earth drilling [E21](#))

#### Definition statement

*This place covers:*

Pits for foundations and their borderings;

Narrow shafts or ditches and trenches for foundation;

Stiffening or bordering the sides of ditches or trenches by using travelling trench shores and shoring struts;

Covering and back-filling of those trenches;

Machines for making foundation slots, i.e. diaphragm walls;

Securing of slopes or inclines, e.g. to counter erosion, by flexible securing means e.g. geotextiles, prefabricated modular blocks or by sheet piles and piles.

### Relationships with other classification places

[E02F](#) covers general working methods with dredgers or soil-shifting machines;

### References

#### Limiting references

*This place does not cover:*

Concrete diaphragms per se	<a href="#">E02D 5/18</a>

**E02D 19/00****Keeping dry foundation sites or other areas in the ground (sheet piles or bulkheads [E02D 5/02](#))****Definition statement**

*This place covers:*

Protecting areas, particularly foundation areas like foundation pits, from the entry of water;

Water may arise as open water or underground water;

Lining sumps when in trenches, ditches or other foundation pits.

The methods comprising the building of coffer-dams, making open ditches or trenches, lowering the level of ground water, e.g. by pumping, interrupting the waters passage by freezing, damming, making sealing aprons or forcing out the water by e.g. compressed air.

**References****Limiting references**

*This place does not cover:*

Consolidating soil by placing solidifying or pore-filling substances in the soil	<a href="#">E02D 3/12</a>
Sheet piles or sheet pile bulkheads	<a href="#">E02D 5/02</a>
Pneumatic caissons to keep of the water	<a href="#">E02D 23/04</a>

Collecting drinking water	<a href="#">E02B 3/00</a>
Sealing or joints in connection with hydraulic engineering when correcting rivers or streams	<a href="#">E02B 3/16</a>
Freezing the soil when sinking shafts, e.g. mining shafts	<a href="#">E21D 1/12</a>

**Glossary of terms**

*In this place, the following terms or expressions are used with the meaning indicated:*

Sealing aprons	Diaphragms made from bituminous or clay material in contrast to diaphragm wall which is widely understood a concrete wall.
----------------	--

## E02D 23/00

**Caissons; Construction or placing of caissons (tunnels submerged into or built in open water [E02D 29/063](#) {; moles, piers, quays, breakwaters incorporating caissons [E02B 3/06](#); foundation formed by caissons [E02D 27/18](#) - [E02D 27/22](#); caisson-like artificial islands [E02B 17/00](#)})**

### Definition statement

*This place covers:*

Caissons and pneumatic caissons, their use involving bringing materials and persons in there;

Particularities of the use of such caissons comprising lowering and sinking, increasing lowering, jointing caissons to the foundation soil, solving problems such as skin friction while lowering.

### References

#### Limiting references

Air locks in mines	<a href="#">E21F 1/14</a>

## E02D 25/00

**Joining caissons, sinkers, or other units to each other under water**

### Definition statement

*This place covers:*

Underwater connection of elements used for foundation underwater such as caissons, sinkers, or other units

### References

#### Limiting references

*This place does not cover:*

Joining caissons to (uneven) foundation soil	<a href="#">E02D 23/16</a>
--	----------------------------

## E02D 27/00

**Foundations as substructures**

### Definition statement

*This place covers:*

Foundations when flat on the foundation soil, deeply embedded foundations such as pile foundations;

## Definition statement

Foundations for special purposes, e.g. in earthquake territories, in frozen ground, in moors, for masts or machines;

special type of fixing the foundation to the ground such as anchoring or building underneath existing buildings for their recovery.

## References

## Special rules of classification

Looping references between [E02D 27/34](#) and [E04H 9/02](#) have been identified. Until this inconsistency is resolved, the current classification practice in CPC is as follows: both references should be treated as informative.

## E02D 29/00

{Independent} underground or underwater structures (underground tanks [B65D 88/76](#); hydraulic engineering, e.g. sealings or joints, [E02B](#); underground garages [E04H 6/00](#); underground air-raid shelters [E04H 9/12](#); burial vaults [E04H 13/00](#)); Retaining walls

### Definition statement

*This place covers:*

Underground or underwater structures as independent buildings or constructions, e.g. retaining or protecting walls, caverns, tunnels, siphons;

Tunnels for conduits;

Manhole shafts and covers therefore;

Joints in constructions and their arrangement;

Retaining walls
