# **CPC** COOPERATIVE PATENT CLASSIFICATION

# **B PERFORMING OPERATIONS; TRANSPORTING**

(NOTES omitted)

# <u>SHAPING</u>

# B29 WORKING OF PLASTICS; WORKING OF SUBSTANCES IN A PLASTIC STATE IN GENERAL

(NOTES omitted)

# B29C SHAPING OR JOINING OF PLASTICS; SHAPING OF MATERIAL IN A PLASTIC STATE, NOT OTHERWISE PROVIDED FOR; AFTER-TREATMENT OF THE SHAPED PRODUCTS, e.g. REPAIRING (making preforms <u>B29B 11/00</u>; making laminated

products by combining previously unconnected layers which become one product whose layers will remain together <u>B32B 37/00</u> - <u>B32B 41/00</u>)

# NOTES

- 1. This subclass covers:
  - shaping or joining of plastics;
  - shaping of material in a plastic state when a specific material is not identified;
  - shaping of material in a plastic state, not otherwise provided for.
- 2. This subclass does not cover:
  - working of plastics sheet material in a manner analogous to the working of paper, which is covered by class <u>B31</u>;
  - shaping of materials provided for elsewhere, e.g. of metal, clay or foodstuffs.
- 3. Attention is drawn to Note (3) following the title of class  $\underline{B29}$ .
- 4. In this subclass:
  - repairing of articles made from plastics or materials in a plastic state, e.g. of articles shaped or produced by using techniques covered by this subclass or subclass <u>B29D</u>, is classified in group <u>B29C 73/00</u>;
  - component parts, details, accessories or auxiliary operations which are applicable to more than one moulding technique are classified in groups <u>B29C 31/00</u> <u>B29C 37/00</u>;
  - component parts, details, accessories or auxiliary operations which are only applicable or only of use for one specific shaping technique are classified only in the relevant subgroups of groups <u>B29C 39/00-B29C 71/00</u>.
- 5. In this subclass, it is desirable to add the indexing codes of subclasses  $\underline{B29K}$  and  $\underline{B29L}$ .

# WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

# Component parts, details or accessories; Auxiliary operations NOTE {Attention is drawn to Note (4) following the subclass title.} 31/00 Handling, e.g. feeding of the material to be shaped {, storage of plastics material before moulding; Automation, i.e. automated handling lines in plastics processing plants, e.g. using manipulators or robots (discharging moulded articles from the mould B29C 37/0003; storage of prepregs or SMC after impregnation or during ageing B29C 70/54; baling of rubber B29B 15/02)} 21/002 (Handling tubes a g transforming between shaping

- 31/002 {Handling tubes, e.g. transferring between shaping stations, loading on mandrels}
- 31/004 (Arrangements for converting the motion of a material which is continuously fed to a working station in a stepwise motion)
- 31/006 {Handling moulds, e.g. between a mould store and a moulding machine (movable moulds <u>B29C 33/34</u>; for injection moulding <u>B29C 45/1756</u>)}

31/008	• {Handling preformed parts, e.g. inserts
	(B29C 37/001 takes precedence; for injection
	moulding <u>B29C 45/14008;</u> for blow moulding
	<u>B29C 49/2408;</u> for thermoforming <u>B29C 51/165</u> )}

- Dispensing from vessels, e.g. hoppers {(into a mould cavity <u>B29C 31/04;</u> large containers characterised by discharge means <u>B65D 88/28</u>, <u>B65D 88/54</u>)}
- Feeding {of the material to be moulded}, e.g. into a mould cavity {(<u>B29C 39/08</u> takes precedence; using a material distribution system to two or more fixed injection moulds <u>B29C 45/125</u>)}
- 31/041 . {using filling or dispensing heads placed in closed moulds or in contact with mould walls (<u>B29C 45/27</u> takes precedence)}
- 31/042 . {using dispensing heads, e.g. extruders, placed over or apart from the moulds (positioning extruded preforms on conveyors <u>B29C 31/085</u>)}
- 31/044 . . . {with moving heads for distributing liquid or viscous material into the moulds}

31/045	•••• {moving along predetermined circuits or distributing the material according to predetermined patterns}
31/047	<ul> <li>. {combined with moving moulds (<u>B29C 31/044</u>, <u>B29C 31/048</u> take precedence)}</li> </ul>
31/048	<ul> <li>• { the material being severed at the dispensing head exit, e.g. as ring, drop or gob, and transported immediately into the mould, e.g. by gravity}</li> </ul>
31/06	<ul> <li>in measured doses {, e.g. by weighting (feeding mixers with measured doses <u>B01F 35/714</u>, <u>B01F 35/882</u>, <u>B29B 7/24</u>, <u>B29B 7/603</u>)}</li> </ul>
31/061	• • { using stationary volumetric measuring chambers }
31/063	• • • • {of the piston type}
31/065	• • { using volumetric measuring chambers moving between a charging station and a discharge station }
31/066 31/068	<ul><li> {using feed frames, e.g. for dry material}</li><li> {of the piston type}</li></ul>
31/08	<ul> <li>of preforms {to be moulded, e.g. tablets, fibre reinforced preforms, extruded ribbons, tubes or profiles; Manipulating means specially adapted for feeding preforms, e.g. supports conveyors (B29C 31/066, B29C 37/001, B29C 43/085 take precedence)}</li> </ul>
	NOTE
	Documents describing feeding preforms, e.g. parisons, tubes, sheets in connection with shaping techniques described in groups <u>B29C 49/00</u> - <u>B29C 65/00</u> are not classified in group <u>B29C 31/08</u> , but in the relevant groups of these techniques
31/085	<ul> <li>• {combined with positioning the preforms according to predetermined patterns, e.g. positioning extruded preforms on conveyors (<u>B29C 70/30</u> takes precedence; for building tyres <u>B29D 30/08</u>)}</li> </ul>
31/10	• • of several materials
33/00	Moulds or cores; Details thereof or accessories therefor
2033/0005	• {with transparent parts, e.g. permitting visual inspection of the interior of the cavity}
33/0011	• {thin-walled moulds}
33/0016	<ul> <li>{Lost moulds, e.g. staying on the moulded object (flexible bags without particular shape filled with expandable material <u>B29C 44/182</u>; single use mandrels for winding and forming <u>B29C 53/822</u>)}</li> </ul>
33/0022	• {Multi-cavity moulds ( <u>B29C 33/301</u> takes precedence)}
33/0027	<ul> <li>{with deep narrow cavities, e.g. for making piles (non-woven pile fabrics <u>D04H 11/00</u>)}</li> </ul>
33/0033	<ul> <li>{constructed for making articles provided with holes}</li> </ul>
	NOTE
	If the hole is made by cutting means associated with the mould, see the relevant moulding technique

33/0038	• {with sealing means or the like (seals on envelopes
	used in tyre retreading <u>B29D 30/542;</u> for injection
	moulding footwear <u>B29D 35/0045</u> )}
33/0044	• • {for sealing off parts of inserts projecting into the
	mould cavity}
33/005	• {characterised by the location of the parting line of
<b>22</b> (00 <b>2 2</b>	the mould parts}
33/0055	• {with incorporated overflow cavities (in particular
22/00/1	in injection moulds <u>B29C 45/2669</u> )}
33/0061	• {characterised by the configuration of the material
	feeding channel (sprue channels for injection moulding <u>B29C 45/27</u> )}
33/0066	• {with a subdivided channel for feeding the
33/0000	material to a plurality of locations}
33/0072	<ul> <li>• {with a configuration promoting turbulency, e.g.</li> </ul>
33/0072	for after-mixing in the mould}
33/0077	• {characterised by the configuration of the mould
33/00/1	filling gate (mixing chambers situated in the mould
	opening <u>B29B 7/7471</u> ); accessories for connecting
	the mould filling gate with the filling spout}
33/0083	• {Electrical or fluid connection systems therefor}
33/0088	• {Multi-face stack moulds}
2033/0094	• {Means for masking a part of the moulding surface}
33/02	• with incorporated heating or cooling means
2033/023	• • {Thermal insulation of moulds or mould parts}
33/026	• {in rolls, calenders or drums}
33/04	• • using liquids, gas or steam {(tyre moulds with
	incorporated heating or cooling means using
	liquids, gas or steam <u>B29D 30/0601</u> )}
2033/042	• • • {Meander or zig-zag shaped cooling channels,
	i.e. continuous cooling channels whereby
	a plurality of cooling channel sections are
<b>22</b> /2.1.1	oriented in a substantial parallel direction}
33/044	<ul><li>oriented in a substantial parallel direction}</li><li> {in rolls calenders or drums}</li></ul>

33/303	<ul> <li>{centering mould parts or halves, e.g. during mounting}</li> </ul>
33/304	• • {centering cores}
33/305	• • {Mounting of moulds or mould support plates (handling of moulds <u>B29C 31/006;</u> mounting of moulds for injection moulding <u>B29C 45/1742</u> )}
33/306	• • {Exchangeable mould parts, e.g. cassette moulds, mould inserts (moulds with exchangeable mould parts for injection moulding <u>B29C 45/2673;</u>
22/207	mounting of exchangeable mould inserts for injection moulding <u>B29C 45/2675</u> )}
33/307	<ul> <li>{Mould plates mounted on frames; Mounting the mould plates; Frame constructions therefor (shaping plates for making moulds <u>B29C 33/3842</u>; thin walled moulds <u>B29C 33/0011</u>)}</li> </ul>
33/308	<ul> <li>{Adjustable moulds (for injection moulding B29C 45/376)}</li> </ul>
33/32	• using magnetic means
33/34	• movable, e.g. to or from the moulding station
33/36	<ul> <li>continuously movable {in one direction, e.g. in a closed circuit (<u>B29C 49/0021</u> takes precedence)}</li> </ul>
33/38	<ul> <li>characterised by the material or the manufacturing process (<u>B29C 33/44</u> takes precedence)</li> </ul>
33/3807	• • {Resin-bonded materials, e.g. inorganic particles}
33/3814	• • {Porous moulds (adapted for vacuum forming <u>B29C 51/365</u> )}
33/3821	• • {composed of particles enclosed in a bag}
33/3828	• • {Moulds made of at least two different materials having different thermal conductivities}
33/3835	• • {Designing moulds, e.g. using CAD-CAM}
33/3842	• {Manufacturing moulds, e.g. shaping the mould surface by machining}
2033/385	• • • {by laminating a plurality of layers (moulds
	built up by stacking mould elements, e.g. plates, blocks, rods, in general <u>B29C 33/301</u> , tyre moulds made of a plurality of laminations <u>B29D 2030/0609</u> }
33/3857	• • {by making impressions of one or more parts of models, e.g. shaped articles and including possible subsequent assembly of the parts}
2033/3864	{Spraying at least one layer to create the mould}
2033/3871	• • • {the models being organic material, e.g. living or dead bodies or parts thereof}
33/3878	• • • • {used as masters for making successive impressions}
33/3885	• • • • { the mould parts being co-operating impressions }
33/3892	• • • {Preparation of the model, e.g. by assembling parts}
33/40	• Plastics, e.g. foam or rubber
33/405	• • {Elastomers, e.g. rubber ( <u>B29C 33/50</u> takes precedence)}
33/42	• characterised by the shape of the moulding surface, e.g. ribs or grooves

2033/422	• • {Moulding surfaces provided with a shape to
	promote flow of material in the mould cavity}
33/424	• • {Moulding surfaces provided with means for
	marking or patterning (for injection moulding
	<u>B29C 45/372</u> )}
2033/426	• • • {Stampers}
33/428	• • For altering indicia, e.g. data, numbers (for
	injection moulding <u>B29C 45/374</u> )}
33/44	• with means for, or specially constructed to facilitate,
	the removal of articles, e.g. of undercut articles
33/442	• • {with mechanical ejector or drive means therefor}
33/444	• • • {for stripping articles from a mould core, e.g.
	using stripper plates }
33/446	• • • • {and using a rotating movement to unscrew
	articles (in particular in injection moulds
	<u>B29C 45/262</u> )}
33/448	• {destructible ( <u>B29C 33/52</u> takes precedence;
	in particular used in injection moulding
	<u>B29C 45/4457</u> )}
33/46	• • using fluid pressure
33/48	• • with means for collapsing or disassembling
33/485	• • • {cores or mandrels (collapsible mandrels
	for shaping tube ends <u>B29C 57/02;</u>
	collapsible mandrels for winding and joining
	<u>B29C 53/824</u> )}
33/50	• • • elastic {or flexible (for isostatic pressing
	<u>B29C 43/3642</u> )}
33/505	• • • { cores or mandrels, e.g. inflatable
	(B29C 33/0016 takes precedence; for
	winding and joining <u>B29C 53/824;</u>
	for supporting articles during joining
	<u>B29C 66/634;</u> flexible cores for vulcanizing
	tyres <u>B29D 30/0654</u> )}
33/52	• soluble or fusible {(in particular used in injection
	moulding <u>B29C 45/4457</u> )}
2033/525	• • • {Cores made of frozen liquids, e.g. ice}
33/54	• • made of powdered or granular material
33/56	• Coatings {, e.g. enameled or galvanised};
	Releasing, lubricating or separating agents {(in-
	mould coating <u>B29C 37/0028</u> ; using or applying
00/7 47	separating agents <u>B29C 37/0067</u> )}
33/565	• • {Consisting of shell-like structures supported by
	backing material}
33/58	• Applying the releasing agents
33/60	• Releasing, lubricating or separating agents {(in
00/10	general <u>C10M</u> )}
33/62	• • • based on polymers or oligomers
33/64	Silicone
33/66	Cellulose; Derivatives thereof
33/68	Release sheets
33/70	. Maintenance
2033/705	• • {Mould inspection means, e.g. cameras}
33/72	• Cleaning {(extruder parts <u>B29C 48/27;</u> in general
	<u>B08B 7/00</u> )}
33/722	• • • {Compositions for cleaning moulds}
2033/725	• • • {cleaning by plasma treatment}
2033/727	• • • {cleaning during moulding}
33/74	Repairing
33/76	• Cores ( <u>B29C 33/02</u> - <u>B29C 33/70</u> , { <u>B29C 41/40</u> ,
	<u>B29C 53/74, B29C 53/82</u> } take precedence)
	-

3

35/00	Heating, cooling or curing, e.g. crosslinking or vulcanising; Apparatus therefor (moulds with incorporated heating or cooling means <u>B29C 33/02</u> {; thermal after-treatment of shaped articles <u>B29C 71/02</u> }; curing devices for plastics
	dental prostheses <u>A61C 13/14;</u> before moulding <u>B29B 13/00</u> )
35/002	<ul> <li>{Component parts, details or accessories; Auxiliary operations}</li> </ul>
2035/005	• {Enveloping the material to be cured, e.g. by helically winding a film around the material}
35/007	<ul> <li>{Tempering units for temperature control of moulds or cores, e.g. comprising heat exchangers, controlled valves, temperature-controlled circuits for fluids (<u>B29C 35/0294</u> takes precedence)}</li> </ul>
35/02	• Heating or curing, e.g. crosslinking or vulcanizing {during moulding, e.g. in a mould}(cold vulcanisation <u>B29C 35/18</u> {; vulcanising tyres, presses therefor <u>B29D 30/0601</u> })
2035/0211	• • {resistance heating ( <u>B29C 2035/0811</u> takes precedence)}
2035/0216	• • {using Peltier-effect}
35/0222	• • {the curing continuing after removal from the mould ( <u>B29C 35/0233</u> takes precedence)}
35/0227	<ul> <li>{using pressure vessels, e.g. autoclaves, vulcanising pans (<u>B29C 35/065</u> takes precedence)}</li> </ul>
35/0233	• • • {the curing continuing after removal from the mould}
35/0238	• • {Presses provided with pressure vessels, e.g. steam chambers}
35/0244	• • {using fluidised bed}
35/025	• • { for articles of indefinite length }
35/0255	• • {using friction}
35/0261	• {using ultrasonic or sonic vibrations}
35/0266	• {Local curing (for repairing <u>B29C 73/34</u> )}
35/0272	<ul> <li>{using lost heating elements, i.e. heating means incorporated and remaining in the formed article (for preforms with internal stresses <u>B29C 61/0625</u>; joining using lost heating elements <u>B29C 65/34</u>; making electrically conductive articles <u>B29C 70/882</u>)}</li> </ul>
35/0277	<ul> <li>{Apparatus with continuous transport of the material to be cured (<u>B29C 35/025, B29C 35/06, B29C 35/10, B29C 35/14</u> take precedence)}</li> </ul>
2035/0283	• • {Thermal pretreatment of the plastics material (thermal after-treatment <u>B29C 71/02</u> )}
35/0288	• • {Controlling heating or curing of polymers during moulding, e.g. by measuring temperatures or properties of the polymer and regulating the process (controlling or regulating chemical, physical or physico- chemical processes in general <u>B01J 19/0006</u> )}
35/0294	• • {using tempering units for temperature control of moulds or cores}
35/04	• • using liquids, gas or steam
35/041	• • • {using liquids}
2035/042	• • • • {other than water}

#### 49/00 Blow-moulding, i.e. blowing a preform or parison to a desired shape within a mould; Apparatus therefor

## <u>WARNING</u>

Group <u>B29C 49/00</u> is impacted by reclassification into groups <u>B29C 49/006</u>, <u>B29C 49/0062</u> and <u>B29C 49/0064</u>.

All groups listed in this Warning should be considered in order to perform a complete search.

49/0005 . {characterised by the material}

#### **NOTE**

{When classifying in this group, it is desirable to add the indexing codes of subclass <u>B29K</u> to identify the moulding materials and their properties. Documents concerning the choice of moulding materials having a particular influence on the moulding technique should be classified in this group if of interest}

#### WARNING

Group <u>B29C 49/0005</u> is impacted by reclassification into group <u>B29C 49/0006</u>. Groups <u>B29C 49/0005</u> and <u>B29C 49/0006</u> should be considered in order to perform a complete search.

49/0006 . . {for heating or cooling}

#### WARNING

Group <u>B29C 49/0006</u> is incomplete pending reclassification of documents from group <u>B29C 49/0005</u>.

Groups <u>B29C 49/0005</u> and <u>B29C 49/0006</u> should be considered in order to perform a complete search.

49/0015 • {Making articles of indefinite length, e.g. corrugated tubes}

#### WARNING

Group <u>B29C 49/0015</u> is impacted by reclassification into groups <u>B29C 49/0021</u>, B29C 49/0022, <u>B29C 49/0023</u>, <u>B29C 49/0024</u>, B29C 49/0025, <u>B29C 49/0027</u>, <u>B29C 49/0028</u>, <u>B29C 49/0029</u> and <u>B29C 49/003</u>.

All groups listed in this Warning should be considered in order to perform a complete search.

49/0021 . . {using moulds or mould parts movable in a closed path, e.g. mounted on movable endless supports}

#### WARNING

Group <u>B29C 49/0021</u> is incomplete pending reclassification of documents from group <u>B29C 49/0015</u>.

Group <u>B29C 49/0021</u> is also impacted by reclassification into groups <u>B29C 49/0022</u>, <u>B29C 49/0023</u>, <u>B29C 49/0024</u>, <u>B29C 49/0025</u>, <u>B29C 49/0027</u>, <u>B29C 49/0028</u>, <u>B29C 49/0029</u> and <u>B29C 49/003</u>.

All groups listed in this Warning should be considered in order to perform a complete search.

```
49/0022 . . . {characterised by mould return means}
```

#### WARNING

Group <u>B29C 49/0022</u> is incomplete pending reclassification of documents from groups <u>B29C 49/0015</u> and <u>B29C 49/0021</u>.

Groups <u>B29C 49/0015</u>, <u>B29C 49/0021</u> and <u>B29C 49/0022</u> should be considered in order to perform a complete search.

49/0023 • . {using adjustable machine tables, e.g. to align extrusion nozzles with the moulds}

#### WARNING

Group <u>B29C 49/0023</u> is incomplete pending reclassification of documents from groups B29C 49/0015 and B29C 49/0021.

Groups <u>B29C 49/0015</u>, <u>B29C 49/0021</u> and <u>B29C 49/0023</u> should be considered in order to perform a complete search.

49/0024 . . {using varying mould speed}

#### WARNING

Group <u>B29C 49/0024</u> is incomplete pending reclassification of documents from groups <u>B29C 49/0015</u> and <u>B29C 49/0021</u>.

Groups <u>B29C 49/0015</u>, <u>B29C 49/0021</u> and <u>B29C 49/0024</u> should be considered in order to perform a complete search.

49/0025 . . {subsequent mould cavities being different, e.g. for making bells}

#### WARNING

Group <u>B29C 49/0025</u> is incomplete pending reclassification of documents from groups B29C 49/0015 and B29C 49/0021.

Groups <u>B29C 49/0015</u>, <u>B29C 49/0021</u> and <u>B29C 49/0025</u> should be considered in order to perform a complete search.

Documents in which moulding materials are mentioned are indexed using indexing codes of subclass <u>B29K</u>. However, when, for example,

	documents concerning the choice of moulding material having a particular influence on the moulding technique cannot be satisfactorily indexed, the documents may be classified in this group if of interest
59/007	• {Forming single grooves or ribs, e.g. tear lines, weak spots (by moulding <u>B29C 37/0057</u> ; folding lines <u>B29C 53/06</u> ; in metal articles <u>B21D 17/00</u> ; by cutting <u>B26D 3/08</u> )}
59/02	• by mechanical means, e.g. pressing {( <u>B29C 59/007</u> takes precedence; embossing expanded porous articles <u>B29C 44/5627</u> )}
59/021	• • {of profiled articles, e.g. hollow or tubular articles, beams}
59/022	<ul> <li>{characterised by the disposition or the configuration, e.g. dimensions, of the embossments or the shaping tools therefor}</li> </ul>
2059/023	• • • {Microembossing}
59/025	• • {Fibrous surfaces with piles or similar fibres substantially perpendicular to the surface}
59/026	• • {of layered or coated substantially flat surfaces}
2059/027	• • {Grinding; Polishing}
2059/028	• • {Incorporating particles by impact in the surface, e.g. using fluid jets or explosive forces to implant particles}
59/04	• • using rollers or endless belts
59/043	• • • { for profiled articles }
59/046	• • • {for layered or coated substantially flat surfaces}
59/06	<ul> <li>using vacuum drums {(for thermoforming <u>B29C 51/225</u>)}</li> </ul>
59/08	• by flame treatment {; using hot gases}
59/085	• {of profiled articles, e.g. hollow or tubular articles}
59/10	• by electric discharge treatment
59/103	• • {of profiled articles, e.g. hollow or tubular articles}
59/106	• • {the electrodes being placed on the same side of the material to be treated}
59/12	• • in an environment other than air
59/14	• by plasma treatment {(plasma tubes <u>per se H01J</u> )}
59/142	• • {of profiled articles, e.g. hollow or tubular articles}
2059/145	• • {Atmospheric plasma}
2059/147	• • {Low pressure plasma; Glow discharge plasma}
59/16	• by wave energy or particle radiation {, e.g. infrared heating ( <u>B29C 59/007</u> takes precedence)}
59/165	• • {of profiled articles, e.g. hollow or tubular articles}
59/18	• by liberation of internal stresses, e.g. plastic memory
61/00	Shaping by liberation of internal stresses; Making preforms having internal stresses; Apparatus
	therefor (for surface shaping <u>B29C 59/18;</u> for lining
	articles <u>B29C 63/38</u> ; for joining preformed parts
	<u>B29C 65/66</u> {; for packaging <u>B65B 53/00</u> ; connecting
	arrangements or other fittings for plastics pipes using shrink-down material <u>F16L 47/22</u> , electrical
	connections insulated using heat shrinking insulating
	sleeves <u>H01R 4/72</u> ; cable junctions protected by sleeves H02G 15/181)

sleeves H02G 15/18})

61/003	• {characterised by the choice of material}		
	NOTE		
	When classifying in this group, it is desirable to add the indexing codes of subclass <u>B29K</u> to identify the moulding materials and their properties. Documents concerning the choice of moulding materials having a particular influence on the moulding technique should be classified in this group if of interest		
61/006	<ul> <li>{the force created by the liberation of the internal stresses being used for compression moulding or for pressing preformed material}</li> </ul>		
61/02	• Thermal shrinking		
61/025	• {for the production of hollow or tubular articles}		
61/04	• Thermal expansion		
61/06	• Making preforms having internal stresses, e.g. plastic memory		
61/0608	• • {characterised by the configuration or structure of the preforms}		
61/0616	<ul> <li>{layered or partially layered preforms, e.g. preforms with layers of adhesive or sealing compositions (<u>B29C 61/0625</u> and <u>B29C 61/065</u> take precedence)}</li> </ul>		
61/0625	• • {Preforms comprising incorporated or associated heating means}		
61/0633	<ul> <li>. (Preforms comprising reinforcing elements (<u>B29C 61/0625</u> takes precedence))</li> </ul>		
61/0641	• • {Clips for dividing preforms or forming branch-offs (clips in general <u>F16B 2/20</u> )}		
61/065	• • {Preforms held in a stressed condition by means of a removable support; Supports therefor}		
61/0658	• • {consisting of fibrous plastics material, e.g. woven}		
61/0666	• • {comprising means indicating that the shrinking temperature is reached}		
2061/0675	• • • { the means being a material exuding outside the preform when the temperature is reached }		
2061/0683	• • • { the means being a thermochromic painting or coating }		
2061/0691	• • • {the means being protrusions on the preform surface disappearing when the temperature is reached}		
61/08	<ul> <li>by stretching tubes {(in general <u>B29C 55/22</u>, <u>B29C 55/28</u>)}</li> </ul>		
61/10	<ul> <li>by bending plates or sheets {(in general <u>B29C 53/36</u>)}</li> </ul>		
63/00	Lining or sheathing, i.e. applying preformed layers or sheathings of plastics; Apparatus therefor ( <u>B29C 73/00</u> takes precedence; by blowing <u>B29C 49/00</u> ; by thermoforming <u>B29C 51/00</u> )		
63/0004	• {Component parts, details or accessories; Auxiliary operations}		
2063/0008	• • {Registering, centering the lining material on the substrate}		
63/0013	• • {Removing old coatings}		
63/0017	• {characterised by the choice of the material}		
	NOTE		
	When classifying in this group, it is desirable to add the indexing codes of subclass <u>B29K</u> to identify the moulding materials and their		

to identify the moulding materials and their

properties. Documents concerning the choice of moulding materials having a particular influence on the moulding technique should be classified in this group if of interest

63/0021	• • {with coherent impregnated reinforcing layers}
63/0026	• {an edge face with strip material, e.g. a panel
	edge (securing a veneer strip to a panel edge
(2)/002	<u>B27D 5/003</u> )}
63/003	• {continuously}
63/0034	• • {the strip material being folded}
63/0039	• • {continuously}
63/0043	• {Fixing the layers by electrostatic charges, by the
62/00/17	use of structured surfaces or by mechanical means}
63/0047	• {Preventing air-inclusions}
63/0052 63/0056	<ul><li> {Testing, e.g. testing for the presence of pinholes}</li><li> {Provisional sheathings}</li></ul>

	comprising reinforcements, fillers or preformed
	parts, e.g. inserts
	<u>NOTE</u>
	In this group, the following terms or expressions
	are used with the meanings indicated:
	<ul> <li>"reinforcement" means a structure in the form of fibres, wires, rods, bars, sections, plates</li> </ul>
	or blocks, which improves the strength of an
	article;
	• "filler" means a relatively inert substance in
	the form of particles, powder, beads, flakes or
	spheres, which improves the physical properties or increases the bulk or weight of an article;
	<ul> <li>"preformed part" means a part made of any</li> </ul>
	material, being completely shaped to have a
	determined form and which is not used as a
	reinforcement, e.g. wires or nets forced only into the surface of an article;
	<ul> <li>"insert" means a preformed part incorporated in</li> </ul>
	an article during moulding.
70/003	• {characterised by the matrix material, e.g. material
10/000	composition or physical properties}
70/0035	• • {comprising two or more matrix materials}
70/02	• comprising combinations of reinforcements, {e.g.
	non-specified reinforcements, fibrous reinforcing
	inserts} and fillers, {e.g. particulate fillers}, incorporated in matrix material, forming one or
	more layers and with or without non-reinforced
	or non-filled layers {(combinations of fibrous

## Particular articles

B29C 2949/07	
(continued)	All groups listed in this Warning should be
(continued)	considered in order to perform a complete
	search.
2949/071	• the preform being a tube, i.e. with both ends open
2949/0715	
2949/0713	<ul> <li>having variable wall thickness</li> </ul>
2949/0721	Tangentially varying thickness
2949/0722	• • • • at neck portion
2949/0723	at flange portion
2949/0724	at body portion
2949/0725	• • • at bottom portion
2949/073	having variable diameter
2949/0731	at neck portion
2949/0732	at flange portion
2949/0733	at body portion
2949/0734	at bottom portion
2949/074	having ribs or protrusions
2949/0741	longitudinal, e.g. from top to bottom
2949/0742	Circumferential
2949/0744	• • • at neck portion
2949/0745	• • • at flange portion
2949/0746	• • • at body portion
2949/0747	• • • at bottom portion
2949/075	having at least one internal separating wall
2949/0751	• • • at neck portion
2949/0752	at flange portion
2949/0753	at body portion
2949/0754	at bottom portion
2949/076	characterised by the shape
2949/0761	characterised by overall the shape
2949/0762	Conical
2949/0763	Axially asymmetrical
2949/0764	Elliptic or oval cross-section shape
2949/0765	Rectangular cross-section shape
2949/0766	Hexagonal cross-section shape
2949/0767	<ul> <li> the shape allowing stacking or nesting</li> <li> characterised by the shape of specific parts of</li> </ul>
2949/0768	preform
2949/0769	• • • • characterised by the lip, i.e. very top of
2949/0109	preform neck
2949/077	characterised by the neck
2949/0771	Wide-mouth
2949/0772	Closure retaining means
2949/0773	Threads
2949/0774	Interrupted threads
2949/0775	Inner threads
2949/0776	not containing threads
2949/0777	Tamper-evident band retaining ring
2949/0778	characterised by the flange
2949/0779	• • • characterised by the body
2949/078	characterised by the bottom
2949/0781	characterised by the sprue, i.e. injection
	mark
2949/0782	• • • • characterised by the pinch-off portion
2949/079	• Auxiliary parts or inserts
2949/0791	Handle
2949/0792	Closure
2949/0793	Transport means
2949/0794	Dispensing spout
2949/0795	• • Parts to assist orientation of preform, e.g. in mould
	moula

2949/0796	• • • at neck portion
2949/0797	• • • • at flange portion
2949/0798	• • • • at body portion
2949/0799	• • • at bottom portion
2949/08	• • Preforms made of several individual parts, e.g.
	by welding or gluing parts together
2949/0801	Finish neck ring
2949/081	• Specified dimensions, e.g. values or ranges
2949/0811	• • Wall thickness
2949/0812	• • • of the lip, i.e. the very top of the preform
2717/0012	neck
2949/0813	•••• of the neck
2949/0814	• • • • of the threads
2949/0815	••••••••••••••••••••••••••••••••••••••
2949/0816	••••••••••••••••••••••••••••••••••••••
2949/0817	• • • • of the body
2949/0817	••••••••••••••••••••••••••••••••••••••
2949/0818	• • • of a layer
2949/081	Diameter
2949/082	•••• of the lip, i.e. the very top of the preform
2949/0821	neck
2949/0822	• • • of the neck
2949/0822	of the threads
2949/0823	••••••••••••••••••••••••••••••••••••••
2949/0824	••••••••••••••••••••••••••••••••••••••
2949/0825	
	••••••••••••••••••••••••••••••••••••••
2949/0827	
2949/0828	• • • of a layer
2949/0829	• • Height, length
2949/083	•••• of the lip, i.e. the very top of the preform neck
2949/0831	of the neck
2949/0831	
2949/0832	<ul> <li>of the threads</li> <li>of the tamper-evident band retaining ring</li> </ul>
2949/0833	• • • • of the flange
2949/0834	of the body
2949/0835	of the bottom
2949/0830	of a layer
2949/0837	Ratio between length and diameter
2949/0838	Angle
2949/083	•••• Angle •••• of the lip, i.e. the very top of the preform
27+7/004	neck
2949/0841	• • • of the neck
2949/0842	of the threads
2949/0843	••••••••••••••••••••••••••••••••••••••
2949/0844	••••••••••••••••••••••••••••••••••••••
2949/0845	• • • • of the hange
2949/0846	of the bottom
2949/0840	• • • of a layer
2949/0849	Curvature, e.g. radius
2949/085	••••••••••••••••••••••••••••••••••••••
2949/003	neck
2949/0851	• • • of the neck
2949/0852	• • • • of the threads
2949/0852	••••••••••••••••••••••••••••••••••••••
2949/0855	••••••••••••••••••••••••••••••••••••••
2949/0855	• • • • of the body
2949/0855	of the bottom
2949/0850	of a layer
2949/080	Other specified values, e.g. values or ranges
2949/0801	Other specified values, e.g. values of ranges     Other specified values, e.g. values of ranges
2949/0862	• • • • • at the neck portion
2747/0803	

2949/0864	•••• at the flange portion
2949/0865	• • • • at the body portion
2949/0866	• • • • at the bottom portion
2949/0867	Surface roughness
2949/0868	• • • • at the neck portion
2949/0869	• • • • at the flange portion
2949/087	at the body portion
2949/0871	• • • • • at the bottom portion
2949/0872	Weight
2949/20	• Preforms or parisons whereby a specific part is
2)4)/20	made of only one component, e.g. only one layer

All groups listed in this Warning should be considered in order to perform a complete search.

- 2949/3004 . . having longitudinally different components within one layer, e.g. tubes with longitudinal stratified layering
  2949/3006 . . having tangentially different components within one layer, e.g. longitudinal stripes
- 2949/3008 . . at neck portion
- 2949/3009 . . . partially

2949/3012	• • at flange portion
2949/3014	• • • partially
2949/3016	• • at body portion
2949/3018	• • • partially
2949/302	at bottom portion
2949/3022	• • partially
2949/3024	<ul> <li>characterised by the number of components or by</li> </ul>
2949/3024	the manufacturing technique
2949/3026	• • • having two or more components
2949/3028	• • • having three or more components
2949/303	having more than three components
2949/3032	<ul> <li>having components being injected</li> </ul>
2949/3034	<ul> <li>having components being injected</li> <li>having two or more components being injected</li> </ul>
2949/3036	••••• having two of more components being injected
294973030	injected
2949/3038	• • • • having more than three components being
_,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	injected
2949/3041	having components being extruded
2949/3042	••••••••••••••••••••••••••••••••••••••
2949/3044	• • • having three or more components being
	extruded
2949/3046	•••• having more than three components being
	extruded
2949/3048	having components being thermoformed
2949/3051	having two or more components being
	thermoformed
2949/3052	• • • having three or more components being
	thermoformed
2949/3054	• • • • having more than three components being
	thermoformed
2949/3056	• • having components being compression moulded
2949/3058	having two or more components being
0040/006	compression moulded
2949/306	having three or more components being compression moulded
2949/3062	• • • • having more than three components being
2949/3002	compression moulded
2949/3064	having at least one components being
2949/3004	applied using techniques not covered by
	B29C 2949/3032 - B29C 2949/3062
2949/3066	having two or more components being applied
	using said techniques
2949/3068	having three or more components being
	applied using said techniques
2949/307	• • • • having more than three components being
	applied using said techniques
2949/3074	said at least one component obtained by coating
2949/3076	• • • • on the inside
2949/3078	• • • by spray coating
2949/308	• • • by dip coating
2949/3082	• • • by powder coating
2949/3084	said at least one component obtained by casting
2949/3086	• Interaction between two or more components, e.g.
	type of or lack of bonding
2949/3088	Bonding
2949/309	• • • by welding
2949/3092	• • • by using adhesives
2949/3094	• • • preform having at least partially loose
	components, e.g. at least partially loose layers
