Downloadable computer software that recommends, organizes, manages, tracks, records, reviews the next best actions to make
informed choices in relation to scientific research and development data in the fields of chemistry, physics, and science;
Downloadable computer software for data analytics, predictive analysis, and automation in relation to scientific research and
development data in the fields of chemistry, physics, and science; computer software for providing real-time intelligence that
matters from all data sources, regardless of type, complexity and volume, in relation to scientific research and development
data in the fields of chemistry, physics, and science; Downloadable computer software platforms for designing application with artificial intelligence in relation to scientific research and development data in the fields of chemistry, physics, and science; pattern recognition systems composed of computer chips, computer hardware and downloadable software for analysis of scientific research and development data in the fields of chemistry, physics, and science; Downloadable computer software for implementing artificial intelligence for use in data transformation and management in relation to scientific research and development data in the fields of chemistry, physics, and science; Downloadable computer software for gathering scientific research and development data in the fields of chemistry, physics, and science from humans for analysis and processing; Downloadable computer software for automatically capturing scientific research and development data in the fields of chemistry, physics, and science from humans for analysis and processing; Downloadable software for allowing computers to interact directly with customers to capture and provide information in relation to scientific research and development data in the fields of chemistry, physics, and science; excluding software for the telecommunications industry, for inbound and outbound telephone calls for others, and/or for accessing and operating a call center

**International Classes**

| 9 - Primary Classes | US Classes | 21, 23, 26, 36, 38 |

**International Class Title** Electrical and Scientific Apparatus

**For** Software as a Service (SAAS) services featuring artificial intelligence (AI) software for making certain tasks more efficient for customers, namely, for analysis of scientific research and development data in the fields of chemistry, physics, and science to increase the rate of organizing, normalizing, indexing, and structuring multi-modal data, for improving efficiency in the fields of scientific research and development and engineering in the fields of chemistry, physics, and science by improving understanding and parsing of discernment and extraction of data, and increasing the rate of invention and progress, in scientifically-oriented disciplines and fields, for implementing scalable artificial intelligence (AI) for scientific research and development in the fields of chemistry, physics, and science, for helping enterprise customers ingest, universalize, and operationalize complex multi-modal data in the fields of chemistry, physics, and science, for automated decision-making in the fields of chemistry, physics, and science, for automated analysis and detection of anomaly in relation to scientific research and development data in the fields of chemistry, physics, and science, for recommending, organizing, managing, tracking, recording, and reviewing the next best actions to make informed choices in relation to scientific research and development data in the fields of chemistry, physics, and science, for providing real-time intelligence from all data sources, regardless of type, complexity and volume in relation to scientific research and development data in the fields of chemistry, physics, and science, for designing computer application platforms with artificial intelligence in relation to scientific research and development data in the fields of chemistry, physics, and science, for pattern recognition systems composed of computer chips, computer hardware and software for analysis of scientific research and development data in the fields of chemistry, physics, and science, and for implementing artificial intelligence for increasing the rate of invention and progress in scientifically-oriented disciplines and fields; Software as a Service (SAAS) services and Platform as a Service (PAAS) services, namely, hosting software for use by others for decision making in relation to scientific research and development data in the fields of chemistry, physics, and science, for implementing artificial intelligence for use in data transformation and management in relation to scientific research and development data in the fields of chemistry, physics, and science, for administration of computer networks, for linking two or more autonomous, distributed systems consisting of either human intelligence or artificial intelligence with digital or mechanical hardware platforms in relation to scientific research and development data in the fields of chemistry, physics, and science, for gathering data from humans for analysis and processing in relation to
scientific research and development data in the fields of chemistry, physics, and science, for automatically capturing data from humans for analysis and processing in relation to scientific research and development data in the fields of chemistry, physics, and science, for allowing computers to interact directly with customers to capture and provide information in relation to scientific research and development data in the fields of chemistry, physics, and science; scientific and industrial research, namely, technical research in the field of a computer software that contains data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; computer services, namely, design and development of computer hardware and computer software, computer network design for others, computer project management services, providing search engines for obtaining data on a global computer network and creating computer network-based indexes of information, sites and resources all in relation to scientific research and development data in the fields of chemistry, physics, and science; technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems and providing advice, consultation and information regarding computer hardware and software all in relation to scientific research and development data in the fields of chemistry, physics, and science, excluding troubleshooting of computer hardware and software used in the telecommunications industry, for inbound and outbound telephone calls for others, and/or for accessing and operating a call center; providing temporary use of online non-downloadable software for implementing artificial intelligence for use in data transformation and management, for administration of computer networks, for linking two or more autonomous, distributed systems consisting of either human intelligence or artificial intelligence with digital or mechanical hardware platforms, for gathering data from humans for analysis and processing, for automatically capturing data from humans for analysis and processing, all in relation to scientific research and development data in the fields of chemistry, physics, and science; testing and research in the field of on-line non-downloadable software for cloud based software for use in the collection, integration, curation, evaluation, and analysis of data utilizing data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; providing temporary use of web-based applications for calculation functions, namely, the collection, integration, curation, evaluation, and analysis of data utilizing data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; providing temporary use of on-line non-downloadable software on data networks for the collection, integration, curation, evaluation, and analysis of data utilizing data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; Computer services, namely, cloud hosting provider service for the electronic storage of data, namely, the collection, integration, curation, evaluation, and analysis of data utilizing data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; Computer services, namely, cloud hosting provider service for the electronic storage of data, namely, the collection, integration, curation, evaluation, and analysis of data utilizing data analytics, statistical models, information retrieval (IR), machine learning (ML), data science (DS) and artificial intelligence (AI) all in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software using artificial intelligence (AI) to make certain tasks more efficient for customers, namely, for analysis of scientific research and development data in the fields of chemistry, physics, and science to increase the rate of organizing, normalizing, indexing, and structuring multi-modal data, to improve understanding and parsing of discernment and extraction of data, and to increase the rate of invention and progress, in scientifically-oriented disciplines and fields; Providing on-line non-downloadable software that improves efficiency in the fields of scientific research and development and
engineering in the fields of chemistry, physics, and science by improving understanding and parsing of discernment and extraction of data, and increasing the rate of invention and progress, in scientifically-oriented disciplines and fields; Providing on-line non-downloadable software that implements scalable artificial intelligence (AI) for scientific research and development in the fields of chemistry, physics, and science; Providing on-line non-downloadable software that helps enterprise customers ingest, universalize, and operationalize complex multi-modal data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for automated decision-making in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for automated analysis and detection of anomaly in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software that recommends, organizes, manages, tracks, records, reviews the next best actions to make informed choices in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for automated decision-making in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for automated analysis and detection of anomaly in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable computer software for providing real-time intelligence that matters from all data sources, regardless of type, complexity and volume in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable computer software platforms for designing applications with artificial intelligence in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for implementing artificial intelligence in relation to scientific research and development data in the fields of chemistry, physics, and science to increase the rate of invention and progress in scientifically-oriented disciplines and fields; Providing on-line non-downloadable software for implementing artificial intelligence in relation to scientific research and development data in the fields of chemistry, physics, and science for use in data transformation and management; Providing on-line non-downloadable software that can be used to link two or more autonomous, distributed systems consisting of either human intelligence or artificial intelligence with digital or mechanical hardware platforms in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for gathering data from humans for analysis and processing in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for automatically capturing data from humans for analysis and processing in relation to scientific research and development data in the fields of chemistry, physics, and science; Providing on-line non-downloadable software for allowing computers to interact directly with customers to capture and provide information in relation to scientific research and development data in the fields of chemistry, physics, and science; all of the above services excluding computer services for the telecommunications industry, for inbound and outbound telephone calls for others, and/or for accessing and operating a call center

Mark Literal(s)  BLENDED MALT SCOTCH WHISKY INSPIRED BY THE RT. HON. W.E. GLADSTONE "NOT A DROP OF MY BLOOD IS NOT SCOTTISH" W.E. GLADSTONE 1868 1880 1886 1892 FOUR TIMES PRIME MINISTER "TRIED-TRUSTED-TRUE" THE GLADSTONE AXE WEG

CASE IDENTIFIERS
Serial Number  88872953 Application Filing Date  Apr. 15, 2020 Register  Principal Mark Type  Trademark Publication Date  Mar. 23, 2021

MARK INFORMATION
Standard Character Claim  No Mark Drawing Type  3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) Description of the Mark  The mark consists of an alcoholic beverage bottle label comprising the shape of an axe lying on its side with the head of the axe pointed upwards. On the left, which is the bottom portion of the axe handle, the wording "BLENDED MALT SCOTCH WHISKY INSPIRED BY THE" appears in capital letters and a stylized font in two rows above the name "Rt. Hon. W.E. Gladstone", which name appears in a highly stylized font. Towards the mid-upper portion of the axe handle, the quote "NOT A DROP OF MY BLOOD IS NOT SCOTTISH" appears in four lines above the name "W.E. GLADSTONE", all of which is in the same stylized font. To the right appears the numbers "1868", "1880", "1886" and "1892" in four lines separated by horizontal bars followed by the wording "FOUR TIMES PRIME MINISTER" in two lines. Below the quote and list of numbers appears the quoted wording "TRIED - TRUSTED - TRUE" in larger letters and a stylized font. On the head of the axe, below the upper curve of the bit of the axe, the word "THE" appears above the wording "GLADSTONE AXE", all of which are in the same stylized font. Towards the left by the heel of the bit, appear the letters "W", "E" and "G" in a highly stylized font superimposed upon one another with the arms of the letter "W" creating the outermost border and the letter "E" at the center. The outer curve and the bar of the letter "G" intersect the inner strokes of the letter "W". Color Claimed  Color is not claimed as a feature of the mark. Disclaimer  "BLENDED MALT SCOTCH WHISKY"
