## **B41G 1/00**

**Apparatus for bronze printing or for like operations (applying granular materials or metallic foils for decorative purposes B44C1/00)**

### **Definition statement**

*This subclass/group covers:*

Printing apparatus of flat bed-type or of rotary type having printing letters or types, or respectively a printing plate made from bronze metallic material.

Specific technology having being mostly used in previous centuries e.g. in East Asia.

## **B41G 3/00**

**Apparatus for printing lines**

### **Definition statement**

*This subclass/group covers:*

Printing apparatus having printing plates specifically adapted to print specific images, essentially lines on various substrates.

Specific technology mostly used until the year 2000.

## **B41G 5/00**

**Apparatus for bordering or edging of sheets or like articles, e.g. for producing black rims on mourning cards**

### **Definition statement**

*This subclass/group covers:*

Printing apparatus having printing plates specifically adapted to print specific print images essentially on borders or edges of sheet like articles.

Specific technology mostly used until the year 2000.

## **B41G 7/00**

**Auxiliary perforating apparatus associated with printing devices (apparatus or machines for carrying-out printing operations combined with other operations other than perforating B41F19/00)**

## **Definition statement**

*This subclass/group covers:*

Sheet or web perforating apparatus exclusively being part of or being in line with printing apparatus or presses.

Rotary and flat perforating devices.
