focusing on forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory,
process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence
technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research,
researching energy production, new energy technologies, engine technology and energy in transportation, controlling factors
related to the operating reliability and service life of various products, finding material solutions for difficult operating
conditions, promoting and developing of environmentally friendly products and production methods, as well as developing
models for exploiting new technologies for the management of goods and information flows and telecommunication systems and networks for others; scientific research and analysis in the field of mobile communications technology, information system applications, telecommunications and network technologies, safety and reliability research, sensor technology, environmental issues focusing on forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory, process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research, researching energy production, new energy technologies, engine technology and energy in transportation, controlling factors related to the operating reliability and service life of various products, finding material solutions for difficult operating conditions, promoting and developing of environmentally friendly products and production methods, as well as developing models for exploiting new technologies for the management of goods and information flows and telecommunication systems and networks for others; computer aided scientific research services; scientific research relating to the computerised automation of industrial processes; research in the field of artificial intelligence; advisory services relating to scientific research; provision of information relating to scientific research; preparation of reports relating to scientific research; industrial design services; provision of information relating to industrial design; professional consultancy relating to industrial design; provision of information relating to industrial engineering; technological planning services in the field of mobile communications technology, information system applications, telecommunications and network technologies, safety and reliability research, sensor technology, forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory systems, process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research, energy production research, new energy technologies, engine technology and energy in transportation; technological consultancy services relating to manufacture of goods; engineering consultancy relating to the manufacture of goods; technological consulting services, namely, industrial analysis services in the field of mobile communications technology, information system applications, telecommunications and network technologies, safety and reliability research, sensor technology, forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory systems, process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research, energy production research, new energy technologies, engine technology and energy in transportation; computer aided engineering services, namely, industrial analysis services in the field of mobile communications technology, information system applications, telecommunications and network technologies, safety and reliability research, sensor technology, forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory systems, process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research, energy production research, new energy technologies, engine technology and energy in transportation; providing information about industrial engineering analysis and research services; software as a service (SAAS) services featuring software for use in database management and process simulation; platform as a service (PAAS) services featuring computer software platforms for use in database management and process simulation; platform as a service (PAAS) featuring computer software platforms for transmission of images, audio-visual content, video content and messages; software as a service (SAAS) services featuring software using artificial intelligence for use in machine learning, facial and speech recognition and process simulation; providing on-line non-downloadable software using artificial intelligence for use in machine learning, facial and
speech recognition and process simulation; technical data analysis services in the field of bacteriology, chemistry, cosmetics, metrology; technical advisory services relating to computer programs for data processing; data mining; computerised electronic data storage; development of computer software systems for the processing of data; designing of data processing computer programs; development of software and hardware for industrial processes; services for monitoring industrial processes, namely, inspections of manufactured goods for quality control purposes; conducting industrial tests in the nature of quality control for others; quality control for others in the nature of conducting of quality control tests; consultancy relating to quality control of goods and services; quality control testing services for industrial machinery; materials testing and analysing; testing of materials; material testing for fault detection; technical material testing; technical evaluation and testing of materials; laboratory material testing; component testing, namely, product testing; product quality testing; scientific testing services in the field of artificial intelligence; testing, authentication and quality control of pharmaceuticals and medicine for others; testing, analysis and evaluation of the goods of others to determine conformity with certification standards; microbiological testing for others in the nature of testing new products in the field of microbiology; testing of chemicals; testing of cosmetics; inspection of cosmetics; testing of pharmaceuticals; biotechnology testing for others in the nature of testing new products in the field of biotechnology; environmental testing and inspection services; hosting on-line web facilities for others for sharing on-line content; maintenance of websites and hosting on-line web facilities for others; technical support, namely, providing computer facilities for the electronic storage of digital data; genetic scientific research in the field of genetics; research and development services in the field of gene expression systems; laboratory research in the field of gene expression; genetic engineering services; scientific research in the field of genetics and genetic engineering; scientific research relating to genetics; genetic testing for scientific research purposes; genetic engineering services relating to plants; scientific research relating to genetics of plants; biochemical engineering services; biochemical research and development; biochemical research and analysis; biochemistry research services; biochemistry research consultancy; advisory services relating to scientific research in the field of biochemistry; providing information relating to scientific research in the fields of biochemistry and biotechnology; providing information on the subject of scientific research in the field of biochemistry and biotechnology; scientific research laboratory services relating to the isolation and cultivation of human tissues and cells; technological engineering design services; new product design and development; biotechnology design services relating to the creation of elementary cells; DNA screening for scientific research purposes; testing of raw materials; quality control of raw materials; chemical research; research and development of new products; research laboratories, namely, laboratory research in the field of bacteriology, chemistry, cosmetics; chemical laboratories; medical laboratories; preparation of biological samples for testing and analysis in research laboratories; research and testing services in the fields of bacteriology and virology; research and development in the pharmaceutical and biotechnology fields; research and development services in the field of chemistry; research and development of new products and new technology for others in the field of genomics, biotechnology; research and development in the field of microorganisms and cells; stem cell research services; scientific laboratory services and scientific research; scientific research for medical purposes; scientific research; biotechnological research relating to the agricultural and horticultural industry; technical consultancy in relation to research services relating to foods and dietary supplements; cell separation scientific research services; scientific research relating to cultivation in horticulture; scientific research relating to molecular sciences; scientific research in measurement technology; scientific research in the field of materials science; scientific research relating to waste analysis; biotechnological research relating to agriculture; medical and pharmacological research services; scientific research relating to cosmetics; scientific research relating to plant breeding; biotechnological
research relating to enzymatic synthesis; biomedical research services; scientific research relating to biology; biological research and analysis; providing temporary use of non-downloadable software applications accessible via a web site for use in database management; design and development of new products; development of new technology for others in the field of genomics, biotechnology; biological development services in the nature of biological research and analysis; architectural design and urban planning services; town planning consultancy services; town planning advisory services; research on building construction or city planning; research in the field of energy; consultancy relating to technological services in the field of power and energy supply; technological consultation services in the field of mobile communications technology, information system applications, telecommunications and network technologies, safety and reliability research, sensor technology, environmental issues, namely, forest chemicals, printing processes, mineral refinement, developing and researching biomolecules, cell factory systems, process technology, building technology, food design, microbiology, chemistry, genetics, metrology, artificial intelligence technology, quantum technology, health technology, robotics, microelectronics, printed electronics, hydrogen research, researching energy production, new energy technologies, engine technology and energy in transportation; water quality control services; water analysis; monitoring of water quality; engineering services in the field of environmental assessment; engineering services in the field of environmental technology; design of controlled environmental buildings; environmental assessment and planning consultancy services; consultancy services relating to environmental planning; providing temporary use of on-line non-downloadable software for database management; civil engineering planning services; engineering services relating to automatic data processing; technical design and planning of telecommunications networks; road surveying; civil engineering, namely, design of road networks; vehicle design services; infrastructure as a service (IIAS) services, namely, hosting servers for use by others; computer software development, programming and implementation; software engineering services; rental of computer software; creating and maintaining websites for mobile phones, for others; providing information, consultancy, and advisory services in the field of information technology (IT); cloud computing featuring software for use in database management and process simulation; computer software design; computer system design; hosting of digital content on the Internet in the nature of computerized data, files, applications and information; design and development of route planning software
