F16L

PIPES; JOINTS OR FITTINGS FOR PIPES; SUPPORTS FOR PIPES, CABLES OR PROTECTIVE TUBING; MEANS FOR THERMAL INSULATION IN GENERAL

Definition statement

This place covers:

- Methods and machines for laying pipes (F16L 1/00)
- Devices to support, fix or hold pipes (F16L 3/00)
- Pipes: conduits of closed cross-section which are specially adapted to convey fluids, material or objects (F16L 9/00 and F16L 11/00)
- Joints between pipes (F16L 13/00 - F16L 41/00, F16L 47/00, F16L 49/00)
- Energy and noise absorbers associated with pipes (F16L 55/02-F16L 55/055)
- Means for stopping flow from or in pipes (F16L 55/10-F16L 55/136)
- Devices for covering leaks in pipes (F16L 55/16-F16L 55/179)
- Pipe pigs primarily for repairing pipes (F16L 55/26-F16L 55/48)
- Protection of pipes against wear, heat, cracking, buckling and corrosion (F16L 57/00 and F16L 58/00)
- Thermal insulation of pipes, or in general, e.g. when no other special application of the insulation is given (F16L 59/00)
- Tubular bodies that are not used to carry fluid, material or objects, e.g. pipes for scaffoldings, or furniture are only classified in the associated field, e.g. scaffoldings or furniture.
- If the pipe or connection is adapted for a specific use, it is only classified in the use field (e.g. medical connectors, microconnectors or vacuum cleaners)
- Documents that concern the specific material or a specific use for thermal insulation are classified in the specific fields for the material or use (e.g. fridges, building panels or motor compartments)

The class is divided in the following main groups

F16L 1/00 Laying of pipes
F16L 3/00 Fixation of pipes
F16L 5/00 Pipes passing through walls
F16L 7/00 Pipe support inside other pipes
F16L 9/00 Rigid pipes
F16L 11/00 Hoses (the product)
F16L 13/00 Non-disconnectable pipe-joints (not made of plastic material)
F16L 15/00 Screw-threaded joints
F16L 17/00 Sealing by fluid pressure
F16L 19/00 Connection of pipes with swivel nuts
F16L 21/00 Male-female couplings
F16L 23/00 Flanged joints
F16L 25/00 Special types of connections for pipes (not in F16L 13/00-F16L 23/00)
F16L 27/00 Adjustable joints (e.g. for allowing movements)
F16L 29/00 Joints with cut-off means
F16L 31/00 Connection of two hoses or two flexible sleeves
F16L 33/00 Connection of hoses to rigid members
F16L 35/00 Safety connections of hoses
F16L 37/00 Quick-acting couplings
F16L 39/00 Multiple/double-walled joints of fittings for pipes or hoses
F16L 41/00 Branching pipes or joining pipes to walls or pipes
F16L 43/00 Bends
F16L 45/00 Pipe units with apertures
F16L 47/00 Connection of plastic pipes; Connectors made of plastic
F16L 49/00 Connection of pipes or to pipes of brittle material
F16L 51/00 Expansion compensation devices (e.g. thermal expansion)
F16L 53/00 Heating/cooling pipes or pipe-systems
F16L 55/00 Energy absorbers, noise absorbers, means for plugging pipes, pigs, repairing pipes etc.
F16L 57/00 Protection of pipes, e.g. against external/internal damage or wear
F16L 58/00 Protection of pipes against corrosion of incrustation (e.g. by coatings)
F16L 59/00 Thermal insulations

**Special rules of classification**

- Classification is not allocated when the features in the document concerning this subclass are obviously of no technical value, or a mere reference (e.g. if in a document it is mentioned that the connection can be also made by gluing, welding, screwing... without a further relevant technical information)
- Documents mainly concerning the material of the pipe or hose are classified in main groups F16L 9/00 or F16L 11/00
- There is a horizontal indexing scheme for further details not related to a specific CPC group:

Uses or applications of pigs or moles F16L 2101/00
Special arrangements for pipe couplings F16L 2201/00

F16L 1/00
Laying or reclaiming pipes; Repairing or joining pipes on or under water

| Joints allowing adjustment or movement only about the axis of one pipe | F16L 27/08 |
| Joints comprising a flexible connection only | F16L 27/10 |
| Joints allowing substantial longitudinal adjustment or movement | F16L 27/12 |
| Couplings of the quick acting type | F16L 37/00 |
| Sealings tightened by external pressure, inflatable packings | F16J 15/00 |
F16L 17/025
the sealing rings having radially directed ribs

Definition statement

This place covers:

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:
the term "radially directed ribs" also includes the ribs which are deformed in axial direction upon connection
F16L 17/035

the sealing rings having two lips parallel to each other

Definition statement

This place covers:
F16L 17/04
with longitudinally split or divided sleeve

Definition statement

This place covers:

F16L 17/10
the packing being sealed by the pressure of a fluid other than the fluid in or surrounding the pipe

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| Expansion-compensation arrangements for pipe-lines | F16L 51/00 |
F16L 19/00
Joints in which sealing surfaces are pressed together by means of a member, e.g. a swivel nut, screwed on or into one of the joint parts (screw-threaded joints F16L 15/00; F16L 17/00 takes precedence; if using bolts or equivalent connecting means F16L 23/00; electrically insulating F16L 25/02; adjustable joints, joints allowing movement F16L 27/00; specially adapted for pipes of brittle material F16L 49/06)

Special rules of classification
Looping references between F16L 19/00 and F16L 23/00 have been identified. Until this inconsistency is resolved, the current classification practice in CPC is as follows:

Flanged joints with sealing surfaces pressed together by means other than bolts or equivalent are classified only in F16L 19/00.

Flanged joints with sealing surfaces pressed together by bolts or equivalent are classified only in F16L 23/00.

F16L 19/0206
{the collar not being integral with the pipe}

Definition statement
This place covers:

Joints with flanges not forming part of the pipe body. This includes welded or screwed on flanges which are not considered to be integral with the pipe

F16L 19/061
{a pressure ring being arranged between the clamping ring and the threaded member or the connecting member}

Definition statement
This place covers:

connections having two rings
**F16L 19/065**
the wedging action being effected by means of a ring

**Definition statement**
*This place covers:*
connections having one ring

**F16L 19/0653**
{the ring being rotatably connected to one of the connecting parts}

**Definition statement**
*This place covers:*
connections wherein the ring rotates with the nut during the fastening

**F16L 19/083**
{the longitudinal cross-section of the ring not being modified during clamping}

**Definition statement**
*This place covers:*
connections wherein the ring being a split ring

**F16L 19/10**
the profile of the ring being altered

**Definition statement**
*This place covers:*
connection wherein the ring being no split ring

**F16L 21/00**
Joints with sleeve or socket (*F16L 13/00, F16L 15/00, F16L 17/00, F16L 19/00, F16L 25/0027, F16L 27/00, F16L 37/00*) take precedence {; specially adapted to be made of plastics or to be used with pipes made of plastics *F16L 47/06;* specially adapted for pipes of brittle material *F16L 49/02*)

Connecting arrangements, e.g. joints, specially adapted for pipes of brittle material, e.g. glass, earthenware

**Relationships with other classification places**

Not covered are joints of pipes of brittle material when the connection is not specially adapted therefor, e.g. if they could be made of any other material without any adaptations. These fittings are classified in the general groups for the respective connections.

F16L 55/26
Pigs or moles, i.e. devices movable in a pipe or conduit with or without self-contained propulsion means

**Definition statement**
This place covers:
General features of pigs or moles for use in pipes or pipe systems

**Relationships with other classification places**
Special adaptations of pigs or moles for the use in pipes or pipe systems as defined in Note 1. are classified only in the corresponding place of the Note.

General features of pigs or moles, e.g. propulsion means, not specially adapted to the use in pipes or pipe systems as defined in Note 1. are classified in F16L 55/26 and subgroups.
