incorporate electronic apparatus consisting of microprocessors and a display screen for detecting, storing, and reporting human physiological parameters for nonmedical use; apparatus for information processing, namely, computers; apparatus for the processing of digital information, namely, computer systems consisting of computer hardware and downloadable computer software for remote monitoring and analysis of human biometric data, blood properties, respiratory events, monitoring heart rate and concentrations in fluids; apparatus for the transmission of data; artificial intelligence apparatus, namely, computers and wearable computers in the nature of armbands and smart watches featuring embedded artificial intelligence operating software; connecting devices for data transfer, namely, computers; Data feeders in the nature of computer systems consisting of computer hardware and downloadable computer software linked with artificial intelligence for remote monitoring and analysis of human biometric data, blood properties, respiratory events, monitoring heart rate and concentrations in fluids for nonmedical use; downloadable computer software for remote monitoring and analysis of human biometric data, blood properties, respiratory events, monitoring heart rate and concentrations in fluids; electric sensors; electrical apparatus for recording data; electronic data processing apparatus; interfaces for detectors; interface units for electrical apparatus; downloadable electronic laboratory data for processing apparatus; integral components of electronic control apparatus, namely, precision sensors for detecting, collection and analysis of detecting and gathering human biometric data, blood properties, respiratory events, monitoring heart rate and concentrations in fluids being parts of electronic control apparatus for computers and wearable computers in the nature of armbands and smart watches used in controlling and diagnosing medical conditions; programmable electronic systems consisting of computer hardware, downloadable computer software for remote monitoring and analysis of human biometric data, blood properties, respiratory events, monitoring heart rate and concentrations in fluids, and wearable computers in the nature of armbands that incorporate electronic apparatus consisting of microprocessors and a display screen for detecting, storing, and reporting human physiological parameters; downloadable application software in the field of biotechnology, pharmaceutical studies, oncology, medical and cardiovascular treatment and diagnostics, clinical studies and pharmacogenetics, analyzing, viewing and interpreting medical and pharmaceutical data and generating clinical reports; apparatus for displaying information, namely, LCD monitors and wearable computers in the nature of armbands that incorporate electronic apparatus consisting of microprocessors and a display screen for detecting, storing, and reporting human physiological parameters; electrical interfaces for computers and wearable computers in the nature of armbands that incorporate electronic apparatus consisting of microprocessors and a display screen for detecting, storing, and reporting human physiological parameters not for medical use; display apparatus, electrical or electronic, namely, LCD monitors and wearable computers in the nature of armbands that incorporate electronic apparatus consisting of microprocessors and a display screen for detecting, storing, and reporting human physiological parameters not for medical use; recordable computer programs for the analysis of data processing procedures; recordable data processing software; research laboratory analyzer instruments for measuring, testing and analyzing blood and other bodily fluids, not for medical purposes; scanners for entering data into computers; watches that communicate data to smartphones being wearable computers in the nature of armbands that incorporate electronic apparatus consisting of microprocessors and a display screen
for detecting, storing, and reporting human physiological parameters not for medical use; scientific apparatus for use in non-
medical diagnostic applications in the nature of consisting of computer hardware, downloadable computer software for remote
monitoring and analysis of human biometric data, blood properties, respiratory events, monitoring heart rate and
concentrations in fluids, and wearable computers in the nature of armbands that incorporate electronic apparatus consisting of
microprocessors and a display screen for detecting, storing, and reporting human physiological parameters not for medical use
