CASE IDENTIFIERS
Serial Number 88349271 Application Filing Date Mar. 20, 2019 Registration Number 6563283
Registration Date Nov. 16, 2021 Register Principal Mark Type Trademark Publication Date Dec. 31, 2019
Notice of Allowance Date Feb. 25, 2020

MARK INFORMATION
Standard Character Claim No Mark Drawing Type 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/LETTER(S) Description of the Mark The mark consists of illustration of a stylized house with chimney, eyes, eyebrows and and a mouth with smiling sharp teeth exposed. Two hands are coming out of the left and right side of the house; in the hands are two illustrations of ice cream cones. The ice cream cone in the left hand has a skull with a row of five teeth, on top of a scoop of melting ice cream with eyes and a mouth showing upper and lower teeth. The ice cream cone in the right hand has a brain sitting on top of a scoop of melting ice cream with two eye sockets, with one eye-ball dangling out of the socket, and an open mouth displaying a tongue and lower teeth. Behind both the ice cream cones is an illustration of plants. Above the house is the literal element "HOUSE OF" in all caps with horizontal bars across each letter, and below the house is the literal element "FLAVOURS" in all caps with horizontal bars across each letter, and each letter appears to be melting at the bottom. Color Claimed Color is not claimed as a feature of the mark.

Standard Character Claim No Mark Drawing Type 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) Description of the Mark The mark consists of the letter string "L3HARRIS" and the design of a geodesic polyhedron located to the left of the letter string. Color Claimed Color is not claimed as a feature of the mark.

RELATED PROPERTIES INFORMATION
Claimed Ownership of US Registrations 1211342, 1408873, 2735001 and others

GOODS AND SERVICES INFORMATION
For Logistics management advice and consultation in the field of telecommunications; Business consultation and assistance in the operation of telecommunication systems and networks for others; Business consultation and assistance in the field of telecommunications network management, namely, the operation and administration of telecommunication networks and communication links for others
International Classes 35 - Primary Classes US Classes 100, 101, 102 International Class Title Advertising and Business First Use Jun. 29, 2019 In Commerce Jun. 29, 2019
For Technical consultation in the field of building construction of fixed site earth-based facilities; Technical consultation and assistance in the field of construction, repair and maintenance of submarines and ships; Technical consultation concerning the installation, repair and maintenance of mobile and fixed site earth-based facilities, satellites and related information systems, namely, information security, communications, microwave products and telemetry and instrumentation; Technical consultation and assistance in the field of deployment of computer hardware equipment and systems; IT and communication infrastructure upgrade services, namely, updating of computer hardware for IT and communication systems; Telecommunications system maintenance services, namely, maintenance of radio, television and digital communications equipment for others
International Classes 37 - Primary Classes US Classes 100, 103, 106 International Class Title Construction and Repair First Use Jun. 29, 2019 In Commerce Jun. 29, 2019
computer hardware; cockpit voice and flight data recorders; flight parameter data recorders and transmitters; semiconductors; radio frequency switches; radar detectors; flight testers, namely, computer hardware and downloadable software for performing flight simulation; wired and wireless telephones and telephone equipment, namely, telephonic transmitters, telecommunication network hubs, connectors, receivers and other telephonic communications devices, equipment, products, and components, namely, telephonic network interface hardware, telephonic security control hardware, telephonic multimedia control hardware, telephonic switching, routing, and subscriber interface hardware which are used in computer and communications networks and systems; downloadable computer software for use in satellite command and control and in the field of satellite communications; downloadable computer software for information mining in the field of strategic and tactical intelligence; downloadable computer telemetry and communications software for use in data collection and transmission from fielded remote equipment, namely, satellites, aircraft, missiles, moving surface-based systems, remotely configured fixed site installations and Communication and Command and Control intelligence; downloadable computer software for use in data collection and transmission in the field of medical technology, namely, x-ray machines, magnetic sensing machines, acoustic sensing machines, chemical tracing machines; downloadable computer software for use in control and operation of real-time equipment, namely, x-ray machines, magnetic sensing machines, acoustic sensing machines, chemical tracing machines, flight navigation controls, flight safety equipment, namely, voice recorders, telemetry systems on airplanes, maintenance systems on airplanes, telemetry scanners, intrusion systems, combat scoring systems and pictures, air traffic handling systems, monitors, still video, radar systems, and vehicle status and monitoring systems; downloadable computer software for system situational awareness and representation in a communication and data link control system; Channel amplifiers and frequency filters for use in telecommunications, namely, electronic devices in the nature of digital filters and analog filters for frequency filtering of telecommunications signals; computer hardware for electronic key information processing, namely, the processing of information related to electronic encryption and other security technologies; radio frequency limiters; harmonic generators; satellite transponders; transponder controllers; secure communications systems consisting of digital processors, modulators, antennas, transmitters, receivers, and encryption hardware and downloadable software for secure algorithm processing devices for use with airborne, satellite, ground and sea-based information collection, transmission and analysis; communications systems consisting of high data rate microwave communications links and computer hardware; communications systems consisting of telephonic and high data rate microwave radio components, digital processors, computer hardware, downloadable software containing algorithms for use in processing secure communications and downloadable software for the secure broadcast and/or receipt of communications and information or data; on-board satellite equipment providing subsystem capabilities, namely, electronic modules and circuit cards for digital solid-state recording, video signal processing, communications signal processing and translation; microwave devices, equipment, products and components, namely, frequency transmitters, frequency converters, frequency synthesizers, frequency modulators, frequency filters, namely, electronic devices in the nature of digital filters and analog filters for frequency filtering of electromagnetic signals, frequency power amplifiers, passive components, mechanical switches, wireless frequency monitoring system and associated electronic component implementation circuit card assemblies providing frequency determination, frequency characteristics, frequency status, and frequency control; radio navigation equipment comprised of recording transmission and receiving microwave equipment, namely, microprocessors, electronic displays, digital storage devices, radio transmitters and receivers, providing the following capabilities in the nature of navigation, vehicle command and control, vehicle indications and warning, data and telemetry recording; surveillance equipment and devices, namely, ISR (Intelligence surveillance reconnaissance) subsystems.
which use computer hardware and downloadable software to provide a sampling of the electromagnetic spectrum in prescribed frequencies to extract information content available for analysis, for use in military and civilian aircraft; electronic sensors that provide in real time the ability to collect electronic data and information, namely, sense the external electromagnetic spectrum, convert received energy into a digital representation of the energy, process electronic data and information, namely, filter the digital representation of the energy and translate it into a visual or audio representation of the information, analyze electronic data and information, namely, compare georeferenced information, detect changes, display changes for visual confirmation, store electronic data and information, namely, transfer data and information to digital storage, and disseminate electronic data and information, namely, create information based on electronic packets that can be sent on any selected transfer media to other remote locations; electronic computer hardware and downloadable software that allow for the collection, monitoring, analysis, storage, and presentation of medical images; computer network devices and equipment, namely, computer hardware that allows for the interfacing of analog or digital signals into the existing PSTN (Public Switch Telephone Network) or global Information network and create the ability to take those same signals into a mobile communications system; telephonic computer hardware that allows for creation of a wireless last mile, namely, wireless radio connections between a central source and destination, where the telephony and data system have fixed site or mobile operational capability; communications terminals in the nature of computer terminals which consist of computer hardware that provides for the creation and connection of multimedia communication signals including analog, voice, data, and video and allow signals to be connected to other communications terminals or other network nodes; Radio and television transmission systems comprising transmitters, audio and video monitors, signal mixers, audio and video signal encoders and decoders and editing equipment, namely, signal processors; transmitters and receivers for satellite communications; computer operated network systems comprising computer hardware and downloadable software for transmitting data between computers connected in a network and for managing the computers and the transmission of the data on said network; computer information systems comprising computers and downloadable software for processing data, word processing and displaying of data; avionics systems in the nature of electronic devices for use in aircraft comprising digital maps, fiber-optic data buses and wire data buses, computer memory devices, instrumentation for displaying, storing, processing, and retrieving weather, tactical, strategic and secure data, cockpit controls and data displays; phased array antennas; global positioning equipment comprising data processors and displays; air traffic control communications systems consisting of computer hardware and downloadable software for displaying transporting, transmitting, controlling, switching, routing, and receiving air traffic information; computer hardware and downloadable computer software for converting images into data, and for analyzing, displaying and printing the data in the field of two and three-dimensional image extraction, manipulation, display, and geographic registration; secure computer operated systems consisting of computer hardware and downloadable computer software, and encrypted databases, all used for ensuring and controlling the security and access of a computer network and the information contained therein, namely, tracking air traffic and transmitting encrypted messages to pilots, data base management, file transfer, and for connecting computers and data bases in a network and for circulation management; airline management system comprising computers and downloadable software for database management and for exchanging aircraft and aircraft operations information; Television signal analysis equipment, namely, electronic display panels for displaying signals, signal evaluation terminals primarily comprised of customized signal analysis hardware with integrated displays and downloadable software analysis components running on industry standard computers and monitors for evaluating the quality of analog and digital signals, media analysis servers for verifying the quality of digital media content, signal interface modules, handheld signal analyzers, optical signal analyzers, circuit testers for monitoring broadcast signals, and video monitoring tools, namely, downloadable or recorded

13132
software based video monitoring tools, namely, downloadable computer software for monitoring and logging the loudness of media content; timing reference generators, namely, time reference signal generators for broadcast system timing signal and test signal generation; computer hardware and downloadable computer software for television production, post production and broadcast, namely, demodulators, digital signage, namely, dynamic electronic displays and networking computer servers and downloadable computer software for managing and controlling dynamic electronic displays, distribution amplifiers, audio and video editing equipment, namely, computer workstations equipped with downloadable computer software for editing audio and video program material; computer hardware and downloadable computer software sold as a unit for generating characters and graphics; downloadable computer software for generating visual effects, computer hardware and downloadable computer software sold as a unit for generating and inserting on-air branding; emergency alert modules, namely, computerized electronic modules and associated downloadable computer software for implementing the broadcasting of public emergency alert messages; fiber optic signal transports, namely, fiber optic signal transmitters, fiber optic signal receivers, fiber optic signal multiplexers and fiber optic signal de-multiplexers; electronic master control switches for audio and video signals; audio and video signal compressors and audio and video signal decompressors; multiplexers and de-multiplexers; multiviewers in the nature of electronic devices for displaying one or more video signals; downloadable broadcast computer network monitoring and control application software, electronic network control panels, audio, video and data receivers and decoders, electronic routing switchers for audio and video signals; video servers; video computer networking switches; Network Time Protocol (NTP) timing modules comprised primarily of computer hardware and downloadable computer software for carrying out network time protocol timing, signal timing clocks, signal transport modules, audio and video sync and timing managers primarily comprised of high precision clock generation circuitry for synchronization of audio with video, broadcast signal legalizers, downloadable computer software for creating and displaying timecode markers, signal frequency up converters, signal frequency down converters, signal format cross converters, all for use in the media and entertainment industry; downloadable broadcast operations software for advertising, sales, traffic and billing, automation, digital asset management, programming and rights management, namely, downloadable computer software for managing, monitoring and automating the buying, selling, scheduling, research, inventory management, production tracking and accounting processes for advertising, and general content for the media and entertainment industry; downloadable computer software for controlling and monitoring switching systems for television and radio signals; downloadable computer software for managing, monitoring and automating the creation, movement, location, archiving, retrieval and use of digital media assets; downloadable computer software, namely, business process management and messaging software, for managing and controlling human and automated workflows and multisystem communications for use in the media and entertainment industry; network management center equipment, namely, mobile and portable radios, electrical base station controllers, electrical communication controllers and electrical network controllers; mobile and nonmobile two-way communications radios; portable two-way communications radios; radio network gateways comprising computers, computer switches and associated downloadable computer software for voice and data communications; Internet protocol-based networks comprising computer hardware and downloadable computer software for interoperable communications; telecommunications equipment, namely, trunked radio communication systems for public and industrial applications comprised of portable communications radios, electrical base station controllers, electrical communication controllers and circuit switches; control equipment for two-way mobile and two-way fixed radios, namely, base station equipment for fixed and mobile networking and communications and cell sites primarily comprised of electronic computer hardware, downloadable computer software, antennae, and telecommunication base stations; control
stations primarily comprised of radios, radio hardware and associated downloadable computer software for controlling operation of communications radios; desktop control stations primarily comprised of radios, radio hardware and associated downloadable computer software, dispatch and console computer hardware, namely, dispatch consoles and downloadable software for carrying out emergency and nonemergency communications and carrying out command and control of public safety personnel and assets; site management computer hardware and downloadable software for managing communications radios and base stations, and network monitoring computer hardware and downloadable software for monitoring communications radios and base stations; radio data communications systems primarily comprised of mobile communications radios and also containing non-mobile communications radios, portable communications radios, base station controllers, communication controllers, and network controllers; communications radio network gateways comprised primarily of computers, computer switches and downloadable computer software for providing a gateway between networks; space deployable reflectors in the nature of electromagnetic signal reflectors for satellite communications; computers and downloadable computer software for converting elevation data point clouds from remote sensing devices into data, and for analyzing, displaying and printing the data in the field of three-dimensional feature extraction, manipulation, display, and geographic registration; computers and downloadable computer software for managing, cataloging and retrieving geospatial imagery, imagery derived products and other intelligence products, through the synchronization of data catalogs across disparate storage locations; computers and downloadable computer software for managing, processing, exploiting and disseminating motion imagery intelligence; computers and downloadable computer software for managing, processing, exploiting and disseminating flight planning presentations to general aviation pilots and air traffic controllers; networking communications radios; shipboard communication terminals primarily comprised of antennae, pedestals, positioners, modems, up converters, down converters, amplifiers and user interfaces, namely, user interfaces consisting primarily of computer hardware and electronic screen displays; ground communication terminals primarily comprised of antennae, pedestals, antenna positioners, modems, up converters, down converters, amplifiers and user interfaces, namely, user interfaces consisting primarily of computer hardware and electronic screen displays; computer information systems comprised mainly of computers and downloadable computer software for processing data, word processing and displaying of data in the fields of census information systems, healthcare information systems, intelligent electrical power distribution systems, weather reporting and forecasting systems and environmental reporting and forecasting systems; avionics equipment, namely, video signal compressor and decompressors, power supplies, mounting racks specially adapted for mounting and interconnecting electronic apparatus, airborne signal processors for network interoperability and targeting, secure network switches, downloadable computer software in the nature of networking protocols for facilitating the exchange of electronic messages and data; radio frequency data links for weapons; wireless data links, namely, very high frequency and ultrahigh frequency wireless data links; phased array electronics, namely, beam former electronics primarily consisting of power amplifiers and also containing low noise amplifiers, phase shifters, time delay units, transmit and receive switches, array dividers, array combiners, frequency up-converters, frequency down-converters, array controllers and array power supplies and control equipment, namely, antenna control units, attitude and heading reference units, transmit and receive control units, antenna position controllers and frequency band select switches; air traffic control communications systems consisting of computer hardware and downloadable computer software for displaying, transmitting, controlling, switching, routing, and receiving weather data; two-way radios for communication of voice, data, images and video for use by military and other government agencies; two-way communications radios, namely, voice and data communications radios operable across multiple frequency bands for enabling public safety officials and first responders such as law enforcement agencies, paramedics, firefighters and military personnel to
communicate interoperably with one another even though their respective pre-existing communications infrastructures might otherwise be mutually incompatible; trunked radio communication systems for public service and industrial applications, namely, cellular base stations and mobile radio base stations for two-way mobile and fixed communications radios; loudspeakers for mobile two-way communications radios; loudspeakers for non-mobile two-way communications radios; battery chargers for two-way communications radios; Internet protocol-based communication networks comprised primarily of computer hardware and downloadable computer software for implementing interoperable communications; cryptographic modules, namely, electronic modules in the nature of integrated circuits with embedded firmware for data encryption purposes; integrated circuits, namely, encryption engines; radio frequency wireless communications adapters, namely, network interface cards; downloadable software for operating radio frequency wireless network interface cards; downloadable communications software for connecting radio frequency wireless network interface cards to a local area communications network; radio network gateways comprised primarily of computers, computer switches and downloadable computer software in the field of voice and data communications; downloadable computer software for use in the field of air traffic control, namely, for the supervision, maintenance, administration, troubleshooting and configuration of downloadable computer software for monitoring the performance of air traffic control systems, mapping definition, uploading software updates and releases, access control, user definition, circuit assignment, hardware editing, recovery and diagnostic reporting

**International Classes**

**9 - Primary Classes** US Classes 21, 23, 26, 36, 38

**International Class Title** Electrical and Scientific Apparatus

**First Use** Jun. 29, 2019

**In Commerce** Jun. 29, 2019

For Technical consultation in the field of satellite communications and communications by related communication information systems, namely, communications via satellite transmission, microwave products and telemetry and instrumentation; Consultation and technical assistance in the fields of secure telecommunications and telemetric communication

**International Classes** 38 - Primary Classes US Classes 100, 101, 104
