CPC COOPERATIVE PATENT CLASSIFICATION

F MECHANICAL ENGINEERING; LIGHTING; HEATING; WEAPONS; BLASTING (NOTE omitted)

ENGINEERING IN GENERAL

F16 ENGINEERING ELEMENTS AND UNITS; GENERAL MEASURES FOR PRODUCING AND MAINTAINING EFFECTIVE FUNCTIONING OF MACHINES OR INSTALLATIONS; THERMAL INSULATION IN GENERAL

F16P SAFETY DEVICES IN GENERAL; {SAFETY DEVICES FOR PRESSES}

NOTE

Attention is drawn to the following places:

Attention is drawn to the folio	owing places:
<u>A01D 75/18</u>	Harvesting machines
A01F 21/00	Threshing machines or baling presses
B02C 23/04	Crushing or disintegrating machines
B21B 33/00	Rolling of metal
B21D 55/00	Working sheet metal or tubes, rods or profiles without essentially removing material
B23B 25/04	Turning-machines
B23Q 11/00	Machine tools
B24B 55/00	Grinding or polishing machines
B25J 19/06	Manipulators
B26D 7/22	Cutting machines
B27G 19/00	Wood saws
B65B 57/00	Packaging machines or apparatus
B65G 43/00	Conveyors
B65H 26/00	Web-advancing mechanisms
B65H 63/00	Handling or winding of thin or filamentary material
D01G 31/00	Treatment of fibres
D01H 13/14	Spinning or twisting
D05B 83/00	Sewing machines
F21V 25/00	Lighting devices.

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

Devices protecting or preventing injuries to people 3/00			• • {having a movable screen or a sensor influencing
1/00	Safety devices independent of the control and operation of any machine (protective devices for the eyes or ears, worn on the body or carried in the hand, A61F 9/00, A61F 11/00)	3/006	 the switching system} • {having a screen moving with the machine and moving the operator out of danger, or restraining the operator, without influencing the switching system}
1/005 1/02	 {Guards for rolls in calendering or other roll machines, e.g. nip guards, finger guards} Fixed screens or hoods 	3/008	• {Devices for directly stopping or interrupting the drive or gear in case of danger to the machine, e.g.
1/04	Screens or hoods rotating with rotary shafts	3/02	devices with clutches}
1/06	specially designed for welding	3/02	 Screens or other safety members moving in synchronism with members which move to and fro
3/00	Safety devices acting in conjunction with the control or operation of a machine; Control arrangements requiring the simultaneous use of two or more parts of the body (F16P 5/00 takes	3/04	 for machines with parts which approach one another during operation, e.g. for stamping presses in which body parts of the operator are
3/001	 precedence) {Safety devices for guarding the human operator of punch presses or like machine tools performing an opening and closing travel} 	3/08	removed from the danger zone on approach of the machine parts in connection with the locking of doors, covers, guards, or like members giving access to moving
3/003	• {by application of a specific control arrangement, e.g. specific switching systems or two-hand control}	3/10	 machine parts in which the operation of locking the door or other member causes the machine to start

CPC - 2024.01

machine (F16P 3/08 takes precedence) 3/125 . {Guards for rolls in calendering or other roll machines, e.g. nip guards, finger guards} 3/14 . the means being photocells or other devices sensitive without mechanical contact 3/141 {using sound propagation, e.g. sonar} 3/142 {using image capturing devices} 3/144 {using light grids} 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 . Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence)		
 3/125 {Guards for rolls in calendering or other roll machines, e.g. nip guards, finger guards} 3/14 the means being photocells or other devices sensitive without mechanical contact 3/141 {using sound propagation, e.g. sonar} 3/142 {using image capturing devices} 3/144 {using light grids} 3/145 {using light grids} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 . Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/12	presence of a body part of a person in or near the danger zone influence the control or operation of the
 3/14 the means being photocells or other devices sensitive without mechanical contact 3/141 {using sound propagation, e.g. sonar} 3/142 {using image capturing devices} 3/144 {using light grids} 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/125	• • {Guards for rolls in calendering or other roll
 3/142 {using image capturing devices} 3/144 {using light grids} 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00) take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/14	the means being photocells or other devices
 3/142 {using image capturing devices} 3/144 {using light grids} 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/141	• • {using sound propagation, e.g. sonar}
 3/144 {using light grids} 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/142	
 3/145 {using magnetic technology} 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/144	
 3/147 {using electro-magnetic technology, e.g. tags or radar} 3/148 {using capacitive technology} 3/16 with feeling members moved by the machine 3/18 . Control arrangements requiring the use of both hands 3/20 for electric control systems 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/145	
 3/16 . with feeling members moved by the machine 3/18 . Control arrangements requiring the use of both hands 3/20 . for electric control systems 3/22 . for hydraulic or pneumatic control systems 3/24 . for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/147	• • {using electro-magnetic technology, e.g. tags or
 3/18 . Control arrangements requiring the use of both hands 3/20 . for electric control systems 3/22 . for hydraulic or pneumatic control systems 3/24 . for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/148	• • {using capacitive technology}
hands 3/20 . for electric control systems 3/22 . for hydraulic or pneumatic control systems 3/24 . for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings)	3/16	with feeling members moved by the machine
 3/22 for hydraulic or pneumatic control systems 3/24 for mechanical controls 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 . {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 . by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/18	
 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 • {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/20	for electric control systems
 5/00 Emergency means for rendering ineffective a coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 • {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/22	for hydraulic or pneumatic control systems
 coupling conveying reciprocating movement if the motion of the driven part is prematurely resisted 5/005 • {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00) take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	3/24	for mechanical controls
 5/005 • {Overload protection by energy absorbing components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00) take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	5/00	coupling conveying reciprocating movement if the
 components, e.g. breaker blocks, shear sections} 7/00 Emergency devices preventing damage to a machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00) take precedence) 7/02 by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	5/005	
machine or apparatus (F16P 1/00, F16P 3/00, F16P 5/00 take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings		
 F16P 5/00 take precedence) 7/02 • by causing the machine to stop on the occurrence of dangerous conditions therein (devices in bearings) 	7/00	Emergency devices preventing damage to a
