

G06M

COUNTING MECHANISMS; COUNTING OF OBJECTS NOT OTHERWISE PROVIDED FOR (counting by measuring volume or weight of articles to be counted G01F, G01G; computers G06C to G06J; counting electric pulses H03K; counting characters, words or messages in switching networks for transmission of digital information H04L12/08)

Definition statement

This subclass/group covers:

Stepping or continuously-moving mechanical counters operated through one or more inputs applied to the lowest order mechanically or electrically.

Counting systems involving applications of either mechanical, electrical, or electronic counters.

Special rules of classification within this subclass

Subject-matter classified in [G06M 7/00](#), [G06M 9/00](#), and [G06M 11/00](#) should also be classified in the relevant sub-group of [G06M 1/08](#) if the means detecting the objects counted are of particular relevance.

G06M 1/00

Design features of general application

G06M 3/00

Counters with additional facilities (generating electric pulses at random intervals H03K3/84)

G06M 7/00

Counting of objects carried by a conveyer

Definition Statement

This subclass/group covers:

Counting of randomly distributed loose objects moving past a counting station, like in chute conveyers.

G06M 9/00

Counting of objects in a stack thereof

G06M 11/00

Counting of objects distributed at random, e.g. on a surface

Definition statement

This subclass/group covers:

Counting of objects in a static distribution.
