information and being displayed; electronic control and management systems consisting primarily of computer hardware and
recorded computer software for land and air vehicles, in particular flight management systems and flight monitoring apparatus; electronic map display systems consisting primarily of computer hardware and recorded computer software for land and air vehicles for graphically displaying the position of the vehicle; electronic recording systems consisting primarily of computer hardware and recorded computer software for land and air vehicles for recording vehicle data and mission data; electronic subsystems for the aforesaid systems, namely, sensor-assisted electronic subsystems consisting primarily of computer hardware and recorded computer software for controlling sensor, computer, database, display, recording and bus systems; sensor-assisted radar systems, in particular electro-optical and LADAR-assisted radar systems consisting primarily of hardware and recorded computer software for air and land vehicles for recording environmental data, in particular topographical altitude data, distance data and obstacle data, in the air and on the ground; ground-based electric and electronic flight control stations comprised primarily of recorded and downloadable application-specific computer software for mission preparation, mission execution and mission follow-up for manned and unmanned aircraft and computer hardware and communications apparatus for mission preparation, mission execution and mission follow-up for manned and unmanned aircraft; radar apparatus and radar systems consisting thereof; speed detectors; location detectors, namely, electronic, optical and radar location detectors for determining the azimuth, distance and elevation of an object; motion detectors; high-frequency apparatus, namely, high-frequency antennae, high-frequency transmitters, high-frequency receivers and high-frequency transceivers; transmitters of electronic signals; satellite antennae; signal generators; recorded computer software for planning and managing requests with regard to intelligence gathering; computer hardware and recorded computer software for the surveillance and monitoring of military forces and military and non-military services and agencies; radio transmitters and receivers; on-board electronic systems consisting of electronic equipment for satellites and space vehicles, in particular avionics modules in the nature of navigation and positioning systems and service modules for operational control and communications; ground systems consisting primarily of computer hardware and recorded computer software for operating and controlling satellites; radioelectric transceivers and radios; blank optical data carriers; telecommunications transmitters; electric wires, fiber-optic cables; blank digital electronic storage media; encoding and decoding apparatus, digital sound and image data transmitters, namely, radio transmitters; satellite transmitters and receivers, power converters and transponders; portable computers; portable telecommunications apparatus and equipment, namely, radio communication transmitters; computer servers; blank data storage devices, namely, disc drives; computer workstations comprised primarily of computer hardware; computer modems; computer hardware and recorded computer software for determining the position, observation and monitoring of specific geographical locations; storage media, namely, recorded computer software for use in data and user computer terminals for geo-position determination, navigation, for retrieving navigation databases, for integrating radar and satellite navigation, and for radio navigation; computer hardware and recorded computer software for transmission of data on digital telecommunications networks; electrical communications hardware in the nature of routers and recorded operating computer software for providing telecommunications and radio networks through wire, cable, optical fiber, radio and satellite; recorded computer software programs for secure communications and for facilitating the authentication, examination, recording and analysis of business relations and transactions using a system of controlled access rights and notifications, equipment and stations consisting thereof for satellite telecommunications, in particular in aircraft; recorded computer software programs for communications and radio communications networks for the transmission of data through wire, cable, optical fiber, radio and satellite; recorded computer software programs for encryption and decryption; recorded computer software for warfare simulation, model creation, testing and experimentation; computer servers for modelling, simulating, testing and experiments relating to civil and military operations; recorded computer software for planning, capturing, processing and
disseminating intelligence information and data, solely in the fields of secret service information and geography, for defense and security purposes; recorded computer software programs for providing access to an electronic messaging service; recorded transmission security software for intranet data terminals and Internet data terminals, operating stations and terminals for presenting information in graphic and text form; recorded computer software for synchronizing secure data between a remote data station or a remote device and a fixed or remote data station; recorded computer software for examining and identifying space segments in two and three dimensions; industrial geoproduction systems consisting primarily of computer hardware and recorded computer software used in a digital process chain for generating satellite, aerial and terrestrial images and 3D data; recorded computer software for capturing and generating satellite image data; recorded computer software for processing and analyzing photographs, namely, aerial photographs and satellite photographs; recorded computer software for stereographic projections, digital terrain models, orthophotos and thematic maps; recorded database management computer software for stereographic reproduction, storing, preparing, processing and analyzing drawings, depictions, photographs, maps, aerial and satellite images and surface models; apparatus consisting primarily of computer hardware and recorded computer software for processing, analysis, reproduction and storage with the aid of images generated by satellites; computers and recorded computer software for industrial purposes, namely, for managing fire service and governmental operational systems, client management, installation management systems, geographical information systems, computer-aided design (CAD) systems, real-time display systems and mobile systems, and the configuration thereof, for use with suitable computer hardware; recorded database management software, in particular for stereographic reproduction, for storing, creating, processing and analyzing drawings, images, photographs, graphic representations, aerial and satellite images and surface models; recorded computer files and recorded computer software for stereographic reproduction and for storing, creating, processing and analyzing surface models, images and photographs; satellite navigation apparatus and systems consisting primarily thereof, namely, a global positioning system (GPS); satellites; satellites for scientific purposes, in particular satellites for terrestrial observation and radar satellites; aerial imaging sensors; downloadable and recorded computer software in the nature of databases containing digital topographical models; recorded computer software packages, namely, computer software suites for processing and evaluating photographs, namely, aerial and satellite images; recorded computer software sold as a unit in packages for stereographic reproduction, for creating digital terrain models, for orthophotos and for thematic maps; recorded computer files and recorded computer software packages, namely, computer software suites containing geographical, geological, cartographic and topographical content; recorded computer software files and recorded computer software sold as a unit in packages containing terrain representations and digital maps; satellite communications apparatus and instruments, namely, radio transmitters; computer servers as terminals for satellite communications; communications apparatus and instruments, namely, radio transceivers; computer servers as terminals for satellite communications; telephone apparatus; data processing and transmission apparatus and instruments in the nature of magnetic encoders and decoders; computer terminals and keyboards; communications and transmission apparatus, instruments and systems consisting primarily of computer hardware, peripheral devices and recorded computer software for providing and managing news, information about weather, sporting events broadcast by other information applications, including the Internet; systems consisting primarily of computer hardware and recorded computer software for communications and transmission apparatus and instruments for facilitating real-time communications between users and providers via the Internet; downloadable computer software in the nature of business information system (BIS) software for facilitating and for operating business systems via the Internet and the world wide web; recorded computer software for simulating and analyzing satellite communications systems; recorded computer software
programs for operating and managing satellite communications systems; apparatus and instruments for broadcasting, transmitting, receiving, processing, duplicating, encoding and decoding digital and satellite signals, namely, antennae, satellite dishes, signal transmitters, exciters, signal receivers, analog filters, digital filters, transceivers, encoders, decoders, transcoders, routers, hubs, switches, satellite uplinks, satellite downlinks and satellite earth stations; electronic apparatus, namely, electronic radar apparatus, computer hardware and recorded computer software for target recognition, target identification and target tracking, and for fire control and ballistic correction; electro-optical surveillance and observation systems consisting primarily of cameras and observation software therefor, in particular evaluation and display software for use on land, on water, in the air and in space; periscopes and periscope systems for use in air, water and land vehicles, namely, periscope systems comprised primarily of periscope masts, periscopic viewing optics, cameras, video cameras, infrared cameras, short wave infrared cameras, high definition video cameras, range finders, operator control and viewing stations, periscopic viewing optics, antenna mounts and combat system interface modules; optoelectronic mast systems consisting primarily of optoelectronic periscopic viewers, periscope masts, cameras, night-vision cameras, video cameras, night vision video cameras, range finders, operator control and viewing stations, antenna mounts and combat system interface modules; submarine periscopes; optoelectronic mast systems for submarines consisting primarily of computer control consoles, and recorded operating software required therefor, in particular image processing software; optical apparatus in the nature of computerized electromechanical stabilizers for stabilizing the line of sight direction of an optical device based on regulating signals from mechanical, optical and fiber-optic gyroscopes, accelerometers and based on image evaluation algorithms; periscopes with direction-stabilized line of sight for use on land, on water and in the air; gyroscopically and inertially stabilized and scene-based stabilized commander's periscopes and electro-optical observation, monitoring and targeting devices and systems consisting thereof, and electric driver vision devices, driver assistance devices, situational awareness devices and systems composed thereof for armored vehicles; optoelectronic sensors for air defense systems featuring TV assemblies, thermal imaging apparatus, laser range finding apparatus and laser target illuminators in the nature of laser designators; laser rangefinders; laser altimeters for use in space; stabilized platforms in the nature of computer hardware and software for electronically stabilizing electro-optical surveillance cameras, vision equipment, electronic sensors, electro-optical sensors and optical sensors in manned and unmanned air vehicles, land vehicles and water vehicles; missile warning sensors for use on water, on land and in the air; gyroscopically stabilized commander's submarine periscopes with integrated thermal imaging apparatus; submarine periscopes and optoelectronic mast systems with integrated laser range finders, laser target illuminators and integrated thermal imaging apparatus and integrated line of sight direction stabilization, namely, stabilization with an integrated image processing platform and high-level algorithms, namely, image fusion and tracking algorithms; sensors for position regulation and orbit control, in particular for satellites, optical instruments for terrestrial observation and for observing other natural and technical objects in space, star and solar sensors; rendezvous and docking sensors for aerospace; multispectral imaging apparatus in the nature of multispectral cameras; inertial and gyro sensors; apparatus for recording, transmitting, processing and reproducing sound, images, namely, video cameras and recorded software therefor for controlling, recording, transmission, evaluation and processing of images and data of video cameras; blank machine-readable data carriers; microwave switches; DC converters; laser transmitters and receivers; electronic amplifiers; power amplifiers; satellite transmitters and receivers for analog and digital signals; data processors, computers, and the peripheral devices therefor, memory disc drives, optical scanners, computer screens and installations consisting primarily of data processors and computers; computer keyboards and electronic printers; recorded computer programs for providing real-time, multimedia, multi-sensor and multi-user communications via computer networks; computer hardware and recorded computer software for
satellite sensor data fusion, including databases and the object world for military applications; computer hardware and recorded computer software for operating augmented reality and virtual reality applications, namely, presentation media, monitors, tablets and smartglasses; computer hardware and recorded computer software for displaying maps and geographical positions; electronic signal jammers, namely, radar jammers; direction finding and position finding computer apparatus for ships, land vehicles, aircraft, helicopters and drones; electronic sensors for the detection of electromagnetic, ultraviolet and infrared radiation, and self-defense systems composed primarily thereof and computer hardware and recorded software, for ships, land vehicles, aircraft and helicopters; electronic apparatus for guided and directional infrared counter measures (DIRCM), namely, protective systems consisting primarily of computer hardware enabling vehicles, in particular aircraft, for defending against guided missiles equipped with IR seeker heads; IR lasers and lasers for defending against missile attacks; Identification Friend and Foe (IFF) receivers and transponders on airborne platforms; IFF query apparatus, namely, directional antennas and radar systems for transponder query, in particular for the identification of aircraft, and, secondary radar systems consisting thereof on ships and land-based platforms; antennae, transmitters and receivers for wide-band data transmission; computer hardware and recorded computer software for military mission planning and evaluation for airborne platforms; computer hardware and recorded computer software for capturing maintenance and diagnostic data from airborne platforms; binoculars; spyglasses; telescopes; photographic filters; photovoltaic cells; global positioning system (GPS) apparatus; directional compasses; corrective optical lenses; lasers not for medical purposes, close-up lenses not for medical purposes; surveyors' levels; optical lenses; optical instruments containing eyepieces, namely, rifle sighting scopes, periscopes, microscopes, binoculars and telescopes; periscopes; optical prisms; transmitters of electronic signals, namely, radio transmitters; stands for photographic apparatus and cameras; telescopes; optical rifle scopes; electro-optical rifle scopes; electronic and optical spyholes in the nature of magnifying lenses for doors and magnifying peepholes for doors; helmet target tracking systems and helmet display systems being optical and electronic apparatus and instruments for use in air, land and water vehicles, namely, helmet-mounted heads-up displays (HUDs) electronic displays for military use military and general aviation aircraft for providing vehicle crew members with target tracking information; landing control apparatus for helicopters; laser target illumination systems, namely, lasers for marking targets for combat aircraft; electromagnetic sensor platforms for military air vehicles equipped with electronic, electro-optical, optical and radar sensors for providing military situational awareness; laser rangefinders for ranging targets; apparatus for electromagnetic target marking in the nature of targeting pods; uncooled modules being night vision attachments, namely, uncooled electro-optical night vision viewing modules integrally including software and map position display; recorded computer software for encryption; electronic encryption units in the nature of computer hardware and downloadable computer software for use in the encryption and decryption of digital files, including audio, video, text, binary, still images, graphics and multimedia files; electronic encryption units

**MARK INFORMATION**

**Standard Character Claim** No

**Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S)

**Description of the Mark**
The mark consists of an outline of a house, as viewed from the front, and to the left of the phrase "NEST IN PLACE." The left side of the house roof resembles a twig, having an appendage extending upwards and slightly right from a point just left of the apex of the roof at the center. This appendage mimics a chimney. The line comprising the left side of the roof also extends past the apex of the roof slightly. Both the lines comprising the left and right side of the roof extend diagonally down past the lines comprising the left and right walls of the house, respectively. Disconnected leaves are located at both terminal ends of the left roof line, the lower end having three leaves and the upper end having two. An arch is formed by the bottom line of the house, forming a doorway. The top left point of the doorway-arch is drawn as a right angle. This same archway shape represents a letter "N". Within the phrase "NEST IN PLACE", the word "IN" is drawn slightly smaller than, and appears to float between, the words "NEST" and "PLACE".
