COOPERATIVE PATENT CLASSIFICATION

B PERFORMING OPERATIONS; TRANSPORTING
(NOTES omitted)

SEPARATING; MIXING

B05 SPRAYING OR ATOMISING IN GENERAL; APPLYING LIQUIDS OR OTHER FLUENT MATERIALS TO SURFACES, IN GENERAL
(NOTE omitted)

B05B SPRAYING APPARATUS; ATOMISING APPARATUS; NOZZLES (sprayers or atomisers specially adapted for therapeutic purposes A61M 11/00; spray-mixers with nozzles B01F 5/20; processes for applying liquids or other fluent materials to surfaces by spraying B05D; nozzles specially adapted for injection moulding of plastics or substances in a plastic state B29C 45/1603, B29C 45/20; nozzles specially adapted for windscreen washers B60S 1/52; means for pumping fluids F04; valves, e.g. water-taps, F16K)

NOTES
1. This subclass covers particularly apparatus for the release or projection of drops or droplets into the atmosphere or into a chamber to form a mist or the like. For this purpose, the materials to be projected may be suspended in a stream of gas or vapour.
2. Attention is drawn to the Note following the title of class B05.
3. In this subclass, "means for controlling volume of flow" is used in the most general meaning and includes also means allowing only starting and stopping the flow
4. In this subclass, the meaning of the expression "apparatus carried on or by a person" includes all apparatus comprising at least one container for the material to be sprayed carried on or by a person during use
5. In this subclass, the word "container" is to be understood as the innermost enclosure containing the material to be sprayed

WARNING
In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

1/00 Nozzles, spray heads or other outlets, with or without auxiliary devices such as valves, heating means (B05B 3/00, B05B 5/00, B05B 7/00) take precedence; nozzles for baths with water or gas jets A61H 33/00, e.g. A61H 33/6003, A61H 33/6021, A61H 33/026 or A61H 33/027; nozzles specially adapted for fire-extinguishing A62C 31/02; nozzles for generating high velocity abrasive fluid jets B24C 5/04; nozzles for jet-ink printing mechanisms B41J 2/135; nozzles for filling containers B65B 39/00; nozzles for liquid-dispensing, e.g. in vehicle service stations B67D 7/42

1/002 {designed to reduce the generation or the transmission of noise or to produce a particular sound; associated with noise monitoring means}

WARNING
Group B05B 1/002 is incomplete pending reclassification of documents from group B05B 1/00.
Groups B05B 1/00 and B05B 1/002 should be considered to perform a complete search.

1/005 {Nozzles or other outlets specially adapted for discharging one or more gases}

1/02 {designed to produce a jet, spray, or other discharge of particular shape or nature, e.g. in single drops, or having an outlet of particular shape} (B05B 1/26, B05B 1/28, B05B 1/34 take precedence)

1/04 {in flat form, e.g. fan-like, sheet-like}

1/042 {Outlets having two planes of symmetry perpendicular to each other, one of them defining the plane of the jet (B05B 1/044, B05B 1/046 take precedence)}

1/044 {Slits, i.e. narrow openings defined by two straight and parallel lips; Elongated outlets for producing very wide discharges, e.g. fluid curtains (B05B 1/046 takes precedence)}
outside the outlet opening with multiple outlet openings (B05B 1/02, outlets B05B 1/16 e.g. either jet or spray (having selectively-effective outlets B05B 1/1681, B05B 1/308)), E01C 19/176 uses A01M 7/0071 spray booms { (spray booms for agricultural bodies, e.g. perforated pipes or troughs, e.g. Arrangements of several outlets along elongated body)}; Outlet elements therefor; spray bars for treating roads E03C 1/08 soap or the like E03C 1/046 Roses; Shower heads { (means for adding soap to the like E03C 1/046; jet regulators E03C 1/08)} characterised by their outlet element; Mounting arrangements therefor 1/185 [Arrangements of several outlets along elongated bodies, e.g. perforated pipes or troughs, e.g. spray booms {[spray booms for agricultural uses A01M 7/0071; spray bars for treating roads E01C 19/176]; Outlet elements therefor 1/202 [comprising inserted outlet elements (B05B 1/205 takes precedence)] 1/205 [characterised by the longitudinal shape of the elongated body] 1/207 [the elongated body being a closed loop] 1/22 Spouts (anti-splash devices for water-taps E03C 1/08) 1/24 incorporating means for heating the liquid or other fluent material, e.g. electrically 1/26 with means for mechanically breaking-up or deflecting the jet after discharge, e.g. with fixed deflectors; Breaking-up the discharged liquid or other fluent material by impinging jets 1/262 [with fixed deflectors] 1/265 [the liquid or other fluent material being symmetrically deflected about the axis of the nozzle] 1/267 [the liquid or other fluent material being deflected in determined directions] 1/28 with integral means for shielding the discharged liquid or other fluent material, e.g. to limit area of spray; with integral means for catching drips or collecting surplus liquid or other fluent material (means for any of these purposes, per se B05B 12/16, B05B 12/32, B05B 14/00) 1/30 designed to control volume of flow, e.g. with adjustable passages (B05B 11/0094 takes precedence) WARNING Group B05B 1/30 is impacted by reclassification into group B05B 11/0094. Groups B05B 1/30 and B05B 11/0094 should be considered to perform a complete search. 1/3006 [the controlling element being actuated by the pressure of the fluid to be sprayed (B05B 11/0062 takes precedence)] 1/3013 [the controlling element being a lift valve (B05B 1/3006, B05B 1/3033 take precedence; lift valves in general F16K 1/00)] 1/302 [with a ball-shaped valve member (ball valves in general F16K 1/14)] 1/3026 [the controlling element being a gate valve, a sliding valve or a cock (B05B 1/3006, B05B 1/326 take precedence; gate valves or sliding valves in general F16K 3/00; cocks in general F16K 5/00)] 1/3033 [the control being effected by relative coaxial longitudinal movement of the controlling element and the spray head (B05B 1/3026 takes precedence)] 1/304 [the controlling element being a lift valve] 1/3046 [the valve element, e.g. a needle, co-operating with a valve seat located downstream of the valve element and its actuating means, generally in the proximity of the outlet orifice (B05B 1/308 takes precedence)] 1/3053 [the actuating means being a solenoid] 1/306 [the actuating means being a fluid] 1/3066 [the valve element being at least partially hollow and liquid passing through it when the valve is opened] 1/3073 [the controlling element being a deflector acting as a valve in co-operation with the outlet orifice (B05B 1/308 takes precedence; deflectors per se B05B 1/262)] 1/308 [the controlling element comprising both a lift valve and a deflector]
Spraying or sprinkling apparatus with moving outlet elements or moving deflecting elements

3/00

Groups B05B 1/3402 should be considered to perform a complete search.

3/042 . . . . (to produce swirl)

3/041 . . . . [with moving outlet elements]

3/045 . . . . (to avoid or to reduce turbulences, e.g. comprising fluid flow straightening means)

WARNING

Group B05B 1/3402 is incomplete pending reclassification of documents from group B05B 1/34.

Groups B05B 1/34 and B05B 1/3402 should be considered to perform a complete search.

3/0436 . . . . [the controlling element being a grooved body, which is movable in the outlet orifice]

1/3093 . . . . (Recirculation valves, i.e. the valve element opens a passage to the nozzle and simultaneously closes at least partially a return passage the feeding means)

1/32 . . . . in which a valve member forms part of the outlet opening (B05B 1/3033 takes precedence)

1/323 . . . . [the valve member being actuated by the pressure of the fluid to be sprayed (B05B 11/0062 takes precedence)]

1/326 . . . . [the valve being a gate valve, a sliding valve or a cock]

1/34 . . designed to influence the nature of flow of the liquid or other fluent material, e.g. to produce swirl (designed to control volume of flow B05B 1/30)

WARNING

Group B05B 1/34 is impacted by reclassification into group B05B 1/3402.

Groups B05B 1/34 and B05B 1/3402 should be considered to perform a complete search.

3/0494 . . . . [the discharge outlet being not on the axis of the swirl chamber]

3/06 . Outlets for discharging by overflow

3/001 . . . . (incorporating means for heating or cooling, e.g. the material to be sprayed)

3/002 . . . . (comprising a moving member supported by a fluid cushion)

3/003 . . . . (with braking means, e.g. friction rings designed to provide a substantially constant revolution speed)

3/005 . . . . (using viscous dissipation, e.g. a rotor movable in a chamber filled with oil)

3/006 . . . . (using induced currents; using magnetic means)

3/007 . . . . (with friction clutch means)

3/008 . . . . (comprising a wobbling or nutating element, i.e. rotating about an axis describing a cone during spraying (B05B 3/0463 takes precedence)]

3/009 . . . . with rotating elements

3/021 . . . . (with means for regulating the jet relative to the horizontal angular position of the nozzle, e.g. for spraying non circular areas by changing the elevation of the nozzle or by varying the nozzle flow-rate (B05B 3/0454 takes precedence))

3/022 . . . . (the rotating deflecting element being a ventilator or a fan (B05B 3/105 takes precedence; agricultural atomisers or mist blowers A01M 7/0003)]

3/023 . . . . (comprising a pneumatic motor actuated by a depression created by the liquid flow)

3/025 . . . . (Rotational joints)

3/026 . . . . (the fluid passing axially from one joint element to another)

3/027 . . . . (with radial fluid passages)

3/028 . . . . (the rotation being orbital (B05B 3/0445 and B05B 3/066 take precedence)

3/04 . . driven by the liquid or other fluent material discharged, e.g. the liquid actuating a motor before passing to the outlet ((B05B 3/023 takes precedence))

3/0404 . . . . (the motor comprising a movable ball)

3/0409 . . . . (with moving, e.g. rotating, outlet elements (B05B 3/0486, B05B 3/06 take precedence)

3/0413 . . . . (comprising a liquid driven piston motor)

3/0418 . . . . (comprising a liquid driven rotor, e.g. a turbine (B05B 3/0463, B05B 3/0468 take precedence))

3/0422 . . . . (with rotating outlet elements)

3/0427 . . . . (the outlet elements being directly attached to the rotor or being an integral part of it)

3/0431 . . . . (the rotative movement of the outlet elements being reversible (B05B 3/0445 takes precedence))

3/0436 . . . . (by reversing the direction of rotation of the rotor itself)
3/044 . . . . . . . . [Tubular elements holding several outlets, e.g. apertured tubes, oscillating about an axis substantially parallel to the tubular element] 3/0445 . . . . . . . . [the movement of the outlet elements being a combination of two movements, one being rotational] 3/045 . . . . . . . . with automatic means for regulating the jet (B05B 3/0445 takes precedence) 3/0454 . . . . . . . . [relative to the angular position of the outlet or to the direction of rotation of the outlet, e.g. for spraying non circular areas] 3/0459 . . . . . . . . [the rotor axis not being parallel to the rotation axis of the outlet, e.g. being perpendicular thereto] 3/0463 . . . . . . . . [Rotor nozzles, i.e. nozzles consisting of an element having an upstream part rotated by the liquid flow, and a downstream part connected to the apparatus by a universal joint] 3/0468 . . . . . . . . [the liquid actuating a motor after passing the spray outlet (B05B 3/0472 takes precedence)] 3/0472 . . . . . . . . [the spray jet actuating a movable deflector which is successively moved out of the jet by jet action and brought back into the jet by spring action] 3/0477 . . . . . . . . [the spray outlet having a reversible rotative movement, e.g. for covering angular sector smaller than 360°] 3/0481 . . . . . . . . [Impact motive means] 3/0486 . . . . . . . . [the spray jet being generated by a rotary deflector rotated by liquid discharged onto it in a direction substantially parallel its rotation axis] 3/049 . . . . . . . . [comprising mechanical means for preventing a rotor from rotating despite being submerged in a streaming fluid] 3/0495 . . . . . . . . [the liquid or other fluent material discharged powering several motors, e.g. several turbines] 3/06 . . . . . . . . by jet reaction, i.e. creating a spinning torque due to a tangential component of the jet 3/063 . . . . . . . . [using a member, e.g. a deflector, for creating the tangential component of the jet] 3/066 . . . . . . . . [the movement of the outlet elements being a combination of two movements, one being rotational] 3/08 . . . . in association with stationary outlet or deflecting elements 3/082 . . . . [the spraying being effected by centrifugal forces] 3/085 . . . . . . . . [in association with sectorial deflectors] 3/087 . . . . . . . . [Spray guns comprising this arrangement] 3/10 . . . . . . . . discharging over substantially the whole periphery of the rotating member, i.e. the spraying being effected by centrifugal forces (B05B 3/082 takes precedence) 3/1007 . . . . . . . . [characterised by the rotating member (B05B 3/105 takes precedence)] 3/1014 . . . . . . . . [with a spraying edge, e.g. like a cup or a bell] 3/1021 . . . . . . . . [with individual passages at its periphery] 3/1028 . . . . . . . . [the passages comprising an insert] 3/1035 . . . . . . . . [Driving means; Parts thereof, e.g. turbine, shaft, bearings] 3/1042 . . . . . . . . [Means for connecting, e.g. reversibly, the rotating spray member to its driving shaft] 3/105 . . . . . . . . [Fan or ventilator arrangements therefor] 3/1057 . . . . . . . . [with at least two outlets, other than gas and cleaning fluid outlets, for discharging, selectively or not, different or identical liquids or other fluent materials on the rotating element] 3/1064 . . . . . . . . [the liquid or other fluent material to be sprayed being axially supplied to the rotating member through a hollow rotating shaft] 3/1071 . . . . . . . . [with two rotating members rotating at different speeds] 3/1078 . . . . . . . . [the rotating members rotating in opposite directions] 3/1085 . . . . . . . . [with means for detecting or controlling the rotational speed] 3/1092 . . . . . . . . [Means for supplying shaping gas] 3/12 . . . . . . . . with spray booms or the like rotating around an axis by means independent of the liquid or other fluent material discharged 3/14 . . . . . . . . with oscillating elements; with intermittent operation 3/16 . . . . . . . . driven or controlled by the liquid or other fluent material discharged, e.g. the liquid actuating a motor before passing to the outlet ([B05B 3/0431, B05B 3/0468, B05B 3/0472 take precedence]) 3/18 . . . . . . . . with elements moving in a straight line, e.g. along a track; Mobile sprinklers ([watering arrangements making use of movable installations A01G 25/09])

5/00 Electrostatic spraying apparatus; Spraying apparatus with means for charging the spray electrically; Apparatus for spraying liquids or other fluent materials by other electric means

5/001 . . . . . . . . [incorporating means for heating or cooling, e.g. the material to be sprayed] 5/002 . . . . . . . . [comprising means for neutralising the spray of charged droplets or particules] 5/003 . . . . . . . . [by mixing two sprays of opposite polarity] 5/004 . . . . . . . . [by alternating the polarity of the spray] 5/005 . . . . . . . . [the high voltage supplied to an electrostatic spraying apparatus being adjustable during spraying operation, e.g. for modifying spray width, droplet size] 5/006 . . . . . . . . [the adjustment of high voltage is responsive to a condition, e.g. a condition of material discharged, of ambient medium or of target] 5/007 . . . . . . . . [the high voltage supplied to an electrostatic spraying apparatus during spraying operation being periodical or in time, e.g. sinusoidal] 5/008 . . . . . . . . [with periodical change of polarity] 5/025 . . . . . . . . Discharge apparatus, e.g. electrostatic spray guns 5/0255 . . . . . . . . [spraying and depositing by electrostatic forces only] 5/03 . . . . . . . . characterised by the use of gas, e.g. electrostatically assisted pneumatic spraying ([B05B 5/043, B05B 5/043, B05B 5/047 take precedence]) 5/032 . . . . . . . . [for spraying particulate materials]
5/035 . . . characterised by gasless spraying \[, e.g. electrostatically assisted airless spraying (B05B 5/04, B05B 5/043, B05B 5/047 take precedence)\]

5/04 . . . characterised by having rotary outlet or deflecting elements \[. i.e. spraying being also effected by centrifugal forces\]

5/0403 . . . [characterised by the rotating member]

5/0407 . . . [with a spraying edge; e.g. like a cup or a bell]

5/0411 . . . [with individual passages at its periphery]

5/0415 . . . [Driving means; Parts thereof, e.g. turbine, shaft, bearings]

5/0418 . . . [designed for spraying particulate material]

5/0422 . . . [comprising means for controlling speed of rotation]

5/0426 . . . [Means for supplying shaping gas]

5/043 . . . using induction-charging

5/047 . . . using tribo-charging

5/053 . . . Arrangements for supplying power, e.g. charging power

5/0531 . . . [Power generators]

5/0532 . . . [driven by a gas turbine]

5/0533 . . . [Electrodes specially adapted therefor; Arrangements of electrodes]

5/0535 . . . [at least two electrodes having different potentials being held on the discharge apparatus, one of them being a charging electrode of the corona type located in the spray or close to it, and another being of the non-corona type located outside of the path for the material]

5/0536 . . . [Dimensional characteristics of electrodes, e.g. diameter or radius of curvature of a needle-like corona electrode]

5/0537 . . . [comprising a charge return path between the target and the spraying apparatus which is not the “true” earth, i.e. using a direct charge return path like a wire or the like, e.g. “floating earth”]

5/0538 . . . [the operator being part of a charge return path between target and apparatus]

5/057 . . . Arrangements for discharging liquids or other fluent material without using a gun or nozzle

5/06 . . . using electric arc

5/08 . . . Plant for applying liquids or other fluent materials to objects

5/081 . . . [specially adapted for treating particulate materials]

5/082 . . . [characterised by means for supporting, holding or conveying the objects]

5/084 . . . [the objects lying on, or being supported above conveying means, e.g. conveyor belts]

5/085 . . . [the plant being provided on a vehicle]

5/087 . . . [Arrangements of electrodes, e.g. of charging, shielding, collecting electrodes (B05B 5/12, B05B 5/14 take precedence; arrangements of electrodes on the discharge apparatus B05B 5/0533)]

5/088 . . . [for creating electric field curtains]

5/10 . . . Arrangements for supplying power, e.g. charging power (in discharge apparatus B05B 5/053)

5/12 . . . specially adapted for coating the interior of hollow bodies

5/14 . . . specially adapted for coating continuously moving elongated bodies, e.g. wires, strips, pipes

5/16 . . . Arrangements for supplying liquids or other fluent material

5/1608 . . . [the liquid or other fluent material being electrically conductive]

5/1616 . . . [and the arrangement comprising means for insulating a grounded material source from high voltage applied to the material]

5/1625 . . . [the insulating means comprising an intermediate container alternately connected to the grounded material source for filling, and then disconnected and electrically insulated therefrom]

5/1633 . . . . . . [the arrangement comprising several supply lines arranged in parallel, each comprising such an intermediate container]

5/1641 . . . . . . [an additional container being provided downstream the intermediate container]

5/165 . . . . . . [by dividing the material into discrete quantities, e.g. droplets]

5/1658 . . . . . . [Details]

5/1666 . . . . . . [Voltage blocking valves, e.g. with axially separable coupling elements]

5/1675 . . . . . . [the supply means comprising a piston, e.g. a piston pump]

5/1683 . . . . . . [specially adapted for particulate materials]

5/1691 . . . . . . [Apparatus to be carried on or by a person or with a container fixed to the discharge device]

7/00 Spraying apparatus for discharge of liquids or other fluent materials from two or more sources, e.g. of liquid and air, of powder and gas (B05B 3/00, B05B 5/00 \[, B05B 11/06\] take precedence)

7/0006 . . . [Spraying by means of explosions]

7/0012 . . . [Apparatus for achieving spraying before discharge from the apparatus]

7/0018 . . . [with devices for making foam]

7/0025 . . . [with a compressed gas supply]

7/0031 . . . [with disturbing means promoting mixing, e.g. balls, crowns]

7/0037 . . . . . . [including sieves, porous members or the like]

7/0043 . . . . . . [including a plurality of individual elements, e.g. needles, baffles, rotatable blades]

7/005 . . . . . . [wherein ambient air is aspirated by a liquid flow]

7/0056 . . . . . . [with disturbing means promoting mixing, e.g. balls, crowns]

7/0062 . . . . . . [including sieves, porous members or the like]

7/0068 . . . . . . [including a plurality of individual elements, e.g. needles, baffles, rotatable blades]

7/0075 . . . . . . [Nozzle arrangements in gas streams]

7/0081 . . . . . . [Apparatus supplied with low pressure gas, e.g. "hvlp"-guns; air supplied by a fan]

7/0087 . . . . . . [Atmospheric air being sucked by a gas stream, generally flowing through a venturi, at a location upstream or inside the spraying apparatus]

7/0093 . . . . . . [At least a part of the apparatus, e.g. a container, being provided with means, e.g. wheels or casters for allowing its displacement relative to the ground]
B05B

7/02 . Spray pistols; Apparatus for discharge (for spraying particulate material B05B 7/14; with means for heating the material to be sprayed B05B 7/16; with means for supplying fluent material to a discharge device B05B 7/24)

7/025 . {Nozzles having elongated outlets, e.g. slots, for the material to be sprayed}

7/04 . with arrangements for mixing liquids or other fluent materials before discharge (mixing in general B01F, e.g. B01F 5/00; mixing valves F16K 11/00)

7/0408 . {with arrangements for mixing two or more liquids}

7/0416 . {with arrangements for mixing one gas and one liquid}

7/0425 . . . {without any source of compressed gas, e.g. the air being sucked by the pressurised liquid}

7/0433 . . . {with one inner conduit of gas surrounded by an external conduit of liquid upstream the mixing chamber}

7/0441 . . . {with one inner conduit of liquid surrounded by an external conduit of gas upstream the mixing chamber}

7/045 . . . {the gas and liquid flows being parallel just upstream the mixing chamber (B05B 7/0458, B05B 7/0466 take precedence)}

7/0458 . . . . {the gas and liquid flows being perpendicular just upstream the mixing chamber}

7/0466 . . . . {with means for deflecting the central liquid flow towards the peripheral gas flow}

7/0475 . . . . {with means for deflecting the peripheral gas flow towards the central liquid flow (B05B 7/0458 takes precedence)}

7/0483 . . . . {with gas and liquid jets intersecting in the mixing chamber}

7/0491 . . . . {the liquid and the gas being mixed at least twice along the flow path of the liquid}

7/06 . . with [at least] one outlet orifice surrounding another approximately in the same plane

7/061 . . . . {with several liquid outlets discharging one or several liquids}

7/062 . . . . {with only one liquid outlet and at least one gas outlet}

7/063 . . . . {one fluid being sucked by the other}

7/064 . . . . {the liquid being sucked by the gas}

7/065 . . . . {an inner gas outlet being surrounded by an annular adjacent liquid outlet}

7/066 . . . . {with an inner liquid outlet surrounded by at least one annular gas outlet}

7/067 . . . . {the liquid outlet being annular}

7/068 . . . . {the annular gas outlet being supplied by a gas conduit having an axially concave curved internal surface just upstream said outlet}

7/08 . . with separate outlet orifices, e.g. to form parallel jets, i.e. the axis of the jets being parallel, to form intersecting jets, i.e. the axis of the jets converging but not necessarily intersecting at a point

7/0807 . . . {to form intersecting jets}

7/0815 . . . . {with at least one gas jet intersecting a jet constituted by a liquid or a mixture containing a liquid for controlling the shape of the latter}

7/0823 . . . . {comprising a rotatable spray pattern adjusting plate controlling the flow rate of the spray shaping gas jets}

7/083 . . . . {comprising rotatable spray shaping gas jet outlets}

7/0838 . . . . {comprising a single means controlling simultaneously the flow rates of shaping and spraying gas jets}

7/0846 . . . . {with jets being only jets constituted by a liquid or a mixture containing a liquid}

7/0853 . . . . {with one single gas jet and several jets constituted by a liquid or a mixture containing a liquid (B05B 7/0815 takes precedence)}

7/0861 . . . . {with one single jet constituted by a liquid or a mixture containing a liquid and several gas jets (B05B 7/0815 takes precedence)}

7/0869 . . . . {the liquid or other fluent material being sucked or aspirated from an outlet orifice by another fluid, e.g. a gas, coming from another outlet orifice}

7/0876 . . . . {to form parallel jets constituted by a liquid or a mixture containing a liquid (B05B 7/0846, B05B 7/0892 take precedence)}

7/0884 . . . . {the outlet orifices for jets constituted by a liquid or a mixture containing a liquid being aligned}

7/0892 . . . . {the outlet orifices for jets constituted by a liquid or a mixture containing a liquid being disposed on a circle}

7/10 . producing a swirling discharge

7/12 . designed to control volume of flow, e.g. with adjustable passages

7/1209 . . . . {the controlling means for each liquid or other fluent material being manual and interdependent}

7/1218 . . . . {With means for adjusting or modifying the action of the controlling means}

7/1227 . . . . {Non linear relationship between the controlling means displacement and the valve element displacement}

7/1236 . . . . {with three or more interdependent valves}

7/1245 . . . . {A gas valve being opened before a liquid valve}

7/1254 . . . . {the controlling means being fluid actuated}

7/1263 . . . . {pneumatically actuated}

7/1272 . . . . {actuated by gas involved in spraying, i.e. exiting the nozzle, e.g. as a spraying or jet shaping gas}

7/1281 . . . . {Serial arrangement, i.e. a single gas stream acting on the controlling means first and flowing downstream thereof to the nozzle}

7/129 . . . . {Hand guns comprising a gas valve located at the bottom of the handle (B05B 7/0087 takes precedence)}

7/14 . . designed for spraying particulate materials (B05B 7/16 takes precedence)

7/1404 . . . {Arrangements for supplying particulate material}
B05B

7/1409 . . . [specially adapted for short fibres or chips
(B05B 7/1425 takes precedence)]
7/1413 . . . [Apparatus to be carried on or by a person,
e.g. by hand; Apparatus comprising a container
fixed to the discharge device]
7/1418 . . . . [comprising means for supplying an
additional liquid]
7/1422 . . . . [the means for supplying particulate material
comprising moving mechanical means, e.g. to impart vibration]
7/1427 . . . . [Apparatus to be carried on the back of the
user]
7/1431 . . . . [comprising means for supplying an additional
liquid (B05B 7/1418 takes precedence)]
7/1436 . . . . . [to a container where the particulate material
and the additional liquid are brought together
(mixing in general B01F)]
7/144 . . . . [the means for supplying particulate material
comprising moving mechanical means
(B05B 7/1422, B05B 7/1459 take precedence)]
7/1445 . . . [involving vibrations (B05B 7/145 takes precedence)]
7/145 . . . [specially adapted for short fibres or chips]
7/1454 . . [comprising means for supplying collected
oversprayed particulate material (spray booth
with arrangements for collecting oversprayed
material B05B 14/40)]
7/1459 . . [comprising a chamber, inlet and outlet valves
upstream and downstream the chamber and
means for alternately sucking particulate
material into and removing particulate
material from the chamber through the
valves (conveying material in bulk by using
a combination of gas pressure and suction
B65G 53/28; pumps in general F04B; apparatus
for repeatedly measuring and separating a
predetermined volume of fluent solid material
from a supply or container G01F 11/00)]
7/1463 . . . [the means for supplying particulate material
comprising a gas inlet for pressurising
or avoiding depressurisation of a powder
container]
7/1468 . . . [the means for supplying particulate material
comprising a recirculation loop]
7/1472 . . . [Powder extracted from a powder container in
a direction substantially opposite to gravity by
a suction device dipped into the powder]
7/1477 . . . [means for supplying to several spray
apparatus]
7/1481 . . . [Spray pistols or apparatus for discharging
particulate material]
7/1486 . . . [for spraying particulate material in dry state]
7/149 . . . . [with separate inlets for a particulate material
and a liquid to be sprayed]
7/1495 . . . . [and with separate outlets for the particulate
material and the liquid]
7/16 . . incorporating means for heating [or cooling] the
material to be sprayed ](Spraying by means of
explosions B05B 7/0006)]
7/1606 . . . [the spraying of the material involving the use
of an atomising fluid, e.g. air (B05B 7/168,
B05B 7/1686, B05B 7/20, B05B 7/22 take
precedence)]
7/1613 . . . [comprising means for heating the atomising
fluid before mixing with the material to be
sprayed]
7/162 . . . . [and heat being transferred from the
atomising fluid to the material to be sprayed]
7/1626 . . . . [at the moment of mixing]
7/1633 . . . [and heat being transferred from the material
to be sprayed to the atomising fluid]
7/164 . . . . . [the material to be sprayed and the atomising
fluid being heated by independent sources
of heat, without transfer of heat between
atomising fluid and material to be sprayed]
7/1646 . . . . . [the material to be sprayed and the atomising
fluid being heated by the same source of
heat, without transfer of heat between
atomising fluid and material to be sprayed]
7/1653 . . . . . [the source of heat being a heat conductive
fluid]
7/166 . . . . [the material to be sprayed being heated in a
container (B05B 7/208 takes precedence)]
7/1666 . . . . [fixed to the discharge device]
7/1673 . . . [heat being transferred to the material to be
sprayed by a heat transfer conductive fluid
(B05B 7/162, B05B 7/1653 take precedence)]
7/168 . . . [with means for heating or cooling after mixing
(B05B 7/201, B05B 7/22 take precedence)]
7/1686 . . . [involving vaporisation of the material to be
sprayed or of an atomising-fluid-generating
product]
7/1693 . . [with means for heating the material to be
sprayed or an atomizing fluid in a supply hose or
the like]
7/18 . . the material having originally the shape of a wire,
rod or the like (B05B 7/203, B05B 7/224 take
precedence)]
7/20 . . . by flame or combustion
7/201 . . . . [downstream of the nozzle]
7/203 . . . . . . . . . . . . . . . . (the material to be sprayed having originally
the shape of a wire, rod or the like]
7/205 . . . . . . . . . . . . . . . . (the material to be sprayed being originally a
particulate material)
7/206 . . . . . . . . . . . . . . . . (in a container fixed to the discharge
device)
7/208 . . . . . . . . . . . . . . . . (the material to be sprayed being heated in a
container)
7/22 . . . electrically [i.e. magnetically or
electromagnetically], e.g. by arc (B05B 7/20
takes precedence)]
7/222 . . . . [using an arc]
7/224 . . . . . . . . . . . . . . . . (the material having originally the shape of a
wire, rod or the like)
7/226 . . . . . . . . . . . . . . . . (the material being originally a particulate
material)
7/228 . . . . . . . . . . . . . . . . (using electromagnetic radiation, e.g. laser)
7/24 . . . with means, e.g. a container, for supplying
liquid or other fluent material to a discharge
device (B05B 7/14, B05B 7/16, B05B 11/00 take
precedence)]
7/2402 . . . . (Apparatus to be carried on or by a person, e.g.
by hand; Apparatus comprising containers fixed
to the discharge device (B05B 7/0012 takes
precedence)]
[using an atomising fluid as carrying fluid for feeding, e.g. by suction or pressure, a carried liquid from the container to the nozzle (B05B 7/2459 - B05B 7/247 take precedence)]

(characterised by the container or its attachment means to the spray apparatus)

(the container being pressurised)

(with means for changing the position or the orientation of the container relative to the spray apparatus)

(characterised by the means for producing or supplying the atomising fluid, e.g. air hoses, air pumps, gas containers, compressors, fans, ventilators, their drives)

(Air pumps actuated by the operator, e.g. manually actuated)

(Gas containers)

{ the carried liquid and the main stream of atomising fluid being brought together downstream of the container before discharge (B05B 7/2435 takes precedence) }

{ and a secondary stream of atomising fluid being brought together in the container or putting the carried liquid under pressure in the container }

{ the carried liquid and the main stream of atomising fluid being brought together after discharge (B05B 7/2435 takes precedence) }

{ and a secondary stream of atomising fluid being brought together in the container or putting the carried liquid under pressure in the container }

{ the carried liquid and the main stream of atomising fluid being brought together by parallel conduits placed one inside the other }

{ a liquid being fed by gravity only from the container to the nozzle (B05B 7/2478 takes precedence) }

WARNING

Group B05B 7/247 is impacted by reclassification into group B05B 7/2478.

Groups B05B 7/247 and B05B 7/2478 should be considered to perform a complete search.

{ comprising several containers }

{ comprising a container carried on the back of the user }

{ Gun with a container which, in normal use, is located above the gun }

WARNING

Group B05B 7/2478 is incomplete pending reclassification of documents from B05B 7/247.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

{ with a flexible container for liquid or other fluent material }

{ the supplying means involving no pressure or aspiration, e.g. means involving gravity or capillarity (B05B 7/2459, B05B 7/247 take precedence) }

{ with means for supplying liquid or other fluent material to several discharge devices }

{ an atomising fluid, e.g. a gas, being supplied to the discharge device (B05B 7/2402, B05B 7/2483, B05B 7/262 take precedence) }

{ characterised by the means for producing or supplying the atomising fluid, e.g. air hoses, air pumps, gas containers, compressors, fans, ventilators, their drives }

{ a liquid being supplied from a pressurized or compressible container to the discharge device }

{ several liquids from different sources being supplied to the discharge device }

{ Apparatus in which liquids or other fluent materials from different sources are brought together before entering the discharge device (B05B 7/2402 takes precedence) }

{ a liquid and a gas being brought together before entering the discharge device }

{ the liquid being fed by gravity, or sucked into the gas }

{ the liquid and the gas being both under pressure }

WARNING

The complete search.

Groups B05B 7/247 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.

Groups B05B 7/247 and B05B 7/2478 should be considered in order to perform a complete search.
Spraying apparatus for discharge of liquids or other fluent material, without essentially mixing with gas or vapour (B05B 7/00 takes precedence)

Spray pistols, (discharge devices) (B05B 9/03 takes precedence)

Spray pistols, characterised by means for supplying liquid or other fluent material (B05B 9/002 takes precedence)

Spray pistols, to several spraying apparatus (B05B 9/0423 takes precedence)

Spray pistols, with pressurised or compressible container (aerosol containers B65D 83/14); with pump

Spray pistols, with pumps for liquids or other fluent material (B05B 9/043 takes precedence)

Spray pistols, with several pumps

Spray pistols, the pumps being driven by a hydraulic or a pneumatic fluid

Spray pistols, with reciprocating pumps, e.g. membrane pump, piston pump, bellow pump (B05B 9/043 takes precedence)

Spray pistols, with pumps comprising rotating pumping parts, e.g. gear pump, centrifugal pump, screw-type pump (B05B 9/0424 takes precedence)

Spray pistols, with peristaltic pumps

Spray pistols, for supplying liquid or other fluent material to several spraying apparatus

Spray pistols, with a pump attached to the spray gun or discharge device (single-units hand-held apparatus in which the flow is effected by a pump (B05B 11/301)

Spray pistols, having pump readily separable from container

Spray pistols, supply being effected by follower in container, e.g. membrane or floating piston, or by deformation of container (B05B 9/0838 takes precedence)

Spray pistols, the delivery being related to the movement of a vehicle, e.g. the pump being driven by a vehicle wheel

Spray pistols, Apparatus to be carried on or by a person, e.g. of knapsack type (B05B 9/0426, B05B 11/00 takes precedence); details or components, e.g. casings, bodies of portable power-driven tools not particularly related to the operation performed (B25F 5/00)

Spray pistols, comprising a pressurised or compressible container for liquid or other fluent material (B05B 9/085 takes precedence)

Spray pistons, comprising air supplying means actuated by the operator to pressurise or compress the container

Spray pistons, the air supplying means being a manually actuated air pump

Spray pistons, a discharge device being fixed to the container

Spray pistons, the air pump being actuated by shaking

Spray pistons, comprising a compressed gas container, e.g. a nitrogen cartridge

Spray pistons, supply being effected by follower in container, e.g. membrane or floating piston, or by deformation of container

Spray pistons, the container being pressurised or compressed by a gas generated by a chemical reaction

Spray pistons, with a liquid pump

Spray pistons, the pump being motor-driven (B05B 9/0866, B05B 9/0872 takes precedence)

Spray pistons, the motor being electric

Spray pistons, the pump being a gear, centrifugal or screw-type pump

Spray pistons, the pump being a peristaltic pump

Spray pistons, the pump being of pressure-accumulation type or being connected to a pressure accumulation chamber

Spray pistons, having a discharge device fixed to the container

Spray pistons, Carrying means for knapsack sprayers

Spray pistons, Gun with a container which, in normal use, is located above the gun

11/00 Single-unit, i.e. unitary, hand-held apparatus (apparatus with an external source or the possibility of permanent accumulation of pressure for discharging the liquid or fluid material B05B 7/00, B05B 9/00)

11/0002 Incorporating means for heating or cooling, e.g. the material to be sprayed

11/0005 Components or details (of single units wherein the flow is effected by a pump B05B 11/3042)

11/0008 Sealing or attachment arrangements between sprayer and container (between pump and container B05B 11/3043)

11/001 Snap-on-twist-off type connections

11/0013 Attachment arrangements comprising means cooperating with the inner surface of the container

11/0027 Means for neutralising the actuation of the sprayer (pump locking means B05B 9/0852; Means for preventing access to the sprayer actuation means)

11/0029 Valves not actuated by pressure (automatically opened during actuation of a spray pump B05B 11/3053; B05B 11/4032, B05B 11/0094 takes precedence)
WARNING

Group B05B 11/0037 is impacted by reclassification into group B05B 11/0038. Groups B05B 11/0037 and B05B 11/0038 should be considered to perform a complete search.

WARNING

Group B05B 11/0038 is incomplete pending reclassification of documents from group B05B 11/0037. Groups B05B 11/0037 and B05B 11/0038 should be considered to perform a complete search.

WARNING

Group B05B 11/0039 is impacted by reclassification into group B05B 11/00442. Groups B05B 11/0039 and B05B 11/00442 should be considered to perform a complete search.

WARNING

Group B05B 11/0041 is impacted by reclassification into group B05B 11/00411. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00411 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00411 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00412 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00411 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00412 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00411 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00412 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00411 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.

WARNING

Group B05B 11/00412 is incomplete pending reclassification of documents from group B05B 11/0041. Groups B05B 11/0041 and B05B 11/00411 should be considered to perform a complete search.
{Means for filling or refilling the sprayer (through additional openings in the container B05B 11/0095)}

11/02 . the flow being effected by a follower, e.g. membrane, floating piston, in container for liquid or other fluent material

11/025 . (with stepwise advancement of the follower, e.g. for spraying a predetermined quantity of the liquid or other fluid material)

11/04 . the flow being effected by deformation of container for liquid or other fluent material

11/041 . (designed for spraying particulate material B05B 11/045 takes precedence)

11/042 . (the spray being effected by a gas or vapour flow in the nozzle, spray head, outlet or dip tube)

11/043 . (designed for spraying a liquid B05B 11/046 takes precedence)

11/045 . (designed for spraying particulate material B05B 11/046 takes precedence)

11/046 . (the gas or vapour flow coming from a source where the gas or vapour is not in contact with the liquid or other fluent material to be sprayed, e.g. from a compressive bulb, an air pump or an enclosure surrounding the container)

11/047 . (characterised by the outlet or venting means B05B 11/041 and B05B 11/042 take precedence)

11/048 . (characterised by the container, e.g. this latter being surrounded by an enclosure, or the means for deforming it B05B 11/041, B05B 11/046 take precedence)

11/06 . the spray being effected by a gas or vapour flow {from a source where the gas or vapour is not in contact with the liquid or other fluent material to be sprayed}, e.g. from a compressive bulb, an air pump or an enclosure surrounding the container B05B 11/046 and B05B 11/3087 take precedence)

11/061 . (characterised by the means producing the gas or vapour pressure)

11/062 . (designed for spraying particulate material)

11/064 . (the particulate material being stored in several discrete quantities delivered one at a time)

11/065 . (the particulate material being separated from a main storage in discrete quantities delivered one at a time)

11/067 . (the particulate material being separated from the main storage by a dosing device)

11/068 . (comprising a liquid-absorbent material)

11/30 . (the flow being effected by a pump)
Components or details

11/3032 . . . [actuated without substantial movement of the nozzle in the direction of the pressure stroke (B05B 11/303 takes precedence)]
11/3033 . . . [the deformable wall, the inlet and outlet valve elements being integrally formed, e.g. moulded]
11/3035 . . . [the pumping chamber being a bellow]
11/3036 . . . [the outlet valve being opened in the direction opposite to the fluid flow downstream the outlet valve by the pressure acting on a valve controlling element]

**WARNING**

Group B05B 11/3036 is incomplete pending reclassification of documents from B05B 11/0067.

Groups B05B 11/0067 and B05B 11/3036 should be considered to perform a complete search.

11/3038 . . . [Pressure accumulation pumps, i.e. pumps comprising a pressure accumulation chamber]
11/3039 . . . [the outlet valve being mechanically opened after a defined accumulation stroke]
11/304 . . . [the outlet valve being opened by pressure after a defined accumulation stroke]
11/3042 . . . [Components or details]
11/3043 . . . [Sealing or attachment arrangements between pump and container (sealing arrangements around pump actuating stem B05B 11/305)]
11/3045 . . . [the pump being preassembled as an independent unit before being mounted on the container (B05B 11/3047, B05B 11/3049 take precedence)]
11/3046 . . . [the pump chamber being arranged substantially coaxially to the neck of the container (B05B 11/3049 takes precedence)]
11/3047 . . . [the pump being preassembled as an independent unit before being mounted on the container]
11/3049 . . . [Attachment arrangements comprising a deformable or resilient ferrule clamped or locked onto the neck of the container by displacing, e.g. sliding, a sleeve surrounding the ferrule]
11/305 . . . [Sealing arrangements around pump actuating stem]
11/3052 . . . [Actuation means (locking means therefor B05B 11/3059; B05B 11/309 takes precedence)]
11/3053 . . . [combined with means, other than pressure, for automatically opening a valve during actuation; combined with means for automatically removing closures or covers from the discharge nozzle during actuation]
11/3054 . . . [the valve being located upstream of an outlet valve]
11/3056 . . . [comprising rotatable or articulated levers (lever actuated piston pumps B05B 11/3009, lever actuated pumps with deformable chamber B05B 11/3029; B05B 11/3053 take precedence)]

11/3057 . . . [Triggers, i.e. actuation means consisting of a single lever having one end rotating or pivoting around an axis or a hinge fixedly attached to the container, and another end directly actuated by the user]
11/3059 . . . [Means for locking a pump or its actuation means in a fixed position (B05B 11/3091 takes precedence)]
11/306 . . . [in a retracted position, e.g. in an end-of-dispensing-stroke position]
11/3061 . . . [Pump priming means]
11/3063 . . . [Air exhausted from the pump chamber being discharged into the container during priming]
11/3064 . . . [Pump inlet and outlet valve elements integrally formed of a deformable material (pump chambers having a deformable wall integrally formed with inlet and outlet valve elements B05B 11/3033)]
11/3066 . . . [Pump inlet valves (B05B 11/3018, B05B 11/3019, B05B 11/3064 take precedence)]
11/3067 . . . [actuated by pressure]
11/3069 . . . [the valve being made of a resiliently deformable material or being urged in a closed position by a spring]
11/307 . . . [Gate valves; Sliding valves]
11/3071 . . . [Two inlet valves being placed in a supply conduit one upstream of the other]
11/3073 . . . [Springs]
11/3074 . . . [located outside pump chambers]
11/3076 . . . [Traction springs, e.g. stretchable sleeve]
11/3077 . . . [characterized by a particular shape or material (B05B 11/3076 takes precedence)]
11/3078 . . . [Vacuum chambers acting like springs]
11/308 . . . [Means for counting the number of dispensing strokes]
11/3081 . . . [Arrangements for pumping several liquids or other fluent materials from several containers, e.g. for mixing them at the moment of pumping]
11/3083 . . . [in adjustable proportion]
11/3084 . . . [each liquid or other fluent material being pumped by a separate pump]
11/3085 . . . [the pumps being coaxial]
11/3087 . . . [Combination of liquid and air pumps]
11/3088 . . . [the pump being a double-acting pump]
11/309 . . . [the dispensing stroke being effected by the stored energy of a spring (B05B 11/3088 takes precedence)]
11/3091 . . . [being first hold in a loaded state by locking means or the like, then released (B05B 11/3092 takes precedence)]
11/3092 . . . [automatically released from a loaded state at the end of the loading stroke]
11/3094 . . . [having inlet or outlet valves not being actuated by pressure or having no inlet or outlet valve]
11/3095 . . . [with movable suction side]
11/3097 . . . [with means for sucking back the liquid or other fluent material in the nozzle after a dispensing stroke]
11/3098 . . . [Air being permanently entrapped or sucked into the liquid pump chamber]
Arrangements for controlling delivery;
Arrangements for controlling the spray area

**WARNING**

Group B05B 12/00 is impacted by reclassification into groups B05B 12/16, B05B 12/18, B05B 12/20, B05B 12/22, B05B 12/24, B05B 12/26, B05B 12/28, B05B 12/30, B05B 12/32, B05B 12/34, B05B 12/36.

All groups listed in this Warning should be considered in order to perform a complete search.

12/002 . . . (Manually-actuated controlling means, e.g. push buttons, levers or triggers (for single units B05B 11/00))

**WARNING**

Group B05B 12/002 is impacted by reclassification into groups B05B 12/0022, B05B 12/0024, B05B 12/0026.

All groups listed in this Warning should be considered to perform a complete search.

12/0022 . . . (associated with means for restricting their movement)

**WARNING**

Groups B05B 12/0022, B05B 12/0024, B05B 12/0026 are incomplete pending reclassification of documents from group B05B 12/002.

All groups listed in this Warning should be considered to perform a complete search.

12/0024 . . . [to a single position]
12/0026 . . . . [to inhibit delivery]
12/004 . . . (comprising sensors for monitoring the delivery, e.g. by displaying the sensed value or generating an alarm (B05B 12/08 takes precedence; registering or indicating the condition or the working of machines or other apparatus in general G07C 3/00))
12/006 . . . [Pressure or flow rate sensors]
12/008 . . . . [integrated in or attached to a discharge apparatus, e.g. a spray gun]
12/02 . . for controlling time, or sequence, of delivery
12/04 . . . for sequential operation or multiple outlets
12/06 . . . for effecting pulsating flow (nozzles, spray head or outlet with means for generating a discharge of pulsating nature B05B 1/08)
12/08 . responsive to condition of liquid or other fluent material [to be] discharged, of ambient medium or of target {} responsive to condition of spray devices or of supply means, e.g. pipes, pumps or their drive means)
12/081 . . . [responsive to the weight of a reservoir or container for liquid or other fluent material; responsive to level or volume of liquid or other fluent material in a reservoir or container]
12/082 . . . [responsive to a condition of the discharged jet or spray, e.g. to jet shape, spray pattern or droplet size]
12/084 . . . [responsive to condition of liquid or other fluent material already sprayed on the target, e.g. coating thickness, weight or pattern]

12/085 . . . [responsive to flow or pressure of liquid or other fluent material to be discharged (B05B 1/3006, B05B 1/323, B05B 7/1254 takes precedence)]
12/087 . . . . [Flow or pressure regulators, i.e. non-electric unitary devices comprising a sensing element, e.g. a piston or a membrane, and a controlling element, e.g. a valve]
12/088 . . . . [the sensing element being a flexible member, e.g. membrane, diaphragm, bellows]
12/10 . . . responsive to temperature or viscosity of liquid or other fluent material discharged
12/12 . . . responsive to conditions of ambient medium or target, e.g. humidity, temperature [position or movement of the target relative to the spray apparatus (B05B 12/082, B05B 12/084 takes precedence)]
12/122 . . . . [responsive to presence or shape of target (B05B 12/124 takes precedence)]
12/124 . . . . [responsive to distance between spray apparatus and target]
12/126 . . . . [responsive to target velocity, e.g. to relative velocity between spray apparatus and target (B05B 9/06 takes precedence)]
12/14 . . for supplying a selected one of a plurality of liquids or other fluent materials [or several in selected proportions] to a [spray apparatus, e.g. to a] single spray outlet
12/1409 . . . [the selection means being part of the discharge apparatus, e.g. part of the spray gun]
12/1418 . . . [for supplying several liquids or other fluent materials in selected proportions to a single spray outlet (controlling ratio of two or more flows of fluid G05D 11/02)]
12/1427 . . . . [a condition of a first liquid or other fluent material in a first supply line controlling a condition of a second one in a second supply line]
12/1436 . . . . . [the controlling condition of the first liquid or other fluent material in the first supply line being its flow rate or its pressure]
12/1445 . . . . [pumping means for the liquids or other fluent materials being mechanically linked, e.g. master and slave pumps]
12/1454 . . . . [separate units comprising both a material container and a spray device permanently connected thereto being removably attached to a part of the spray apparatus, e.g. to a robot arm]
12/1463 . . . . . [separate containers for different materials to be sprayed being moved from a first location, e.g. a filling station, where they are fluidically disconnected from the spraying apparatus, to a second location, generally close to the spraying apparatus, where they are fluidically connected to the latter (B05B 12/1454 takes precedence)]
12/1472 . . . . [separate supply lines supplying different materials to separate outlets of the spraying apparatus (B05B 12/1454 takes precedence)]
12/1481 . . . . [comprising pigs, i.e. movable elements scalpingly received in supply pipes, for separating different fluids, e.g. liquid coating materials from solvent or air (cleaning pipes with pigs B05B 9/0557, pigs per se F16L 55/26)]
12/149 . .  (characterised by colour change manifolds or valves therefor (B05B 12/1409 takes precedence))

12/16 . .  for controlling the spray area (B05B 3/00 takes precedence)

**WARNING**

Group B05B 12/16 is incomplete pending reclassification of documents from group B05B 12/00. Group B05B 12/16 is also impacted by reclassification into group B05B 12/32.

Groups B05B 12/00, B05B 12/16, and B05B 12/32 should be considered in order to perform a complete search.

12/18 . .  using fluids, e.g. gas streams

**WARNING**

Group B05B 12/18 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/18 should be considered in order to perform a complete search.

12/20 . .  Masking elements, i.e. elements defining uncoated areas on an object to be coated

**WARNING**

Group B05B 12/20 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/20 should be considered in order to perform a complete search.

12/22 . .  movable relative to the spray area

**WARNING**

Group B05B 12/22 is incomplete pending reclassification of documents from group B05B 12/00. Group B05B 12/22 is also impacted by reclassification into group B05B 12/34.

Groups B05B 12/00, B05B 12/22, and B05B 12/34 should be considered in order to perform a complete search.

12/24 . .  made at least partly of flexible material, e.g. sheets of paper or fabric

**WARNING**

Group B05B 12/24 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/24 should be considered in order to perform a complete search.

12/26 . .  for masking cavities

**WARNING**

Group B05B 12/26 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/26 should be considered in order to perform a complete search.

12/28 . .  [between a door and a post, e.g. foam strips]

**WARNING**

Group B05B 12/28 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/28 should be considered in order to perform a complete search.

12/29 . .  [with adjustable size]

12/30 . .  specially adapted for vehicle wheels

**WARNING**

Group B05B 12/30 is incomplete pending reclassification of documents from group B05B 12/00.

Groups B05B 12/00 and B05B 12/30 should be considered in order to perform a complete search.

12/32 . .  Shielding elements, i.e. elements preventing overspray from reaching areas other than the object to be sprayed (nozzles with integral shielding elements B05B 1/28)

**WARNING**

Group B05B 12/32 is incomplete pending reclassification of documents from groups B05B 12/00 and B05B 12/16.

Groups B05B 12/00, B05B 12/16, and B05B 12/32 should be considered in order to perform a complete search.

12/34 . .  movable relative to the spray area

**WARNING**

Group B05B 12/34 is incomplete pending reclassification of documents from groups B05B 12/00 and B05B 12/22.

Groups B05B 12/00, B05B 12/22, and B05B 12/34 should be considered in order to perform a complete search.
12/36 . . . Side shields, i.e. shields extending in a
direction substantially parallel to the spray jet

**WARNING**

Group B05B 12/36 is incomplete pending
reclassification of documents from group
B05B 12/00.

Groups B05B 12/00 and B05B 12/36
should be considered in order to perform a
complete search.

12/40 . . . {Devices for making a normally hidden area
accessible for the spray material}

13/00 **Machines or plants for applying liquids or
other fluent materials to surfaces of objects or
other work by spraying, not covered by groups
B05B 1/00 - B05B 11/00 (B05B 5/08 takes
precedence); means for supplying or discharging
liquid or other fluent material for this purpose; see
the relevant preceding groups; processes for applying
liquids or other fluent materials to surfaces in general
B05D}

13/005 . . . {mounted on vehicles or designed to apply a liquid
on a very large surface, e.g. on the road, on the
surface of large containers}

13/02 . . . Means for supporting work; Arrangement
or mounting of spray heads; Adaptation
or arrangement of means for feeding work
(B05B 13/06 takes precedence)

13/0207 . . . {the work being an elongated body, e.g. wire
or pipe (B05B 13/0436, B05B 13/0463 take
precedence)}

13/0214 . . . {the liquid or other fluent material being
applied to the whole periphery of the cross
section of the elongated body}

13/0221 . . . {characterised by the means for moving or
conveying the objects or other work, e.g.
conveyor belts (B05B 13/0207 takes precedence;
conveyors in general B65C)}

13/0228 . . . {the movement of the objects being rotative
(B05B 13/0242 takes precedence)}

13/0235 . . . {the movement of the objects being a
combination of rotation and linear displacement
(B05B 13/0242 takes precedence)}

13/0242 . . . {the objects being individually presented to
the spray heads by a rotating element, e.g.
turntable}

13/025 . . . {the objects or work being present in bulk}

13/0257 . . . {in a moving container, e.g. a rotatable
foraminous drum}

13/0264 . . . {Overhead conveying means, i.e. the object
or other work being suspended from the
conveying means; Details thereof, e.g. hanging
hooks}

13/0271 . . . {the object or work standing still during the
spraying operation}

13/0278 . . . {Arrangement or mounting of spray heads
(B05B 13/0207 takes precedence)}

13/0285 . . . {Stands for supporting individual articles to be
sprayed, e.g. doors, vehicle body parts}

13/0292 . . . {devices for holding several workpieces to be
sprayed in a spaced relationship, e.g. vehicle
doors spacers}

13/04 . . . {the spray heads being moved during {spraying} operation

13/0405 . . . {with reciprocating or oscillating spray heads
(B05B 13/0436, B05B 13/0442, B05B 13/0447,
B05B 13/0468 take precedence)}

13/041 . . . . . . {with spray heads reciprocating along a
straight line}

13/0415 . . . . . . {the angular position of the spray heads
relative to the straight line being modified
during the reciprocating movement}

13/0421 . . . . . . {with rotating spray heads}

13/0426 . . . . . . {with spray heads moved along a closed path
(B05B 13/0421 takes precedence)}

13/0431 . . . . . . {with spray heads moved by robots or
articulated arms, e.g. for applying liquid
or other fluent material to 3D-surfaces
(B05B 13/0436, B05B 13/0442, B05B 13/0447,
B05B 13/0463 take precedence)}

13/0436 . . . . . . {Installations or apparatus for applying
liquid or other fluent material to elongated
bodies, e.g. light poles, pipes (B05B 13/0442,
B05B 13/0463 take precedence)}

13/0442 . . . . . . {Installation or apparatus for applying liquid or
other fluent material to separate articles rotated
during spraying operation}

13/0447 . . . . . . {Installation or apparatus for applying liquid
or other fluent material to conveyed separate
articles (B05B 13/0442 takes precedence)}

13/0452 . . . . . . {the conveyed articles being vehicle bodies}

13/0457 . . . . . . {specially designed for applying liquid or
other fluent material to 3D-surfaces of the
articles, e.g. by using several moving spray
heads (B05B 13/0452 takes precedence)}

13/0463 . . . . . . {Installation or apparatus for applying liquid
or other fluent material to moving work of
indefinite length}

13/0468 . . . . . . {with reciprocating or oscillating spray
heads}

13/0473 . . . . . . {with spray heads reciprocating along a
straight line}

13/0478 . . . . . . {the angular position of the spray
heads relative to the straight line being
modified during the reciprocating
movement}

13/0484 . . . . . . {with spray heads having a circular motion,
e.g. being attached to a rotating supporting
element (B05B 13/0468 takes precedence)}

13/0489 . . . . . . {around the moving work}

13/0494 . . . . . . {with spray heads being moved along
a closed path (B05B 13/0484 takes precedence)}

13/06 . . . {specially designed for treating the inside of hollow
bodies (spray heads B05B 1/00 - B05B 7/00;
{devices for covering leaks in pipes or hoses, e.g.
hose-menders, from inside the pipe F16L 55/162;
{sprayed layers of rubber or plastics for internal
protection of pipes or pipe fittings against corrosion
or incrustation F16L 58/1027)}

13/0609 . . . . . . {the hollow bodies being automatically fed to, or
removed from, the machine}

13/0618 . . . . . . {only a part of the inside of the hollow bodies
being treated}

13/0627 . {Arrangements of nozzles or spray heads
specially adapted for treating the inside of hollow
bodies (B05B 13/0645 takes precedence)}

13/0636 . . . . . . {by means of rotatable spray heads or nozzles}
Arrangements for collecting, re-using or eliminating excess spraying material (arrangements integral with nozzles B05B 1/28)

14/18  the excess material being particulate (for spray booths B05B 14/48)
14/20  from moving belts, e.g. filtering belts or conveying belts
14/30  comprising enclosures close to, or in contact with, the object to be sprayed and surrounding or confining the discharged spray or jet but not the object to be sprayed
14/40  for use in spray booths
14/41  by cleaning the walls of the booth
14/412  wherein the walls of the booth is perforated or porous walls and the walls are cleaned of or prevented from being contacted with excess material by a flow of fluid, e.g. air or water, directed into the booth
14/42  using electrostatic means
14/43  by filtering the air charged with excess material
14/435  with means for cleaning the filters by gas flow, e.g. blasts of air
14/437  with means for introducing solid material into the air charged with excess material for preventing clogging of the filter
14/44  using walls specially adapted for promoting separation of the excess material from the air, e.g. baffle plates (using wetted walls B05B 14/465)
14/45  using cyclone separators
14/46  by washing the air charged with excess material
14/462  and separating the excess material from the washing liquid, e.g. for recovery
14/463  by means of ultrafiltration
14/465  using substantially vertical liquid curtains or wetted walls behind the object to be sprayed
14/468  with scrubbing means arranged below the booth floor
14/469  wherein the washing material is the spraying material
14/48  specially adapted for particulate material
14/49  specially adapted for solvents

Details of spraying plant or spraying apparatus not otherwise provided for; Accessories

WARNING
Group B05B 15/00 is impacted by reclassification into groups B05B 15/14 and B05B 15/18.
Groups B05B 15/00, B05B 15/14, and B05B 15/18 should be considered in order to perform a complete search.

Arrangements for preventing or controlling structural damage to spraying apparatus or its outlets, e.g. for breaking at desired places;
Arrangements for handling or replacing damaged parts

WARNING
Group B05B 15/14 is incomplete pending reclassification of documents from group B05B 15/00.
Groups B05B 15/00 and B05B 15/14 should be considered in order to perform a complete search.

for preventing non-intended contact between spray heads or nozzles and foreign bodies, e.g. nozzle guards

Improving resistance to wear, e.g. inserts or coatings; for indicating wear; for handling or replacing worn parts

WARNING
Group B05B 15/18 is incomplete pending reclassification of documents from group B05B 15/00.
Groups B05B 15/00 and B05B 15/18 should be considered in order to perform a complete search.

Arrangements for agitating the material to be sprayed, e.g. for stirring, mixing or homogenising

using moving elements, e.g. rotating blades

Dip tubes

Weighted

with decorative elements

Filters located upstream of the spraying outlets

Arrangements for cleaning; Arrangements for preventing deposits, drying-out or blockage;
Arrangements for detecting improper discharge caused by the presence of foreign matter

WARNING
Group B05B 15/50 is impacted by reclassification into group B05B 15/58.
Groups B05B 15/50 and B05B 15/58 should be considered in order to perform a complete search.

for removal of clogging particles

using cleaning elements penetrating the discharge openings

([the cleaning element, e.g. a needle, and the discharge opening being movable relative to each other in a direction substantially parallel to the flow of liquid or other fluent material through said opening]
15/525 . . . . {the cleaning element being located upstream of the discharge opening or being actuated upstream therefrom}
15/525 . . . by increasing the cross section of the discharge openings
15/528 . . . by resilient deformation of the nozzle
15/531 . . . using backflow
15/534 . . . by reversing the nozzle relative to the supply conduit
15/55 . . using cleaning fluids
15/555 . . discharged by cleaning nozzles
15/557 . . . {the cleaning fluid being a mixture of gas and liquid}
15/58 . . preventing deposits, drying-out or blockage by recirculating the fluid to be sprayed from upstream of the discharge opening back to the supplying means ((B05B 1/3093 takes precedence))

**WARNING**

Group B05B 15/58 is incomplete pending reclassification of documents from group B05B 15/50.

Groups B05B 15/50 and B05B 15/58 should be considered in order to perform a complete search.

15/60 . . Arrangements for mounting, supporting or holding spraying apparatus

**WARNING**

Group B05B 15/60 is impacted by reclassification into group B05B 15/63.

Groups B05B 15/60 and B05B 15/63 should be considered in order to perform a complete search.

15/62 . . Arrangements for supporting spraying apparatus, e.g. suction cups
15/622 . . ground-penetrating
15/625 . . designed to be placed on the ground
15/628 . . of variable length
15/63 . . Handgrips

**WARNING**

Group B05B 15/63 is incomplete pending reclassification of documents from group B05B 15/60.

Groups B05B 15/60 and B05B 15/63 should be considered in order to perform a complete search.

15/65 . . Mounting arrangements for fluid connection of the spraying apparatus or its outlets to flow conduits
15/652 . . . where the jet can be oriented
15/654 . . . using universal joints
15/656 . . . where the flow conduit length is changeable
15/658 . . . the spraying apparatus or its outlet axis being perpendicular to the flow conduit
15/68 . . Arrangements for adjusting the position of spray heads (B05B 15/628, B05B 15/652, B05B 15/656 take precedence)

15/70 . . Arrangements for moving spray heads automatically to or from the working position

**WARNING**

Group B05B 15/70 is impacted by reclassification into groups B05B 15/72 and B05B 15/74.

Groups B05B 15/70, B05B 15/72, and B05B 15/74 should be considered in order to perform a complete search.

15/72 . . . using hydraulic or pneumatic means

**WARNING**

Group B05B 15/72 is incomplete pending reclassification of documents from group B05B 15/70.

Groups B05B 15/70 and B05B 15/72 should be considered in order to perform a complete search.

15/74 . . . driven by the discharged fluid

**WARNING**

Group B05B 15/74 is incomplete pending reclassification of documents from group B05B 15/70.

Groups B05B 15/70 and B05B 15/74 should be considered in order to perform a complete search.

15/80 . . Arrangements in which the spray area is not enclosed, e.g. spray tables

16/00 Spray booths (arrangements for collecting, re-using or eliminating excess spraying material in spray booths B05B 14/40)

16/20 . . Arrangements for spraying in combination with other operations, e.g. drying; Arrangements enabling a combination of spraying operations

16/25 . . for both automatic and manual spraying
16/40 . . Construction elements specially adapted therefor, e.g. floors, walls or ceilings (ceiling elements filtering inflow of air into the booth B05B 16/60; walls specially adapted for promoting separation of excess material B05B 14/44)

16/405 . . . {Partly or totally cylindrical walls; Round floors}
16/60 . . Ventilation arrangements specially adapted therefor
16/80 . . Movable spray booths
16/90 . . {comprising conveying means for moving objects or other work to be sprayed in and out of the booth, e.g. through the booth}

16/95 . . . {the objects or other work to be sprayed lying on, or being held above the conveying means, i.e. not hanging from the conveying means}

17/00 Apparatus for spraying or atomising liquids or other fluent materials, not covered by the preceding groups (dropping or releasing powdered, liquid or gaseous matter in flight B64D 1/16)

17/04 . . operating with special methods
17/06 . . using ultrasonic {or other kinds of} vibrations
17/0607 . . . {generated by electrical means, e.g. piezoelectric transducers}

17/0615 . . . {spray being produced at the free surface of the liquid or other fluent material in a container and subjected to the vibrations}
17/0623 . . . . {coupled with a vibrating horn}
17/063 . . . . . {having an internal channel for supplying the liquid or other fluent material}
17/0638 . . . . {spray being produced by discharging the liquid or other fluent material through a plate comprising a plurality of orifices}
17/0646 . . . . . {Vibrating plates, i.e. plates being directly subjected to the vibrations, e.g. having a piezoelectric transducer attached thereto}
17/0653 . . . . . {Details}
17/0661 . . . . . {Transducer materials}
17/0669 . . . . . {Excitation frequencies}
17/0676 . . . . . {Feeding means}
17/0684 . . . . . {Wicks or the like}
17/0692 . . . . {generated by a fluid (B05B 17/0607 takes precedence)}
17/08 . . . . . Fountains (drinking fountains E03B 9/00; wash fountains E03C 1/16)
17/085 . . . . {designed to produce sheets or curtains of liquid, e.g. water walls}
