## B PERFORMING OPERATIONS; TRANSPORTING

(NOTES omitted)

## **SEPARATING**; **MIXING**

### B01 PHYSICAL OR CHEMICAL PROCESSES OR APPARATUS IN GENERAL

# B01F MIXING, e.g. DISSOLVING, EMULSIFYING OR DISPERSING (mixing paints B44D 3/06)

#### **NOTES**

- 1. This subclass covers:
  - agitation or homogenisation of products formed by a combination of two or more components with the purpose of obtaining a homogeneous composition or homogeneous conditions in the mass of material;
  - stirring of a single material with the purpose of obtaining homogeneous conditions in the mass of material;
  - mixing, agitation and homogenisation of materials, irrespective of the application in which it is produced, whenever the device or the method are directed to achieve the desired effect.
- 2. In this subclass, the following term is used with the meaning indicated:
  - "mixing" also covers stirring of a single material.

#### WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

21/00	<b>Dissolving</b> (separating by dissolving <u>B01D</u> ; dissolving to effect cooling <u>F25D 5/00</u> )	23/00	Mixing according to the phases to be mixed, e.g. dispersing or emulsifying
